INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center; margin-top: 10px;">SHELLY</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">7/11/2024</td> <td style="border: none;">Date To:</td> <td style="border: none;">7/12/2024</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0700</td> <td style="border: none;">Time To:</td> <td style="border: none;">0700</td> </tr> </table>	Date From:	7/11/2024	Date To:	7/12/2024	Time From:	0700	Time To:	0700
Date From:	7/11/2024	Date To:	7/12/2024						
Time From:	0700	Time To:	0700						

3. Objective(s):

Leaders Intent

- Implement a full suppression strategy on the Shelly Fire. Values at risk include human safety, private timberlands, communities, cultural, and wilderness areas. Apply tactics that offer the highest probability of success.
- All incident assigned personnel should be prepared to take appropriate actions regarding:
 - Personal safety and the safety of others, including driving slowly and defensively.
 - Professional behavior, conduct, and timely / effective communication.
 - Manage fatigue by taking breaks and maintaining work / rest cycles.
 - Provide the highest level of customer service to all involved with or impacted by the Shelly Fire.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate all public information to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Maintain relationships with partner agencies, elected officials, organizations, tribes, neighboring landowners, and community groups and members.

Control Objectives

- To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the Shelly Fire:
 - North of Sawyer's Bar Road
 - South of Scott River Road
 - East of Ukonom Ranger District
 - West of Highway 3

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

6. Incident Action Plan

FIRE WEATHER FORECAST

FORECAST NO. 6

NAME OF INCIDENT: Shelly

PREDICTION FOR: Thursday July 11, 2024

UNIT: Klamath National Forest

TIME AND DATE

SIGNED: Julia E. Ruthford

FORECAST ISSUED: 1900 Wednesday 7/10/24

Julia Ruthford – (530) 440-4898
Incident Meteorologist

WEATHER DISCUSSION: Upper level ridging will continue to bring hot, dry and unstable conditions while limited mid level moisture continues to gradually filter in aloft and further destabilizes the atmosphere. This combination will increase the potential for PyroCumulus to develop on top of the column if the fire produces enough heat. An onshore pressure gradient combined with a heat low inland will bring gusty W-SW to W-NW ridge level and down-canyon winds this afternoon & evening combined with continued dry afternoon Min RHs.

THURSDAY:

WEATHER: Hot, dry & unstable. Sunny but smoky with afternoon cumulus build-ups possible along the Mtns.

MAXIMUM TEMPERATURE: Highs ranging from the mid 80s along ridges to upper 90s valleys.

MINIMUM RELATIVE HUMIDITY: 14-17% in valleys and 18-21% along ridges.

20 FOOT WINDS:

SW of the PCT – Up-slope winds of 3-5 mph developing late morning will become SW up-canyon 7-11 mph early afternoon with gusts of 14-18 mph possible mid to late afternoon. A shift to W-NW winds of 15-20 mph along ridges will bring battling winds in the afternoon & evening.

NE of the PCT – Up-slope winds of 2-4 mph becoming E-SE to E-NE up-canyon 4-7 mph winds early afternoon then reversing to SW to NW winds around 1400 and increasing to 14-18 mph with localized gusts to 25 mph late afternoon through the evening along ridges and down-canyon winds of 5 to 7 mph drainage bottoms.

Scott Valley – East winds 3-5 mph in the morning becoming NW 5-7 mph around 1200 and increasing to 10-15 mph with gusts to 20 mph mid afternoon and continuing into the evening.

STABILITY: Smoky valley inversions lifting late morning but hazy smoke remaining over the area despite unstable afternoon conditions. Deep vertical mixing is possible mid to late afternoon with enhanced potential for column growth due to the increased availability of mid level moisture supporting PyroCumulus development.

CHANCE OF RAIN: 0% **LAL:** 1 **SMOKE TRANSPORT WIND:** SE 3-5 mph becoming SW 10-15 mph

THURSDAY NIGHT:

WEATHER: Continued warm with mid slope thermal belts and moderate to poor RH recoveries.

MINIMUM TEMPERATURE: Lower 70s along slopes & ridges and in the 60s in valleys.

