Fire Weather Forecast

FRIDAY AUG 16, 2024

FORECAST NO: 3
SHIFT DATE: Thursday/Aug 16, 2024
FORECAST ISSUED: 2200, Aug 15, 2024

NAME OF FIRE: Boise
UNIT: SRF
Incident Meteorologist: *Mike Kistner*

DISCUSSION: Cooler than average temperatures across the area again today and fire weather concerns remain low. The timing of the inversion lifting has been persistent the last several days, lifting around 1300 - 1400 and expecting a similar breakup today. After the inversion dissipates, winds will pick up out of the west-southwest with the strongest winds expected during the late afternoon and into the early evening hours. Tonight there will be strong RH recovery once again. ***Finally, there is a chance for a wetting rain across the area on Saturday, so proper preparations should be taken to keep your things dry (Tarp your tent).***

FRIDAY:

- **WEATHER:** Smoke lifting again in the afternoon and then mostly sunny
 - **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 2-5 mph through 1200 then upslope 4-7 mph. Mid-slope and above: Unsheltered areas and wind-aligned drainages: Variable 3-5 mph through 1200 then shifting to west-southwest 8-10 mph and gusting 15-18 mph at times on the exposed ridges and aligned drainages.
 - **MAX TEMPERATURES:** 70-75 lower slopes and drainages, 64-69 mid-slope and above.
 - **MIN RH:** 45%
 - **INVERSION:** Moderate mid-slope...mixing out 1300 - 1400 hrs.
-

FRIDAY NIGHT:

- **WEATHER:** Areas of Smoke.
 - **WIND (20 FT):** Becoming downslope/down valley 3-7 mph after 2000.
 - **MIN TEMPERATURES:** 47-52 bottom, 56-61 mid-slope and above.
 - **MAX RH:** 75-85% bottom, 65-75% mid-slope and above.
 - **INVERSION:** Moderate developing near mid-slope.
-

SATURDAY:

- **WEATHER:** Areas of smoke in the morning lifting around noon. ***Rain and isolated thunderstorms in the afternoon and evening. Chance of rain 70%, Chance of thunderstorms 20%.***
 - **Critical weather: *Small potential for outflow winds from thunderstorms.***
 - **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1100 then upslope 2-6 mph. Unsheltered areas and wind-aligned drainages: Southwest 5-8 mph through 1100 then increasing to 10-12 mph with gusts 17 - 22 mph.
 - **MAX TEMPERATURES:** 67-75 lower slopes and drainages, 64-69 mid-slope and above.
 - **MIN RH:** 57%.
 - **INVERSION:** Moderate mid-slope...mixing out 1300 - 1400 hrs.
-

Extended outlook: Sunday through Tuesday: Lingering light rain and drizzle possible Sunday morning. Temperatures will remain cooler than normal through the remainder of the weekend and into next week. Areas of smoke will likely remain an issue through the morning hours with the inversion holding on until the afternoon. There are no critical fire weather concerns.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 5	TYPE OF FIRE: WILDFIRE
FIRE NAME: Boise Complex	FOR OPERATIONAL PERIOD: 8/16/24 (24 hour shift)
DATE ISSUED: 8/16/24 Friday	TIME ISSUED: 1900 8/15
UNIT: SRF	SIGNED /s/ R.Henault

INPUTS

WEATHER SUMMARY

Continuing similar weather pattern will result in moderated fire behavior.

High temps 65-70

Min RH 45%

Daytime: Variable 1-4 mph becoming WSW 8-13 mph in the afternoon. Ridgetops- E 3-5, becoming W 5-10 G15

Nighttime: SW 5-8 in the evening becoming south 2 mph after midnight. Thermal belt around 3500'

Overnight lows around 50

Max RH around 60-65% above thermal belt

OUTPUTS

FIRE BEHAVIOR

GENERAL

DFM 9-11% PIG 30-40% U/S

Estimated LFM (based on yearly averages) 110%

Forecast SC: 15 Forecast Burning Index: 24 Forecast ERC: 85thth percentile

Spotting distance: up to ½ mile

*

- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Fire has been burning actively at night above the inversion layer.
- Group torching and short crown runs have been observed, with spotting distance greater than ½ mile observed.
- Very heavy fuel loading in an area with no recorded fire history. 1000-hour fuels are consuming and contributing to fire load. Expect high energy release and extended residence/burn out times.
- Rollout is a major factor that can contribute to spots and slop-overs on extremely steep slopes.
- Fire is moving east into an 11-year-old burn scar with much lighter fuel loading, less sheltering and more reactivity to wind gusts.

Fuel Type	Flame Length	Crown Fire Flame Length	Max Rate of spread	Spotting Distance	Probability of Ignition
10 Timber Litter and Understory	<8	97	21 ch/hr	.6 mi	40%
High load timber-shrub TU5	<11	100	21 ch/hr	.6 mi	40%
Moderate Load Blowdown SB2	<9	96	37 ch/hr	.6 mi	40%
Low load dry climate shrub SH1	<2	93	2 ch/hr	.6 mi	40%

Behave Calculations use 100% slope, max wind and min RH values.

