LEADERS INTENT:
 Utilize the best combination of point protection, direct and indirect tactics with mindful consideration of the values at risk and the probability of success of fire management actions in order to meet incident objectives.

Management Objectives

-SAFETY: Provide for firefighter and public safety as the highest priority through sound risk management and Life First Principles. The safety of fire personnel, the public and the employees is the highest priority during all phases of the incident.

-PROPERTY: Protect qualifying sites and natural resources from damage by wildfire. Provide point protection for values immediately or potentially affected by fire. Document effects of native allotments from the fire and suppression activities.

-RELATIONSHIPS: Maintain and develop relationships and partnerships and stakeholders, cooperators, community leaders/members, private landowners, and local agencies by coordinating incident management efforts through timely and accurate information sharing.

-COST: Ensure expenditures are commensurate with the values at risk. Keep Agency Administrators apprised of current situation and cost estimates.

Operational Objectives

-Confine the fire NORTH and EAST of the Chatanika River while providing point protection for all values at risk. Manage fire growth utilizing natural barriers and previous fire control lines. Support the Fairbanks Area by assuming IA responsibilities within the TFR, as well as providing resources for initial attack in the Fairbanks Area. Level of response to new starts will be based on location within AK Fire Management Option Area.

WEATHER SUMMARY: ****** RED FLAG WARNING ****** Extended – for Lightning & Dry Fuels thru midnight

Temps: High 60s to mid 70s; **RH:** High 40s to high 50s; **LAL** 4; **CWR** 40%

OUTPUTS

FIRE BEHAVIOR

GENERAL: *Overall, greatly diminished fire activity and conditions conducive for spotting and rapid rates of spread.*

Fire Danger Indices (CFFDRS)	Today's (Projected)	Trend	Interpretation
Fine Fuel Moisture Code (FFMC):	80 (moderate)	up 4	Active spread in light fuels at 80. Ignition potential high at 90 and <i>extreme fire behavior expected at 92.</i>
Build-up Index (BUI):	97 (high)	down 13	Fuel availability and flammability. Seasonal severity. Used in Fire Behavior Predictions.

Fuel Type (FBS)	5 mph wind (*head-fire)	10 mph wind*	20 mph wind (T-storm outflow)*
Black Spruce (C-2)	ROS: 4-7 ch/hr	ROS: 6-12 ch/hr	ROS: ¼ - ½ mph
Mixed Hardwood w/50% Spruce (M-2)	ROS: 2-4 ch/hr	ROS: 4-6 ch/hr	ROS: ½ - 1 mph
Old Burn Scars (O-1b) 50% cured, 0 t/a	ROS: 4-7 ch/hr	ROS: 7-12 ch/hr	ROS: 1/10 - ¼ mph

Important thresholds:

Critical Fire Weather (Temp/Rh) - rapid spread & crown fire	greater than 80° F	less than 30% Rh
CFFDRS Indices - Correlated Large Fire Growth	greater than 88 FFMC	greater than 80 BUI

SPECIFIC:

DIV-A (SW Corner of Fire): Minimal fire activity throughout the division. Any residual heat holding over will be little affected by precipitation, unless long sustained precipitation occurs (>1”).

Div-E, H (North Flank of fire): Some residual heat is still evident in Washington and Aggie Ck drainages. Most active spread between Washington creek and Tatalina river in boggy meskag. Close to Tatalina river.

Div-Z, T (East flank): Significant decrease in fire activity compared to this last week except for yesterday, which it will be similar to. Mixed hardwoods with little to no spruce component is acting as a barrier to fire movement and spread. Duff fuel moisture is still very low and will sustain hold-over heat to continue until drying trend returns in number of places. Do not expect backing and flanking will continue in mixed hardwood stands that are more open or with greater than 50% spruce component.

AIR OPERATIONS: Smoke (varies) and t-storm activity may limit air operations.

SAFETY

Common denominator of tragic fires ~ Innocent in appearance before unexpected shifts in wind direction and/or speed results in flare-ups or extreme fire behavior. In some cases, tragedies occur in the mop-up stage.

Incident Location: College AK

State: AK

Latitude: 64°53'28.78"N Longitude: 147°48'57.10"W

Forest / Unit / Jurisdiction: AKS-FNS

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed. **Communications Unit Phone: 206-260-1132**

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Major Hazards and Risks

Wet Weather – With wetting rains increasing each day, do you have a plan for the following: Will the dirt road you're using be drivable in wet conditions? Do you have an alternate travel plan for a medical emergency? Is your sleeping area good for wetting rains? Do you have enough food and water if the supplies can't make it to spike camp? Please take the time to get ready before the wetting rains arrive.

Local Traffic – When you're traveling around the line, or even the ICP, watch for the public to do just about anything on the road. Expect the unexpected.

Complacency – We have been busy on this incident for almost two weeks now, but we are currently getting cooler wetter weather. **DON'T BECOME COMPLACENT!** There are many hazards still out there. It only takes a short amount of dry weather to get active fire behavior again.

Risk Management Process

Step 1 Situation Awareness

Gather Information

- Objectives (s)
- Communications
- Who's in charge
- Previous Fire Behavior
- Weather Forecast
- Local Factors

Scout the Fire

IF LIGHTNING OCCURS:

- Take shelter in vehicle or building if possible.
- Find a low spot away from tall trees or other elevated conductible objects not subject to Flooding.
- If you feel your skin tingle or your hair stand on end, immediately crouch low, make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together
- Stay away from ridge tops, wide open areas, rock outcroppings, or near ledges.
- If only isolated trees are nearby, keep your distance twice the tree height.
- Don't handle flammable materials in open spaces or use metal hand tools
