

**National Interagency Coordination Center
Incident Management Situation Report
Friday, August 10, 2018 – 0530 MT
National Preparedness Level 5**

National Fire Activity

Initial Attack Activity:	Light (80 fires)
New large incidents:	9
Large fires contained:	17
Uncontained large fires:**	51
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	14
Type 2 IMTs committed:	16

Nationally, there are 50 large fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

[Link](#) to Geographic Area daily reports.

One hundred thirty-eight fireline management personnel from Australia and New Zealand are assigned to support large fires in the California and Northwest Areas.

Two MAFFS C-130 airtankers and support personnel from the 152nd Airlift Wing (Nevada Air National Guard), one from the 146th Airlift Wing (California Air National Guard) and one from the 302nd Airlift Wing (Colorado Springs, Air Force Reserve) have been deployed to McClellan Airfield, CA in support of wildland fire operations.

One RC-26 aircraft with Distributed Real-Time Infrared (DRTI) capability and support personnel from the 141st Air Refueling Wing (Washington Air National Guard) has been deployed to Spokane, WA in support of wildland fire operations in the West.

Northwest Area (PL 5)

New fires:	15
New large incidents:	1
Uncontained large fires:	14
Type 1 IMTs committed:	7
Type 2 IMTs committed:	3

Cougar Creek, Okanogan/Wenatchee NF. IMT 1 (Young). IMT is also managing the Bannock Lakes incident. Twelve miles northwest of Ardenvoir, WA. Timber, medium logging slash and closed timber litter. Active fire behavior with uphill runs and backing. Numerous structures and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

* **Bannock Lakes**, Okanogan/Wenatchee NF. Fourteen miles southwest of Stehekin, WA. Timber and brush. Minimal fire behavior. Trail closures in effect.

Crescent Mountain, Okanogan/Wenatchee NF. IMT 1 (Dueitt). Eighteen miles west of Winthrop, WA. Timber. Moderate fire behavior with torching, flanking and running. Numerous residences threatened. Road, area and trail closures in effect.

Miriam, Okanogan/Wenatchee NF. IMT 2 (Knerr). Fifteen miles east of Packwood, WA. Timber and brush. Active fire behavior with short crown runs, group torching and flanking. Numerous structures threatened. Evacuations, road, area and trail closures in effect.

Miles, Umpqua NF. Unified Command between IMT 1 (Turman) and ODF IMT 1 (Hessel). IMT is also managing the Snow Shoe, Columbus and Round Top incidents. Five miles northeast of Trail, OR. Timber. Active fire behavior with running, spotting and short crown runs. Numerous residence and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Snow Shoe, Umpqua NF. Six miles northwest of Trail, OR. Timber. Moderate fire behavior with creeping and smoldering.

Columbus, Umpqua NF. Fifteen miles east of Tiller, OR. Timber. Active fire behavior with running, short-range spotting and short crown runs. Road and trail closures in effect.

Round Top, Rogue River-Siskiyou NF. Eight miles northeast of Prospect, OR. Timber. Moderate fire behavior.

Taylor Creek, Medford District, BLM. IMT 1 (Schulte). IMT is also managing the Klondike incident. Ten miles west of Grants Pass, OR. Timber and brush. Moderate fire behavior with uphill runs, isolated torching and short-range spotting. Numerous structures and communication infrastructure threatened. Road, area and trail closures in effect.

Klondike, Rogue River-Siskiyou NF. IMT 1 (Kurth) mobilizing. Nine miles northwest of Selma, OR. Timber and chaparral. Moderate fire behavior with uphill runs, backing and isolated torching. Numerous residences threatened. Evacuations, road, area and trail closures in effect.

Natchez, Rogue River-Siskiyou NF. IMT 1 (Goicoechea). Fifteen miles southeast of Cave Junction, OR. Timber and chaparral. Active fire behavior with backing, flanking and torching. Structures threatened. Evacuations, road, area and trail closures in effect.

Maple, Olympic NF. IMT 2 (Lawson). Ten miles north of Hoodspport, WA. Timber. Active fire behavior with uphill runs, group torching and flanking. Structures and communication infrastructure threatened. Road, area and trail closures in effect.

Angel Springs, Northeast Region, Washington DNR. IMT 2 (Goldman). Eight miles northeast of Davenport, WA. Timber, brush and tall grass. Minimal fire behavior. Numerous residences threatened. Reduction in acreage due to more accurate mapping.

Hendrix, Rogue River-Siskiyou NF. Nine miles southwest of Ashland, OR. Timber and medium logging slash. Minimal fire behavior. Residences threatened. Road, area and trail closures in effect.