SPECIFIC

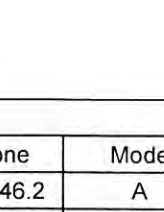

Fire activity will increase after inversion lifts. Watch for increased fire behavior as fire backs or spots into drainages, and slope reversal occurs.

SAFETY

As surface fuels burn out, be extremely vigilant for snags, weakened root structures can cause green trees to fall without warning.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Narrow, steep, unforgiving native surfaced roads within the fire area. Drive defensively! Expect the unexpected around every curve. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Always use headlights. Follow travel plans.
All	FIRE BEHAVIOR	<ul style="list-style-type: none"> Anticipate active fire behavior and rapid rates of spread. Establish and maintain LCES. Expect increased spot fires and spotting distance. Allow for adequate time to escape routes and safety zones. Dry Fuels and Large dead and down component. Heavy fuel loading with no fire history. ERCs at record or critical levels.
ALL	HAZARD TREES	<ul style="list-style-type: none"> Be especially alert around snags during wind events or changing wind direction. Establish trigger points. Green trees can fall without warning. Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> Always be thinking "How are you going to move this patient to care". Incorporate transportation times into your "tactical operational plan". Don't rely on aircraft.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Evaluate necessity to send personnel in areas with limited access. Concentrate on your footing placement; take your time. Evaluate the necessity to send personnel in areas with limited access, post lookouts to warn of rolling debris. SHOUT out to warn others
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Follow the incidents communication plan. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident communications plan.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Watch for ash pits.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotters. Ensure the use of effective communication (radio, hand signals).
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours
ALL	UTV USE	<ul style="list-style-type: none"> Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/RMA.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Repeated assignments in the same area can lead to complacency. A feeling of being satisfied with your safety may be a sign of complacency.
INCIDENT NAME: BOISE		DATE PREPARED: 8/15/2024

BOISE FIRE

Operation Period: 08/16/2024 0600 to 08/17/2024 0600

SAFETY MESSAGE

Crew Safety Is Dependent Upon Competent And Confident Leadership

Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known And Observed

- **TAKE CHARGE** of assigned resources
- **MOTIVATE** crew members with a “can do” safety attitude
- **DEMONSTRATE INITIATE** by taking appropriate action in the absence of orders
 - **COMMUNICATE** by giving specific instructions and asking for feedback
 - **SUPERVISE** at the scene of the action

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FIRE BEHAVIOR SPOT FIRES	ROLLING MATERIAL DEHYDRATION DRIVING	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
--	--	--

Be sure all elements of your safety plan are in place prior to engagement

Watch for Rolling Material

Post lookout(s) to warn of rolling material and ignitions below the line.

Consider locating line in a defensible position.

Do you have two escape routes if rolling material ignites fuel below you.

Can you adequately trench the line based on steepness of slope and soil conditions?

Night Operations Hazards

Your ability to maintain your situational awareness at night is compromised by your inability to see hazards and other visual indicators in your work area.

Other challenges faced during night operations:

- Ability to maintain your orientation
- Difficulty seeing hazards beyond your headlamp
- Difficulty estimating distances
- Inability to use landmarks as reference
- Blowing smoke can increase visual difficulties
- Logistical support is limited

California Team 10 Safety Officer Jason Danen

FINANCE MESSAGE

Finance Email: 2024.boise.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

All Local Government employees MUST have a MARS account to complete and submit their F-42's for reimbursement.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

THANKS FOR KEEPING UP ON YOUR TIMES!!!

TRAINING SPECIALIST MESSAGE

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible. Register your assignment with the TNSP to take advantage of the available services.

An Incident Training Program Home Page is available for *both* trainees and trainers. Please visit and bookmark the page to register and manage your training assignment throughout the incident.

Access the Incident Training Page by scanning the QR Code on the IAP Cover Page and select the "Incident Training Program" link.

Please take advantage of the Incident Training Home Page as connectivity opportunity allows.

Trainees and Trainers: Please take a moment to check the Message Board on the Incident Trainee Website, daily, for any important information and updates regarding training assignments on this incident.

Avoid creating a delay when it's time for you to Demob. Register with the Training Specialist as early as possible during the course of your assignment.

Brad Smith, TNSP 209.770.4809 bradley_smith@firenet.gov

Ryan Wakefield

Cal OES Asst. Chief
Region II - North

OES Resource Check In QR Code

DEMOB

If you have questions about the Demob process, please call Boise Fire Demob at 916-440-3661. If no answer, please leave a message clearly stating who you are, why you are calling and a number so that we may return your call.

****If you are flying home, please call Demob 72 hours in advance!****

Documentation (DOCL)

Incident records please remember to provide final incident records on a consistent basis to the DOCL. Records may be uploaded to the 'To Be Filed' folder in eDOC Box or dropped off to the DOCL located in the Status Check-in trailer. Please do not wait until the last minute before leaving the incident.

Thank you for keeping up on your incident records – they help tell the story of the incident!

WALKING PATH

MEDICAL PLAN (ICS 206 WF) CIIMT 10

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
