HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU

INCIDENT: **2025 SBR TREX**

OPERATIONAL PERIOD: Nov 3-15, 2025

Fire Order / Watchout Situation of the Day:

Taking a nap near fireline

Fatigue & Stress

Accumulated (chronic) Fatigue is defined as fatigue from which normal rest does not produce recovery. Accumulated fatigue is often caused by extended periods of stress with inadequate recovery periods, which results in decreased productivity, compromised immune function, and reduced alertness. Fatigued workers perform poorly, behave carelessly, tolerate greater errors, and become inattentive. Chronic fatigue often results in increased stress, which may present itself through certain behavioral and physiological indicators, such as those described below:

Behavioral indicators:

- Decreased motivation and low morale.
- Increased irritability and depression.

Physiological indicators:

- Confusion, poor problem-solving.
- Poor abstract thinking.
- Poor attention/decisions.
- Poor concentration/memory.
- Extreme emotional responses.
- Social/behavioral changes.

Recommendations for chronic fatigue/stress are:

- Take longer periods of rest/recovery.
- Ensure that workers are adequately rested before they begin work shifts.
- Provide periodic rest breaks to allow physical and mental recovery.
- Alternate between heavy and light tasks.
- Eat well-balanced meals regularly, with energy supplements during periods of high exertion.
- Maintain hydration.
- Ensure workers maintain good personal hygiene.
- Maintain high standards of physical fitness and work capacity.
- In extreme cases, personnel may need to be relieved of their duties.

TREX Training Message

Module leads have trainee-trainer pairing assignments for TREX. Identify who you are training and who is training you and get with your people. Discuss goals, expectations, what success looks like, and look through task books together in preparation for your assignment. Also take time to get to know each other and how each of you best receives feedback and learns. Make the most of every hour and every day here to learn, grow, and build relationships together!

Thank you,

Sasha Berleman, PhD

Incident Location County: State: SC Latitude: N Longitude: W											
The convention calls for frequency lists to show five digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. Use Remarks for any clarifications, to show gateway channels or other information. All channels are shown as if programmed into a hand held, mobile or control station radio. A Repeater must be programmed with the Rx and Tx reversed. A Base Station is simplex typically.
