## AGENCY ADMINISTRATOR IGNITION AUTHORIZATION

(Prescribed Fire Plan, Element 2A)

Instructions: The Agency Administrator Ignition Authorization must be completed before a prescribed fire can be implemented. If ignition of the prescribed fire is not initiated prior to expiration date determined by the agency administrator, a new authorization will be required.

Prior to signature the agency administrator should discuss the following key items with the fire management officer (FMO) or burn boss. Attach any additional instructions or discussion documentation (optional) to this document.

	y Discussion Items
Α.	Has anything changed since the Prescribed Fire Plan was approved or revalidated?
	Such as drought or other climate indicators of increased risk, insect activity, new subdivisions/structures, smoke requirements, Complexity Analysis Rating.
В.	Have compliance requirements and pre-burn considerations been completed?
	Such as preparation work, NEPA mitigation requirements, cultural, threatened and endangered species, smoke permits, state hurn permits/authorizations.
C.	Can all of the elements and conditions specified in Prescribed Fire Plan be met?
	Such as weather, scheduling, smoke management conditions, suitable prescription window, correct season, staffing and organization, safety considerations, etc.
D.	Are processes in place to ensure all internal and external notifications and media releases will be completed?
E.	Have key agency staffs been fully briefed about the implementation of this prescribed fire?
F.	Are there circumstances that could affect the successful implementation of the plan?
	Such as preparedness level restrictions, resource availability, other prescribed fire or wildfire activity
G.	Have you communicated your expectations to the Burn Boss and FMO regarding if and when you are to be notified that
	contingency actions are being taken?
Н.	Have you communicated your expectations to the Burn Boss and FMO regarding decisions to declare the prescribed fire a wildfire?
Im	plementation Recommended by:
	O or Prescribed Fire Burn Boss Signature:
	m authorizing ignition of this prescribed fire between the dates of and It is my expectation that the
-	ject will be implemented within this time frame and as discussed and documented and attached to this plan. If the conditions we
	cussed change during this time frame, it is my expectation you will brief me on the circumstances and an updated authorization will be
neg	gotiated if necessary.
Ad	ditional Instructions or Discussion Documentation attached (Optional): Yes $\Box$ No $\Box$
Ign	ition Authorized by:

## PRESCRIBED FIRE GO/NO-GO CHECKLIST

Preliminary Questions	Circle YES or	NO
<ul> <li>A. Have conditions in or adjacent to the ignition unit changed, (for example: drought conditions or fuel loadings), which were not considered in the prescription development?</li> <li>If <u>NO</u> proceed with the Go/NO-GO Checklist below, if <u>YES</u> go to item B.</li> </ul>	YES N	Ю
<ul> <li>B. Has the prescribed fire plan been reviewed and an amendment been approved; or has it been determined that no amendment is necessary?</li> <li>If <u>YES</u>, proceed with checklist below.</li> <li>If <u>NO</u>, STOP: Implementation is not allowed. An amendment is needed.</li> </ul>	YES N	Ю
GO/NO-GO Checklist	Circle YES	or NO
Have ALL permits and clearances been obtained?	YES N	О
Have ALL the required notifications been made?	YES N	О
Have ALL the pre-burn considerations and preparation work identified in the prescribed fire plan been completed or addressed and checked?	YES N	О
Have ALL required current and projected fire weather forecast been obtained and are they favorable?	YES N	О
Are ALL prescription parameters met?	YES N	О
Are ALL smoke management specifications met?	YES N	О
Are ALL planned operations personnel and equipment on-site, available, and operational?	YES N	О
Has the availability of contingency resources applicable to today's implementation been checked and are they available?	YES N	О
Have ALL personnel been briefed on the project objectives, their assignment, safety hazards, escape routes, and safety zones?	YES N	О
If all the questions were answered " <u>YES</u> " proceed with a test fire. Document the location and results. If any questions were answered " <u>NO</u> ", DO NOT proceed Implementation is not allowed.	with the test fire	2:
After evaluating the test fire, in your judgment can the prescribed fire be carried prescribed fire plan and will it meet the planned objective? <b>Circle</b> :	out according to YES or NO	) the

## **INCIDENT OBJECTIVES (ICS 202)**

#### Objective(s):

#### A. Resource objectives:

- 1. Actively manage units using prescribed fire with 1-2 treatments every 5-10 years.
- 2. Reduce or maintain presence of non-native invasive species including smooth brome, Kentucky bluegrass, absinth wormwood and Canada thistle.
- 3. Reduce accumulated litter by 70% 100% to increases soil nutrients, stimulates plant growth and rejuvenate native grasses.

