INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Nelchina Glacier Fire	2. Operational Period: Date From: 07/12/2025 to 07/15/2025 Time From: 0600 Time To: 2230																				
3. Objective(s): <u>Leader's Intent</u> Task- Secure holding lines to 100' and backhaul resources and equipment from the fire in a safe and efficient manner. Purpose- To bring the fire to a point within the capacity of the local unit to manage. End State- Fire is in patrol status where it can remain unstaffed and have the majority of resources and equipment off of the incident.																					
<u>Management Objectives</u> 1. Provide for the safety of fire fighters and the public. 2. Work with the Jurisdictional agencies to identify objectives and constraints as fires are prioritized and engaged. 3. Provide protection to values at risk including structures, Native Allotments, Infrastructure and any other identified values. 4. Maintain a coordinated communication and information effort to disseminate incident information to the media, public, stakeholders, cooperators and other agencies. 5. Adhere to Specific Objectives and Coarse of Action identified in the WFDSS. 6. Provide all GIS Data for the incident to the Protection Agency.																					
<u>Operational Objectives</u> 1. Provide for firefighter and public safety. 2. Hold fire to current footprint. 3. Manage the efficient drawdown of resources and direct suppression operations. 4. Employ rotary wing aircraft to support operations and provide for safety of assigned personnel. 5. Repair all damages caused by suppression operations.																					
<u>General Situational Awareness</u>																					
5. Site Safety Plan Required? Yes ☐ No																					
Approved Site Safety Plan(s) Located at:

INCIDENT SAFETY MESSAGE

Incident: Nelchina Glacier
Operational Period: 07/08/2025-07/11/2025

Mop-Up Safety

Brief from Page 103 - 105 of your Fireline Handbook

Major Hazards & Risks:

Driving – Obey the Posted Speed limit, Use Seatbelts and Headlights

Steep Terrain – Rolling Material, Slips, Falls

Light Flashy Fuels – Most Tragedy Fires Occur in Light Fuel Types

Establish Safety Zones and Escape Routes

Snakes and Stinging Insects

ATTITUDE/COMPLACENCY- affects our judgment and how we respond to hazards on the fireline such as rolling rocks or even driving. We get used to a particular Division and think it will be the same as yesterday, but sometimes it's not the same. Conditional changes occur on every shift.

THERE IS STILL FIRE OUT THERE!

STEEP TERRAIN- The elevation and steep terrain can significantly reduce your physical capacity. You need to shorten your ESCAPE ROUTE times by 50%. Due to unburned fuels on steep terrain SAFETY ZONES are needed. These zones MUST be of adequate size and space and be reachable by all personnel.

Demobilization Driving – Take Frequent Driving Breaks, No Alcohol Use!

TRANSPORTATION- ROAD HAZARDS are around the very next corner- so BUCKLE UP- USE HEADLIGHTS, USE BACKERS, CALM DOWN and GO SLOW. Fire vehicles should clean windshields regularly!

Spot Forecast for Nelchina Glacier Fire...SOA DOF National Weather Service Anchorage AK 803 PM AKDT.

.DISCUSSION... Wetting rains and low cloud cover will persist over the forecast area through early to mid morning Tuesday. The storm system responsible for the rain then begins to move east through the day Tuesday, with rain tapering off to scattered showers along with some breaks of sunshine through slowly diminishing cloud cover. With an unstable airmass lingering over the forecast area, any additional sunshine in the afternoon hours could lead to further surface heating and result in a redevelopment of scattered showers for late Tuesday afternoon and evening. As the storm moves east on Tuesday, winds through Chickaloon and Tahnetta Passes are expected to increase, possibly reaching all the way to Eureka and the fire location for late Tuesday afternoon and evening. While there is low confidence in the gusty winds reaching all the way to the fire location, occasional wind gusts near 20 mph cannot be ruled out for tomorrow afternoon/evening. Clear and dry conditions will prevail for Wednesday as temperatures climb back into the lower 60s with min RH values falling into the lower 40 percent range.

TUESDAY... Sky/weather.....Mostly cloudy (75-85 percent). Numerous rain showers through around noon. Then scattered rain showers in the afternoon. CWR.....40 percent in the morning diminishing to 10 in the afternoon. Chance of pcpn.....60 percent diminishing to 40 in the afternoon. Tstm Coverage.....None. Max temperature.....Around 57. Min humidity.....58 percent. Wind (20 ft).....Southwest winds increasing to 6 to 12 mph by early afternoon. Occasional gusts 12 to 20 mph possible mid afternoon through early evening. Mixing height.....Around 400 ft AGL in the morning rising to around 2800 ft AGL. Transport winds.....West around 7 mph in the morning becoming southwest 8 to 15 mph in the afternoon. Pcpn amount.....0.08 inches.

