Fire Weather Forecast

TUESDAY AUG 27, 2024

FORECAST NO: 14
SHIFT DATE: Tuesday/Aug 27, 2024
FORECAST ISSUED: 2230, Aug 26, 2024

NAME OF FIRE: Boise
UNIT: SRF
Incident Meteorologist: *Mike Kistner*

DISCUSSION: High pressure remains over the region today and through the remainder of the week. Warm and dry conditions are expected with light westerly winds along exposed ridges. Elsewhere, winds will be terrain driven with downslope/downvalley in the morning and becoming upslope/upvalley in the afternoon. Winds tonight will turn easterly through Wednesday morning, and this will bring lower RH recovery mid slope and above. A moderate inversion is expected each night this week and it will mix out around noon each day, but due to the lack of smoke and moisture, there are no visibility restrictions expected.

TUESDAY:

- **WEATHER:** Sunny
- **WIND (20 FT):** Ridges and exposed drainages: west-southwest at 8-10 mph after 1200. Otherwise, terrain driven downslope / downvalley in the morning and upslope / up-valley during the afternoon. Light and variable winds under the shelter of the forest canopy. Winds become ENE late tonight midslope and above.
- **MAX TEMPERATURES:** 84-89 lower slopes and drainages, 75-80 mid-slope.
- **MIN RH:** 27 - 32% in exposed areas and 40-45% under the canopy.
- **MAX RH:** 70 - 80% at lower elevations, and 45 - 50% midslope and up
- **INVERSION:** Moderate mid-slope...mixing out around noon.

WEDNESDAY:

- **WEATHER:** Sunny
- **WIND (20 FT):** Ridges and exposed drainages: east-northeast 8-10 in the morning, becoming west-southwest at 8-10 mph after 1200. Otherwise, terrain driven downslope / downvalley in the morning and upslope / up-valley during the afternoon. Light and variable winds under the shelter of the forest canopy.
- **MAX TEMPERATURES:** 84-89 lower slopes and drainages, 77-82 mid-slope.
- **MIN RH:** 25% in exposed areas and 35-40% under the canopy.
- **MAX RH:** 55%
- **INVERSION:** Moderate mid-slope...mixing out around noon.

Extended outlook: Thursday through Saturday: High pressure will remain over the region through this week and into the weekend. Temperatures will be close to, or slightly above normal for this time of year. Highs will be in the mid to upper 80s to low 90s and minimum RH will also dip back down to 25-30% in exposed areas and 35-40% under the forest canopy. Winds will be mostly orographic with downslope/downvalley at night and in the morning, becoming upslope/upvalley late morning through the afternoon. Ridges and exposed west to east aligned drainages will have west winds at 8 - 12 mph with occasional gusts at 14-17 mph. Inversion will set up overnight each night and break around noon, however the impacts will be minimal to aviation due to the lack of smoke and fog.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 14

TYPE OF FIRE: Wildfire

FIRE NAME: Boise Fire

OPERATIONAL PERIOD: August 27, 2024

DATE ISSUED: August 26, 2024

TIME ISSUED: 1900 hours.

UNIT: CA-SRF-000729

SIGNED: Dan Felix FBAN

INPUTS

**** Refer to the Fire Weather Forecast for details ****

WEATHER SUMMARY

- Sunny.
- Max temps: 84-89° lower slopes and drainages, 75-80° mid-slope.
- Min RH: 27-32% in exposed areas and 40-45% under the canopy.
- Winds-slope/valley: Terrain driven early, then west-southwest at 8-10 mph after 1200.

FIRE BEHAVIOR

GENERAL:

Fire behavior: Conditions will not support spread until fuels have a chance to dry out. Stay tuned.

Fuels: Live fuel moistures, 1000 hr. and other dead fuels were at or near critical levels before the rain. Currently those indices are well below average, but will recover. Fuels include timber with litter and understory, brush, and some areas of standing snags and blow down.

Topography: The fire is burning in steep, rugged terrain. The fire is burning at elevations between 1600-5500' and slopes between 40-over 100%. All aspects represented in the fire area.

SPECIFIC FIRE BEHAVIOR:

The previous rainfall has suspended any growth of the fire but as drying continues you may start to see more smoke from the snags, stump holes, and heavy fuels that will continue to hold heat. Surface fuels will not support spread yet, but will continue to dry out in the coming days. We will continue to monitor conditions and utilize modeling to determine the rate of recovery. Any field observations of changing conditions are appreciated.

