COCONINO NF (AZ-COF) FLAGSTAFF DISPATCH (FDC)

2020 RESOURCE BRIEFING GUIDE UPDATED 09/03/2020

!!PLEASE RETURN TO FDC!!

THIS PAGE INTENTIONALLY LIEFT BLANK

The Coconino National Forest is comprised of roughly 1.8million acres and is divided into three ranger districts. It is one of the most diverse national forests in the country with landscapes ranging from the famous Red Rocks of Sedona to ponderosa pine forests, to alpine tundra. The Coconino National Forest experiences anywhere from 250-400 plus fires a year. Many are human caused but the majority occurs during the Monsoon season due to lightning in late July through early September. Some are very small and some have the potential to grow very large like the Schultz Fire of 2010.

The Flagstaff District contains the North and Central parts of the forest and is a predominately ponderosa pine and pinon juniper forest with grass and oak understories. Elevations here can range from 5,000 to 12,000+ ft. This district includes Mt. Humphreys, the highest peak in Arizona located in the scenic Kachina Wilderness.

The Mogollon Rim District (pronounced mug-ee-yun) is the Southeast part of the forest. This rim is the most southern limit of the Colorado Plateau. On top of the Mogollon Rim elevations can easily reach 9-10,000 feet and vegetation is predominately ponderosa pine forests with oak and brush understories. This district includes everything on top of the rim and transitions to the Apache-Sitgreaves National Forest to the east and the Tonto National Forest "off" the rim to the south.

The Red Rock District is the Southwest portion of the forest. This district has ponderosa pine, juniper, brush, desert scrub, and seasonal grasses. The southern portion of the district is in the Verde Valley where temperatures can easily rise to 100 degrees and above in the summer. Most notable are the Red Rock formations and steep, inaccessible canyons surrounding the town of Sedona as well as many wilderness areas that attract sight seers on foot, in vehicle, and in the air.

FOREST REPEATER MAP

Coconino National Forest Repeater Locations

GENERAL GUIDELINES

- ❖ The FDC call sign is "Flagstaff"
- ❖ Compose your thoughts before transmitting & keep message short
- ❖ Be professional and use clear text (no 10 code)
- Don't use abusive language or swear on the radio
- Use call signs if assigned (see Radio Call List)
- ❖ To place a call: call the person you are calling followed by who is calling
 - "Jones Walther or Captain 4-61 Flagstaff
- ❖ To answer a call: identify yourself followed by who called you
 - "Walther Jones or Flagstaff Captain 4-61"
- ❖ Personnel without call sign's should be identified by last name
- ❖ If more than one person in zone with same last name, use first & last name
- ❖ IF YOU GO IN SERVICE, FDC WILL TRACK YOU UNTIL YOU GO OUT OF SERVICE
- ❖ ALWAYS USE A REPEATER CHANNEL AND IDENTIFY WHAT REPEATER YOU ARE USING

RADIO OPERATING PROCEDURES

The primary purpose of having radio operating procedures is to reduce frequency congestion, and provide a rapid means of positive communication – Numerous radios are on the same net therefore strict net discipline and procedures are necessary to facilitate emergency traffic

The two most important parts of net discipline are:

- Short Clear messages
- Radio Professionalism

Messages should not exceed 30 seconds. If they do, break your transmission after 30 seconds with the word "*BREAK*" – Allowing for 5-10 seconds before resuming your transmission will allow any emergency traffic to access the net – Speak normally (do not yell) and hold the microphone about 1" to 1/2" from your mouth – Say numbers and letters slowly and clearly.

Professional and Courteous radio procedures are to be followed in all radio broadcasts. Short concise messages and "clear text" will be used when communicating on any assigned radio frequency – "*Flagstaff*" is the official radio designator for the Flagstaff Dispatch Center (FDC) and will be used exclusively to identify the center on all assigned radio frequencies – The FCC call sign of KOC437 must be broadcast at the start and close of business by FDC to identify the broadcast license – Ranger Districts and Work Centers should also broadcast their FCC designations periodically.