TUESDAY NIGHT... Sky/weather.....Partly cloudy (40-50 percent). Scattered rain showers in the evening, then isolated rain showers overnight. CWR.....0 percent. Chance of pcpn.....40 percent. Tstm Coverage.....None. Min temperature.....Around 42. Max humidity.....93 percent. Wind (20 ft).....Southwest winds 6 to 12 mph. Occasional gusts 12 to 20 mph possible through early evening. Mixing height.....2800 ft AGL in the evening falling to around 800 ft AGL overnight. Transport winds.....Southwest 8 to 15 mph in the evening becoming west around 10 mph overnight. Pcpn amount.....0.02 inches.

WEDNESDAY... Sky/weather.....Mostly sunny (40-50 percent). CWR.....0 percent. Chance of pcpn.....0 percent. Tstm Coverage.....None. Max temperature.....Around 63. Min humidity.....44 percent. Wind (20 ft).....Southwest winds 4 to 8 mph. Mixing height.....Around 600 ft AGL in the morning rising to 4600 ft AGL. Transport winds.....Southwest 10 to 15 mph. Pcpn amount.....0.00 inches.

INCIDENT RADIO COMMUNICATIONS PLAN (ICS 205)

1. Incident Name: Nelchina Glacier		2. Date/Time Prepared: Date: 7/2/25 Time: 1930			3. Operational Period: Date From: 7/03/25 Time From: 0500 Date To: 7/05/25 Time To: 2230					
4. Basic Radio Channel Use:										
Zone Grp.	Ch #	Function	Channel Name/Trunked Radio System Talkgroup	Assignment	RX Freq N or W	RX Tone/NAC	TX Freq NorW	TX Tone/NAC	Mode (A, D, or M)	Remarks
10	4	CMD	SOUTH 4	CMD	ALMR		ALMR			Use as CMD channel & comma with Coastal Dispatch.
10	10	Tactical	V TAC 11	Division B	151.137 5		151.137 5			
10	11	Tactical	V TAC 13	Structure Group	158.737 5		158.737 5			Use SOUTH 4 as alternative.
10	12	Tactical	V TAC 14	Division E	159.472 5		159.472 5			
10	15	Air to Ground Primary	A/G 1	Air Resources	166.637 5		166.637 5			
5. Special Instructions: Must use dual mode scan in order to scan SOUTH 4 with other channels. Instructions for Dual Mode Scan: Menu - DMS List Edit - Select Zone - Select desired channels - Escape out - settings should save Scan & Priority switches must be in the OFF position Dual mode scan switch turned to 0 position (switch located under channel select knob) Dual mode scan should now be working. Special note - Dual Mode scan will scan multiple zones, previous zones set to Dual Mode scan must be cleared.

In the event of a medical incident the first responder on scene should establish command and relay an initial size up to their direct supervisor using SOUTH 4. Request a response from the nearest medical personnel to your location. Fill out the attached 8-line and relay to direct supervisor.

Request a proper response for medical treatment or transportation.

Determine if 911 should be activated. Ground ambulance is approximately 1-1 .5 hours away. Life med flight is approximately 45 min away.

Call 911 for any incident where transport will be necessary or the patient requires a higher level of care than medical personnel on scene.

To communicate with responding Ground Ambulance via radio select: Menu, 8: Zone, 8: MATSU1, ENT, Menu, 1: Channel Select, 21: MSB East, ENT.

Alaska Rescue Coordination Center - Military Assets - 907-551-7230. Call 911 let MATCOM/Coastal Dispatch coordinate with Alaska RCC

MEDICAL PLAN (ICS 206 WF)

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	☐ RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented. ☐ YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes. ☐ GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)		
Transport Request			Air Ambulance / Short Haul / Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat./Long. (WGS84)		
Incident Name			Geographic Name + "Medical" (Ex: Trout Meadow Medical)		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)		
Patient Care			Name of Care Provider (Ex: EMT Smith)		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient) Patient Assessment: See IRPG PAGE 106			VITAL SIGNS Age _____ Weight _____ Level of Consciousness: Alert and Oriented to: Person Place Time Event Responsive to: Verbal Stimulus Pain Stimulus Unresponsive Breathing: Not Normal Difficult/Labored Rate _____ Pulse Rate: Absent Present: _____/minute Skin Color: Normal Pale Bluish Red Skin Moisture: Normal Dry Moist Profuse Sweating Skin/Body Temp: _____°F Normal Hot Cold Cool Pupils: Equal and Reactive Unequal Dilated Constricted Blood Pressure: SYS _____/DIA _____ Oxygen Saturation with Pulse Oximeter (SaO2): _____ Blood Glucose Level: _____		
Treatment:					
4. TRANSPORT PLAN: Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat./Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS: Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