DIV A/E/Y: Control lines are secure. No spread or significant activity is expected.

DIV L, R, T, U: Very few smokes showing under thick timber canopy. These heavy fuels will hold heat but under current condition will not be able to find enough receptive fine fuels to carry any surface spread. The exception to this is roll out, but this will be localized. Exposed areas are not showing any heat or smoke. There are numerous areas of incomplete burn that will have some for potential for reburn after a few days of drying.

AIR OPERATIONS

No limitations are anticipated.

SAFETY

"The opportunity of defeating the enemy is provided by the enemy himself." – Sun Tzu
Taking advantage of those opportunities reduces exposure and helps keep all of you safer.

SAFETY MESSAGE

Contributing Factors to ATV/UTV accidents

- Rider inexperience
- Excessive speed combined with rough terrain
- Lack of helmet use.
- ATV improperly loaded or load weight exceeds vehicle capacity
- Operator carries passengers that affect control and operation

Please review your agency policy for operating an ATV/UTV and take time for a safety briefing.

A photo guide to FS helmet requirements for ATVs and UTVs
This includes  Wildland Fire Operations 

CIIMT 11 Safety Officer, Nick Colonelli-SOF2(t)

Communications

Phone List: If a phone list is needed go to the available clerical unit and ask to see it.

PUBLIC INFORMATION

Photos: We *need* pictures or videos of the fire, vegetation, terrain, crews, equipment, apparatus, etc. These photos may be used on social media, Inciweb and the IAP cover. See the PIOs, text: (707) 572-4860 or email: 2024.boisefire@firenet.gov.

*If the public approaches you with questions, please have them contact the information phone:
(707) 572-4860 (8am-8pm)

Lost & Found:

Lost and Found is with the PIOs.

Training Message

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible. Currently the TNSP is at the ETNA ICP. Register your assignment with the TNSP to take advantage of the available services.

Access the Incident Training forms by going here

<https://linktr.ee/dani.mcmillon>

When you are nearing the Demob process please reach out to the email and/or number below. Avoid creating a delay when it's time for you to Demob and contact me early to help walk you through the process

Natalie Maynard, TNSP(t) 530-927-7941 or email natalie.maynard@usda.gov

FINANCE MESSAGE

2024.boise.finance@firenet.gov

CTRs, shift tickets and supporting documents can be e-mailed to the address above. Hard copy CTRs and shift tickets will be collected daily at the other camps and brought to the ICP for posting. Please submit documents either electronically (preferred) or hard copy. Do not submit duplicates.

Virtual Demob is available. Please make sure you to include your e-mail address on at least your final CTR or Shift Ticket. For contractors your travel time will be calculated based on the terms of your agreement.

Approving Officials for CTRs & shift tickets please write legibly and print your name under your signature.

Contract equipment please note your request number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports even if it's zero. If you have been here for 14 days or more and would like an interim payment please send an e-mail to the address above.

Contract crews – Crew Boss time starts at briefing. Contract crew member times start ½ hour later. Meal breaks need to be shown and time stops at arrival back at ICP, base or spike camp.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to Finance for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a current copy of a signed JHA or RA (IIBM Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

Local Government Resources – Please check in at the OES Support Unit.

The following resources need to please check in with Finance:

REQUEST NUMBER	RESOURCE NAME	ISSUE or QUESTION
E-125	Outback Firefighting	Need missing ST for 8/20-8/24
E-204	Paul Yokoyama	Meed Mileage on 8/24/24

Human Resource Message

What Makes Communication Difficult?

Words Mean Different Things to Different People

Look up 500 different words in a dictionary and you will find over 2,500 meanings and/or definitions for those same words. To communicate effectively, both the speaker and the listener must have a mutual understanding of the words they use.

The Presenting Problem May Not Be the Major Concern

People often are hesitant to talk about what is really bothering them. The “real issues” are what they tend to hide most carefully. Trying to solve minor problems while the real problems are not clearly understood does not work. Doing this is a major source of ineffectiveness.

Filters Distort What People Hear and Say and Emotions Are Blinding

Our own expectations, experiences, values, biases, self-images, beliefs, ideas, worldview, etc. create a “zone of distortion”; the filter that distorts our interpretation of another person’s message. People are often unaware of how their emotions affect communications with others and emotions can literally put some people out of control and prevent them from communicating effectively.

