

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

MASP INSTRUCTIONS

Pages 1-11 or through map and aerial hazard analysis page (due to extended risk assessment) require total completion for submission, review, and approval signature (mission approver signature-appropriate level line officer). Subsequent pages see instructions below

Subsequent pages include: Pilot information, flight following, frequencies, MTR's / MOA's, crash rescue /medivac, and additional appendices. Complete these pages as information becomes available. Partial completion of these pages is recommended during the submission process. (Subsequent pages shall be filled out prior to mission initiation).

RISK MATRIX INSTRUCTIONS

Appropriate management level for operational risk decision will remain the same in the color-coded format. The number system on page (6) in the risk management scale is incorporated into the drop-down menu of risk assessment attached. Values of risk level are as follows:

Low-1 Medium-2

Serious-3 High-4

In no case will the overall risk of the mission be less than the highest specific factor. (Example: One high, one serious, and two medium threats couldn't result in anything less than a high).

SIGNATURE'S

Signature blocks are in order of how the MASP will move forward for review and signature. Route all MASP's through the Zone Aviation Officer or delegated acting. The tan colored fields are required to be signed for at the Line Officer level. The MASP's will be routed back down through the Zone Aviation Officer or delegated acting after signature from the Regional Aviation Officer. MASP will come back in PDF for approving official to sign in signature block and risk assessment (See tan highlighted areas).

Signing: All signature boxes up to the Zone Aviation Officer will be signed in typed text. See below.

Example: /s/ John M. Smith

Regional Aviation Safety Manager and Regional Aviation Officer will sign with a link pass digital signature. Approval of risk assessment and line officer plan approval final signature will be wet signature or link pass digital signature (line officer discretion). These areas are a tan color. The mission aviation safety plan will come back to the field in PDF format for ease of link pass signatures.

RETENTION AND FILING OF PLAN

Once the mission safety plan is approved, the plan will be maintained in the dispatch office and referenced during flight. Retention of the plan and daily briefing sheets by the forest, refuge or unit shall be one year: reference NSHO Chapter 3, Mission Aviation Safety Plans, or any other governing policies that refer to MASP retention per aircraft type.

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

<u>Mission Supervisor:</u> ANF Helicopter Manager or Flight Manager	<u>Alternate Mission Supervisor:</u> Forest Aviation Officer or Zone Aviation Officer
---	---

**** Participant's qualifications and responsibilities verified/discussed during daily briefing****

<p style="text-align: center;"><u>Mission Name</u> Apalachicola N.F Ecosystem Management (EM) Flights CY 2023</p>
<p><u>Mission Description:</u> Note: Compliance with the operational procedures outlined in the Mission Aviation Safety Plan is required.</p> <p>Ecosystem Management (EM) missions consist of reconnaissance and missions that can require flight profiles under 500' above ground level (AGL). These missions are generally accomplished using a helicopter. The use of fixed-wing aircraft to accomplish these missions are authorized if operating 500' AGL or above. The flight profiles associated with EM are used to accomplish (resource) missions such as, but not limited to wildlife management, timber management, animal tracking, storm damage assessment, and biological/hydrologic flights.</p> <p>Missions described above will be accomplished with Exclusive Use, Call-When-Needed (CWN), or agency owned aircraft (WCF). Incoming units will receive a local aviation in-briefing (airspace, frequencies, DOD areas, etc.).</p> <p><u>Mission Objectives:</u></p> <ul style="list-style-type: none">▪ Provide a safe, timely, and cost-effective alternative to ground-based operations.▪ Enhance the ability of the user to provide real-time and accurate data for outlined missions stated in the mission description.▪ Accomplish agency goals/expectations with limited resources and personnel. <p><u>Aircraft Justification for Mission:</u> Using rotor and/or fixed-wing aircraft for these operations is the most efficient means of meeting mission objectives. This method of conducting aerial resource mission(s) allows for the following:</p> <ul style="list-style-type: none">▪ Personnel Safety: Limits exposure and mitigates the need for additional personnel. Reduces the need for ground operations, particularly in remote, adverse terrain and thick, impenetrable vegetation.▪ Cost-Effectiveness: Expedites timeframes, lowers personnel requirements for conducting resource missions, and achieves agency goals while generally reducing costs.▪ Timeliness: Resource mission objectives can be determined quickly from the air, assisting managers in making real-time and critical decisions to meet agency goals.▪ Land stewardship: Enables mission objectives/goals to be met while being light on the land.

