WEATHER SUMMARY: TREND

see IMET Fire Weather Forecast

Temps: up 1-3 degrees; RH: down 0-3 percent; LAL: no change; CWR: no change until late evening, then up 50%

#### **OUTPUTS**

#### **FIRE BEHAVIOR**

GENERAL:

- Minimal fire activity overall. Except for a few isolated areas where heat is holding and there may be occasional flair
  ups or torching. Be "heads up" today for much higher winds this evening when the frontal system moves through.
  Areas that are affected can be more active where hold-over heat may align with fuels receptive for isolated torching.
  Though unlikely, there may be a few areas on the line where this increase in potential may cause areas smoldering to
  creeping, backing and flanking at the greatest potential activity.
- Increasing cloudy cover and more moisture expected late this afternoon/evening into early tomorrow morning will
  continue the trend we have been seeing the last couple days. Reducing fire activity dramatically as we go into the
  following day.

Fire Danger Indices (CFFDRS)	Today's (Projected)	Trend	Interpretation Note: projected indices are calculated prior day for 14:00pm AKDT
Fine Fuel Moisture Code (FFMC):	86 (high)	up 3	Below 74, little chance of ignition or surface fire spread with an open flame. Active spread in light fuels at 80. Ignition potential high at 90 and extreme fire behavior expected at 92.
Build-up Index (BUI):	65 (high)	up 14	Fuel availability and flammability. Seasonal severity. Used in Fire Behavior Predictions.

Fuel Type (FBS)	5 mph wind (*head-fire)	10 mph wind*	20 mph wind (T-storm outflow)*	
Black Spruce (C-2)	ROS: 10-20 ch/hr	ROS: 18-34 ch/hr	ROS: 53-92 ch/hr	
Mixed Hardwood w/50% Spruce (M-2)	ROS: 5-11 ch/hr	ROS: 10-18 ch/hr	ROS: 29-49 ch/hr	
Old Burn Scars (O-1b) 50% cured, 0 t/a	ROS: 2-4 ch/hr	ROS: 4-7 ch/hr	ROS: 13-22 ch/hr	

Note: 80 chains (ch) in a mile (mi); a chain (ch) is 66 feet (ft).

· · · · · · · · · · · · · · · · · · ·	Important th	rtant thresholds:			
Critical Fire Weather (Temp/Rh) - rapid spread & crown fire	greater than 80° F	less than 30% Rh			
CFFDRS Indices - Correlated Large Fire Growth	greater than 88 FFMC	greater than 80 BUI			

#### SPECIFIC:

**DIV-A (SW Corner of Fire)**: Minimal fire activity throughout the division.

**Div-E (North Flank of fire)**: Some residual heat is still evident in Washington and Aggie Ck drainages. Most active spread between Washington creek and Tatalina river in boggy meskag, near the Tatalina river.

**Div-Z** (South flank): Minimal fire activity throughout the division, with pockets of heat near Div-Z/T break. Pockets of heat can still be problematic if near the line or values.

AIR OPERATIONS: Clear skies today with mild winds will be good for air operations.

#### **SAFETY**

As fire activity in your divisions decline, remember to keep your situational awareness in tune. Snags and fire weakened trees continue to be one of the biggest hazards out there. Continue surveying work areas overhead hazards and mitigate them by having them removed or use flagging to keep people well clear of area.

#### SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

#### Major Hazards and Risks

**Working with Aircraft** – Don't base your plan on the availability of aircraft for success. Do not let an overwhelming sense of urgency pressure you (or the pilot) into working in unsafe conditions. Clear all areas of personnel prior sling loads. Use qualified personnel for sling loads.

**UTV** – Always use Defensive Driving techniques. Drive at posted or slower speed limits as conditions warrant. Be prepared for sudden vehicle traffic; expect the unexpected. Try to stay to the right on public dirt roads as residents tend to drive in the middle of the road.

**Wildlife** – Watch for bears that are roaming through Spike Camp looking for food. Keep your trash picked up and hauled away daily. Watch for Moose and there young. Don't get between mom and calf. Watch for wildlife on the highway at any time of day.

## With the extra Daylight are you getting good sleep

#### Signs of Fatigue to Watch for

The following may present in

firefighters suffering from fatigue.

- Vacant Stare
- Glazed Eyes
- Pale Skin
- Body swaying upon standing.
- Walking into objects.
- Loss of concentration during briefings
- Slurred Speech

#### **Suppression Repair**

- Use caution when working around heavy equipment.
- Make sure to make eye contact with operators when working with and moving around heavy equipment.
- Do not work directly below heavy equipment.
- Be mindful of your distance and of your crew's around equipment
- Use caution around snags and fire weakened trees that may be dislodged during heavy equipment operations.

## Training Specialist Minto Lakes

## The Training Specialist is working remotely. Training Specialist contact information for the Minto Lakes Fire is:

- Robert Rivelle
- Most important; If any Trainee or Trainer has any questions or concerns, call/text: 707.498.1761 "anytime".
- Email: robert\_rivelle@nps.gov

#### How to register as a Trainee:

- 1. Use the QR code below to register. If you're unable to register using the QR code, please call 707.498.1761 anytime.
- 2. Once registered, you will receive text and email updates.

#### How to close-out your training assignment:

- 1. **Trainer:** Complete and Evaluation Record in the back of the Position Task Book and make as many entries as possible within the individual tasks. Discuss this with your Trainee.
- 2. **Trainer**: Complete an individual performance rating (ICS 225) and go over the performance rating with your Trainee.
- 3. **Trainee:** Text a photo or email your individual performance rating (ICS 225) to the Training Specialist.
- 4. Trainee: Complete the Trainee exit questions at the QR code below.
- 5. **Trainee:** Once 1-4 are completed, the Trainee and the Training Specialist will have a brief conversation to discuss the Task Book and assignment with the Trainee.
- 6. Done, except for safe travels home!

#### **Trainee Registration**
