INCIDENT OBJECTIVES (ICS 202)

CHELLY True Forms	INCIDI	ENI ODJECI	100 100	202)		
S. Objective(e): Leaders Intent: Implement a full suppression strategy on the Shelly Fire. Values at risk include human safety, private timberlands, communities, cultural, and wilderness areas. Apply factics that offer the highest probability of success. All incident assigned personnel should be prepared to take appropriate actions regarding: Personal safety and the safety of otheres, including driving slowly and defensively. Professional behavior, conduct, and timely / affective communication. Manage fatigue by taking breaks and maintaining work / rest cycles. Provide the highest level of customer service to all involved with or impacted by the Shelly Fire. Management Objectives Provide for firefighter and public safety through hazard recognition and application of the risk management process. Coordinate all public information to provide timely and continuous information to affected agency partners, cooperators, and to the public. Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources. Maintain relationships with partner agencies, elected officials, organizations, tribes, neighboring landowners, and community ground members. Control Objectives To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the Shelly Fire: North of the Salmon River Road South of of Wooley Creek Shackle ford Creek East of the Yellow Jacket Ridge, English Peak, and Big Meedow Creek drainage West of Pacific Creet-Treil Patters on Creek drainage West of Pacific Creet-Treil Patters on Creek drainage West of Pacific Creet-Treil Patters on Creek drainage Incident Action Plan County Health Message Signature: Authum	1. Incident Name:	2. Operational Period	d: Date From:	7/7/2024	Date To:	7/8/2024
Leaders Intent Implement a full suppression strategy on the Shelly Fire. Values at risk include human safety, private timberlands, communities, cultural, and wildemess areas. Apply tactics that offer the highest probability of success. All incident assigned personnel should be prepared to take appropriate actions regarding: Personal safety and the safety of otheres, including driving slowly and defensively. Professional behavior, conduct, and timely / effective communication. Manage fatigue by taking breaks and maintaining work / rest cycles. Provide the highest level of customer service to all involved with or impacted by the Shelly Fire. Management Objectives Provide for firefighter and public safety through hazard recognition and application of the risk management process. Coordinate all public information to provide timely and continuous information to affected agency pertners, cooperators, and to the public. Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources. Maintain relationships with partner agencies, elected officials, organizations, tribes, neighboring landowners, and community ground members. Control Objectives To limit fire growth and to prevent the fire from spreading to private property, sumounding communities and values at risk, keep the Shelly Fire: North of the Salmon River Road South of of Wootley Creek Shackle for all Creek East of the Yellow Jacket Ridge, English Peak, and Big Meedow Creek drainage West of Racific Creet-Treit Patters on Creek of Training Message West of Racific Creet-Treit Patters on Creek of Training Message ICS 204			Time From:	0700	Time To:	0700
- Implement a full suppression strategy on the Shelly Fire. Values at risk include human safety, private timberlands, communities, cultural, and wildemess areas. Apply factics that offer the highest probability of success. - All incident assigned personnel should be prepared to take appropriate actions regarding: - Personal safety and the safety of otheres, including driving slowly and defensively. - Professional behavior, conduct, and timely / effective communication. - Manage fatigue by taking breaks and maintaining work / rest cycles. - Provide the highest level of customer service to all involved with or impacted by the Shelly Fire. Management Objectives - Provide for firefighter and public safety through hazard recognition and application of the risk management process. - Coordinate all public information to provide timely and continuous information to affected agency partners, cooperators, and to the public. - Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources. - Maintain relationships with partner agencies, elected officials, organizations, tribes, nelighboring landowners, and community ground members. - To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the Shelly Fire: - North of the Salmon River Road - South of of Wooter Greek Shackle ford Creek - East of the Yellow Jacket Ridge, English Pesk, and Big Meadow Creek drainage - West of Pacific Creet Freit Pathers on Creek drainage - West of Pacific Creet Freit Pathers on Creek drainage - West of Pacific Creet Freit Pathers on Creek drainage - Incident Action Plan - Incident	3. FIRE WEATHER FORECAST

FORECAST NO. 2

NAME OF INCIDENT: Shelly

PREDICTION FOR: Sunday July 7, 2024

UNIT: Klamath National Forest

TIME AND DATE

FORECAST ISSUED: 1900 Saturday 7/6/24

SIGNED: Julia E. Ruthford

Julia Ruthford – (530) 440-4898 Incident Meteorologist

*** Red Flag Warning this Afternoon & Evening and Excessive Heat Warning continues through Tuesday***

WEATHER DISCUSSION: The strong upper level ridge will continue to persist overhead bringing another day of very hot and unusually dry conditions to the Shelly Fire. A slight eastward shift in the ridge axis position will allow conditions in the afternoon to become unstable through a greater depth of the atmosphere as the low-level instability from the hot temperatures becomes aligned with increasing mid-level instability. Gusty NW winds will develop along ridges this afternoon & evening then shift to the NE tonight remaining breezy at ridge level but diminishing elsewhere. Afternoon Min RHs will fall to 5-10% with widespread poor RH recoveries tonight.