#### B. Prescribed fire objectives:

- 1. Treat 80% 100% of unit with fire providing for a natural or mosaic fire pattern where possible.
- 2. Reduce litter accumulation by 70% 100%.

#### **Operational Period Command Emphasis:**

The Burn Boss is responsible for determining if an escape has become a wildfire.

Priorities in the event of a wildfire are as follows:

- 1. Protection of public and fire line personnel life safety
- 2. Protection of privately owned primary residences
- 3. Protection of private property and lands
- 4. Minimize any damage to natural resources

#### General Situational Awareness

#### Safety Hazards:

• Wetlands on boundary - Driving interior of unit & access around water.

#### **Smoke-Sensitive Receptors:**

• Residence within 2 miles of unit

#### **Leaders Intent**

- 1. Task: Ignite, hold, patrol, mop-up the perimeter, and protect values at risk within and adjacent to the burn unit.
- 2. Purpose: protect private property, reduce hazardous fuels, and enhance wildlife habitat
- **3. End State:** Fire stays on FWS lands, within containment lines. Damage to natural resources do not occur or are minimized. No injuries occur. No vehicles get stuck.

#### **6. Site Safety Plan Required?** Yes ⊠ No □

Approved Site Safety Plan(s) Located at: Station Safety Plan and JHA's are located at Chase Lake WMD Office.

### 7. Work Assignments:

Ignite, hold and patrol line along the boundary. Continually patrol between ignition and test fire to ensure line is secure.

### 8. Special Instructions:

Critical holding areas: any portion of the border that requires a mowed fire break. Patrol until line is secure to ensure there is no possibility of fire creeping outside the unit.

## **INCIDENT ORGANIZATION CHART (ICS 207)**

1. Incident Name:	2. Incident Location:		3. Operational
Chase Lake WMD,	Wells County. Lynn Twp. Burn unit is 8.0 miles south of Hursdfiel	Period:	
Fredrick WPA, Lone Tree WMA	1 Mile north of the Intersection of 7 <sup>th</sup> St SE & 24 <sup>th</sup> Ave SE, Lynn, ND	47.3311° -99.9863°	

### **Prescription Parameters**

ENVIRONMENTAL CONDITIONS	ACCEPTABLE	DESIRED	FORECASTED (NWS spot forecast)
Temperature	40-99	50-89	
Relative Humidity	15-70	25-44	
1 hr. Fuel Moisture (%)*	5-11	5-7	
Wind Speed mph (20' forecast)	3-20	5-15	
Wind Direction	N, NE, 1	E, SE	
Dispersion Index**	>13,0	00	
FIRE BEHAVIOR (BehavePlus5 runs – FM 1, 6% Slope, Direction of Maximum Spread)	ACCEPTABLE	DESIRED	FORECASTED (if environmental conditions are outside acceptable ranges – see below)
Surface Rate of Spread (ch/h)	6-297	44.9-297.3	
Fireline Intensity (Btu/ft/s)	4-504	73-504	
Flame Length (ft)	0.8-8	3.2-7.9	
FIRE BEHAVIOR (NFDRS Calculator)	ACCEPTABLE	DESIRED	FORECASTED (RAWS)
Energy Release Component (ERC)	1-20+	3-4	
Burning Index (BI)	0-60	25-53	

See Appendix E: Fire Behavior Modeling Documentation or Empirical Documentation The Fire Behavior Prescription is the range of acceptable and desired fire behavior to obtain the fire treatment and resource objectives. The Environmental Conditions are used only to determine Fire Behavior. Any combination of weather and fuels guidance parameters that result in and acceptable fire behavior range will be considered within prescription.

- \*\*Dispersion Index (Transport Winds X Mixing Height)
  - <13,000: Poor, No burning will be conducted
  - 13,000 29,999: Fair
  - 30,000 59,000: Good
  - 60,000 or greater: Excellent

#### Method and Frequency for Obtaining Weather and Smoke Management Forecast(s)

- A spot weather forecast for the burn site will be requested from the NWS for each ignition operational period by submitting the online form at <a href="http://www.crh.noaa.gov/bis/fire.htm">http://www.crh.noaa.gov/bis/fire.htm</a> or by phone at 701-250-4224.
- NFDRS data for point forecasts, including Burning Index, Energy Release Component, Ignition Component and others, may be obtained from NDC or directly from the RAWS located in the area (Long Lake or Sand Lake).

Prepared by: Mike Hill/RXB2

<sup>\*1</sup> hr. Fuel Moistures are Reference Fuel Moistures with Fuel Moisture Content Correction of 0-1 during May, June and July. Forecasted 1 hr. Fuel Moisture can be determined using the Fireline Handbook Appendix B: Fire Behavior or taken from a representative RAWS.
