

July 9, 2022 Operation Period: Day: 0700 – 2300

Communications 24-Hour

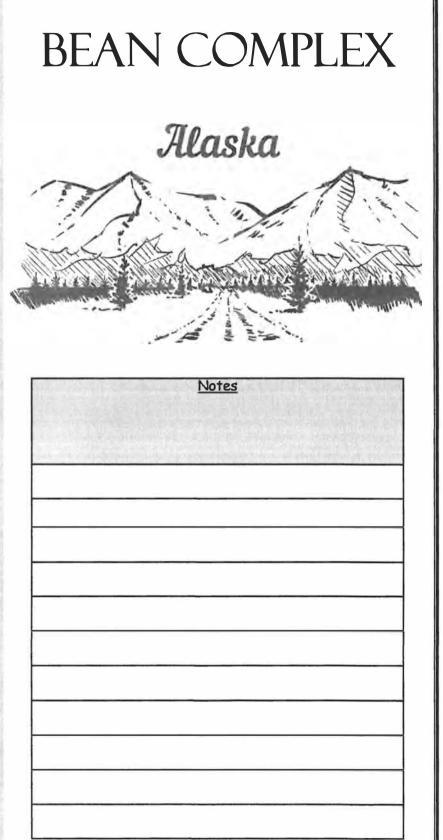

Emergency Number:

In Fairbanks— Call 911 and notify your supervisor

On the fires or in Manley — Call Bean Communications at 907-388-7148

Incident #: AK-TAD-000898 Financial Code: PD PRT0 (1522)

INCIDENT OBJECTIVES

4. Operational Period

Day Operations: 0700-2300

Strategic Framework:

Implement point protection and full suppression strategies on the Bean Complex fires to protect values at risk including human safety, communities and remote structures, tribal trust lands, and cultural and natural resources. Apply strategy and tactics that offer the highest probability of success.

Management Objectives:

- Provide for the safety of firefighters, public, and aviation resources.
- Utilizing the Risk Assessment Process, evaluate all actions prior to engagement.
- Develop strategic plans that identify management action points for point protection of values at risk and evacuation efforts.
- Maintain and enhance relationships with communities, cooperators, and the public. Ensure the public is
 informed on the current situation.
- Utilize resource advisors when using heavy equipment and retardant applications during suppression actions and repair.
- Follow agency and community COVID guidelines to minimize the threat and spread of COVID 19 and other infectious viruses.

Operational Period Command Emphasis:

Control Objectives:

- 1. Incidents #315, #312, #310, and #343 Commensurate with risks and exposure, provide point protection to protect those values at risk immediately and potentially affected by the fires.
- 2. Incident #327 (Hutlinana) is a full suppression effort. Adequately staff Incident #327 to contain, control, and call out.

INCIDENT Weather Forecast

FORECAST NO: 9 PREDICTION FOR: Saturday SHIFT DATE: 07/09/22 FORECAST ISSUED: 07/08/22 at 1900 AKDT

NAME OF FIRE: Bean Complex UNIT: Alaska Fire Service – Tanana Zone SIGNED: Shawn Palmquist - Incident Meteorologist

Red Flag Warning in effect through Midnight Sunday Night

WEATHER DISCUSSION:

Another heads up day with hot and dry conditions in place over the region. Highs in the upper 70s to 80s can be expected, with afternoon RH minimums down into the 20s and 30s and generally light winds. A few isolated showers or thunderstorms are possible late this afternoon and evening, with little to no rain expected. Gusty and erratic winds are the main threat with thunderstorms. Expect lows in the 50s to lower 60s tonight, with moderate to good RH recoveries and light winds prevailing. Hot and dry conditions continue for Sunday, with isolated to scattered showers and thunderstorms possible during the late afternoon and evening.

Today:

WEATHER: Partly cloudy. Isolated showers and thunderstorms possible in the late afternoon, mainly after 1600 AKD. Gusty and erratic winds are possible with the thunderstorms.

