

#252 Deception Pup
#259 Flasco
Incident Action Plan
Friday, June 28, 2024
0630- 2300

Idaho Team 1- Type 3 Team

Incident #s:
252 AK-UYD-000252
PDR1HC (1522)

259 AK-UYD-000259
PDR1JB (1522)

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period: DAY	
DECEPTION PUP	Date/Time From: 06/28/2024 0630 FRI	Date/Time To: 06/28/2024 2300 FRI
3. Objective(s):		
<p>1. Incorporate sound risk management principles during decision processes in order to provide for firefighter and public safety.</p> <p>2. Protect Native Allotments from fire and suppression activity impacts.</p> <p>3. Identify, preserve and protect significant cultural resources.</p> <p>4. Provide accurate and timely information to the local community and all involved agencies and cooperators.</p> <p>5. Where practicable and feasible, avoid disturbance of the vegetative mat, permafrost soil areas, and lichen-rich plant communities.</p>		
4. Operational Period Command Emphasis:		
<p>Task: Implement strategies and tactics that utilize a continuous, risk informed (values vs. risk) decision process for all phases of operations.</p> <p>Purpose: To provide incident personnel decisional space to evaluate and communicate hazards utilizing the risk management process given the current management of the incident.</p> <p>End State: Provide a transparent command climate that allows for two way communication amongst all incident resources, while providing a common operating picture towards achieving incident objectives.</p>		
General Situational Awareness:		
<p>1. Utilize active listening and ask clarifying questions.</p> <p>2. Be aware of large root burned trees that pose a significant hazard.</p> <p>3. Be mindful of low visibility due to smoke and adjust driving speed.</p> <p>3. Maintain positive interactions with local community and impacted stakeholders.</p>		
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
Approved Site Safety Plan(s) Located at:		
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Spot Forecast for 252 Deception Pup...Alaska Fire Service

Forecast is based on forecast start time of 1900 AKDT on June 27. If conditions become unrepresentative...contact NWS.

...RED FLAG WARNING IN EFFECT UNTIL 10 PM AKDT THIS EVENING...

DISCUSSION...Thunderstorms in the area drift generally away from the fire this evening, though there may still be a chance for a stray thunderstorm to develop before 11 pm. Another hot day is forecast Friday, though minimum RH should be a bit higher than today. Widely scattered thunderstorms develop near the fire early in the afternoon, and may persist in the area through the evening. Storms will come with the threat of outflow winds up to 40 mph and have the potential to be dry. Temperatures will cool slightly through the weekend while min RHs remain around 30 percent.

REST OF TONIGHT...

Sky/weather.....Mostly cloudy (50-60 percent). Areas of smoke through the night. Chance of thunderstorms before 11 pm.
CWR.....10 percent.
LAL.....2.
Min temperature.....Around 52.
Max humidity.....90 percent.
Wind (20 ft).....Light winds. Gusty and erratic winds expected near thunderstorms in the evening.
Mixing height.....4600 ft AGL decreasing to 400 ft AGL in the late evening and overnight.
Transport winds.....South around 6 mph.
Inversion setup.....12 am.

FRIDAY...

Sky/weather.....Partly sunny (55-65 percent). Areas of smoke through the day. Widely scattered thunderstorms after 1 pm.
CWR.....25 percent.
LAL.....3.
Max temperature.....Around 82.
Min humidity.....30 percent.
Wind (20 ft).....West winds 5 to 9 mph. Gusty and erratic winds expected near thunderstorms in the afternoon.
Mixing height.....1100 ft AGL increasing to 5700 ft AGL in the late morning and early afternoon, then decreasing to 3700 ft AGL late in the afternoon.
Transport winds.....West around 7 mph.
Inversion burnoff...9 am.

FRIDAY NIGHT...

Sky/weather.....Mostly cloudy (55-65 percent). Areas of smoke through the night. Widely scattered thunderstorms before midnight.
CWR.....11 percent.
LAL.....3.
Min temperature.....Around 52.
Max humidity.....93 percent.
Wind (20 ft).....Light winds. Gusty and erratic winds expected near thunderstorms in the evening.
Mixing height.....3700 ft AGL decreasing to 400 ft AGL in the late evening and overnight.
Transport winds.....West around 7 mph.
Inversion setup.....1 am.

Spot Forecast for 259 Flasco...Alaska Fire Service

Forecast is based on forecast start time of 1900 AKDT on June 27.
If conditions become unrepresentative...contact the National Weather Service.

...RED FLAG WARNING IN EFFECT UNTIL 10 PM AKDT THIS EVENING...
...RED FLAG WARNING IN EFFECT FROM 10 AM TO 11 PM AKDT FRIDAY...

DISCUSSION...

Isolated thunderstorms drift slowly northwest near the fire this evening, generally ending by 8 pm, though there may be a chance for a stray thunderstorm through 11 pm. Gusty and erratic winds are possible this evening. Then, another hot day is forecast Friday, though minimum RH should be a bit higher than today. Widely scattered thunderstorms develop near the fire early in the afternoon and may persist in the area through the evening. There is potential for thunderstorm coverage to be greater in the area, with a Red Flag Warning in effect for scattered thunderstorms on the Yukon Flats. Storms will come with the threat of outflow windsup to 40 mph, may produce frequent lightning, and have the potential to be dry. Temperatures will cool slightly through the weekend while min RHs remain around 30 percent.

REST OF TONIGHT...

Sky/weather.....Mostly cloudy (50-60 percent). Areas of smoke through the night.
Isolated thunderstorms before 11 pm.
CWR.....10 percent.
LAL.....2.
Min temperature....Around 56.
Max humidity.....90 percent.
Wind (20 ft).....Light winds. Gusty and erratic winds expected near thunderstorms in the evening.
Mixing height.....7000 ft AGL decreasing to 400 ft AGL in the late evening and overnight.
Transport winds.....South around 7 mph.
Inversion setup.....12 am.

