

STUART CREEK 2 FIRE

AK-MID-280

JULY 4, 2013

0800-2200

| | | | | | | | | | | | | |
|---|---|---------------------------------------|---------------------------------|---|--|--------------------------------|---|--|--------------------------------|---|---------------------------------------|--------------------------------|
| <h1 style="text-align: center;">INCIDENT OBJECTIVES</h1> | 1. INCIDENT NAME Stuart Creek 2 Fire | 2. DATE PREPARED 07/03/2013 | 3. TIME PREPARED 1813 | | | | | | | | | |
| | 4. OPERATIONAL PERIOD (DATE/TIME) 07/04/2013--0800 Hours to 2200 Hours | | | | | | | | | | | |
| 5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) <ul style="list-style-type: none"> * Apply direct attack and indirect attack tactics to minimize acres burned and impacts to values at risk. * Utilize appropriate suppression methods to keep the fire to the smallest possible size. * Use of indirect line construction and burnout operations is allowed. * Only aviation resources will be used within Impact Areas, except on hardened roads within coordination with military EOD/Range Control personnel. * Scout for contingency lines on all flanks of the fire. * Develop and implement structure protection plans to protect residences, military infrastructure, and identified high value military areas and resources. * Utilize retardant and mechanized equipment to minimize burned acreage, per National policy and Agency direction. * Where steep, treacherous terrain results in unacceptable risk exposure to firefighters, use previously identified contingency lines as primary containment lines for indirect line and burnout operations. * As safety allows, conduct mop-up outside of military impact areas. * Facilitate the coordination of information regarding the fire incident between assigned Military, State and Borough liaisons to ensure effected land managers are kept aware of the fire situation. | | | | | | | | | | | | |
| 6. WEATHER FORECAST FOR OPERATIONAL PERIOD Partly sunny. Temperature 63F. Humidity 34%. Winds S @ 4-8 MPH in the afternoon. | | | | | | | | | | | | |
| 7. GENERAL SAFETY MESSAGE Please see Safety Message. | | | | | | | | | | | | |

SPOT FORECAST FOR STUART CR 2...WIIMT #3
NATIONAL WEATHER SERVICE FAIRBANKS AK
423 PM AKDT WED JUL 3 2013

.DISCUSSION...

WEAK RIDGING ALOFT WILL CONTINUE OVER THE FIRE AREA THROUGH
FRIDAY. THERE WILL BE AREAS OF CLOUDS OVER THE AREA...NO
THUNDERSTORMS OR WETTING RAIN EXPECTED.
WINDS LIGHT OUT OF THE SOUTH SOUTHWEST THROUGH FRIDAY.

.INDEPENDENCE DAY...

SKY/WEATHER.....PARTLY SUNNY (45-55 PERCENT). AREAS OF SMOKE.
MAX TEMPERATURE.....AROUND 63.
MIN HUMIDITY.....34 PERCENT.
WIND (20 FT).....SOUTHEAST WINDS 4 TO 8 MPH SHIFTING TO THE
SOUTH 4 TO 8 MPH IN THE AFTERNOON.
CWR.....0 PERCENT.
LAL.....1.
MIXING HEIGHT.....300-1800 FT AGL INCREASING TO 6700-8400 FT AGL.
TRANSPORT WINDS.....SOUTH AROUND 12 MPH.

.THURSDAY NIGHT...

SKY/WEATHER.....MOSTLY CLOUDY (75-85 PERCENT). AREAS OF SMOKE.
MIN TEMPERATURE.....AROUND 45.
MAX HUMIDITY.....87 PERCENT.
WIND (20 FT).....SOUTHWEST WINDS 4 TO 8 MPH.
CWR.....0 PERCENT.
LAL.....1.
MIXING HEIGHT.....5800-7200 FT AGL DECREASING TO 300-600 FT AGL.
TRANSPORT WINDS.....SOUTHWEST AROUND 12 MPH.

.FRIDAY...

SKY/WEATHER.....PARTLY SUNNY (65-75 PERCENT).
MAX TEMPERATURE.....AROUND 64.
MIN HUMIDITY.....42 PERCENT.
WIND (20 FT).....LIGHT WINDS.
CWR.....0 PERCENT.
LAL.....1.
MIXING HEIGHT.....1400-2300 FT AGL INCREASING TO 7600-9200 FT
AGL.
TRANSPORT WINDS.....SOUTHWEST AROUND 10 MPH.

.FORECAST DAYS 3 THROUGH 5...

.SATURDAY...

MOSTLY CLOUDY. LOWS IN THE MID 40S. HIGHS IN THE MID 70S. LIGHT
WINDS.

.SUNDAY...

MOSTLY CLOUDY. LOWS IN THE LOWER 40S. HIGHS IN THE MID 70S. LIGHT
WINDS.

.MONDAY...

MOSTLY CLOUDY. LOWS IN THE MID 40S. HIGHS IN THE LOWER 70S. LIGHT
WINDS.

FIRE BEHAVIOR FORECAST

| | |
|-----------------------------------|--|
| FORECAST NUMBER: # 2 | TYPE OF FIRE: Wildfire |
| FIRE NAME: Stuart Creek #2 | OPERATIONAL PERIOD: Day – July 4, 2013 |
| DATE ISSUED: 07/03/13 | TIME ISSUED: 2100 hrs |
| UNIT: BLM | SIGNED:  Colin Robertson (FBAN) |

WEATHER SUMMARY:

High temperature: 63 degrees Minimum RH: 34% Winds: S 4-8 mph

See attached Spot Weather Forecast for more details.

Take weather observations, and call in hourly to Communications. Please include location and elevation. Watch for increased temps and a decrease in RH when sun breaks through the cloud cover.