TEMPERATURES: Highs 78 to 86. Up 2 to 4 degrees.

HUMIDITY: Minimum 27 to 35 %. Little change.

20 FT WINDS:

RIDGETOP - Light and variable winds becoming west 4 to 8 mph by the afternoon.

SLOPE/VALLEY – Light and variable winds becoming west 3 to 7 mph by the afternoon. Gusty and erratic winds possible near thunderstorms.

FWI (From Manley Hot Springs): 35+ (Very high to extreme)

CHANCE OF WETTING RAIN (> .10): 5% LAL: 2

STABILITY/INVERSION: Weak to Moderate inversion breaking around 0900-1000 AKDT.

OUTLOOK FOR TONIGHT:

Partly cloudy. Isolated showers and thunderstorms in the evening. Low temperatures 53 to 61 degrees. RH recoveries 70 to 85 %, highest along the valley bottoms. Light and variable winds. Inversion begins to form 2200-2300 AKDT.

OUTLOOK FOR SUNDAY:

Partly cloudy. Isolated to scattered showers and thunderstorms are possible. High temperatures 78 to 86 degrees. RH minimums 30 to 38 %. Southwest winds 3 to 8 mph in the morning, becoming west to northwest 4 to 9 mph in the afternoon.

	FIRE BEHAVIOR F	ORECAST					
FORECAST NUMBER: 11		TYPE OF FIRE: Wildlan	d				
FIRE NAME: Bean Complex		OPERATIONAL PERIOD:	July 9, 2022

Spotting distance e able to follow available fo	es may be far enough to sp uels around riparian areas				
periodic crown runs possible 310: Highest spread potential may initiate upslope runs, part across smaller waterways. Fue 315/343: Pockets of heat are r	is near the northwest and southea ticularly where continuous spruce is els are burning intensely and may b	s present. Spotting distance e able to follow available fo d around the east half of th	es may be far enough to sp uels around riparian areas e perimeter. Primary spre				

327: No significant fire behavior.

AIR OPERATIONS:

Smoke density and visibility are forecast to be less of a factor but remaining highly variable throughout the day. Thunderstorm formation has been notably quick! Storms may become active quickly after development.

SAFETY:

<u>Recycled for emphasis</u>: Seasonal fire danger indices continue to rise indicating fire is likely to burn deeper into duff layers. Other fires in the area have encountered ash pits — watch for ash pit formation in your area of work!

Bean Complex - Updated 7/8/2022

SMKJ personnel groups w/ SAT Phones

#310/#327 - Deadman Lake	Whittemore +3	8816-514-01799
#315	Hayes +4	8816-2248-7596)

Division Group Supervisor SAT Phone Numbers

Gubser	8816-514-02344
Neil	8816-514-02467
Lane	8816-514-02334
Merritt	8816-514-00503
Spanarella	8816-514-02162
Kiene	8816-224-87540

Instructions for placing calls to SAT Phones:

You have the option to give the caller the 2-stage dialing access number. When calls are placed to the satellite phone via the access number, you as the subscriber, are billed \$1.60/incoming minute. The caller is charged a regular long distance call to Arizona. The 2-stage access number is **1-480-768-2500**. The caller will be prompted to enter your 12-digit satellite phone number, then the call will be placed to your Iridium satellite phone.

SAFETY MESSAGE

INCIDENT: Bean Complex

Shift: 07/09/2022 - Day

DRIVING TO AND FROM MANLEY

Hazards: Wildlife, road construction equipment and flaggers, poor road surface conditions, civilian traffic, boring/hypnotic scenery, dusty conditions, and long drive times are all part of ground travel to and from Manley. Any one of these hazards can result in serious injuries or worse. Combined, and interacting, they increase the overall hazard of driving exponentially.