Mission Risk Assessment Matrix Scale

	Severity			
Likelihood	Negligible IV	Marginal III	Critical II	Catastrophic I
Frequent A				
Probable B			<i>Serious 3</i>	<i>High 4</i>
Occasional C				
Remote D		<i>Medium 2</i>		
Improbable E	<i>Low 1</i>			

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

Severity and Likelihood Scale Definitions			
Severity		Likelihood	
Catastrophic	Fatalities and or loss of the system.	Frequent	Likely to occur and continuously experienced.
Critical	Severe injury and or major system damage.	Probable	Will occur several times and occur often.
Marginal	Minor injury and or minor system damage.	Occasional	Likely to occur sometimes and will occur several times.
Negligible	Less than minor injury and or less than minor damage.	Remote	Unlikely to occur, but possible. Unlikely, but expected to occur.
		Improbable	So unlikely, assume it will not occur. Unlikely to occur, but possible.

Appropriate Management Level for Operational Risk Decisions		
Risk Level	Fire	Mission (non-fire)
High	Incident Commander or Operations Sections Chief	Line Officer/Manager
Serious	Incident Commander or Operations Sections Chief	Line Officer/Manager
Medium	Air Operations Branch Director	Mission Aviation Manager
Low	Base Manager	Helicopter or Flight Manager

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

SAFETY MANAGEMENT SYSTEM ASSESSMENT AND MITIGATION								
System Being Evaluated: EM Flights		Pre Mitigation			Mitigation	Post Mitigation		
Sub System(s)	Hazards	Likelihood	Severity	Risk Level		Likelihood	Severity	Risk Level
Aerial Hazards	Avoid known hazards and aerial obstacles such as bird strikes, embers, smoke, etc.	Probable	Critical	High-4	Brief personnel to be aware of known physical hazards using the Aerial Hazards Map. Perform high-level recon before commencing low-level operations. See and avoid birds and other obstacles. Use quality crew communication and implement crew resource management.	Remote	Critical	Medium-2
Capability	Aircraft capabilities/limitations are not appropriate to mission. Overloaded aircraft. Adverse wind speed and direction.	Occasional	Catastrophic	High-4	Ensure appropriate aircraft is ordered and utilized. Conduct a thorough pre-mission briefing. Complete load calculations and weight & balance. Pilot to obtain updated weather briefing and continually monitor wind speed and direction. Operate aircraft in accordance with RFM.	Remote	Catastrophic	Serious-3
Communications	Unclear on assignments or unclear briefing. Miscommunication from air to ground. Poor communication such as non-standard wording etc. Loss of communications (FM, AM, or ICS).	Occasional	Critical	Serious-3	Mission leader in performing a complete briefing. Use clear text and proper nomenclature in all communications. Utilize read-back to ensure instructions are understood. Suspend all operations until communications can be restored. Ensure AFF is working properly for resource tracking.	Remote	Critical	Medium-2
Weather	Extreme weather-thunderstorms, high winds, etc. Lack of visibility due to fog, smoke, shadows/glare, loss of daylight, etc.	Occasional	Critical	Serious-3	Obtain weather briefings. Continuously monitor conditions. Abort missions as necessary until conditions improve. Be prepared for changing conditions and identify alternative landing locations.	Remote	Critical	Medium-2

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

SAFETY MANAGEMENT SYSTEM ASSESSMENT AND MITIGATION								
System Being Evaluated: EM Flights		Pre Mitigation			Mitigation	Post Mitigation		
Sub System(s)	Hazards	Likelihood	Severity	Risk Level		Likelihood	Severity	Risk Level
Environment	Unimproved landing sites.	Probable	Critical	High-4	Identify alternate landing areas before the mission, as necessary. Perform an aerial recon of the site before landing, notify flight following personnel of landing location. Plan flight(s) for best access to alternate landing areas.	Occasional	Critical	Serious-3
	Mountainous terrain.	Probable	Critical	High-4	Ensure pilot is trained, experienced, and qualified for the mission. Aircraft appropriate for mission and carded. Conduct high recon before any low-level operations.	Occasional	Critical	Serious-3
Mission Planning	Military training routes, military operating areas, and general aviation traffic.	Occasional	Catastrophic	High-4	Consult up-to-date materials to identify routes. Ensure dispatch is appropriately using de-conflicting procedures. See and avoid general aviation traffic.	Remote	Catastrophic	Serious-3
Pilot Experience and Capabilities	Lack of pilot proficiency. Inadequate performance planning. Lack of recognition of adverse wind speed and direction. Inexperienced in low-level helicopter operations.	Occasional	Catastrophic	High-4	Ensure an understanding of mission, hazards, and mitigations. Complete recon. Ensure pilot is carded for aerial ignition. Perform adequate planning using agency policy and guides. Refer to FSAPB 16-01 Helicopter Maneuvering and Power Management.	Remote	Catastrophic	Serious-3

