GENERAL

FDPM 5% PIG 70-%

Estimated LFM (based on yearly averages) 110%

Forecast SC: n/a Forecast Burning Index: n/a Forecast ERC: Above 97th percentile

Spotting distance: .5 miles

Inversion will be lifting about an hour earlier than yesterday.

- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Fire has been burning actively at night above the inversion layer.
- Group torching and short crown runs have been observed, with spotting distance greater than ½ mile.
- Very heavy fuel loading in an area with no recorded fire history. 1000 hour fuels are consuming and contributing to fire load. Live fuels are cured, with a heavy grass load where grasses are present. Expect high energy release and extended residence/burn out times.
- Rollout is a major factor contributing to spot/slop-overs on extremely steep slopes.
- Timber stands and heavy fuels can obscure view of potential spots, Post lookouts.

SPECIFIC

SAFETY

Watch for fire weakened timber/snags, spotting and roll-out.

ALL	HAZARD TREES	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. • Be especially alert around snags during wind events or changing wind direction. • Check for hazard trees & “widow-makers” in sleeping areas prior to using. • Maintain Situational Awareness. 	
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on; use chock blocks, keep windshields clean; look before backing; and use backers whenever available. • Don’t drive when fatigued.