Mitigations:

- Use the check in/ out system we have established on the incident.
- > Drive with lights on to increase your visibility to other drivers.
- Always wear seatbelts.
- > Keep your windshield clean. Supplies are available at ICP and Manley
- > Take safety breaks at the marked parking areas.
- Expect a flat tire. Know how to find, free up, and change the spare on your rig.
- Slow down. It is about 160 road miles to Manley. Driving at an average of 35 MPH should get you there in about 4.5 hours. Going 45 MPH should take about an hour less. Is that hour saved worth the increased risk incurred while going that much faster? Stopping distance on gravel can be at least double the distance at the same speed on pavement.

HAZARD TREES:

- Refer to pages 22, 23 in your IRPG for awareness and control of hazard trees.
- Just because it was standing yesterday doesn't mean it is stable today. Spruce are notoriously tippy- green ones with burned roots can be deceptively tippy.
- Consider access/egress routes when determining need to remove trees.
- Understand the current situation of the incident. Perform a risk/benefit analysis of hazard tree felling operations.
- Follow leaders' intent and fall only those hazard trees with the potential to hit a cabin, or our workers defending the cabin. Sometimes putting the saw to a hazard tree is the most dangerous thing we can do about these trees.
- Consider the risks associated with long extraction times in the event of: a faller getting injured while falling a tree, VS likelihood of the tree falling and injuring someone if left un cut.
- > Consider flagging and avoiding instead of cutting.

Create a legacy of safe behavior. Mitigate or avoid hazards based on risk/benefit analysis. How do you want your organization, crew, and self to be remembered both short and long term?

SAFETY OFFICERS: Philip Bordelon, Matt Broyles (ICP), Kris Croddy (Manley)

Finance Message 7/2/22

Finance Phone Number: 530-375-7205

Once CTR's and Shift Tickets have been signed, email them as a PDF attachment to: <u>2022.Bean.Finance@firenet.gov</u>

- The subject line should include your Resource Order(RO)# and last name or company name.
- When saving your CTR or Shift Ticket, please use the following naming convention: CTR_RO#_YYMMDD or ST_RO#_YYMMDD

Example: CTR_C3_220628

 For multiple days on one CTR or Shift Ticket, please use this format: CTR_RO#_YYMMDD_DD

Example: ST_E12_220629_30

If you are unable to email documents due to connectivity issues, hard copies will be accepted. There will be a runner from Pipeline ICP to Manley FOB daily and documents may be transported that way. As a last resort, CTR/Shift Tickets can be turned in at the end of the assignment.

All CTR/Shift Ticket header information should match the incident on the RO. However, the team is required to track costs for each individual fire, so please indicate which incident you worked for each shift in the remarks section.

PARA CARGO ORDERING INSTRUCTIONS

Due to resource limitations, schedule only food box, MREs or water for para cargo delivery. To place a para cargo order, contact Bean Communication via radio or phone. Note the Branch/Division assigned A/G frequency will be used by the aircraft to coordinate delivery with the Drop Zone Ground Contact. Provide the following information.

- 1. Branch and Division
- 2. Date and Time Needed
- 3. Items name and quantity to be delivered.
- 4. Drop Zone Name (Indicate if new drop zone)
- 5. Drop Zone Lat/Long
- 6. Drop Zone Assigned A/G Frequency
- 7. Drop Zone Ground Contact (First name and last name)

MEDICAL EVACUATION AND AIRCRAFT MISHAP INFORMATION

Medical Incident Requiring Extraction from Fireline and Reporting Procedures

In the event of a medical incident requiring extraction from the fireline the procedure will be:

1. On- scene Incident Commander (IC) will notify Bean Communications and provide the information on the 8 Line form (last page of the IAP, or IRPG pgs 118-119) preferably in the order listed. On-scene IC will request resources needed for the extraction.

2. Bean Communications will notify Command and General Staff (C&G) present in Manley via cell phone text list.

3. Field Operations (in cooordination with Manley medical personnel and Manley air operations) will direct/assign/coordinate incident resources to perform the pateint retrieval and either:

- A. Deliver the patient(s) to Manley Airstip for transfer to fixed wing lifeflight.
- B. Deliver the patient(s) to Manley Airstrip for transfer to Fairbanks by ground transport.
- C. Fly patient(s) directly, by rotor, from the line to Fairbanks Memorial Hospital.
- D. Transport patient(s) by boat to Manley.

