Non-Motorized Trail Restrictions

1. Bicycle and livestock restrictions
2. Bicycle restrictions
3. Livestock restrictions
4. Dog restrictions

All bicycle and stock restrictions are implemented through special orders per 36 CFR 261.55 and the official orders are posted on the website: INSERT WEBSITE HERE?

Travel Management on this Map

This map shows, in general, the travel opportunities on Forest Service lands. For detailed information you must consult the current Motor Vehicle Use Map (MVUM). The existence of roads on this map DOES NOT imply the road is open to the public, but that it exists. On Forest Service lands, consult the MVUM; on state and other federal lands, consult the appropriate agency; on private lands check with the land owner before using.

The road symbology on unpaved roads indicates the type of road and on Forest Service lands may indicate its use. Roads with a yellow band — are the primary access roads. These roads are normally suitable for passenger cars, and are the better ways to access the forest. Composition unspecified roads are symbolized as — and are normally suitable for passenger vehicles. The unimproved dirt roads are symbolized as - - - - . These roads are not suitable for passenger cars and the road color indicates its use. A green road — is one that is open year round with no restrictions; a light purple or orange band — indicates roads that have been identified on the MVUM as "Trails Open to All Vehicles" or "Roads With Seasonal Designations" (please see the MVUM for details).

Inclement weather such as snow or rain, and spring meltwater may make any of the non-paved roads impassable for passenger vehicles, including four-wheel drive vehicles. Travel all roads with caution.

CHECK YOUR MOTOR VEHICLE USE MAP!

The Motor Vehicle Use Map (MVUM) is a companion map to the one you are holding. While this visitor map displays motor vehicle opportunities, it may not be current. Please refer to the current year MVUM as well. Motorized travel off designated roads and trails is prohibited. MVUM maps are available for free at all Custer Gallatin National Forest offices.

Forest visitors are allowed to park adjacent to designated motorized road and trails where it is safe to do so and where parking does not damage natural and cultural resources, and is not prohibited by posted signs.

Custer Gallatin
National Forest
Beartooth Ranger District

Forest Visitor Map

Montana

Welcome to the Beartooth Ranger District of the Custer - Gallatin National Forest

The Beartooth District was its own National Forest until 1932, when it was combined with other Districts to the east to form the Custer National Forest. The 587,000-acre Beartooth District is in Southcentral Montana and has some of the most spectacular high country of any National Forest. The District is part of the Greater Yellowstone area and boasts diverse wildlife and plant species.

The highest peaks in Montana, including 12,799 foot Granite Peak, and hundreds of lakes are in the District's Beartooth Mountains, which are part of the 945,000 acre Absaroka-Beartooth Wilderness Area. The Beartooth Mountains get their name from a spire Crow Tribe referred to as Na Pet Say, or "The Bear's Tooth."

The District includes a portion of the Pryor Mountains south of Billings. The Pryor Mountains are rich in heritage resources and are culturally-important to the Crow Tribe. The dry, rocky habitats of the Pryors are dominated by sundrenched limestone canyons and outcrops, and include portions of the Pryor Mountain Wild Horse Range.

The Beartooth District provides a variety of services for a wide range of public needs on a long-term basis. It is managed to provide quality fish and wildlife habitat, livestock grazing, mineral resources, and diverse recreational opportunities.

The Beartooth District is a popular destination for hiking, fishing, backpacking, horse packing, OH use, and camping. There are numerous campgrounds and picnic areas and hundreds of miles of trails. Cold winters provide additional recreational opportunities on the District, including Red Lodge Mountain Ski Resort, cross-country skiing, snowshoeing, and snowmobiling. The Ranger District Office is located in picturesque and historic Red Lodge, Montana.

Come visit your National Forest and experience some of the most picturesque country in America.

MARY ERICKSON — *December 1, 2019*
FOREST SUPERVISOR — *DATE*

Absaroka - Beartooth Wilderness

The 943,377-acre Absaroka-Beartooth Wilderness has over 20 peaks greater than 12,000 feet elevation (including Granite Peak, Montana's highest at 12,799 feet), and about 950 alpine lakes, many with fish. The Absaroka-Beartooth Wilderness is preserved for recreational use, clean air, water quality, wildlife habitat and spiritual and historic characteristics. For additional rules and regulations, please contact the Beartooth Ranger District.
