North Ops

DISCUSSION...

Isolated to widely scattered thunderstorm over the Southwest Interior and Eastern Interior today will taper off from the west tonight and Wed as a cold front sweeps east across all over Northern Alaska. Rain and much cooler temperatures will accompany the front Wed, with most of Northern Alaska remaining cool into the weekend.

A thermal low pressure trough stretching from Arctic Village to Anvik will move east to near the ALCAN Border by Wed AM. An unstable airmass exists along and southeast of this trough, with the highest moisture and greatest instability east of Nenana. Isolated to Widely scattered thunderstorms are expected through Wed along and east of this trough, with the greatest number east of Nenana to Arctic Village this afternoon/evening. Expect 3000 strokes today. After tonight, just isolated thunderstorms Wed east of Delta to Arctic Village with several 100 strokes. Expect few if any thunderstorms Thu through the weekend.

A cold front over the West Coast of Alaska will move to Arctic Village to Delta Junction to McGrath by 4pm Wed, to Arctic Village to Inuvik to Northway by 4am Thu, then move southeast Thu. Rain, much cooler temperatures, and northwest wind will spread east with the front, with some snow in the Brooks Range. Expect northwest winds of 10 mph gusting to 20 mph along and just behind the front. In the Brooks Range will likely see north winds 15 mph gusting to 30 mph behind the front on Wed.

High Water and localized flooding issues will continue over the Southeast Interior through the week.