Long Hollow 0806 RN, Prineville District, BLM. Started on private land five miles south of Dufur, OR. Brush and grass. No new information.

Silver Lake, Northeast Region, Washington DNR. Five miles west of Cheney, WA. Timber, light logging slash and short grass. Minimal fire behavior.

Sheep Creek, Northeast Region, Washington DNR. Four miles northwest of Northport, WA. Timber. Moderate fire behavior with creeping, single tree torching and smoldering. Numerous structures and communication infrastructure threatened.

Coal Hollow, Manti-Lasal NF. IMT 2 (Roide). IMT1 (Pechota) mobilizing. IMT is also managing the Hill Top incident. Eleven miles northeast of Price, UT. Timber and brush. Extreme fire behavior with uphill runs, flanking and backing. Numerous residences and energy infrastructure threatened. Evacuations, road, area and trail closures in effect.

Hill Top, Central Area, Utah DOF. Fifteen miles north of Mount Pleasant, UT. Timber, brush and grass. Minimal fire behavior. Residences threatened. Road and area closures in effect. Evacuations have been lifted.

Rabbit Foot, Salmon-Challis NF. Transfer of command from IMT 2 (Rohrer) to IMT1 (DeMasters) will occur tomorrow. Fourteen miles southwest of Salmon, ID. Timber. Active fire behavior with running, crowning and short-range spotting. Numerous structures, communication infrastructure and sage-grouse habitat threatened. Road, area and trail closures in effect.

Dollar Ridge, Northeast Area, Utah DOF. Thirty-six miles southeast of Heber City, UT. Timber and hardwood litter. Active fire behavior. Road, area and trail closures in effect.

Mesa, Payette NF. IMT 2 (Thompson). Four miles south of Council, ID. Timber, brush and tall grass. Active fire behavior with uphill runs, group torching and spotting. Numerous structures and sage-grouse habitat threatened. Road, area and trail closures in effect.

Sharps, Eastern Idaho Area, Idaho Department of Lands. IMT 1 (Lund). Six miles east of Bellevue, ID. Timber, brush and tall grass. Moderate fire behavior with creeping, smoldering and single-tree torching. Sage-grouse habitat threatened. Road, area and trail closures in effect.

Bear Trap, Unintah and Ouray Agency, BIA. Previously reported incident. Forty-four miles southeast of Price UT. Timber. Active fire behavior with uphill runs, creeping and backing. Last narrative report unless significant activity occurs.

Goose Creek, Elko District, BLM. Thirty-three miles southeast of Jackpot, NV. Timber. Minimal fire behavior. Sage-grouse habitat threatened.

Chin Creek, Ely District Office, BLM. Sixty miles northeast of Ely, NV. Timber, brush and short grass. Minimal fire behavior. Sage-grouse habitat threatened.

Hansel Point, Bear River Area, Utah DOF. Ten miles northwest of Tremonton, UT. Brush and short grass. Active fire behavior with group torching, torching and creeping. Structures and communication infrastructure threatened.

Lodgepole, Boise NF. Sixteen miles northeast of Garden Valley, ID. Timber, brush and tall grass. Minimal fire behavior. Last report unless significant activity occurs.

* **Pole Canyon**, Fishlake NF. Ten miles northeast of Loa, UT. Timber and brush. Active fire behavior with creeping and running. Road, area and trail closures in effect. Last narrative report unless significant activity occurs.

***Stina**, Kaibab NF. Eighteen miles northwest of North Rim, AZ. Timber. Active fire behavior with torching, flanking and spotting.

***Cat**, Kaibab NF. Eleven miles north of North Rim, AZ. Timber. Active fire behavior with uphill runs, torching and spotting. Road, area and trail closures are in effect.

Mariposa, Cibola NF. Previously reported incident. Thirty miles northeast of Grants, NM. Timber. Minimal fire behavior. Reduction in acreage due to more accurate mapping.

Deer, Coconino NF. Previously reported incident. Ten miles northeast of Pine, AZ. Timber. Minimal fire behavior. Last narrative report unless significant activity occurs.

Ranch, Apache-Sitgreaves NF. Previously reported incident. Twenty-five miles south of Winslow, AZ. Brush and short grass. Moderate fire behavior with isolated torching. Last narrative report unless significant activity occurs.

Obi, Grand Canyon National Park, NPS. Previously reported incident. Four miles southeast of North Rim, AZ. Timber and short grass. Moderate fire behavior with flanking, backing and isolated torching. Last narrative report unless significant activity occurs.