MAXIMUM RELATIVE HUMIDITY: Around 40-45% slopes & ridges and 50-60% valleys.

20 FOOT WINDS: NW winds 15-20 mph diminishing around 2100 then becoming N-NE 10-15 mph along ridges with downslope/down-valley 2-4 mph elsewhere.

STABILITY: Dense smoke settling into valleys overnight including Scott Valley.

CHANCE OF RAIN: 0% **LAL:** 1 **SMOKE TRANSPORT WIND:** N 10-15 mph becoming light SE.

FRIDAY: A few degrees warmer on Friday with taller afternoon cumulus build-ups possible along the mountains and breezy westerly wind developing again in the afternoon. High temps ranging from the mid to upper 80s along ridges and upper 90s to low 100s in the valleys. Min RHs in the lower teens with overnight RH recoveries around 25% along slopes and ridges and around 40% valleys. Terrain driven up-slope and up-canyon winds will continue with NW down-canyon winds of 14-18 mph locally gusting to 25 mph late afternoon into the evening.

OUTLOOK FOR SATURDAY AND SUNDAY: Mid level moisture surging northward across California this weekend combined with the hot, dry & unstable conditions will bring the potential for thunderstorm activity in the fire vicinity. Model uncertainty remains about how far westward the moisture will extend with isolated dry thunderstorms possible on Saturday if enough mid-level moisture reaches the area. An upper level disturbance crossing NW California Saturday night or Sunday will bring the potential for high based, fast moving nocturnal thunderstorms or if the timing of trough is slower, isolated thunderstorm chances Sunday afternoon. Gustly SW to NW afternoon & evening winds along ridges and through channeled terrain will continue with Min RHs in the lower to mid teens and overnight RH recoveries remaining poor along slopes and ridges.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 05	TYPE OF FIRE: Wildfire
FIRE NAME: Shelly	OPERATIONAL PERIOD: 07/11 Day/Night
DATE ISSUED: July 10, 2024	TIME ISSUED: 1830
UNIT: CA-KNF	SIGNED: /s/ Patrick Doyle, FBAN 530-310-3552

WEATHER SUMMARY (See Fire Wx Forecast)

TOPOGRAPHY: Elevations: 3900'-6,700' Slopes: 0%-100+% (0°-68°degrees)

FUELS: Key Fuel Models, Fuel Moistures, FDR

Grass/Shrub	GS2
Timber	TU5
FDFM (1hr)	4 % NC*
10-hr (%)	5 % NC*
100-hr (%)	6 % NC*
1000-hr(%)	<10 %*
Live Fuels (Seasonal grasses)	¾ to fully cured

Forecasted PSA04:
NFDR (Y)
ERC: 61 (down 2)
BI: 41 (down 1)

**Note: FM %s in left column have been adjusted relative to Blue Ridge values.*

Blue Ridge – KNF (40203) / Predictive Service Area: NC04 -
Northwestern Mtn.
NC=No change, ▲up, ▼down

Fire Behavior (for new starts or unburned areas)

Probability of Ignition: 92% Unshaded / 76% Shaded
Spotting Distance: up to 0.5 mile (short range)
Values below use **40% slope** and assume upslope spread.

Fuel Model	Day		Night		
	FL (Ft.)	ROS (Ch/Hr)	Fuel Model	FL (Ft.)	ROS (Ch/Hr)
Grass/Shrub	5-21	23-39	GS2	1-17	1-39
Timber	1-10	1-16	TU5	1-10	1-16

Live fuel moistures in shrubs and trees, having passed green-up phase.

FIRE BEHAVIOR

GENERAL:

- Expect fire activity in the morning to be primarily diurnal; slowly heating in the morning increasing upslope/updrainage winds, with transition in the afternoon to a W-SW to W-NW ridge-level influence until late evening. Take this into consideration for any torching and spotting.
- Fuels are very dry and receptive. Keep an eye out for areas where rollout, spotting, or slope-reversals can lead to uphill runs, torching, or crown runs.
- BI and ERC fire danger indices for Predictive Services Area (PSA) NCO4-Northwest Mountains continue setting new maximum thresholds for time of year. Dead fuel moistures critically low; 100-hr and 1000-hr dead fuel moistures setting new minimums for PSA NC04.
- Watch out for when the smoke inversion breaks. If it does expect fire activity increase with potential for extreme fire behavior and spread to follow well into the evening. Until smoke inversion lifts or breaks, it will likely keep a lid on the fire, even though it will still be active.