GENERAL RADIO USE

***When operating radios throughout the Coconino National Forest always use a repeater channel and state which repeater you are using

Ex: "Flagstaff Engine 481 on Saddle Mountain" or "Flagstaff 6-5-8 on Squaw"

***Wait for Flagstaff Dispatch to acknowledge the Resource before continuing with radio traffic...

This allows the listener to reply immediately, without searching or possibly tying up another repeater – Familiarize yourself with repeater location (see repeater map) relative to unit calling location to determine which tower is likely to be receiving/transmitting the strongest signal – If you are unfamiliar with the general coverage of the repeaters on the Coconino National Forest you can try the following:

Key up each individual repeater and see if the "Squelch/Tail" is short and quiet or long and loud — The shorter/quieter tail should be the most powerful repeater to use — Please remember that if you are going to use this method ensure that you are not going to interfere with other emergency traffic -

Individuals using the radio, who do not have a call sign, should identify themselves by their last name – If there is more than one individual with the same last name on the unit, first and last name should be used:

"Flagstaff, Smith" or "Flagstaff, John Smith".

Visiting resources are required to "check-in" with FDC to establish communications for incident response – These units will use the radio call sign assigned on the home unit – If there is known to be more than one unit with the same call sign on the Coconino National Forest, a unit identifier along with the radio call sign should be used:

"Flagstaff, Tonto Patrol 8-4"
"Flagstaff, Flathead Engine 6-4-2"

The "4" precedes the call signs for <u>all</u> Coconino Forest <u>FIRE</u> resources

"Engine 4-81 - Engine Four Eight One"

With interagency operations and multi-channel radio capabilities within the units, each person should become familiar with cooperating agency's radio systems

When transmitting through tone-activated repeaters, wait one or two seconds after pressing the transmission button before speaking – This allows time for the repeater transmitter to be turned on by a tone signal, and the scan feature on the radio to stop on that channel – If you don't wait, you won't be heard

Call the unit you wish to speak to then identify who is calling; i.e.

"Flagstaff, E 4-74 on Hutch"

<u>Be concise!</u> Listen before transmitting to avoid cutting in on another conversation – When calling in on routine traffic, give the complete transmission all at one time – For example:

"Flagstaff, Engine 4-73 is back at station"

FDC can then acknowledge with the time and call sign

"Engine 4-73, Flagstaff copies back at station at 1658"

Remember to be CLEAR, CONCISE, COMPLETE, AND PROFESSIONAL when using the radio

Don't play with the radio by keying the transmitter, or playing music over the air

Units working on a fire are to use Tactical (TAC) frequencies

Flight Following and Air Guard are monitored in dispatch. These frequencies are used for aircraft Flight Following, and emergency aircraft contact only

Air to Ground is assigned to the Coconino NF and is to be used by ground units when communicating with aircraft

If you have any radio question please contact

Flagstaff Dispatch 928-527-3552

IN SERVICE

Resource "In-Service" will be conducted on a daily basis – This will allow for each resource to make a verbal connection with FDC – This information (for fire resources) will be relayed in the morning staffing read after the morning weather – The Duty Officer will also call in district resource staffing prior to 0900

"Flagstaff Engine 4-82" - "E 4-82, Flagstaff:" - "E 4-82 in svc with 5"

"E 4-82, Flagstaff copies in service with 5 at 1001"

If Flagstaff does not respond, continue to attempt contact until positive contact can be established – A minimum of 15-20 seconds should be allowed for FDC to respond as there may be radio traffic that cannot be heard by field units and may have covered your transmission

Units returning to station will do as follows:

"Flagstaff, Engine 4-73 returning to station"

Once a unit has arrived at station they need to call dispatch to identify that they are back at station

"Flagstaff, Engine 4-73 back at station"

Units going in service over the radio will be tracked from the time of in-service to the time they call out of service

LOOKOUTS – IN-SERVICE

Lookouts going in service should do so with;

- Wind Direction
- Wind Speed
- ➤ 24hr Precipitation

"Flagstaff, Elden is in service, winds are North at 15 mph with gusts to 25, .75 inches of precip"

It is not necessary for Lookouts to provide temperature, visibility, etc. when going in service with Flagstaff

When lookouts are "off-duty", there is no need for them to go in and out of service every time they leave the tower

FIRE WEATHER/STAFFING

Starting in the spring, FDC will begin to read the morning weather and daily staffing levels for the Forest. Afternoon weather will also be read once the National Weather Service makes it available (usually in late April/May). When this information is read it is imperative that all radio traffic that is non-emergency traffic must cease. An announcement will be made before each weather reading. The schedule will be as follows:

Morning WX – Daily Staffing – Approx. 0900 every morning

"All Stations Flagstaff, standby for you morning fire weather forecast and daily staffing"

Afternoon Weather – Approx. 1500 (depending on the updated info from the NWS)

"All stations Flagstaff, standby for your afternoon fire weather forecast and daily indices"

INITIAL ATTACK DISPATCH

Emergency dispatch procedures will take precedence over all other routine radio traffic.

