## INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b>	<b>2. Operational Period: DAY</b>	
DECEPTION PUP	Date/Time From: 06/30/2024 0630      SUN	Date/Time To: 06/30/2024 2300      SUN
<b>3. Objective(s):</b>		
<ol style="list-style-type: none"> <li>1. Incorporate sound risk management principles during decision processes in order to provide for firefighter and public safety.</li> <li>2. Provide protection to values at risk including structures, Native allotments, infrastructure and any other identified values.</li> <li>3. Maintain a coordinated communication and information effort to disseminate incident information to the media, public, stakeholders, cooperators, and other agencies.</li> <li>4. Identify, preserve and protect significant activity impacts.</li> <li>5. Where practicable and feasible, avoid disturbance of the vegetative mat, permafrost soil areas, and lichen-rich plant communities</li> <li>6. Provide all GIS Data and updates to the Known Sites database for the incident to the protection and jurisdictional agencies.</li> </ol>		
<b>4. Operational Period Command Emphasis:</b>		
<p>Task: Implement strategies and tactics that utilize a continuous, risk informed (values vs. risk) decision process for all phases of operations.</p> <p>Purpose: To provide incident personnel decisional space to evaluate and communicate hazards utilizing the risk management process given the current management of the incident.</p> <p>End State: Implement an adaptive command climate that allows for two way communication amongst all incident resources, which provides for a common operating picture to accomplish incident objectives.</p>		
<b>General Situational Awareness:</b>		
<ol style="list-style-type: none"> <li>1.Utilize active listening and ask clarifying questions.</li> <li>2.Be aware of large root burned trees that pose a significant hazard.</li> <li>3.Be mindful of low visibility due to smoke and adjust driving speed.</li> <li>3.Maintain positive interactions with local community and impacted stakeholders.</li> </ol>		
<b>5. Site Safety Plan Required?</b> Yes <input type="checkbox"/> No <input checked="" type="checkbox"/>		
<b>Approved Site Safety Plan(s) Located at:</b>		
<b>6. Incident Action Plan</b> (the items checked below are included in this Incident Action Plan):

Spot Forecast for **252 Deception Pup...**

**.DISCUSSION...**

High pressure aloft strengthens through early next week, supporting warmer and drier conditions. High temperatures top out near 80, accompanied by minimum RH values around 35 percent. Overnight RH recovery will be good. Ridgetop winds will be stronger than valley winds, especially on Monday. A thermal trough over the fire will support isolated thunderstorms over the fire area this evening, as well as Sunday and Monday.

**.SUNDAY...**

Sky/weather.....Mostly sunny (40-50 percent). Areas of smoke through the day. Isolated showers in the morning. Isolated thunderstorms through the day. Scattered showers in the afternoon.

CWR.....10 percent.

LAL.....2.

Max temperature.....Around 81.

Min humidity.....34 percent.

Wind (20 ft).....Light winds. Gusty and erratic winds expected near thunderstorms.

Ridgetop wind.....Northeast 6 to 8 mph in the morning becoming light after 1200 AKDT.

Inversion burnoff...Around 0800 AKDT.

**.SUNDAY NIGHT...**

Sky/weather.....Mostly cloudy (55-65 percent). Areas of smoke through the night. Scattered rain showers and isolated thunderstorms in the evening. Isolated rain showers overnight.

CWR.....10 percent.

LAL.....2.

Min temperature.....Around 54.

Max humidity.....97 percent.

Wind (20 ft).....Light winds becoming west around 5 mph overnight. Gusty and erratic winds expected near thunderstorms in the evening.

Ridgetop wind.....Light winds in the evening becoming northwest 6 to 8 mph around 0200 AKDT. Gusty and erratic winds expected near thunderstorms in the evening.

Inversion setup....Around midnight AKDT.

**.MONDAY...**

Sky/weather.....Partly sunny (60-70 percent). Areas of smoke. Scattered showers and isolated thunderstorms.

CWR.....10 percent.

LAL.....3.

Max temperature.....Around 78.

Min humidity.....37 percent.

Wind (20 ft).....West winds 8 to 10 mph. Gusty and erratic winds expected near thunderstorms.

Ridgetop wind.....West northwest 10 to 15 mph.

Mixing height.....500 ft AGL increasing to 5000 ft AGL in the late morning and afternoon. Gusty and erratic winds expected near thunderstorms in the evening.

Transport winds....West around 10 mph.

Inversion burnoff...Around 0800 AKDT.