FIRE BEHAVIOR

GENERAL:

Fire is burning very hot. Crowns are generally fully consumed. Fire intensity is very reactive to changes in weather.

Ground fuels and moss are very dry and are burning readily. Duff layers are burning deep, and holding heat, creating reburn or flare-up potential when wind increases. Areas of hardwoods are not stopping fire spread, as often occurs in typical years.

FUELS:

Black spruce forest.

| | | |
|----------------------|---------------------|-----------------------|
| FL Head: 2 ft | FL Flank: 1 ft | FL Backing: 0.7 ft |
| ROS Head: 5-10 ch/hr | ROS Flank: <1 ch/hr | ROS Backing: <1 ch/hr |

Spruce/Hardwood mix.

| | | |
|----------------------|--------------------|-----------------------|
| FL Head: 5 ft | FL Flank: 2 ft | FL Backing: 1.5 ft |
| ROS Head: 7-15 ch/hr | ROS Flank: 1 ch/hr | ROS Backing: <1 ch/hr |

Winds switching from the South and Southeast today. Fire intensity will increase quickly if RH drops below 30%, or if mid-flame wind speeds are above 10 mph. Take regular weather observations, and watch for these conditions.

Extreme blow-up type conditions are not expected today, but fire can still make runs up drainages and through gaps. Look for rates of spread in these areas to be up to 80 ch/hr.

Spotting distance will be about one quarter mile today.
Probability of ignition will be 50%.

AIR OPERATIONS:

Visibility will generally be poor on the northern area of the fire. Watch out for turbulence over ridge tops.

SAFETY

Dense timber makes it difficult to view the main part of the fire. Maintain communications with lookouts.

Fire will react quickly to changes in the weather. When cloud cover breaks and sun shine reaches fuels, fire intensity will increase dramatically. Monitor weather conditions throughout the day.

Fuels and Fire Behavior Advisory

Central and Eastern Interior Alaska, including Copper River

July 1, 2013

Subject: Extended period of record heat through June in eastern Alaska and neighboring Yukon Territory has produced dry fuelbeds, rapid ignition, and intense burning under even light wind conditions.

Discussion: Buildup Index (BUI) values have risen rapidly throughout the month of June across the state, producing conditions well above thresholds for crown fire in spruce, intense burning in tundra fuels, and holdover fires that resist the effects of moderating weather. Highest values are well above the extreme threshold of 110. Fires across the central and eastern Interior have demonstrated growth in burn scars, mixed hardwood and spruce, and even in some hardwood litter fuels.

Though record heat is not expected for early July, ignition potential and spread rates are still very high with such dry fuels. Long burn periods and holdover fires continue to thwart control efforts. Transitions back to active fire behavior out of moderating conditions may be more abrupt than experienced earlier in the season.

Also with the pattern change, winds are more likely to be appearing in the forecasts, producing rapid spread, especially where reinforced by flashy fuels and exposure to slopes.

Difference from normal conditions: A very stable air mass led to extreme high temperatures and low humidity statewide that lasted through June, drying fuels to extreme levels. The central and northeastern Interior still have yet to see normal afternoon shower activity that serves to moderate fuels during these long summer days. Until some moisture begins to work its way into this part of the state, fuels will remain particularly dry.

Concerns to Firefighters and the Public:

- Rapid spread, spotting potential, and active crown fire that can compromise your current location and personal safety
- New ignitions from dry lightning
- Poor access for you and reinforcing resources
- Smoke, decreasing visibility and raising the risk for respiratory and cardiac health issues

Mitigation Measures:

- Monitor forecasts in areas of interest to you
- Ensure escape routes to adequate safety zones are known and understood by all involved
- Evaluate the effectiveness of response actions you are taking and disengage when necessary
- Maintain good communications within your group and to outside dispatch offices to be aware of forecasted changes

Area of Concern: Central and eastern Interior Alaska, with a focus on the upper Yukon Valley, the middle Tanana River Valley, and the Copper River Valley.

(17)

In the event of a medical emergency provide the following information to the Communications Unit

1. Declare the nature of the emergency. Medical injury/illness? If injury/illness is it Life Threatening?
2. If Life Threatening, then request that the designated frequency be cleared for emergency traffic.
3. Identify the on-scene Point of Contact (POC) by Resource and Last name (i.e. POC is TFLD Smith),
4. Identify nature of incident, number injured, patient assessment(s) and location (geographic and GPS coordinates),
5. Identify on-scene medical personnel by position and name(i.e. EMT Jones),
6. Identify preferred method of patient transport,
7. Request any additional resources and/or equipment needed,
8. Document all information received and transmitted on the radio or phone,
9. Identify any changes in the on-scene Point of Contact or medical personnel as they occur

NOTE: Please contact your Division Supervisor if you have an EMT within your crew.

Emergency Medical Procedures (Provide detailed emergency medical procedures by Division/Group, Spike Camps, etc. or any staffed incident or event location)

Prepared by (Medical Unit Leader)

10. Reviewed by (Safety Officer)

**STUART CREEK 2
HUMAN RESOURCES MESSAGE
JULY 4, 2013**

You hear everyone talk about LCES and it is no different in Human Resources. In human resources we too have LCES.

L - Look out - for each other sometimes we get our head down and don't pay attention to what is going on around us.

C - Communicate - with each other to assure that little issues are resolved while they are small.

E - Evaluate - the situation and react appropriately. Over reaction usually means that there is more to the situation than you know.

S - Solutions - be proactive in coming up with solutions to the problems as they arise.

Our team is here to support you on this incident. Please let me know what I can do to help.

CINDY SANDERS, HRSP
WA IMT # 3

Thought for the Day: What you permit YOU promote.
