INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center; margin-top: 10px;">Boise Fire</p>	2. Operational Period: <table style="width: 100%; border: none;"> <tr> <td style="border: none;">Date From:</td> <td style="border: none;">8/17/2024</td> <td style="border: none;">Date To:</td> <td style="border: none;">8/18/2024</td> </tr> <tr> <td style="border: none;">Time From:</td> <td style="border: none;">0600</td> <td style="border: none;">Time To:</td> <td style="border: none;">0600</td> </tr> </table>	Date From:	8/17/2024	Date To:	8/18/2024	Time From:	0600	Time To:	0600
Date From:	8/17/2024	Date To:	8/18/2024						
Time From:	0600	Time To:	0600						

3. Objective(s):

Strategic Direction:

- The Boise fire is managed with a full suppression strategy. Firefighting resources will follow risk-based decision making and implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and restoring suppression related damages while protecting local values. Values at risk include the safety of the public and firefighters; the communities and outlying areas near Orleans; water, transportation, natural and cultural resources.

Control Objectives:

- Keep fire south of 10N13/25 Rd (Orleans Lookout Road / Antenna Ridge) continuing to Orleans Mountain Ridge to Nordhiemer.
- Keep fire west of the Salmon River
- Keep fire north of Trinity Alps Wilderness
- Keep fire east of Deer Lick Saddle

Management Objectives

- Prior to engagement, ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression activities in consultation with Incident Resource Advisors.
- Minimize impacts to communities, cultural resources, natural resources including old growth forest, critical power, communication and other infrastructure, private property inholdings, Tribal Lands, threatened, endangered species and watersheds.

5. Site Safety Plan Required? Yes No

Fire Weather Forecast

SATURDAY AUG 17, 2024

FORECAST NO: 4
SHIFT DATE: Saturday/Aug 17, 2024
FORECAST ISSUED: 2200, Aug 16, 2024

NAME OF FIRE: Boise
UNIT: SRF
Incident Meteorologist: *Mike Kistner*

DISCUSSION: Showers and scattered thunderstorms are expected from early this afternoon through early this evening, bringing an 80% chance for wetting rain across the area. The chance for thunderstorms is 30%, but any storms can produce localized heavy rainfall. The main threat from any thunderstorms will be outflow winds and dangerous lightning. However, there is a low threat for flash flooding and debris flows if storms line up over the burn scar area. Light rain or drizzle will linger into the overnight hours with areas of fog and smoke also reducing visibility before sunrise on Sunday.

SATURDAY:

- **WEATHER:** Smoke lifting late morning/early afternoon and then showers and thunderstorms.
 - **Critical weather: Potential for outflow winds from showers/thunderstorms. Low potential for flash flooding and debris flows.**
 - **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 2-5 mph through 1100 then upslope 4-7 mph. Mid-slope and above: Unsheltered areas and wind-aligned drainages: Variable 3-5 mph through 1100 then shifting to southwest 8-12 mph and gusting 18-24 mph at times on the exposed ridges and aligned drainages. **Thunderstorms may also produce erratic outflow winds, so be alert for weather updates.**
 - **MAX TEMPERATURES:** 66-72 lower slopes and drainages, 62-67 mid-slope and above.
 - **MIN RH:** 57%
 - **INVERSION:** Weak to moderate mid-slope...mixing out 1100 - 1300 hrs.
-

SATURDAY NIGHT:

- **WEATHER:** Areas of Fog/Smoke and areas of drizzle.
 - **WIND (20 FT):** Becoming downslope/down valley 3-7 mph after 2000.
 - **MIN TEMPERATURES:** 50-55 bottom, 45-50 mid-slope and above.
 - **MAX RH:** Near 100% below 4500 feet, 65-75% above 4500 feet.
 - **INVERSION:** Weak due to cloud cover, if skies clear before sunrise then a weak inversion may briefly develop.
-

SUNDAY:

- **WEATHER:** Areas of smoke and fog early in the morning lifting between 0800 - 1000
 - **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1000 - 1100 then upslope 2-6 mph. Unsheltered areas and wind-aligned drainages: West-southwest 5-8 mph through 1100 then increasing to 10 mph with gusts 12 - 15 mph.
 - **MAX TEMPERATURES:** 70-75 lower slopes and drainages, 63-68 mid-slope and above.
 - **MIN RH:** 47%.
 - **INVERSION:** ...mixing out around noon.
-