Incident Action Plan Safety Analysis (ICS 215A)

<b>1. Incident Name:</b> Deception Pup (#252) / Flasco (#259)		<b>2. Incident Number:</b> AK-UYD-000252 / AK-UYD-000259	
<b>3. Date/Time Prepared:</b> Date: 06/29/2024      Time: 1800		<b>4. Operational Period:</b> Date From: 6/30/2024    Date To: 0630 Time From: 6/30/2024    Time To: 2300	
<b>5. Incident Area</b>	<b>6. Hazards/Risks</b>	<b>7. Mitigations</b>	
To fire area from Fairbanks, AK	Driving	Extended drive time w/ limit visibility and wildlife. Drive with headlights on at a speed conducive for road conditions.	
Fire #252 / #259	Driving	Paved roads w/ transitions to loose gravel / dirt roads. Drive with due regard w/ space between vehicles.	
Fire #252 / #259	Footing in duff / forest litter / tundra. 4' ash pits.	Ensure three points of contact, evaluate depth of ash pits before stepping in ash. Sheath all hand tools.	
Fire #259	SNAGS / Tree root systems are weakened, interwoven and shallow.	Eliminate the hazards with qualified sawyers. Avoid hazards by designating "No Work Zones". Keep clear of bucket drops near trees/ snags.	
Fire #252 / #259	LCES	Elevations of 1,000 ft. or lower. Ensure a lookout is in place with good LCES.	
Fire #252 / #259	Rivers, streams and body of waters	These are not to be considered or used as a viable "safety zone". Establish a clear safety zone and escape route.	
Fire #252 / #259	Aircraft	Refer to page 61 in your IRPG for safely working in and around aircraft.	
Fire #252 / #259	Weather systems, Red Flag warnings and isolated thunderstorms.	Take shelter in a vehicle or building if possible. Find a low spot away from trees, keep your distance twice the tree height.	
Fire #252 / #259	Medical / IWI	Extended medical evacuation times. Consider early treatment and transport type. Review and understand the medical plan!	
Fire #252 / #259	Bears, Wolves, Moose	Do not feed the wildlife, travel with a partner at all times. If you encounter wildlife make yourself as big as possible, make noise and slowly back down.	
Fire #252 / #259	Firefighter mental and physical health	Ensure all personnel are engaged and are mentally and physically prepared for the tasks assigned.	
Fire #252 / #259	Watch-out - Transition Day	Its transition day, know where you are assigned, who you work for and what you are doing.

## BURN INJURIES

---

Burn injuries range from minor burns that can be taken care of with basic first aid on the fireline to life-threatening injuries that require complex treatment and surgical teams at regional burn centers. Due to recent changes in both technology and the American Burn Association referral guidelines, NWCG has updated their burn protocol recommendations which can be found on the [NWCG website](#) and in the current *Interagency Standards for Fire & Fire Aviation Operations (Red Book)*. Firefighters should familiarize themselves with these new protocols.

A burn injury that is beyond basic first aid treatment should be sent to the nearest emergency department for evaluation. Any life-threatening issues such as airway, pain control, and fluid resuscitation can, and should, be treated at a local emergency department. Bypassing local emergency departments to go directly to regional burn centers can put the patient at risk, delay initial treatment, and result in unnecessary travel and risk to both the patient and others. Of note, if a local EMS/aeromedical resource responds and transports the patient, they will follow their destination protocols.

In the emergency department, a licensed independent provider will determine what care should be initiated. This may include any of the below:

- Immediate transfer to a burn center after stabilization
- Remote (tele) consultation with a burn center
- Treatment and referral to local primary care or wound care

The NWCG burn protocol has a flow sheet that addresses the processes in the emergency department as well as a handout that can be provided to the physician to help guide treatment for our firefighters.

When a patient does not need emergent transfer to a burn center it is common for burns to continue to evolve and develop over the course of days to weeks. This means that treatment does not end after the initial emergency department visit. It is imperative to follow the directions from the emergency department and attend all follow-up appointments. All burn patients being discharged from an emergency department should receive/request a follow-up referral.

### Discussion Items:

- What does a minor burn that could be taken care of with first aid look like?
- What would your crew do if they had a member sustain a large burn on the hand? Consider initial treatment by your crew.
- When would you activate EMS/IWI? Which Emergency Room would they go to?

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> – 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary.</b> <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> – 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + Medical <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

**4. EVACUATION PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location: [Click or tap here to enter text.](#)

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. .

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc. [Click or tap here to enter text.](#)

**REMEMBER:** Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

# FINANCE MESSAGE:
