INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">SHELLY</p>	2. Operational Period:	Date From: 7/9/2024	Date To: 7/10/2024
		Time From: 0700	Time To: 0700

3. Objective(s):

Leaders Intent

- Implement a full suppression strategy on the Shelly Fire. Values at risk include human safety, private timberlands, communities, cultural, and wilderness areas. Apply tactics that offer the highest probability of success.
- All incident assigned personnel should be prepared to take appropriate actions regarding:
 - Personal safety and the safety of others, including driving slowly and defensively.
 - Professional behavior, conduct, and timely / effective communication.
 - Manage fatigue by taking breaks and maintaining work / rest cycles.
 - Provide the highest level of customer service to all involved with or impacted by the Shelly Fire.

Management Objectives

- Provide for firefighter and public safety through hazard recognition and application of the risk management process.
- Coordinate all public information to provide timely and continuous information to affected agency partners, cooperators, and to the public.
- Coordinate suppression activities with assigned incident resource advisors to minimize impacts on natural and cultural resources.
- Maintain relationships with partner agencies, elected officials, organizations, tribes, neighboring landowners, and community groups and members.

Control Objectives

- To limit fire growth and to prevent the fire from spreading to private property, surrounding communities and values at risk, keep the Shelly Fire:
 - North of Salmon River Road
 - South of Scott Bar
 - East of the Scott River Ranger District boundary
 - West of Whisky Butte

FIRE WEATHER FORECAST

FORECAST NO. 4

NAME OF INCIDENT: Shelly

PREDICTION FOR: Tuesday July 9, 2024

UNIT: Klamath National Forest

TIME AND DATE

SIGNED: *Julia E. Ruthford*

FORECAST ISSUED: 1900 Monday 7/8/24

Julia Ruthford – (530) 440-4898
Incident Meteorologist

*** Excessive Heat Warning through Wednesday with Very Unstable Afternoon Conditions Continuing ***

WEATHER DISCUSSION: The strong upper level ridge will continue to gradually shift eastward today but remain close enough for hot, dry and unstable conditions to persist. Very limited mid-level moisture moving into the area well above the persistent very dry lower level air mass will increase the potential for PyroCumulus development on top of the column with deep vertical mixing potential continuing in the afternoon and evening. Winds will be largely terrain driven today but will continue to be enhanced due to the hot temps and the dry, unstable atmosphere with a shift to W-NW ridge level and down canyon winds beginning mid afternoon and continuing into the evening.

TUESDAY:

WEATHER: Continued hot & dry with very unstable conditions in the afternoon.

MAXIMUM TEMPERATURE: Highs ranging from the upper 80s along ridges to around 100 valleys.

MINIMUM RELATIVE HUMIDITY: 9-13% in valleys and 14-18% along ridges.

20 FOOT WINDS:

NE of the PCT – Up-slope winds of 3-5 mph developing late morning with NE up-canyon 4-7 mph winds early afternoon reversing to W-NW mid afternoon along ridges and westerly channeling down-canyon winds of 10-15 mph with localized gusts up to 20 mph in NW to SE oriented drainages.

Kidder Creek Drainage – Up-canyon winds (E-SE upper & E-NE lower canyon) will increase to 5-8 mph late morning through early afternoon then shift to W-NW to W-SW down-canyon 10-15 mph between 1400 & 1500 with gusts up to 20 mph possible late afternoon through the evening.

SW of the PCT – Up-slope winds of 3-5 mph developing late morning will become SW up-canyon 7-11 mph early afternoon with gusts of 15-20 mph possible mid to late afternoon. A shift to NW winds along ridges and through NW to SE oriented drainages will bring battling winds in the afternoon & evening.

STABILITY: Valley inversions lifting late morning then becoming unstable with the potential for deep vertical mixing mid to late afternoon continuing to increase and converging terrain driven winds further enhancing instability.

CHANCE OF RAIN: 0% **LAL:** 1 **SMOKE TRANSPORT WIND:** Light east early then west 5-10 mph.

TUESDAY NIGHT:

WEATHER: Continued warm with strong thermal belts and poor RH recoveries.

MINIMUM TEMPERATURE: Mid 70s along slopes & ridges and upper 60s in valleys.

MAXIMUM RELATIVE HUMIDITY: Around 25-30% slopes & ridges and 40-50% valleys.

20 FOOT WINDS: NW winds of 10-15 mph with localized gusts of 20 mph along the ridges in the evening becoming N-NE 4-7 mph along ridges and downslope/down-valley 2-4 mph elsewhere after 2100.

STABILITY: Smoke accumulating in valleys and thermal belts.

CHANCE OF RAIN: 0% **LAL:** 1 **SMOKE TRANSPORT WIND:** N-NE 5-10 mph.

WEDNESDAY: Continued hot and dry though a few degrees cooler with high temps ranging from the mid 80s along ridges to the upper 90s in the valleys. Min RHs in the mid teens with overnight RH recoveries 30-35% along slopes and ridges and around 50% valleys. Enhanced terrain driven up-slope and up-canyon winds will continue with NW down-canyon winds of 15-20 mph locally gusting to 25-30 mph late afternoon into the evening.

OUTLOOK FOR THURSDAY THROUGH SATURDAY: A gradual increase in mid level moisture will continue through the end of the week and when combined with the hot and unstable conditions during the afternoons will continue to increase the potential for pyrocumulus formation over the fire and additionally bring the potential for isolated thunderstorms Fri & Sat. Gustly SW to NW afternoon and evening winds along ridges and through channeled terrain gaps will continue Thu-Sat with a slight cooling influence as the onshore pressure gradient to the west increases. RHs will moderate slightly through this period but still remain concerningly dry.

Please email weather observations to julia.ruthford@usda.gov or text them to 530-440-4898. Thanks!

FIRE BEHAVIOR

- GENERAL:**
- Another critical fire day: environmental conditions are in place that support large fire growth. Hot and dry daytime conditions with very low nighttime humidity recoveries and fuels where available will support active fire behavior (torching, short range spotting and crowning) and rapid rates of spread.
 - Stay alert for breaking smoke inversion today. If it does expect very active to extreme fire behavior and spread to follow well into the evening. Until smoke inversion lifts or breaks, it will keep a lid on the fire, but do not be fooled, active fire spread and growth is occurring, with potential for short range spotting due to fuel continuity, and hot and dry conditions.
 - Very poor night-time relative humidity (Rh) recoveries continue (see Fire Wx Forecast) and hot dry conditions will continue to dry out fuels.

SPECIFIC:

DIVS A, B, C, D, E, F, G: Active fire growth in the Kidder Creek and Babs Fork drainages and moving into Mill Creek (north) and Patterson Creek (south). Fuels continuity and composition of live (shrub and forest vegetation) and dead fuels (1, 10, 100hr size class) will see active growth through surface fire spread, spotting, and torching. Primary fire growth will be driven by fuel continuity, with daytime diurnal winds, and afternoon local ridgetop winds (W-NW to NE).

DIVS T: Fire activity is being moderated by smoke inversion and sparse fuels from the 2017 Wallow fire, expect areas with jackpot of heavier concentrations of dead & down fuels to be resistant to suppression. On steep slopes these will be potential source of rollout on steep slopes and uphill runs.

AIR OPERATIONS:

Inversion in the morning, air operations impacted by smoke.
 Sunrise: 5:47am, Sunset: 8:46pm, Daylength: 14 hours, 59 minutes, 31 seconds (-1:07min)

SAFETY:

Large fire growth is expected today. Don't be surprised! Have your safety zones and/or escape routes pre-identified and timed.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

We are **ALL** accountable for **SAFE** behaviors
For Day/Night Operations: **July 9, 2024**

Parking vehicles on or near wildfire incidents:

- What do you look for in a fireline parking spot? Look up, look down, look all around.
 - Look for cold black, bare soil, sparsely vegetated areas, plowed fields, or other natural or human made barriers. Be careful to not get stuck in soft soils.
 - Complete a walk around looking for ash pits, penetrating stobs, unburned adjacent fuel, snags, or other hazards that may damage the apparatus.
 - Do not block the access or egress of others. Be careful to not block dozer lines, safety zones, or helispots. Back in and face your danger when turning around. Chock your tires.
- What types of situations may require you to park your vehicle in unburned fuels?
- What should be considered when leaving an individual with a fire vehicle?

The following mental checklist and flowchart can be used to ensure the safety of yourself and your equipment.

Is your truck S.E.C.U.R.E.?

Set parking brake

Environmental hazards mitigated

Chock the wheels

Under carriage inspected

Roll up windows

Ensure equipment is safe to leave

Driving Caution

- Please use caution when traveling between Yreka and Etna. Highway 3 near the Forest Summit between Ft. Jones and Etna has had numerous fatalities this year. Both Caltrans and the KNF have expressed concern for both the public and firefighters.
