# INCIDENT OBJECTIVES (ICS 202)

<b>1. Incident Name:</b> <p style="text-align: center;">SHELLY</p>	<b>2. Operational Period:</b> <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">7/13/2024</td> <td style="border: none;">Date To:</td> <td style="border: none;">7/14/2024</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0700</td> <td style="border: none;">Time To:</td> <td style="border: none;">0700</td> </tr> </table>	Date From:	7/13/2024	Date To:	7/14/2024	Time From:	0700	Time To:	0700
Date From:	7/13/2024	Date To:	7/14/2024						
Time From:	0700	Time To:	0700						

**3. Objective(s):**

**Leaders Intent**

- Implement a full suppression strategy on the Shelly Fire. Values at risk include human safety, private timberlands, communities, cultural, and wilderness areas. Apply tactics that offer the highest probability of success.
- All incident assigned personnel should be prepared to take appropriate actions regarding:
  - Personal safety and the safety of others, including driving slowly and defensively.
  - Professional behavior, conduct, and timely / effective communication.
  - Manage fatigue by taking breaks and maintaining work / rest cycles.
  - Provide the highest level of customer service to all involved with or impacted by the Shelly Fire.

**Management Objectives**

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate all public information to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Maintain relationships with partner agencies, elected officials, organizations, tribes, neighboring landowners, and community groups and members.

**Control Objectives**

- To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the Shelly Fire:
  - North of Sawyer's Bar Road
  - South of Scott River Road
  - East of Ukonom Ranger District
  - West of Highway 3

**5. Site Safety Plan Required?** Yes  No

**Approved Site Safety Plan(s) Located at:**

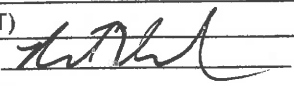

**6. Incident Action Plan**

# FIRE WEATHER FORECAST

FORECAST NO. 8

NAME OF INCIDENT: Shelly

PREDICTION FOR: Saturday July 13, 2024

UNIT: Klamath National Forest

TIME AND DATE

FORECAST ISSUED: 1900 Friday 7/12/24

SIGNED: Jonathan O'Brien/Julia E. Ruthford  
Jonathan O'Brien Julia Ruthford - (530) 440-4898  
IMET (t) IMET

---

**WEATHER DISCUSSION:** Upper level ridging will continue to bring hot, dry and unstable conditions, similar to Friday. Mid-level moisture will increase today, bringing potential for PyroCumulus to develop on top of the column if the fire produces enough heat. Taller cumulus build-ups are likely today. A continued onshore pressure gradient will bring breezy SW-NW ridge level and down-canyon winds this afternoon & evening, with similar wind patterns to recent days. **Isolated, fast moving dry thunderstorms are possible late tonight**, and poor overnight recoveries with warm temperatures are expected.

---

**SATURDAY:**

**WEATHER:** Hot, dry & unstable. Partly cloudy with afternoon cumulus build-ups along the Mtns. Isolated dry thunderstorms may be visible east and southeast of the fire, with no precipitation expected.

**MAXIMUM TEMPERATURE:** Highs ranging from low 90s along ridges to low 100s valleys.

**MINIMUM RELATIVE HUMIDITY:** 6-11% in valleys and 13-18% along ridges.

**20 FOOT WINDS:**

**SW of the PCT** – Up-slope winds of 3-5 mph developing late morning will become SW-NW up-canyon 7-12 mph early afternoon with gusts of 14-18 mph possible mid to late afternoon.

**NE of the PCT** – Up-slope winds of 2-4 mph becoming SE to NE up-canyon 4-7 mph early afternoon then reversing to SW to NW around 1400 and increasing to 12-15 mph with gusts to 20 mph late afternoon through the evening along ridges and down-canyon winds of 5 to 7 mph drainage bottoms.

**Scott Valley** – E-SE winds 3-5 mph in the morning becoming SW-W 5-7 mph around 1200 and increasing to 9-14 mph with gusts to 18 mph mid afternoon and into the evening.

**STABILITY:** Smoky valley inversions lifting by noon. Weaker S-SW transport flow today, but increased instability from mid-level moisture should still allow decent smoke clearing. Deep vertical mixing is likely mid to late afternoon with enhanced potential for column growth due to mid level moisture supporting PyroCumulus development.

**CHANCE OF THUNDERSTORMS:** 10%

**SMOKE TRANSPORT WIND:** E-SE 5 mph S-SW 10-15 mph

---

**SATURDAY NIGHT:**

**WEATHER:** Warm and dry with strong mid slope thermal belts and poor RH recoveries. **Isolated and fast moving dry thunderstorms are possible after 0200. Any rainfall less than a tenth of an inch.**

**MINIMUM TEMPERATURE:** Mid 70s along slopes & ridges and mid 60s to low 70s in valleys.

**MAXIMUM RELATIVE HUMIDITY:** Around 20-26% slopes & ridges and 40-45% valleys.

**20 FOOT WINDS:** SW to NW 10-15 mph diminishing around 2100 then becoming N-NE 5-8 mph along ridges with downslope/down-valley 2-4 mph elsewhere.