SUNDAY:

WEATHER: Continued very hot & extremely dry with increasingly unstable conditions in the afternoon.

MAXIMUM TEMPERATURE: Highs in the upper 80s ridges (6000-7000 ft), mid 90s slopes (5000 ft) and lower 100s in valleys (3000-4000 ft).

MINIMUM RELATIVE HUMIDITY: Following another night of very poor overnight RH recoveries to only around 15% along slopes & ridges, RHs will lower to 5-7% in valleys and 8-10% along ridges during the afternoon.

20 FOOT WINDS:

Valleys – Light downslope/down-valley winds becoming up-slope 3-5 mph mid to late morning then up-valley 5-8 mph early afternoon with NW gusts of 10-15 mph mid to late afternoon.

Ridges – Early morning E-NE winds 3-5 mph along ridges will become light up-slope by late morning with NW winds 5-8 mph early afternoon increasing to 8-12 mph with gusts localized of 20-25 mph by late afternoon.

STABILITY: Valley inversions lifting by mid-morning then becoming unstable by early afternoon with the potential for deep vertical mixing mid to late afternoon further enhanced as compared to Saturday.

CHANCE OF RAIN: 0% LAL: 1 SMOKE TRANSPORT WIND: Morning: Light NE Afternoon: NW 15-20 mph.

SUNDAY NIGHT:

WEATHER: Continued warm with strong thermal belts and poor RH recoveries.

MINIMUM TEMPERATURE: Mid 70s along slopes & ridges and upper 60s in valleys.

MAXIMUM RELATIVE HUMIDITY: 20-25% slopes & ridges and 30-40% valleys.

20 FOOT WINDS: NW winds of 10-15 mph with gusts of 20-25 mph along the ridges in the evening becoming NE 10-15 mph along ridges and downslope/down-valley 2-4 mph elsewhere after 2100.

STABILITY: Smoke accumulating in valleys and thermal belts.

CHANCE OF RAIN: 0% LAL: 1 SMOKE TRANSPORT WIND: NE 10-15 mph

MONDAY: Continued hot and dry though a few degrees cooler than the weekend with high temps ranging from the mid 80s along ridges to around 100 in the valleys. Min RHs will range from 11-14% with overnight RH recoveries around 25% along ridges and 40% valleys Monday night. Winds will diminish somewhat compared to the previous 2 days with ridge level W-NW winds 8-10 mph with localized gusts of 15-18 mph in the afternoon & evening.

OUTLOOK FOR TUESDAY THROUGH THURSDAY: A gradual eastward progression of the ridge will allow temps to continue cooling a degree or two per day from Tue-Thu but will still remain well above normal with RHs only moderating slightly. Strengthening onshore flow near the coast will bring a return to gustier afternoon and evening NW winds along the coast, especially Wed & Thu with a continued switch to NE breezes during the nights. Min RHs will remain in the lower teens Tue gradually increase into mid to upper teens Wed & Thu. Overnight RHs will see some minor improvement as well with ridge level recoveries increasing to 30-40% through the period.

Please email weather observations to julia.ruthford@usda.gov or text them to 530-440-4898. Thanks!

Timber	1-8	1-7	SB1	1-3	1-7

Live fuel moistures in shrubs and trees, having passed green-up phase.

FIRE BEHAVIOR

GENERAL:

- Greater activity today compared to yesterday due decreasing Rh's and fuel moistures. Pattern of late afternoon winds effecting ridgetop fire behavior in the afternoon-late afternoon, from gusty winds (see IMET forecast).
- Fire activity is being moderated by sparse fuels from the 2017 Wallow fire, expect areas with jackpot of heavier concentrations of dead & down fuels to be resistant to suppression. On steep slopes these will be potential source of rollout on steep slopes and uphill runs.
- Very poor nighttime relative humidity (Rh) recoveries (see Fire Wx Forecast) and hot dry conditions will
 dry out fuels increasing receptiveness to spotting and resistance of control. Expect increase availability
 of heavier dead fuels, such as logs and snags, to be ember receptors for short- and long-range spotting
 and threat to containment lines.