Extended outlook: Monday through Wednesday: Temperatures will remain cooler than normal into next week. Areas of smoke will likely remain an issue through the morning hours with the inversion holding on until the afternoon. Winds will be out of the west and remain fairly light through the period. There are no critical fire weather concerns.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 6	TYPE OF FIRE: WILDFIRE
FIRE NAME: Boise Complex	FOR OPERATIONAL PERIOD: 8/17/24 (24 hour shift)
DATE ISSUED: 8/17/24 Saturday	TIME ISSUED: 1900 8/16
UNIT: SRF	SIGNED /s/ R.Henault

INPUTS

WEATHER SUMMARY

Chance of thunderstorms with rain. LAL 2
 High temps 67-72
 Min RH 57%
 Daytime: SW 10 G18 mph in the afternoon. Ridgetops- SW 8-10 G20-25
 Nighttime: Light winds down slope down valley.

Overnight lows around 55
 Max RH around 95%

OUTPUTS

FIRE BEHAVIOR

GENERAL

FDPM 9-12% PIG 20-40% U/S
 Estimated LFM (based on yearly averages) 110%
 Forecast SC: 9 Forecast Burning Index: 17 Forecast ERC: 85thth percentile
 (Slate Creek RAWS)
 Spotting distance: up to ½ mile

*
****POTENTIAL FOR NEW IGNITIONS IN THE LOCAL AREA****

- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Fire has been burning actively at night above the inversion layer.
- Group torching and short crown runs have been observed, with spotting distance greater than ½ mile observed.
- Very heavy fuel loading in an area with no recorded fire history. 1000-hour fuels are consuming and contributing to fire load. Expect high energy release and extended residence/burn out times.
- Rollout is a major factor that can contribute to spots and slop-overs on extremely steep slopes.
- Fire is moving east into an 11-year-old burn scar with much lighter fuel loading, less sheltering and more reactivity to wind gusts.

Fuel Type	Flame Length	Crown Fire Flame Length	Max Rate of spread	Spotting Distance	Probability of Ignition
10 Timber Litter and Understory	<8	97	21 ch/hr	.6 mi	40%
High load timber-shrub TU5	<11	100	21 ch/hr	.6 mi	40%
Moderate Load Blowdown SB2	<9	96	37 ch/hr	.6 mi	40%
Low load dry climate shrub SH1	<2	93	2 ch/hr	.6 mi	40%

Behave Calculations use 100% slope, max wind and min RH values.

SPECIFIC

Expect low intensity fire with slow rates of spread. *** Gusty erratic outflow winds from nearby thunderstorms are possible***

SAFETY

Review IRPG page 17 for thunderstorm safety. High rainfall amounts can affect access/egress roads in the fire area if they occur.

6. Work Assignments:									
Provide structure defense as directed. Assess structure defense needs.									
Prepare to construct indirect control line from Red Cap Road south to the wilderness boundry for potential firing operations.									
Begin firing when feasible.									
Identify and prepare indirect control lines for possible firing operations.									
7. Special Instructions:									
* Resoures on loan									
SOFR(t) Cranston is available for divisions A and Y									
SOFR Groughnour is available for all day divisions									
Yellow/White candystripe flagging signifies culturally sensitive areas

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Narrow, steep, unforgiving native surfaced roads within the fire area. Drive defensively! Expect the unexpected around every curve. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Always use headlights. Follow travel plans, roads may become impassible after rain.
All	FIRE BEHAVIOR	<ul style="list-style-type: none"> Anticipate active fire behavior and rapid rates of spread. Establish and maintain LCES. Expect increased spot fires and spotting distance. Allow for adequate time to escape routes and safety zones. Dry Fuels and Large dead and down component. Heavy fuel loading with no fire history. Thunderstorms possible watch for outflow winds
ALL	HAZARD TREES	<ul style="list-style-type: none"> Be especially alert around snags during wind events or changing wind direction. Establish trigger points. Green trees can fall without warning. Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> Always be thinking "How are you going to move this patient to care". Incorporate transportation times into your "tactical operational plan". Don't rely on aircraft.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Evaluate necessity to send personnel in areas with limited access. Concentrate on your footing placement; take your time. Evaluate the necessity to send personnel in areas with limited access, post lookouts to warn of rolling debris. SHOUT out to warn others
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Follow the incidents communication plan. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident communications plan.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Watch for ash pits.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotters. Ensure the use of effective communication (radio, hand signals).
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours
ALL	UTV USE	<ul style="list-style-type: none"> Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/RMA.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Repeated assignments in the same area can lead to complacency. A feeling of being satisfied with your safety may be a sign of complacency.
INCIDENT NAME: BOISE		DATE PREPARED: 8/16/2024