Here’s what to do to improve communication:

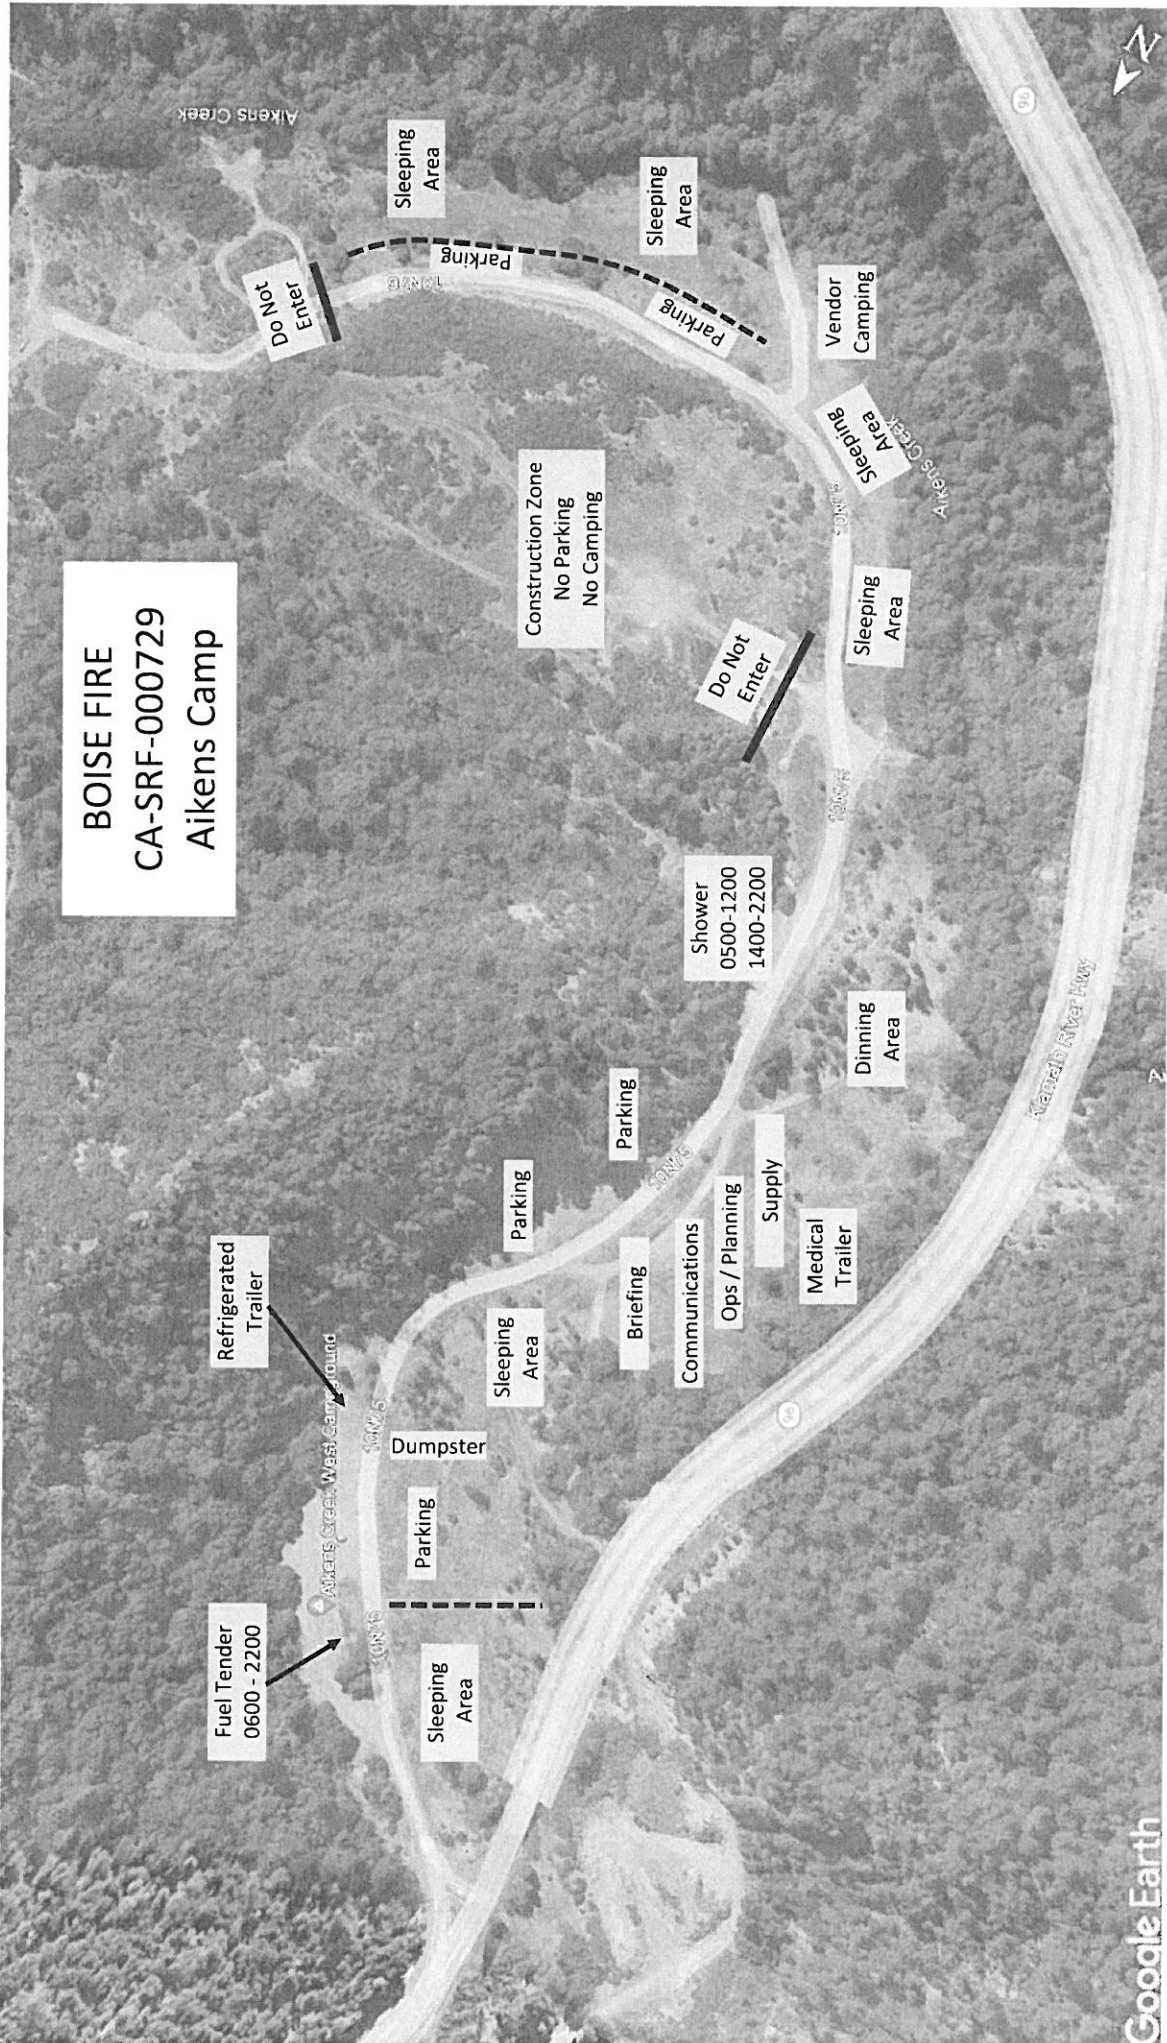

- Stand in the other person’s shoes. You have stood in the other person’s shoes when you repeat their point of view back to their satisfaction.
- Drop your point of view long enough to take another way of seeing things.
- Remember the point of communication is not to win or be right, but to either bring people together or clarify their differences.

“Listen with curiosity. Speak with honesty. Act with integrity. The greatest problem with communication is we don’t listen to understand. We listen to reply. When we listen with curiosity, we don’t listen with the intent to reply. We listen for what’s behind the words.”— Roy T. Bennett, author

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE POINT OF CONTACT BY NAME AND POSITION AND ANNOUNCE **"MEDICAL EMERGENCY"** TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Division W Medical, POC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (Priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° - 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° - 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Point of Contact	Name of on-scene POC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Crew Patient Care	Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: Age: Weight: Chief Complaint:

Skin Signs: (color/moisture/temp) Level of Consciousness: BP: HR: Respirations:

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards) Patient's ETA to Location:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extraction

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training
Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
