# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 18	TYPE OF FIRE: Wildland Fire
FIRE NAME: Aggie Creek	OPERATIONAL PERIOD: Day Shift, July 12, 2015
DATE ISSUED: July 11, 2015	TIME ISSUED: 2100
UNIT: Alaska DNR	SIGNED: /s/ Galen Roesler FBAN 

## INPUTS

### WEATHER SUMMARY:

Partly cloudy with isolated thunderstorms possible.  
See attached Fire Weather Forecast.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

Today fire behavior will moderate somewhat with slightly higher relative humidity and lighter wind speeds. Expect smoldering and creeping with areas of moderate to active surface fire in fuel concentrations. Watch for increased fire behavior with alignment of wind with fuels and topography. Isolated torching and occasional flare-ups will continue in the black spruce. All fuel types in the fire area remain critically dry and will support surface fire. Watch for reburn potential in brush and black spruce.

#### SPECIFIC:

**Divisions A:** Expect moderate to active levels of surface fire with occasional torching and flare-ups in the black spruce. Again today, winds will tend to push the fire to the west and southwest.

**Division G:** The fire will continue to burn into isolated pockets of available fuels along the fire's west edge, but spread will be minimal.

**Division T:** Wind directions should be good for holding yesterday's burnout. A lot of heat will remain on the perimeter in this area.

**Divisions U, & V:** Predicted winds will blow into the fire area in these divisions. Expect creeping and smoldering with areas of low to moderate intensity surface fire.

**Division W:** Predicted winds will blow across the fire perimeter, so watch for hotspots near the fire edge that could threaten the control line.

**Globe Creek and Hayes Fires:** No activity or spread anticipated.

**Initial Attack:** Expect moderate to active surface fire and moderate spread on new fires.

#### Possible spread rates today:

Fuel Model	Rate of Spread
Black Spruce	37 feet/min (crown fire)
Grass/Tussock Tundra	23 feet/min
Mixedwoods, Green	10 feet/min

Alaska Portable #6 RAWs (forecasted): FFMC 90.9 Very High, ISI 8.1 Very High, BUI 121 Extreme, FWI 29.7 Very High

### AIR OPERATIONS:

No problems identified for air ops.

### SAFETY:

Thunderstorms are in the forecast. If outflows contact your area of the fire, the direction and intensity of the fire can change dramatically. Watch for falling snags and green trees with outflow winds. Standard Firefighting Order #1 – Keep informed on fire weather conditions and forecasts.
