### **INCIDENT OBJECTIVES (ICS 202)**

1. Incident Name: Northwood	s Rx	Operational Period:	Date From: Time From:	•	Date To: 12/12/2024 Time To: 0700	
3. Objective(s):				0100	1500 10. 0700	
Provide for Firefighter and I	Public Safety.					
2. Manage selected chaparral	lands to create	a natural mosaic of ve	getative cond	itions &/or aç	je clásšés.	
Manage vegetation to a level quality, public health and safe	el that results in ty, and reduction	healthy forest stands, of hazards.	maintenance	of wildlife ha	bitat, good scenic	
4. Natural fuel manipulation fo	or fire hazard red	uction to maximize pro	tection of for	est investme	nts and interface areas.	
Forest stand densities are r in the functioning ecosystem.	managed to impr	ove and protect forest	health and vi	gor recognizi	ing the natural role of fire	
** Refer to the Prescribed Fire	e Objectives & Pr	escription on page 5 c	fithe IAP.**			
4. Operational Period Comm	and Emphasis:	<del></del>	···			
Adhere to the 10 Standard Ord branches. There are eagle trees identified lengths to a minimum within 1/ Night Operations: It is not exp for resources to remain on see will be determined by the burn included to fill in in case person	d at the edges of 4 mile of the eag ected that there ne past the iden boss based on v	the project area, so by the trees. Refer to the will be night staffing. I tifled operational perion weather conditions and	e aware of th maps for kno lowever, the l d. The amou	eir location; t wn eagle tree Burn Boss m int and length	he goal is to keep flame e locations. ay determine the need n of additional staffing	
General Situational Awareness		·		··-·		
eneral Situational Awareness here will be a combination of aerial and hand ignition on the project. HF08 portable RAWS is on-site.						
** Please fill out and submit the in this IAP **	e cost worksheet	. All OT must be track	ed and pre-ar	oproved, QT	Authorization is included	
5. Site Safety Plan Required?	Yes∐ No⊠					
Approved Site Safety Plan	<u> </u>

		<u> </u>			

### 2024 Northwoods Prescribed Fire Objectives & Prescription

The following parameters were taken from the approved 2024 Northwoods Burn Plan:

### **Objectives:**

Fuel Type	<b>Acceptable Mortality Range</b>	Desired Target
Duff consumption	20-50%	25%
Surface fuels consumption		
(1-hr., 10-hr., 100 hr. litter)	25-75%	50%
Consumption of chapparal	30-50%	33%
Hardwood Overstory Mortality	Less than 10%	5%
Conifer Overstory Mortality	Less than 10%	5%

### Prescription:

<b>Environmental Parameter</b>	Low End	High End
Wind Speed (mid-flame) *	0	10
Wind Direction	.Any	Any
1-hr Fuel Maisture Content	13	5
10-hr Fuel Moisture Content	15	6.

<sup>\*</sup> Wind gusts are not included in the prescription and should not be accounted during calculating wind speed. Wind calculated using 10-minute averages.

### Fire Behavior:

	Fuel Mod (Moderate Load I			del - SH2 Dry Climate Shrub)
<u>Inside Burn Unit</u>	<u>High</u>	Low	<u>High</u>	Low
Flame Length (feet)	4.7	1.5	4.1	.06
Spread Rate (chains/hour)	19.3	2.0	10.0	.06
Outside Burn Unit				
Flame Length (feet)	4.7	1.5	4.1	.06
Spread Rate (chains/hour)	19.3	2.0	10.0	.06

Burn Boss will use flame length, mid-flame wind speed, and 1-hour fuel moisture to determine prescription; the highest-rated attribute will rate the prescription. If any of the three values are found to be out of prescription the unit will be considered out of prescription and necessary action(s) will need to be taken. Refer to Management Action Points (MAPs).

### 2024 Northwoods Rx Management Action Points or Limits:

If any of the following situations occur, contingency actions will take place:

- MAP 1: Fire escapes primary containment lines.
- MAP 2: Fire escapes project boundary.
- MAP 3: Fire exceeds limits of projected fire behavior.
- MAP 4: Smoke emissions or impacts exceed planned limits.
- MAP 5: Following containment of unwanted fire spread.
- MAP 6: Medical Emergency.
- MAP 7: When utilizing aviation, the helicopter crashes.
- MAP 8: When utilizing aviation, the helicopter location is unknown and/or no contact for over 15 minutes.
- MAP 9: Containment of a slop over is unsuccessful and requires additional personnel and equipment.

### MAP 1: Fire escapes primary containment lines

Management Intent:

Maintain fire within project boundary, reduce resource damage.