		OPERATIONAL PERIOD 08/17/2024 0600 to 0600
		Prepared by: Danen

Lookouts
Communications
Escape Routes
Safety Zones

BOISE FIRE
Operation Period: 08/17/2024 0600 to 08/18/2024 0600

SAFETY MESSAGE

IDENTIFICATION OF EFFECTIVE ESCAPE ROUTES AND SAFETY ZONES

- 1. **OBSERVE**-Personally observe potential safety zones and escape routes in the work area.
- 2. **VISUALIZE**- Build a mental picture of the fire behavior you would expect if conditions existed that would enable a crown fire to burn around your potential safety zone.
- 3. **IDENTIFY**- Compare the fire behavior you visualize with the size and location of potential safety zones you observe in order to identify any true safety zones available.
- 4. **TIME**- Have someone walk and time the route from the work location to the potential safety zone(s).
- 5. **INFORM**- Communicate the location and path of travel to those who work for you and around you.
- 6. **EVALUATE**- You must continually evaluate your escape and safety plan to ensure that it will still work.

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION BUCKET DROPS	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
--	---	--

Be sure all elements of your safety plan are in place prior to engagement

Steps To Protect Yourself From Illnesses

- Wash your hands often
- Avoid touching your eyes, nose, or mouth, as this will spread germs.
- Try to avoid close contact with sick people
- Practice good health habits. Get plenty of sleep drink plenty of fluids, and eat healthy food
- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it
- If you are sick with flu-like illness, separate that person from the rest of your crew and others, seek treatment at the medical unit.

Hazard Tree Felling

Felling a hazard tree requires accurate risk assessment and complexity analysis and demands the sawyer's full situational awareness. In all cases, remember to establish and maintain a secure felling area.

Do not bypass hazard trees without taking some action such as felling or establishing a No-Work-Zone.

Degree of hazard varies with tree size, species, and type/location of defect:

- Stem defects resulting in tree failure
- Weakened sapwood resulting in loss of control when falling trees and limits solid wood for wedging.
- Overhead hazards, i.e., dead or hanging limbs falling on the faller.

FINANCE MESSAGE

Finance Email: 2024.boise.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

All Local Government employees MUST have a MARS account to complete and submit their F-42's for reimbursement.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

THANKS FOR KEEPING UP ON YOUR TIMES!!!

TRAINING SPECIALIST MESSAGE

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible. Register your assignment with the TNSP to take advantage of the available services.

An Incident Training Program Home Page is available for *both* trainees and trainers. Please visit and bookmark the page to register and manage your training assignment throughout the incident.

Access the Incident Training Page by scanning the QR Code on the IAP Cover Page and select the “Incident Training Program” link.

Please take advantage of the Incident Training Home Page as connectivity opportunity allows.

Trainees and Trainers: Please take a moment to check the Message Board on the Incident Trainee Website, daily, for any important information and updates regarding training assignments on this incident.

Avoid creating a delay when it's time for you to Demob. Register with the Training Specialist as early as possible during the course of your assignment.

Brad Smith, TNSP 209.770.4809 bradley_smith@firenet.gov

DEMOB

If you have questions about the Demob process, please call Boise Fire Demob at 916-440-3661. If no answer, please leave a message clearly stating who you are, why you are calling and a number so that we may return your call.

****If you are flying home, please call Demob 72 hours in advance!****

Documentation (DOCL)

Incident records please remember to provide final incident records on a consistent basis to the DOCL. Records may be uploaded to the 'To Be Filed' folder in eDOC Box or dropped off to the DOCL located in the Status Check-in trailer. Please do not wait until the last minute before leaving the incident.

Thank you for keeping up on your incident records – they help tell the story of the incident!

MEDICAL PLAN (ICS 206 WF) CIIMT 10

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, head stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrinsic

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