Transmit the following information listed below:

- 1. Resources
- 2. Incident #
- 3. Legal
- 4. General Location
- 5. Time

Example of an Initial Dispatch:

- 1. Receive Report of emergency, open Incident in WILDCAD and record accordingly
- 2. Determine location and jurisdiction
- 3. Transmit the following information on Forest Fire frequencies:

"Engine 4-81, Engine 4-84, D-5 Fuels, WT4-8-1 Flagstaff respond to Incident #1 at T19, R10, S22 (SW/SW) near Mormon Mtn, at 1009"

4. All units will check back with dispatch and if not, dispatch will continue to call the unit until contact has been made

"Flagstaff, Engine 4-81 copies and en route/responding, etc..."

5. Flagstaff will ensure all resource responding have checked back with dispatch and have all available/required information

ON-SCENE

Units arriving on-scene of an incident being managed by Flagstaff Dispatch will transmit the following information

- Unit on-scene identification (resource name / incident #)
- ➤ Size Up
 - o IC
 - o Fire Name
 - o Size
 - Fire Behavior/ROS/Fuels
- **Resource Needs**
- **Best Access ex...flagged in pink, junction of Forest roads xxx and yyy...**
- **Communications**
- **➤** Latitude/Longitude

"Flagstaff E 4-84 North Repeat on East Pocket" – "E 4-84 Flagstaff" – "E 4-84 is on-scene Incident #4 / IC will be Kolb and we will call this the Mooney fire - we have approx. 2/10ths of an acre with a Moderate ROS, burning in grass and timber, BREAK" – "Flagstaff I would like to request an additional T-3 Engine and a Water Tender / best access will be Forest Road (FR) 231 to FR535 and the fire will be flagged in orange / incoming resources can contact the IC on TAC 3, BREAK" – "Additionally I have a Lat/Long of 34 22 54.8 x 111 32 44.1"

"Copy E 4-84, on scene Incident #4 / Mooney is a good name, IC will be Kolb / operations will be on TAC 3 / you have approx. 2/10^{ths} of an acre burning in grass and timber with a Moderate ROS, BREAK" – "Flagstaff copies your Lat/Long of 34 22 54.8 x 111 32 44.1 and best access is FR231 to FR535 / flagged in orange and you are requesting an additional T-3 Engine and Water Tender"

***<u>IC may request Containment/Confinement/Monitor at any point of the fire</u> – FDC will contact the Duty Officer and place the request with them – FDC will then advise the IC if request has been approved

"Mooney IC Flagstaff" – "Flagstaff Mooney IC" – "Request for containment approved per Battalion 4-8-2"

***Non-Fire resources – if you come across a fire please do not take action unless you are appropriately qualified –Please advise FDC as soon as possible – FDC will advise the appropriate Duty Officer and send fire resources to your location

Items to keep in mind:

- Law Enforcement needs other than Fire Investigator
- Keep the area clear of civilian traffic
- Advise FDC of best access (i.e. road numbers, general location, lat/long)
- General info about the situation (size and fire behavior)

Ensure to request a Fire Investigator if the fire is believed to be human caused and protect the origin if possible

FINALS

Flagstaff Dispatch will be notified by IC with any "Final" information – That information will include the following

- > Contain/Control Time
- > Size
- **Cause Human or Lightning**
- **Complexity**
- > Fuel Model
- > Lat/Long of Origin

"Flagstaff Mooney IC" – "Mooney IC Flagstaff" – "Flagstaff, the Mooney fire was controlled at 18:45 at ½ acre / Human caused / Complexity 5 / Fuel Model (9 or Ponderosa Pine) all resources have been released and are returning station"

OUT OF SERVICE

Flagstaff Dispatch will track each unit back to station and Out of Service

Units that return from the field to station and are going out of service immediately shall state with 1 radio call i.e.