**Actions to Consider:** 

Direct suppression action, indirect action.

**Recommended Resources:** 

Available holding and ignition resources; contingency resources may be

utilized at any time.

Time Frame:

**Immediate** 

Responsibility:

Holding Specialist, Firing Boss, Burn Boss

### MAP 2: Fire escapes project boundary

Management Intent:

Initiate suppression action, minimize size and resources damage. Limit acres

burned as much as possible.

Actions to Consider:

Direct or indirect action based on fire behavior and Firefighter safety.

**Recommended Resources:** 

Available holding and ignition resources, contingency resources may be

utilized at any time.

Time Frame:

**Immediate** 

Responsibility:

Holding Specialist, Firing Boss, Burn Boss

### MAP 3: Fire exceeds limits of projected fire behavior

Management Intent:

Cease ignition except as where needed to aid suppression, minimize

resource damage.

Actions to Consider:

Direct suppression, indirect may be used utilizing natural barriers.

**Recommended Resources:** 

Available holding and ignition resources, contingency resources may be

utilized at any time.

Time Frame:

Immediate/under discretion of the Burn Boss

Responsibility:

**Burn Boss** 

(Continued on next page)

MAP 4: Smoke emissions or impacts exceed planned limits

Management Intent:

Decreased impacts and emission production

Actions to Consider:

Cease ignition except where necessary to maintain fire containment. Alter ignition patterns to retain emission production and impacts within planned

limits.

Recommended Resources:

Available holding and ignition resources, contingency resources may be

utilized at any time.

Time Frame:

Immediate

Responsibility:

**Burn Boss** 

### MAP 5: Following containment of unwanted fire spread

Management Intent:

Suppression action will be commensurate with the threat potential and forecasted weather. Prescribed fire operations may resume if prescribed fire

conditions/prescription are within acceptable parameters.

Actions to Consider:

Consider consultation with Firing Boss, Holding Specialist, and District Fire

Management Officer.

Recommended Resources:

Available holding and ignition resources, contingency resources may be

utilized at any time.

Time Frame:

At discretion of the Burn Boss

Responsibility:

Burn Boss

### MAP 6: Medical Emergency

Management Intent:

Implement actions outlined in the Emergency Medical Procedures

(including the MIR Protocol ICS-206 listed in Daily Documentation Appendix

H).

Actions to Consider:

Notify Burn Boss and Redding ECC, refer to ICS-206 for appropriate resources

needed.

**Recommended Resources:** 

ICT5 or identified medical provider

Time Frame:

Begin actions immediately

Responsibility:

**Burn Boss** 

### MAP 7: When utilizing aviation, the helicopter crashes

Management Intent:

Burn Boss to notify dispatch IMMEDIATELY. Dispatch will follow instructions

listed in the Interagency Aviation Mishap Response Guide Checklist

(IAMRGC). The Firing Boss shall cease all firing operations, and the Holding Specialist should assign holding resources on the incident. The Burn Boss will

have contingency resources (or identify to be) sent to the scene.

Actions to Consider:

Notify Redding ECC, secure the scene, provide patient care.

Recommended Resources:

ICT5 and medical provider

Time Frame:

As quickly as possible to travel to the scene safely

Responsibility:

Burn Boss

(Continued on next page)

MAP 8: When utilizing aviation, the helicopter location is unknown and/or no contact for over 15 minutes

Management Intent: Notify dispatch of the situation. Dispatch will follow instructions listed in the

Interagency Aviation Mishap Response Guide Checklist (JAMRGC). Dispatch may send additional aircraft to the burn for aerial reconnaissance. The Burn

Boss should cease ignitions until the situation has been resolved.

Actions to Consider:

Notify Redding ECC, give last time and location of the aircraft.

**Recommended Resources:** 

Fixed wing or rotor wing aircraft

Time Frame:

Begin actions immediately

Responsibility:

**Burn Boss** 

MAP 9: Containment of a slop over is unsuccessful and requires additional personnel and equipment

Management Intent:

The Prescribed Fire Burn Boss will contact the Forest Duty Officer and RICC and order additional resources as needed to contain the event. If project implementation is halted for 1 hour due to limitation of contingency resources and contingency actions continue to be the focus of the project (for any reason), contact the Agency Administrator of record (as discussed in

Element #2 Agency Administrator Checklist).

**Actions to Consider:** 

Direct or indirect action based on fire behavior and Firefighter safety.

**Recommended Resources:** 

Burn Boss discretion

Time Frame:

Closest available resources through RICC

Responsibility:

**Burn Boss**
