DISCUSSION...

Northern Alaska is now transitioning into a cool and wet pattern that will continue into next week. There are isolated thunderstorms along the ALCAN Border that will continue into this evening, then no more thunderstorms are expected through the weekend. RH should remain above 30% through the weekend.

The cold front that brought rain to most of the Interior, and will bring rain to the far eastern Interior tonight as the front moves east of the ALCAN Border. Dy conditions and west winds of 10-15 mph and gusts of 20-25 mph are occurring along and following the front this evening over the Interior.

A low over Eastern Russia will move east to Anvik as a 1004 mb low by 4am Fri, then to Ruby as a 1003 mb low by 4pm Fri, then to Arctic Village as a 1000 mb low by 4pm Sat. This will spread rain over Southwest Alaska Thu night, over the Western and Central Interior on Fri, and into the Eastern Interior Fri night and Sat. Expect near one half inch of rain in most areas with this feature from Fri into Sat.