"Flagstaff, Patrol 4-8-2 at station, out of service."

Out of service, prior to the end of the regular business day:

"Flagstaff Patrol 4-8-2 is out of service"

Units who go in service over the radio and fail to go back at station will receive a "status check" over the radio – If FDC is unable to reach any unit for status checking, a phone call will be made to the individual, duty officer or supervisor to ensure that they are back at station and out of service or not yet returned from the field

"6-5-2-3 Flagstaff status check" – "Flagstaff 6-5-2-3, I am approximately 25 minutes out from station" – "Copy 6-5-2-3 25 minutes out from station 17:45"

FDC will go "out-of-service" daily to inform the field of when the office is not staffed

"All Stations Flagstaff is out of service at 1705, KOC437"

Units that intend to remain on duty beyond the normal business hours should notify FDC at the earliest knowledge of extended staffing - preferably by the Duty Officer or supervisor.

CHANNELS

Flagstaff Dispatch operates primarily using Command, Flight Following, Victor (Air to Air), Air Guard and Air to Ground frequencies as listed below:

Channel 1: Coconino North Direct – Flagstaff RD

Frequency: 171.425 RX/TX

Channel 2: Coconino North Repeat

Frequency: **RX 171.425 TX 164.075**

Channel 3: Coconino South Direct – Mogollon Rim RD – Red Rock RD

Frequency: **172.300 RX/TX**

Channel 4: Coconino South Repeat

Frequency: **RX 172.300 TX 164.875**

 Victor:
 Frequency:
 135.6500

 (FDC Only)
 Alt Freq.:
 126.9000

Used among pilots in aircraft to communicate from one aircraft to another.

Air Guard: Frequency: 168.625 RX/TX

Used only to communicate with aircraft in the event of emergency

Air-to-Ground: Frequency: Primary - 166.9625 Rx/Tx (A/G32)

Secondary – 168.6625 Rx/Tx (A/G 56) Tertiary - 168.7250 Rx/Tx (A/G 57)

Used by aircraft to communicate with ground. Ground personnel are asked to use caution and good judgment in using this frequency when communicating with

aircraft. Keep in mind that aircraft, when flying, are monitoring and

communicating on many frequencies, as well as maneuvering aircraft through

airspace.

Tactical: Frequency: 168.775 RX/TX (TAC 3)

168.675 RX/TX (TAC 2) 167.550 RX/TX (TAC 1)

Used forest wide for all districts – if using another tactical, contact dispatch to

notify which other tactical channel is in use.

VMED: Frequency:

(Statewide) Primary 155.340 RX/TX Tone 156.7 (VMED 28)

Secondary 155.3475 RX/TX Tone 156.7 (VMED 29)

Used to communicate with Medical/Life Flight helicopters

COCONINO NATIONAL FOREST – FIRE AND AVIATION MANAGEMENT STAFF

James Pettit – Fire Staff	Office: Cell:	(928) 527-3550 (928) 607-1676
Vacant – Deputy Fire Staff/FAO	Office: Cell:	(928) 527-3556
Eric Graff – Forest Aviation Officer (Detailed)	Office: Cell:	(928) 638-7413 (928) 856-0319
Vic Morfin – Fuels Specialist	Office: Cell:	(928) 527-3557 (928) 606-4708
Sean Henning – Fire/Fuels Specialist	Office:	(928) 527-3566
Jeff Walther – FDC Center Manager	Office: Cell:	(928) 527-3554 (928) 864-6036
Tony Johnson – FDC Asst. Center Mgr	Office: Cell:	(928) 527-3551 (520)260-6919
John Yurcik – Initial Attack Dispatcher	Office:	(928) 527-3552
Tera Lowe – Initial Attack Dispatcher	Office:	(928) 527-3552
Ana Campbell – Initial Attack Dispatcher	Office:	(928) 527-3552
Margaret Knight – Support Dispatcher	Office:	(928) 527-3552

After Hours Radio Use

- FDC is staffed Mon-Fri, 0700-1730 (Dec-Mar)
- FDC is staffed Sun-Sat, 0630-1830 (Apr-Nov)
- As activity increases, FDC will be staffed as long as necessary as determined by the Center Manager or Coordinator on Duty COD. The above weekdays and hours are approximate and will be determined by the current fire situation within zone, geographically and nationally.
- An "on-call" dispatcher is assigned daily to handle communications outside of normal hours.
- > If there is a communications need outside of normal hours (periods FDC is not staffed) call 928-527-3552 to reach the answering service who will contact the On-call dispatcher.