Response time to Manley after notifying Upper Yukon Tanana Dispatch Center - 75-95 minutes.

Safety Officer in Manley will call Upper Yukon -Tanana Dispath Center (1 800 237- 3652, and ask for the floor corrdinator) and notify them that:

- 1. An accident/injury/illness has occurred.
- 2. An extraction is under way to get patient(s) to Manley Airstrip.
- 3. A lifeflight fixed wing is/ is not requested to respond to Manley airstrip.

Safety Officer in Manley will notify IC, or Deputy IC, or IC(t) at earliest opportunity without delaying care or transport of the patient(s). After hours/off shift notify Ted Hass @ 541-646-1318.

Aircraft Mishap Response and Reporting Procedures

Personnel observing mishap will report it to supervisor and /or Bean communications immediately, attempt to access the scene, and give size up and victim status report when on scene.

On-scene personnel: Once report and size up are delivered, priority for on-scene personnel, in priority order, is:

- 1. As possible, limit the number of personnel exposed to the mishap scene to only those necessary to accomplish tasks listed below.
- 2. Keep responders and uninjured survivors from becoming injured.
- 3. Locate, extricate if necessary, and treat injured survivors.
- Do not move bodies of deceased individuals unless necessary to rescue or treat survivors See IRPG pg. 115 for fatality procedures).
- 5. Report situation and 8 Line information (last page of IAP or pages 118-119 in IRPG) on all victims- living and deceased- to Bean Communications.
- 6. Attempt to control any natural fuels fire started by mishap.
- 7. Secure mishap scene for investigation purposes.

MEDICAL EVACUATION AND AIRCRAFT MISHAP INFORMATION

- 8. Identify and gather witnesses. Have them individually write statements about what they saw and heard regarding the mishap.
- 9. Continue to work towards meeting incident objectives -if possible- with resources uninvolved with the mishap or response to it.

Bean Communications: Once initial report and initial size up has been received Bean communications will, in order:

- 1. Attempt to Notify C and G at Manley.
- 2. Place call to UYT dispatch (1 800 237- 3652, and ask for the floor corrdinator) and relay that a mishap has occurred, and information from initial size up. <u>UYT dispatch</u>, **not** Bean comm. will call national mishap hotline.

Team Safety Officer at Manley: Once initial report and initial size up has been received:

- 1. Notify IC, or Deputy IC, or IC (t) or ICP Safety 541-591-6151.
- 2. Work with field operations and air operations at Manley to coordinate rescue/response.

The transport times in the table below highlight the true remoteness of the fires we are currently staffing. This should lead to thoughtful and deliberate actions by every resource assigned. The mitigation of the hazards faced should reduce the risks and be commensurate to the benefit of our actions, while fully realizing the consequences of accidents and injuries.

Approximate patient transport times from B	Bean Complex incidents
--------------------------------------------	------------------------

INCIDENT	Spool at Manley + fly to incident	Load patient at incident + fly to Manley	Transfer patient to fixed wing life flight + fly to FBK airport	Transfer patient to ground ambo + drive to hospital	Total transport time from incident to hospital	
312	15+60=75	10+60=70	10+45=55	10+20=30	75+70+55+30=230 3 hr. 50 min	
315 North end	15+40=55	10+40=50	10+45=55	10+20=30	55+50+55+30=190 3 hr. 10 min.	
315 south end	15+45=60	10+45=55	10+45=55	10+20=30	60+55+55+30=200 3 hr. 20 min.	
Moose Heart Lake	15+35=50	10+35=45	10+45=55	10+20=30	50+45+55+30=180 3 hr. 0 min.	
327	15+25=40	10+25=35	10+45=55	10+20=30	40+35+55+30=180 2hr 40 min.	
to helipad at FBK memoria hospital.		FBK memorial	NO	NO	40+10+45=95 1 hr. 35 min.