Predictive Services Discussion: The strong high pressure ridge will begin to weaken as a compact area of low pressure begins to move toward the coasts of Oregon and Washington. Pressure gradients along the West Coast from northern California to British Columbia will tighten, creating breezy conditions along the Cascade crest in the afternoon. Isolated storms will be possible during the afternoon period as the associated cold front begins its approach. Inland, the thermal trough will remain very strong but will begin to migrate east to the eastern edge of the Great Basin and over Montana. The southwestern monsoon will be reinvigorated by tropical moisture from a departing storm off the coast of Mexico. Expect an increase in the scattered, wet convection across Arizona and New Mexico. Southern California and the Sierra could see a storm or two. A trough of low pressure over the East will promote cooler than average temperatures. A stalled cold front will focus convective development over the Deep South and northern Texas.

<http://www.predictiveservices.nifc.gov/outlooks/outlooks.htm>

This Day in History is a brief summary of a powerful learning opportunity and is not intended to second guess or be judgmental of decisions and actions. Put yourself in the following situation as if you do not know what the outcome will be. What are the conditions? What are you thinking? What are YOU doing?

Helicopter Longline Accident

Incident Summary: August

10th 2004, firefighters arrive to suppress two lightning fires nearby each other on the Wenatchee National Forest. The area is heavily wooded and mountainous. That evening the firefighters request supplies be flown into a drop zone they have established in a creek bed. The firefighters estimate the trees in the drainage to be an average of 80 feet tall with some 120 foot tall trees near the drop zone. A 150 foot longline is requested. The next morning, a Bell 205 A1 helicopter is dispatched with a tandem sling load to deliver to the firefighters, one net for each fire.

A pink flagging "X" is placed near the stream on a sand bar at the southern end of a cut bank overlooking the sand bar. There is a tall snag located on the cut bank. The helicopters approach is from the SW perpendicular to the drainage and the snag is on the helicopters right side. One of the firefighters establishes communications with the pilot and says that if he doesn't like the drop zone they chose that it is okay to choose his own spot. The pilot acknowledges the firefighter and indicates that he will give it a try. The pilot is not told about the snag. The pilot places both nets on the drop zone; one of the firefighters unhooks their net and re-hooks the load for the other crew. The helicopter begins to lift to depart. Near the top of the snag, the pilot (sitting left seat) slowly turns the nose to the left. The tail of the helicopter strikes the snag causing the helicopter to spin, and impacts the ground just upstream of the drop zone. The pilot is killed.

Size up - The snag was cut down and measured at 169'5" tall. Adding the height of the cut bank to the height of the snag, the tree was 172'11" above the drop zone surface. The longline was measured and was 160 feet long. The strike marks were found 15'4" down from the top of the snag.

- ◆ **When you and your crew are sizing up a potential cargo drop zone, what are some methods to estimate tree and obstacle height?**

L - A pilots' ability to see their surroundings is fairly limited, especially when looking down at an external load. The ability of the ground personnel to see the helicopter in relation to the surrounding hazards can often be better. When a helicopter pilot is working with an external load, consider yourself and your crew to be a "Lookout" for that pilot just as you would other members of your crew. Watch the main rotor and tail rotor, not just the load. When any hazard encroaches on the safety circle (zone) communicate it immediately. Never assume that the pilot sees it or that someone else will say something. IF YOU SEE SOMETHING...SAY SOMETHING.

- ◆ **In addition to trees and snags, as a lookout for a helicopter, what other hazards will you be looking out for?**

C - You and your crew must be able to communicate with the pilot by radio. Before the helicopter arrives at your site, brief the pilot on hazards including trees and their estimated height. It is generally considered better to over-estimate the height than to under-estimate it.

- ◆ **When communicating to a pilot, how do you refer to the direction of a hazard in reference to the helicopter? (IRPG cover)**

E - Helicopters delivering external loads via longline will be flying in the Height-Velocity Curve (aka "dead man's curve", [page 11-1 IHOG](#)) which diminishes the pilot's ability to land safely or recover from a loss of control or power.

- ◆ **Consider the pilots and your crews' escape routes if the helicopter were to lose control or power. Where will it go? Where will you go?**

S - Consider the safety zone and a safety circle to be very similar places. It needs to be big enough for the helicopter to operate without hazards and is considered to be a minimum of 1 ½ times the rotor diameter. The rotor diameter of this helicopter was 48 feet. The snag was 36 feet from the drop zone marker.

Refer to page 49 in your IRPG for safety circle sizes. How big should the safety circle (zone) be for a Type III? Type II? Type I?