SPECIFIC:

DIVS A, B, C, D, E, F, G: Active fire growth to the east & west-ends of the Kidder and Patterson Creeks. Surface spread, backing, flanking, with occasional single- and group- tree torching. Primary fire growth will be driven by fuel continuity, with daytime diurnal winds, and afternoon local ridgetop winds (W-SW to NW).

DIVS T: Fire spread in the area west of Shelly lake and backing into Pointers Gulch. Fire activity is being moderated by smoke inversion and sparse fuels from the 2017 Wallow fire. Fire spread will be dictated by fuels concentration, connectivity and thru spotting or roll-out into receptive fuels.

AIR OPERATIONS:

Inversion in the morning, air operations impacted by smoke.

Sunrise: 5:48am, Sunset: 8:45pm, Daylength: 14 hours, 57 minutes, 07 seconds (-1:13min)

SAFETY:

One of our watch out situations is having unburned fuel between you and the fire. When working on spots or indirect line ensure escape routes and safety zones are identified and make them known.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day Operations: **July 11, 2024**

- Instructions and assignments not clear:

The Incident Command System (ICS) is used to provide uniform chain of command on all incidents. This Watch Out shows an engine crew working in a counterproductive manner, without clear instructions towards an expected outcome.

It is important for the firefighter who is receiving instructions to be mindful of the following during the briefing:

- Did you really listen? What do you do to make yourself pay attention to everything being said?
- Did you understand the assignment, location, and the nature and location of hazards? Do you expect to figure it out for yourself when you get out there or do you step forward and ask questions?
- You must know the location of the assignment and:
 - What is to be done.
 - Who you are to report to and how often to report.
 - Expectations for completing the assignment.
 - Hazards.
 - Communication plan frequencies.
 - Weather and fire behavior.
 - Status of adjoining forces.

Shelly Fire Incident Specific Safety:

- **Driving-** Be cognoscente of the public trying to visit the fire area and making unpredictable driving decisions. Highway 3 is a heavily traveled road and has a history of vehicle accident fatalities.
- **Driving-** Incident base camp has a 5-mph speed limit. Your assignment does not dictate that limit!
- **Access and Egress-** Many of the county, forest and private roads are one way in and one way out. Have a plan to egress prior to entering these narrow, soft shoulder roads.
- **Communication-** Before leaving for your line assignment, confirm your radio frequencies and test the system so you are able to fix a problem while in camp.
- Shelly Communications is up and running and the command frequencies are linked. Please, when you are about to talk on the radio, push the press to talk button, not the press to think button.

ASSIGNMENT LIST (ICS 204 WF)

CONTROLLED UNCLASSIFIED

Request Procedure for These Aircraft:
Communications/Dispatch on Command,
24hr Holist
G841
Redding

General Remarks, Safety Notes, Hazards, Air Operations Special Equipment, etc.
*All Aircraft orders go to Scott Valley Helibase
*Be aware of retardant avoidance areas, 300ft away from waterways and bodies of water.
*Sanitize Buckets before changing water sources.
*Clear drop area/line before initiating drop sequence.
*Be cognizant of all overhead and environmental hazards while working with Aircraft.
All GPS is to be collected in DP MM.MMM*
*ALL water and retardant picks/drops need to be tracked and recorded
*Aviation daily cost to: Scottvalleyhb2023@gmail.com

HELICOPTER EXTRACTION OPERATIONS

The intent of helicopter insertion/extraction operations is to facilitate the movement of personnel to and from inaccessible areas. These operations are not meant to be a medical transport resource; life flight and ground transportation should always be ordered in addition to the extraction aircraft and crew.

