**WEATHER SUMMARY:** TREND *see IMET Fire Weather Forecast*  
**Temps:** up 1-3 degrees; **RH:** down 0-3 percent; **LAL:** no change; **CWR:** no change until late evening, then up 50%

### OUTPUTS

#### FIRE BEHAVIOR

##### GENERAL:

- Minimal fire activity overall. Except for a few isolated areas where heat is holding and there may be occasional flair ups or torching. Be "heads up" today for much higher winds this evening when the frontal system moves through. Areas that are affected can be more active where hold-over heat may align with fuels receptive for isolated torching. Though unlikely, there may be a few areas on the line where this increase in potential may cause areas smoldering to creeping, backing and flanking at the greatest potential activity.
- Increasing cloudy cover and more moisture expected late this afternoon/evening into early tomorrow morning will continue the trend we have been seeing the last couple days. Reducing fire activity dramatically as we go into the following day.

Fire Danger Indices (CFFDRS)	Today's (Projected)	Trend	Interpretation
Fine Fuel Moisture Code (FFMC):	<b>86</b> (high)	<b>up</b> <b>3</b>	Below 74, little chance of ignition or surface fire spread with an open flame. <i>Active spread in light fuels at 80. Ignition potential high at 90</i> and extreme fire behavior expected at 92.
Build-up Index (BUI):	<b>65</b> (high)	<b>up</b> <b>14</b>	Fuel availability and flammability. Seasonal severity. Used in Fire Behavior Predictions.

Fuel Type (FBS)	5 mph wind (*head-fire)	10 mph wind*	20 mph wind (T-storm outflow)*
Black Spruce (C-2)	ROS: 10-20 ch/hr	ROS: 18-34 ch/hr	ROS: 53-92 ch/hr
Mixed Hardwood w/50% Spruce (M-2)	ROS: 5-11 ch/hr	ROS: 10-18 ch/hr	ROS: 29-49 ch/hr
Old Burn Scars (O-1b) 50% cured, 0 t/a	ROS: 2-4 ch/hr	ROS: 4-7 ch/hr	ROS: 13-22 ch/hr

Note: 80 chains (ch) in a mile (mi); a chain (ch) is 66 feet (ft).

Important thresholds:		
<b>Critical Fire Weather (Temp/Rh) - rapid spread &amp; crown fire</b>	greater than 80° F	less than 30% Rh
<b>CFFDRS Indices - Correlated Large Fire Growth</b>	greater than 88 FFMC	greater than 80 BUI

##### SPECIFIC:

**DIV-A (SW Corner of Fire):** Minimal fire activity throughout the division.

**Div-E (North Flank of fire):** Some residual heat is still evident in Washington and Aggie Ck drainages. Most active spread between Washington creek and Tatalina river in boggy meskag, near the Tatalina river.

**Div-Z (South flank):** Minimal fire activity throughout the division, with pockets of heat near Div-Z/T break. Pockets of heat can still be problematic if near the line or values.

**AIR OPERATIONS:** Clear skies today with mild winds will be good for air operations.

### SAFETY

As fire activity in your divisions decline, remember to keep your situational awareness in tune. Snags and fire weakened trees continue to be one of the biggest hazards out there. Continue surveying work areas overhead hazards and mitigate them by having them removed or use flagging to keep people well clear of area.

**Incident:**  
Minto Lakes Fire AF-FAS-211349

**Date:**  
7-15-2022 to 7-16-2022

**Operational Period:**  
0800-0800

## *SAFETY MESSAGE*

*Fire fighter safety comes first on every fire, every time*

### Major Hazards and Risks

**Working with Aircraft** – Don't base your plan on the availability of aircraft for success. Do not let an overwhelming sense of urgency pressure you (or the pilot) into working in unsafe conditions. Clear all areas of personnel prior sling loads. Use qualified personnel for sling loads.

**UTV** – Always use Defensive Driving techniques. Drive at posted or slower speed limits as conditions warrant. Be prepared for sudden vehicle traffic; expect the unexpected. Try to stay to the right on public dirt roads as residents tend to drive in the middle of the road.

**Wildlife** – Watch for bears that are roaming through Spike Camp looking for food. Keep your trash picked up and hauled away daily. Watch for Moose and there young. Don't get between mom and calf. Watch for wildlife on the highway at any time of day.

**With the extra Daylight are you getting good sleep**

**Signs of Fatigue to Watch for**

The following may present in firefighters suffering from fatigue.

- Vacant Stare
- Glazed Eyes
- Pale Skin
- Body swaying upon standing.
- Walking into objects.
- Loss of concentration during briefings
- Slurred Speech

### Suppression Repair

- Use caution when working around heavy equipment.
- Make sure to make eye contact with operators when working with and moving around heavy equipment.
- Do not work directly below heavy equipment.
- Be mindful of your distance and of your crew's around equipment
- Use caution around snags and fire weakened trees that may be dislodged during heavy equipment operations.

Incident Location: College AK

Latitude: 64°53'28.78"N Longitude: 147°48'57.10"W

The convention calls for frequency lists to show four digits after the decimal place (five digits for 700 MHz frequencies). The letter "U", "N", or "W" in the deviation (Dev) column reflects whether the frequency is ultranarrow (6.25 kHz), narrow (12.5 kHz) or wide band (25 kHz). Mode refers to either "A" indicating Analog, "D" indicating Digital (e.g. Project 25) or "M" indicating Mixed Mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeaters (and depending on use, base stations) must be programmed with the Rx and Tx reversed. **Communications Unit Phone: 206-260-1132**