**STABILITY:** Some smoke should settle into valleys including Scott Valley, but possibly less than prior nights.

**CHANCE OF THUNDERSTORMS:** 25%

**SMOKE TRANSPORT WIND:** S-SW 10 mph to light NE-SE.

---

**SUNDAY: \*\*\*FIRE WEATHER WATCH IN EFFECT 11AM-9PM \*\*\*** Remaining hot, though highs should be a little cooler, ranging from upper 80s along ridges to near 100 in valleys. Min RHs near 20% with poor to fair overnight recoveries around 25-35% along slopes and ridges, and 45-55% in valleys. Terrain driven up-slope and up-canyon winds continue with NW down-canyon winds of 10-15 mph gusting to 20 mph late afternoon into the evening. Isolated to scattered dry thunderstorms possible both morning and afternoon/evening.

---

**OUTLOOK FOR MONDAY AND TUESDAY:** There is a slight chance for a final round of isolated thunderstorm activity Monday afternoon. Otherwise, troughing to the northwest and ridging to the east will bring similar onshore pressure gradients with breezy SW to NW afternoon & evening winds along ridges and through channeled terrain, with no major changes in wind versus recent days. There will be a couple degrees of cooling, and some moderation of RH. Min RHs will be in the 17-27% range and overnight recoveries will remain poor to at best fair along slopes and ridges, but overall not as dry as the current period.

---

Please email weather observations to [julia.ruthford@usda.gov](mailto:julia.ruthford@usda.gov) or text them to 530-440-4898. Thanks!

## FIRE BEHAVIOR

**GENERAL:**

- Another critical fire day. Very active fire or potential, similar to yesterday, but little dryer and windier conditions in the afternoon. Just like yesterday in the morning-- primarily diurnal; with transition in the afternoon to a SW to NW ridge-level influence until late evening.
- Fuels are very dry and receptive. Concern is for torching, spotting, or slope-reversals that can lead to uphill runs, torching, more spotting or crown runs. In addition, potential for rapid rates of spread for those areas where fire is in alignment with slope, fuels, and wind.
- Very low Rh's at above 6000' and thermal belts will be most active overnight, and first to come into play during daytime burn period.
- Watch out for when the smoke inversion breaks. If it does expect fire activity increase with potential for extreme fire behavior and spread to follow well into the evening. Until smoke inversion lifts or breaks, it will likely keep a lid on the fire, even though it will still be active.

**SPECIFIC:**

**DIVS A, B, C, D, E, F, G:** Expect fire behavior to remain active in area NW of Shelly Lake. Continuing to spread laterally and making uphill runs over the PCT into the Upper Kidder drainage. Fire is established in Upper Kidder. Active fire growth on the east & west flanks of the fire in Kidder Creek drainage and spots/slop-over in upper Mill Creek. Potential for very active fire behavior in the Patterson Creek drainage, where it spotted yesterday. Fire will spread thru active surface spread, backing, flanking, with occasional single- and group- tree torching and spotting.

**DIVS T:** Areas below 4-5000' inversion layer, fire activity will be moderated by smoke inversion and sparse fuels from the 2017 Wallow fire. Fire spread will be dictated by fuels concentration, connectivity and thru spotting or roll-out into receptive fuels.

**AIR OPERATIONS:**

Inversion in the morning, air operations impacted by smoke.  
Sunrise: 5:50am, Sunset: 8:44pm, Daylength: 14 hours, 54 minutes, 30 seconds (-1:20min)

**SAFETY:**

Snags and fire weakened trees are one of the biggest hazards out there. Survey work areas for overhead hazards and mitigate them by having them removed or use flagging to keep people well clear of area.

# SAFETY MESSAGE

*Fire fighter safety comes first on every fire, every time*

We are **ALL** accountable for **SAFE** behaviors  
For Day/Night Operations: **July 13, 2024**

### Major Hazards and Risks:

➤ **Branch X:**

- Aggressive fire behavior
- Indirect and direct line construction
- Structure protection

- Very steep and rocky terrain
- Night operations
- Hwy 3 public traffic

➤ **Branch XX:**

- Aggressive fire behavior
- Heavy snap patches
- Extremely steep and rocky terrain

- Heavy use of aircraft
- Heavy equipment indirect line
- Working in very remote locations

### Working with Heavy Equipment

- When working around heavy equipment, stay at least 100 feet in front and 50 feet behind the equipment. In timber, distances should be increased to 2 1/2 times the canopy height.
- No one but the operator should ride on the equipment.
- Never approach equipment until you have eye contact with the operator, all implements have been lowered to the ground, and equipment is idled down.
- Avoid working downhill from equipment where rolling material could jeopardize your safety.
- Establish visual and radio communication methods prior to engaging.
- Communicate all hazards to the operator (spot fires, firing operations, and obstacles).
- Equipment operators have difficulty seeing ground personnel; take responsibility for your safety and all those around you.