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

SAFETY MANAGEMENT SYSTEM ASSESSMENT AND MITIGATION								
System Being Evaluated: EM Flights		Pre Mitigation			Post Mitigation			
Sub System	Hazard	Likelihood	Severity	Risk Level	Mitigation	Likelihood	Severity	Risk Level
Human Factors	Failure to follow policy and procedures. Sense of urgency/time pressure or mission pressure. Lack of familiarity with others working on the operation.	Occasional	Critical	Serious-3	Confirm policy and procedures are identified, understood, and followed. Ensure not placing undue pressure on others. Conduct daily briefings, utilize standardized procedures, practice CRM, and limit rotation of personnel.	Remote	Critical	Medium-2
	Airsickness of passengers.	Probable	Negligible	Medium-2	Poll employees for known airsickness issues before the pre-flight briefing. Obtain location and brief on the use of sickness sack on board the aircraft. Open-air vents and ask pilot to land as soon as possible if sickness happens in flight.	Probable	Negligible	Medium-2
Final Assessment: Low-1 <input type="checkbox"/> Medium-2 <input type="checkbox"/> Serious-3 <input checked="" type="checkbox"/> High-4 <input type="checkbox"/>		Prepared By: Joshua Pierotte			11/2/2022			

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

Map Of Mission Area: Depict aerial hazards in this map if known. If map or supporting documents do not fit page format, attach as an appendix. Attach the addendum to the end of the MASP.

****See attachment Appendix 2 (Page 21) ****

Aerial Hazard Analysis:

Northeast corner of the Apalachicola Nation Forest (ANF) on the Wakulla Ranger District, side is a Class C airspace, which is Tallahassee International Airport (KTLH), in the KTLH airspace it contains 32 burn units. On the ANF we have 2 Military Operational Areas (MOA) on the Apalachicola Ranger District, Tyndall D, and E MOA for special military activity contact Gainesville Radio on 122.2 or 122.45 for activity status. There is total of 100 burn units inside Tyndall MOA. We also have 3 Military Training Route VFR (IR021, IR015, and IR019) and 1 Military Training Route IFR (V521). They are all on the East side of the Forest and located on Wakulla Ranger District. Another hazard to look out for on the Forest is transmission lines or towers. Transmission lines are across forests or near private/state land. One well-known tower is FSU Repeater (T82) 1000' AGL high-intensity white strobe & red; it is in burn unit 209. The Apalachicola National Forest has 3 Wilderness areas, 2 of which are on the Wakulla Ranger District (Bradwell Bay Wilderness and Clear Lake Wilderness Study Area) and 1 on the Apalachicola Ranger District (Mud Swamp New River wilderness).

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

Aircraft Performance Planning:

The pilot is responsible for the accurate completion of load calculations or PPC (military performance planning). Trained personnel shall ensure that aircraft scheduled are capable of performing the mission(s) safely and within the capabilities of the aircraft selected. The helicopter or flight manager shall ensure that manifests, load calculations, weight & balance are completed properly using accurate environmental and aircraft data. Reference NSHO chapter 7 or chapter 70 of the Military Use Handbook for additional information.

Personal Protective Equipment: * Always refer back to current ALSE, NSHO, and manual direction*

Type of Operation- Check applicable boxes that may apply to mission or mission	Personnel protective equipment requirements
<input checked="" type="checkbox"/> Rotor Wing Ground Operations Including UAS	Fire-resistant clothing, hard hat w/chin strap or SPH-5 flight helmet or other approved model, fire resistant and/or leather gloves, all leather boots, eye protection, hearing protection. *Refer to appropriate guides or policies for UAS PPE pending mission*
<input checked="" type="checkbox"/> Rotor Wing	Fire-resistant clothing, SPH-5 flight helmet or other approved model, hard hat w/chin strap, fire resistant and/or leather gloves, all leather boots, eye protection, hearing protection. Additional personnel restraints needed in the helicopter pending type of mission. * Refer to appropriate guides or policies. * Charter flights, (non-agency controlled mission), shall comply with 14 CFR 135 requirements.
<input checked="" type="checkbox"/> Doors Off Flight(s)	Personnel will remain seated and inside fuselage during all flights, approved secondary restraint harness for doors off flights (only for PLDO, HRAP, HRSP, Aerial Photography, IR Operator, ACETA Gunner, Cargo Letdown, Short Haul Spotter, Cargo Free Fall Operations-type 3 helicopter) * Refer to appropriate guides or policies*
<input type="checkbox"/> Cargo Free Fall Operations	Fire-resistant clothing, SPH-5 flight helmet or other approved model, fire resistant and/or leather gloves, all leather boots, eye protection, hearing protection. Additional qualifications, compliance with rotorcraft manual, and approved restraint requirement apply. * Refer to NSHO chapter eleven for additional details or other agency guides and policies. *
<input checked="" type="checkbox"/> Fixed Wing	Refer to current IASG, ALSE, and 5700 manual directions for PPE requirements.