SPECIFIC:

North of Pointer Gulch (DIVS A & G): Fire will continue to spot in area north of Shotgun Gulch and NE-side of Pointer Gulch with uphill runs in afternoon. Watch out for roll-out and uphill runs. Monitor for fire/heat creeping through duff and heavy fuels near control features.

South of Pointer Gulch (DIVS T; Razor Ridge Area): Greatest activity in section 35, top two-thirds of Razor Ridge. Afternoon alignment of winds and heat along Razor Ridge and northside of Pointers Gulch can increase potential of spotting and spread to the SE up the drainage or spot over ridge into Flower Gulch.

AIR OPERATIONS:

Inversion in the morning, but skies clearing in the afternoon will improve air operations. Sunrise: 5:45am, Sunset: 8:47pm, Daylength: 15 hours, 01 minutes, 42 seconds (-1:00min)

SAFETY:

Be careful when working around fire weakened trees. Look up, around, and have a plan when working in and around active-fire weakened trees and post-fire snags for structural failure. Especially when winds increase or change direction!

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are <u>ALL</u> accountable for <u>SAFE</u> behaviors For Day/Night Operations: July 7, 2024

Heat Related Illnesses

O Heat becomes a problem when humidity, air temperature, and radiant heat combine with hard work to raise body temperature beyond safe limits. Sweat is your main defense. Everyone on the fireline must understand the importance of drinking water and replacing electrolytes often.

• Aircraft Safety

o It is essential that aviation operations be planned with consideration given to safety and operational efficiency. Missions can be accomplished safely and efficiently, provided that a high degree of planning, risk analysis, and management is applied. The success of a project or flight is affected by the ability to anticipate and influence events before they occur.

Heat Related Illness & Dehydration

- Drink Fluids throughout operational period, up to
 1.5 gallons per shift.
- Carry extra water on line and cache water at drop points
- Take Frequent breaks, minimum of 10 minutes every hour
- Recognize symptoms of HEAT RELATED ILLNESS which include
- Lack of energy
- Headaches, dizziness
- Lack of rest
- No hunger, poor eating habits
- Hot skin, and lack of sweating

Aircraft Safety

- Daylight hours are defined as 30 minutes prior to sunrise until 30 minutes after sunset. Hours may be limited because of low visibility conditions caused by smoke, shadows or other environmental conditions.
- ANY unsupervised day flying will be restricted to 30 min after sunrise and 30 minutes before sunset.
- Follow "Aviation Watch-Out Situations" on page 62, IRPG.
- Don't plan on air resources for medical transport or resupply.
- Refer to page 74, IRPG for directing bucket drops.
- Ensure positive communication with all air resources.

FINANCE MESSAGE

Fire Name: Shelly Fire

Fire Number: CA-KNF-005159

Accounting Code: P5 R18J (0505)

Email: 2024.shelly.finance@firenet.gov

Incident Phone: 530-536-0781

Finance Documents Needed upon "Check In" (If Not Already Submitted):

Please ema	il these documents or scan the	QR Code below, attach 8	submit
 FED Equipment/ Crews: Manifest - showing employment type (GS or WG) or AD rates if applicable 	Overhead: AD/Casual Hire Form If regular Agency please ensure "GS" or "WG" is written on your CTR	Contract Equipment/ Contract Crews: Agreement Manifest Resource Order Inspections	Cooperator: Cooperative Agreement Resource Order

When emailing finance:

- Overhead/FED: subject line: TIME, Resource #, Resource Name
- Equipment/Cooperator: subject line: EQTR, Resource #, Resource Name

Prior to your demob date, please contact Finance via email to expedite the demob process.

Upon submittal of your final CTR/Shift Tickets, Finance will email you copies of your pay

documents for review and signature.

Local Government Resources & CalOES on CFAA:

Check-In

SHELLY INCIDENT TRAINING MESSAGE

All trainees on the incident need to

check-in with the Training Specialist (TNSP)

- Training Specialist is located on "Main Street" at the ICP
- Blank forms and a "drop box" for registering are in the Training Trailer.
- You can also register on mobile devise using the link above

John Fakehany

Training Specialist

C# 909-6939748

Email: John_Fakehany@Firenet.gov

Logistics Hours Shelly Fire

Caterer Hours: Breakfast: 0600 - 0900

Dinner: 1800 - 2130

Shower: 0500-1200, 1400 - 2300

Supply: 0700-2100

Laundry: 0500-2200

Fuel Tender 0600-1300, 1500-2200
