## INCIDENT Weather Forecast

FORECAST NO: 13

NAME OF FIRE: Aggie Creek

PREDICTION FOR: DAY SHIFT

UNIT: Alaska DNR

SHIFT DATE: Thursday, July 9<sup>th</sup>, 2015

SIGNED:

Eric Evenson  
Incident Meteorologist

TIME AND DATE

FORECAST ISSUED: 8:00 PM Wednesday, July 8<sup>th</sup>, 2015

### WEATHER DISCUSSION:

Areas of smoke with reduced visibilities will once again exist over the fire area this morning and should thin by mid-late morning as inversion dissipates. Slightly warmer and drier conditions than yesterday are expected with isolated afternoon and evening showers in and around the fire area. A north to northeast wind flow will begin to bring noticeably drier air into the region during the Friday through Sunday time period with afternoon relative humidities lowering into the 30 percent range. Morning inversions will help to trap smoke over the fire area. Winds will become more terrain driven over the weekend with weaker wind flow aloft.

### WEATHER FORECAST:

**WEATHER:** Areas of smoke with reduced visibilities in the morning, otherwise partly to mostly cloudy with isolated showers after 3:00 pm.

**TEMPERATURES:** Highs 66-70.

**HUMIDITY:** Minimum relative humidities 41-45%.

**20 FT WINDS:**

**RIDGETOP** – North to northwest winds 8 to 12 mph.

**SLOPE/VALLEY** - Local upslope/upvalley winds, otherwise North to northwest 4 to 8 mph.

**HAINES INDEX:** 4

**STABILITY/INVERSION:** Inversion lasts through late morning, with smoke lifting but not clearing the area.

**LAL:** 1

**CHANCE OF WETTING RAIN:** 10%

### TONIGHT:

Any isolated showers ending by 9:00 pm, otherwise mostly clear with areas of smoke. Lows 48-52.

Maximum relative humidity 68-72%. North to northeast winds 4 to 8 mph.

### OUTLOOK FOR FRIDAY:

Areas of smoke and reduced visibilities in the morning, otherwise mostly sunny. Highs 67-71. Minimum relative humidities 32-36%. Northeast winds 5 to 10 mph ridges...around 5 mph at the lower elevations.

### EXTENDED FORECAST (SATURDAY-MONDAY):

Saturday: Sunny. Highs 69-73. Lows 50-54. Minimum RH 30-34%. Northeast wind 5 to 10 mph.

Sunday: Partly cloudy. Highs 68-72. Lows 52-56. Minimum RH 34-38%. Southeast 5 to 10 mph.

Monday: Mostly cloudy with isolated showers in the afternoon. Highs 64-68. Lows 53-57. Minimum RH 48-52%. Southeast winds 5 to 10 mph.

### EXTRA INFORMATION:

Today's Maximum/Minimum Conditions (Wednesday, July 8<sup>th</sup>, 2015):

Fairbanks (433 feet): Temp – 68F. Relative Humidity – 47%. Wind – SW 6G10 mph.

Alaska Portable 6 (2290 feet): Temp – 64F. Relative Humidity – 45%. Wind – WNW 5G13 mph.

Caribou Peak (2517 ft): Temp – 63F. Relative Humidity – 48%. Wind – SW 10G20 mph.

Chatanika (1626 ft): Temp – 68F. Relative Humidity – 43%. Wind – WSW 4G13 mph.

Wickersham Dome (2229 feet): Temp – 65F. Relative Humidity – 42% Wind – SW 6G15 mph.

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 15	TYPE OF FIRE: Wildland Fire
FIRE NAME: Aggie Creek	OPERATIONAL PERIOD: Day Shift, July 9, 2015
DATE ISSUED: July 8, 2015	TIME ISSUED: 2100
UNIT: Alaska DNR	SIGNED: /s/ Galen Roesler FBAN 

## INPUTS

### WEATHER SUMMARY:

Slightly below normal temperatures and lower humidity than yesterday with light north winds. Partly cloudy with areas of smoke and reduced visibility.  
See attached Fire Weather Forecast.

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

The combination of cool temperature, higher relative humidity, and light winds produced generally low to moderate fire behavior yesterday. Most of the fire activity was smoldering and creeping with occasional torching in black spruce. The effects of Tuesday's showers and high relative humidity are now about gone, so expect a gradual increase in fire behavior as temperatures increase and relative humidity decreases over the next several days. Today you should expect smoldering and creeping early with more active surface fire along with occasional torching and flare-ups in black spruce as the day progresses. The potential for intense burning, group torching and crown runs continues to be reduced for this burn period but a lot of heat remains in duff layers. All fuel types are supporting surface burning on the Aggie Creek fire because of extremely dry conditions this season.