SOUTHERN REGION-MISSION AVIATION SAFETY PLAN

<input checked="" type="checkbox"/> Doors Off or Doors Open Flight(s)	<p>Personnel will remain seated and inside fuselage during all flights, approved secondary restraint harness for doors off flights (only for PLDO, HRAP, HRSP, Aerial Photography, IR Operator, ACETA Gunner, Cargo Letdown, Short Haul Spotter, Cargo Free Fall Operations-type 3 helicopter) * Refer to appropriate guides*</p> <p>**Safety Alert IASA 18-03 language**</p> <p><i>“Agency personnel involved in any public aircraft operations mission that require aircraft doors to be removed prior to flight, or open during flight, shall receive hands-on secondary restraint refresher training prior to conducting flight operations”.</i></p>
--	---

Doors Off or Open Operations checklist: **All items shall be covered and signed for prior to operations**

- Aircraft connection point and secondary restraint configuration (Interagency Safety Alert IASA 17-02)
- Proper donning and adjustment of secondary restraint system.
- Have an understanding of the secondary restraint interaction with FAA approved seat belts.
- Potential of secondary restraint interference with Airbus AS 350 fuel shut off lever if applicable.
- Know location and use of secondary restraint interaction quick- release.
- Perform buddy-check and Pilot in Command check of secondary restraints before flight.
- Practice egress with secondary restraint quick-release mechanism and function of seatbelt.
- Know location and use of rescue knife.

Appendix 1 – Hazardous Material Manifest Form DOT-SP-9198

Date: _____ Aircraft #: _____ Bureau/Agency: _____

Common Name	Shipping Name	Hazard Class	UN #	ERG #	QTY	WT
Acetylene	Acetylene, dissolved	2.1 Flammable Gas	UN1001	116		
Aerosols	Aerosols non-flammable each not exceeding one-liter capacity	2.2 Non-Flammable Gas	UN1950	126		
Aerosols starting fluid, WD-40	Aerosols flammable each not exceeding one-liter capacity	2.1 Flammable Gas	UN1950	126		
Batteries dry	Batteries dry, containing potassium hydroxide solid electric storage	8 Corrosive	UN3028	154		
Batteries wet	Batteries wet filled with acid	8 Corrosive	UN2794	151		
Batteries wet	Batteries wet filled with alkali	8 Corrosive	UN2795	131		
Batteries wet	Batteries wet non- spillable	8 Corrosive	UN2800	154		
Bear spray, irritants	Aerosols flammable each not exceeding one-liter capacity	2.1 Flammable Gas	UN1950	126		
Biomedical waste	Infectious substances affecting humans	6.2	UN2814	158		
Cartridge	Cartridge for small arms	1.4s	UN0012	114		
Clorox, liquid bleach	Hypochlorite Solutions	8 Corrosive	UN1791	154		
Diesel	Diesel, fuel	3 Flammable	UN1993	128		
Drip torch fuel	Gasoline/ Diesel	3 Flammable	UN1203	128		
Engine, internal combustion	Engine, internal combustion, flammable gas powered or Engine, fuel cell, flammable gas powered or Machinery, internal combustion, flammable gas powered or Machinery, fuel cell, flammable gas powered	2.1	UN3529	135, A200		
Engine, internal combustion	Engine, internal combustion, flammable liquid powered or Engine, fuel cell, flammable liquid powered or Machinery, internal combustion, flammable liquid powered or Machinery, fuel cell, flammable liquid powered	3	UN3528	135, A200		
Engine, internal combustion	Engine, internal combustion or Machinery, internal combustion	9	UN3530	135, A200		
Engines internal combustion	Engine internal combustion flammable gas powered	9 Misc.	UN3166	128		
Fire extinguisher	Fire extinguisher	2.2 Non-Flammable Gas	UN1044	126		
Fireline explosives FLE	Explosive blasting type E	1.1D EXPLOSIVES	UN0241	112		
Flare shell Pistol flare	Flammable solid, inorganic, nos (Aluminum powder)	4.1 Flammable Solid	UN3178	133		
Fuel white gas	Petroleum distillates, nos, (Naphtha solvent)	3 Flammable	UN1268	128		
Fuel, aviation jet-A	Fuel aviation, turbine engine	3 Flammable	UN1863	128		
Fusee	Fusee (rail or highway)	4.1 Flammable Solid	UN1325	133