FRIDAY...

Sky/weather.....Mostly sunny (40-50 percent). Areas of smoke through the day.
Widely scattered thunderstorms after 1 pm.
CWR.....10 percent.
LAL.....3.
Max temperature....Around 82.
Min humidity.....30 percent.
Wind (20 ft).....Southwest winds 5 to 9 mph. Gusty and erratic winds expected near thunderstorms in the afternoon.
Mixing height.....800 ft AGL increasing to 6000 ft AGL in the late morning and afternoon, then decreasing to 3400 ft AGL late in the afternoon.
Transport winds.....West around 7 mph.
Inversion burnoff...9 am.

FRIDAY NIGHT...

Sky/weather.....Mostly cloudy (60-70 percent). Areas of smoke through the night.
Widely scattered thunderstorms before midnight.
CWR.....10 percent.
LAL.....3.
Min temperature....Around 56.
Max humidity.....93 percent.
Wind (20 ft).....West winds 5 to 9 mph in the evening becoming light. Gusty and erratic winds expected near thunderstorms in the evening.
Mixing height.....3400 ft AGL decreasing to 400 ft AGL in the late evening and overnight.
Transport winds.....West around 7 mph.
Inversion setup.....1 am.

Division/Group Assignment List (ICS 204 WF)
Controlled Unclassified Information//Basic

TRANSFER OF COMMAND

7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.

The Incident Command System (ICS) relies on interagency communications between firefighting resources for collaborative fire suppression. This Standard Firefighting Order shows a variety of firefighting resources working together to effectively suppress a wildland fire.

[Read about all 10 Standard Firefighting Orders.](#)

Risks to fireline personnel increase significantly during transfer of command periods regardless of the size or complexity of the incident. There is a high potential for fatalities, serious injuries, or incidents during transfer of command. Be proactive in mitigating the risks by proper implementation of LCES – Lookouts, Communications, Escape Routes, and Safety Zones.

Factors for increased risks to fireline personnel during transition periods include:

- No or poor briefing of incoming personnel.
- Lack of fire weather and behavior information, both forecast and observed.
- Communications: face-to-face briefings may not be possible and radio frequencies may be overextended and/or changing due to the increased demands on the system.
- Initial attack resources may not have checked in and the Incident Commander (IC) may not be aware of the number, type, and location of all resources.
- Location of safety zones and escape routes may not be known and communicated to all resources.
- Not all resources know who is in command.

Mitigation actions to take:

- Lookouts: post and maintain your own lookouts.
- Communications: maintain existing communications with your own and adjacent resources, as well as your original supervisor, while you are developing communications with incoming adjacent resources and your new supervisor.
- Escape routes and safety zones: identify escape routes and ensure incoming resources are aware of their locations; be aware that your original escape routes and safety zones may no longer be accessible due to changing fire behavior or your increased distance from them.
- Plan for transitions to occur at the morning briefing.
- Utilize the **[Incident Response Pocket Guide \(IRPG\), PMS 461](#)**, Briefing Checklist (inside back cover).

Incident Action Plan Safety Analysis (ICS 215A)

1. Incident Name: Deception Pup (#252) / Flasco (#259)		2. Incident Number: AK-UYD-000252 / AK-UYD-000259	
3. Date/Time Prepared: Date: 06/27/2024 Time: 1800		4. Operational Period: Date From: 6/28/2024 Date To: 0630 Time From: 6/28/2024 Time To: 2300	
5. Incident Area	6. Hazards/Risks	7. Mitigations	
To fire area from Fairbanks, AK	Driving	Extended drive time w/ limit visibility and wildlife. Drive with headlights on at a speed conducive for road conditions.	
Fire #252 / #259	Driving	Paved roads w/ transitions to loose gravel / dirt roads. Drive with due regard w/ space between vehicles.	
Fire #252 / #259	Footing in duff / forest litter / tundra. 4' ash pits.	Ensure three points of contact, evaluate depth of ash pits before stepping in ash. Sheath all hand tools.	
Fire #259	SNAGS / Tree root systems are weakened, interwoven and shallow.	Eliminate the hazards with qualified sawyers. Avoid hazards by designating "No Work Zones". Keep clear of bucket drops near trees/ snags.	
Fire #252 / #259	LCES	Elevations of 1,000 ft. or lower. Ensure a lookout is in place with good LCES.	
Fire #252 / #259	Rivers, streams and body of waters	These are not to be considered or used as a viable "safety zone". Establish a clear safety zone and escape route.	
Fire #252 / #259	Aircraft	Refer to page 61 in your IRPG for safely working in and around aircraft.	
Fire #252 / #259	Weather systems, Red Flag warnings and isolated thunderstorms.	Take shelter in a vehicle or building if possible. Find a low spot away from trees, keep your distance twice the tree height.	
Fire #252 / #259	Medical / IWI	Extended medical evacuation times. Consider early treatment and transport type. Review and understand the medical plan!	
Fire #252 / #259	Bears, Wolves, Moose	Do not feed the wildlife, travel with a partner at all times. If you encounter wildlife make yourself as big as possible, make noise and slowly back down.	
Fire #252 / #259	Firefighter mental and physical health	Ensure all personnel are engaged and are mentally and physically prepared for the tasks assigned.	
Fire #252 / #259	Watch-out - Transition Day	Its transition day, know where you are assigned, who you work for and what you are doing.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + Medical (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

4. EVACUATION PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location: [Click or tap here to enter text.](#)

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. .

8. ADDITIONAL INFORMATION: Updates/Changes, etc. [Click or tap here to enter text.](#)

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