MILE MARKER INFORMATION

Highway 180

Water Sources

Hydrant and Use Protocol:

*There are hydrants available for Forest Service use throughout some of the communities in and around the forest. However, the proper channels must be followed in order to accurately record the amount of water used as this cost may be applied to an incident financial code. *Please contact Flagstaff Dispatch* as soon as you know you will need to use a hydrant for refill so we can start communications with the appropriate individuals.

Standpipes:

North to S	outh

Medical Incident Report

FOR ALL MEDICAL EMERGENCIES: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use items one through nine to communicate situation to communications/dispatch.

1.	CONTACT	COMMUNIC	ATIONS/DISPATCH	4
----	---------	----------	-----------------	---

Ex: "Communications, Div 2. INCIDENT STATUS: Pro					atening re	equest designated fr	requency be cleared for emergency traffic.))
Nature of Injury/Illnes	s						Describe the injury (Ex: Broken leg with bleeding)	
Incident Name							Geographic Name + "Medical" (Ex: Trout Meadow Medical)	
Incident Command	er						Name of IC	
Patient Care							Name of Care Provider (Ex: EMT Smith)	
3. INITIAL PATIENT ASSES			ach patient. 1	This is only a brief, in	itial assess	sment. Provide additio	onal patient info after completing this 9 Line R	Report.
Number of Patients:	Male /	Female	: MEDEVAC	Age:		Weight:		
	thing? YES		= MEDEVAC					
Mechanism of Inj What caused the in	ury: njury?		- 10120247					
Lat/Long (Datum Ex: N 40° 42.45' x W 12								
4. SEVERITY OF EMERGEN	ICY, TRANSPOR	T PRIORITY						
		SEVERITY					NSPORT PRIORITY	
Ex: Unconscious, difficulty heat stroke, disoriented.			- 3º burns m	nore than 4 palm si:	zes,	Ambulance or Mi need is IMMEDIA	EDEVAC helicopter. Evacuation TE.	
□ PRIORITY-YELLOW Serio Ex: Significant trauma, no			re than 1-2	palm sizes.		Ambulance or concepts of Evacuation may be	onsider air transport if at remote loc e DELAYED .	ation.
□ ROUTINE-GREEN Not a life threatening injunct Ex: Sprains, strains, mind		ess.				Non-Emergency. Routine of Conve	Evacuation considered enience.	
5. TRANSPORT PLAN: Air Transport: (Agency Aircra	aft Preferred)							
☐ Helispot		☐ Short-haul	/Hoist			☐ Life Flight	☐ Other	
Ground Transport:								
☐ Self-Extract		☐ Carry-Out				☐ Ambulance	☐ Other	
6. ADDITIONAL RESOURCE		EEDS:						
□ Paramedic/EMT(s)			☐ Crew(s)			ED/Backboard/C-Collar	
☐ Burn Sheet(s)				□ Oxygen		☐ Trauma Bag		
☐ Medication(s) ☐ Other (i.e. splints	s. rope rescue. wl	neeled litter)		□ IV/Fluid(s)		L Cai	rdiac Monitor/AED	
	•	•						
7. COMMUNICATIONS:					•			
Function Channel N	ame/Number	Receive (R	<i>'</i>	Tone/NAC *	Tra	ansmit (Tx)	Tone/NAC *	
Ex: Command Forest COMMAND	Rpt, Ch. 2	168.3250	'	110.9		171.4325	110.9	
AIR-TO- GRND TACTICAL								
8. EVACUATION LOCATION	<u> </u>		*(NAC	C for digital radio sy	rstem)			
Lat/Long (Datum	WGS84)							
EX: N 40 42.45' x W 1. Patient's ETA to Evacuatio								
Helispot/Extraction Size an	d Hazards:							
9. CONTINGENCY:				, , , , , , , , , , , , , , , , , , ,		0.5.		
Considerations: If primary conjunction ahead	•	at actions can be evacuation meth	•		<u>IEMBER:</u>	Act according	s of resources ordered to your level of training o Calm. Think Clearly. Act Decisively.