### Bias For Action

In a high-risk environment, freelancing is a dangerous and unpredictable element, causing more harm than good. Ultimately, leaders are always accountable for their actions.

- A bias for action acknowledges wildfire as an environment where events do not always go according to plan.
- At times during an incident, one person may be the only individual to see what needs to be done and to make it happen.
- Time may not permit gathering all of the information that one might like to have; if you wait until you have all the facts to be 100% sure of your decision, it will almost always be too late.

In these time-critical situations, fire leaders use judgment, act within the intent of their leaders, work in unison with others, develop and communicate a plan, then inform superiors of actions as soon as safely possible.

On a chaotic and rapidly-developing wildfire, one person taking the initiative can make all the difference in taking advantage of an opportunity. Being hesitant, risk-averse, or indecisive can expose firefighters to greater long-term risks and translate into a waste of time, opportunity, energy, and money.

**6. Work Assignments:**  
Identify and construct potential contingency lines to limit the fire progression.  
Improve Sawyers Bar Rd from E/F break to the south to limit southern and eastern fire progression.  
Improve the roads into the Ruffy Gap area to limit road breakdown and maintain usable surfaces.

**7. Special Instructions:**  
Identify and establish water sources.  
Do not use hydrants as water sources unless conducting direct suppression around residential area.

**8. Communications**

## HELICOPTER EXTRACTION OPERATIONS

The intent of helicopter insertion/extraction operations is to facilitate the movement of personnel to and from inaccessible areas. These operations are not meant to be a medical transport resource; life flight and ground transportation should always be ordered in addition to the extraction aircraft and crew.

### ORDERING:

- On-scene EMT and/or Incident within Incident IC determines that an extraction helicopter is needed and places the order through the pre-established procedures:
  - Division Supervisor
  - Incident Communications
  - Dispatch Center
- When ordering extraction aircraft provide the following information:
  - Location (Lat/Long) of patient
  - Known Hazards
  - Wind Speed and Direction
  - Terrain
  - Incident Updates

### SITE SELECTION:

- The helicopter crew will confirm the extraction location when they arrive on scene. However, a general rule is any clearing that is 10'x10' with visible sight lines to the sky is a suitable extraction site.
- If the terrain is steep, excavating a platform or shelf can make it easier for patient packaging.

QR Code-Short-haul Site Selection Video

### CONSIDERATIONS:

- Short-haul and hoist are safe and efficient operations for extracting injured personnel of any severity including "Green" patients.
- Ensure area is clear of non-essential items, hazards, and personnel.
- Rotor wash may affect overhead hazards and blowing dust/debris can create brown out conditions or influence fire behavior.
- Aerial Supervision is valuable for coordinating aviation medevac/extraction missions and should be ordered if available and not currently present.
- The aircrew will make the final assessment of the mission. Always have a contingency plan in case a helicopter cannot complete the request.

### DEFINITIONS:

**Rescue Hoist:** A cable winching device mounted to the helicopter that can lower/raise persons attached to a cable.

- Common cable lengths are 250-300 feet.

**Short-haul:** To insert or extract one or more persons suspended on a fixed line beneath a helicopter.

- Common short-haul line lengths are 100, 150, and 250 feet. The lines can also be connected for a longer line if the situation requires it.

# FINANCE MESSAGE

## TIME Process

**Shift Tickets:** Line supervisors complete for Hired Equipment and submit hard copy to TIME, OR complete an e-Shift Ticket online at <https://shifftickets.fire.ca.gov> AND provide a hard copy to TIME. Shift Ticket example on page 35 of IAP.

**Personnel Time:** All Cal Fire personnel check in to TIME trailer located at fairgrounds in Yreka.

**Hired Equipment:** All Hired Equipment resources check in to TIME trailer located at fairgrounds in Yreka with a copy of your agreement.

**Local Government:** Check-in with OES Rep, located at the fairgrounds in Yreka. See page 34 of IAP.

## COMP/CLAIMS

Report all comp claims to FINANCE.

## AO-341 Hotel Rosters

Please sign the roster for every night.

## Feeding

Feeding is provided at the Yreka fairgrounds.

Off-Site feeding is approved for DINNER ONLY for personnel lodging in the following locations:

MEDFORD			ASHLAND	Mt. Shasta
Elmer's 2000 Biddle Rd. Medford, OR	Elmer's 68 E Stewart Ave. Medford, OR	Applebee's 1388 Biddle Rd. Medford, OR	Oak Tree Bar & Grill 2510 Ashland St. Ashland, OR	Black Bear Diner 401 W Lake St. Mt. Shasta, CA