Remember the fire has substantial potential for continued burning and growth from its active edge.

#### SPECIFIC:

**Divisions A, G, T & U:** Expect moderate levels of surface burning activity in duff below black spruce, aspen and mixedwood fuel types. Most of the fire perimeter has heat which can support creeping and active burning. Fire spread will likely be limited, but torching and flare-ups in black spruce should increase today with lower relative humidity.

**Divisions V & W:** Smoldering, creeping and occasional torching primarily in interior areas of these divisions. The northeast and southeast corners of Div. V have potential for breakout from containment lines and spread to the northeast.

**Spread rates for black spruce:** < 10 ch/hr surface fire, 20 ch/hr torching fire, 40-80 ch/hr for a crowning fire;  
**grass/tussock tundra:** 1 ch/hr; **mixedwoods, green:** 1 ch/hr.

**Globe Creek and Hayes Fires:** No activity or spread anticipated.

**New fire starts:** Expect moderate burning and spread on new fires.

Watch for the possibility of reburn in brush and black spruce areas. Mixedwoods and bottomland areas may slow surface fire spread, but will not be barriers to fire movement. Smoldering, hot spots and ash pits are likely along the perimeter and interior where recent burning occurred on the fire.

#### AIR OPERATIONS:

Smoke over the fire vicinity will limit visibility early, but should begin to improve by mid-morning after the inversion lifts out.

## HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

We are ALL accountable for SAFE behaviors

For DAY Operations: July 9, 2015

INCIDENT: **Aggie Creek**

DATE: July 8 TIME: 1600

### **Major Hazards and Risks:**

- **Driving & Traffic:** Drive slowly!!! Narrow, congested roads due to local and fire traffic.
- **Hazard Trees:** Fire weakens the shallow root systems. Minimal wind disturbance can bring them down!
- **Extreme Fire Behavior:** Extreme rates of spread and spotting distance!
- **Complacency:** The fire was quiet yesterday, but that might not be the case today!!

Fire Order of the Day: ***Know what your fire is doing at all times***

- Safety is of utmost importance.
- Constantly review and apply the **Risk Management Process (IRPG pg. 1)**
- Burning or partially burned live and dead trees.
- Be constantly aware of surroundings and expected fire behavior.

### TRANSFER OF COMMAND

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents with potential during transfer of command periods (some have occurred in the past). Be proactive in mitigating the risks by proper implementation of LCES—Lookout, Communications, Escape Routes, and Safety Zones.

#### **Factors for increased risks to fireline personnel during transition periods include:**

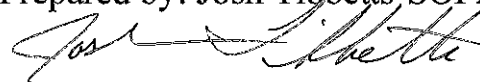

- Lack of fire weather and behavior information, both forecast and observed
- Communications; face-to-face briefings may not be possible for crews at spike camp;
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all Resources know who is in command.

#### **Mitigation actions to take:**

- Lookouts: Post and maintain your own lookouts.
- Communications: Maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: Identify escape routes and assure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
- Transition at the morning briefing
- Utilize the Incident Response Pocket Guide transition checklist

**Thanks from your Safety Team!!**

July 09, 2015

To: All Incident Personnel for the Aggie Creek Fire (AK-FAS-511515)

From: Richard Nieto, Incident Commander

Subject: Ethical Behavior and Conduct

The Southwest Area Incident Management Team 5 is committed to the highest principles of ethical behavior and conduct. This team fully endorses the laws and policies regarding discrimination, harassment, hazing, and other inappropriate behavior, and will not tolerate misconduct in any form. We expect an attitude of mutual respect for all incident personnel and the public we serve.

As Incident Commander, I expect all personnel assigned to this incident to carry themselves with the highest level of conduct and integrity. As ambassadors, I encourage each of you to represent this Incident Management Team, as well as your agency in a professional and respectful manner.

I am committed to the policy that everyone is entitled to a safe work environment from the moment of dispatch until your return to the home unit. I expect and demand nothing less than work practices that reflect a "Safety First" attitude.

Your actions reflect upon all of us.

Sincerely,

*Richard Nieto*
