.DISCUSSION...Red Flag Warnings for abundant lightning and extremely dry fuels are in effect for zones 220, 221, 222, 223 and 224 through midnight Monday night.

A thermal low pressure trough stretching from McGrath to Fairbanks to Eagle will persist into Mon. This, along with a warm and unstable airmass will cause thunderstorms through Mon. Smokey conditions will continue through Mon.

A series of low pressure troughs aloft will move west across Eastern Interior over the next several days. These will cause isolated thunderstorms across the Eastern Interior, with scattered thunderstorms in the afternoon/evening over the area south of Fort Yukon through Mon night. Expect 3000 to 5000 lightning strikes each day. These troughs will also cause significant rain showers over the areas southeast of Eagle to Kantishna through Mon night.

A cold front moving east across the Eastern Interior on Tue will bring cooler temperatures. By Tue thunderstorms will be confined to isolated east of Fairbanks. Cool conditions are expected from Wed through the end of the week.