ORDERING:

- On-scene EMT and/or Incident within Incident IC determines that an extraction helicopter is needed and places the order through the pre-established procedures:
 - Division Supervisor
 - Incident Communications
 - Dispatch Center
- When ordering extraction aircraft provide the following information:
 - Location (Lat/Long) of patient
 - Known Hazards
 - Wind Speed and Direction
 - Terrain
 - Incident Updates

SITE SELECTION:

- The helicopter crew will confirm the extraction location when they arrive on scene. However, a general rule is any clearing that is 10'x10' with visible sight lines to the sky is a suitable extraction site.
- If the terrain is steep, excavating a platform or shelf can make it easier for patient packaging.

QR Code-Short-haul Site Selection Video

CONSIDERATIONS:

- Short-haul and hoist are safe and efficient operations for extracting injured personnel of any severity including "Green" patients.
- Ensure area is clear of non-essential items, hazards, and personnel.
- Rotor wash may affect overhead hazards and blowing dust/debris can create brown out conditions or influence fire behavior.
- Aerial Supervision is valuable for coordinating aviation medevac/extraction missions and should be ordered if available and not currently present.
- The aircrew will make the final assessment of the mission. Always have a contingency plan in case a helicopter cannot complete the request.

DEFINITIONS:

Rescue Hoist: A cable winching device mounted to the helicopter that can lower/raise persons attached to a cable.

- Common cable lengths are 250-300 feet.

Short-haul: To insert or extract one or more persons suspended on a fixed line beneath a helicopter.

- Common short-haul line lengths are 100, 150, and 250 feet. The lines can also be connected for a longer line if the situation requires it.

FINANCE MESSAGE

SHELLY INCIDENT JULY JULY 11, 2024

HUMAN RESOURCE MESSAGE

Communication is a two-way street. When communication becomes a one-way, it becomes a traffic jam and turns into an issue. Some examples are:

- Someone irritating you and getting on your nerves, but you don't say anything until it boils over and causes a crash.
- A misunderstanding of what someone was trying to communicate to you, but you didn't take the time to clarify what was said and just stewed about it.
- It can be like the telephone game. It starts with specific information and by the time it gets to the end it's very different than what was first communicated.
- You have an expectation an individual should have known about a situation when you didn't communicate about it at all. We're not clairvoyant.

Whatever it is, clear the communication lines in a respectful manner and make it a smooth safe flowing two-way street

Feel free to call/text or come by the HRSP trailer.

Adam Alvarez – HRSP - (707) 373-8715

Incident Training Program

Trainee/ Mentor Activities

The following contains information for both the trainee and trainer/ evaluator regarding the Incident Training Program. The information is intended to assist you in planning your incident activities.

1. Trainee and Mentor/ Evaluator register with the Training Specialist (TNSP) with QR code above.
2. It is only necessary to follow up with the TNSP during your assignment if you have any significant issues... ie: Changes in assignment/trainer, problems with the assignment etc.
3. The trainee and evaluator must “close-out” with the TNSP prior to DEMOB. The close out process involves:
 - The Trainer completing an Individual Performance Evaluation (ICS 225 or 226)
 - The Trainee will complete an Exit Interview form. Forms are available at the TNSP desk.
 - The evaluator should have all work completed in the position task book at the time the training assignment close-out including a recommendation as to the outcome of the assignment, ie; recommend certification, needs more assignments.
4. If you reach a point that as much work has been done in the position task book as possible, on this incident, you may perform the close-out process with the TNSP saving you time and a potential waits in line at time of DEMOB.
5. Pay close attention to TNSP IAP messages and briefing announcements concerning time lines and issues regarding the Incident Training Program.

John Fakehany

Training Specialist

MEDICAL PLAN (ICS 206 WF) CIIMT 12

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. <i>(WGS84)</i>		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG PAGE 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): <i>(Descriptive Location (drop point, intersection, etc.) or Lat. / Long.)</i> Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication :</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: <u>Considerations:</u> If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead. .					
8. ADDITIONAL INFORMATION: Updates/Changes, etc. .					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively. .
