Fire Weather Forecast

MONDAY AUG 19, 2024

FORECAST NO: 6
SHIFT DATE: Monday/Aug 19, 2024
FORECAST ISSUED: 2230, Aug 18, 2024

NAME OF FIRE: Boise
UNIT: SRF
Incident Meteorologist: *Mike Kistner*

DISCUSSION: There are no fire weather concerns for today. Weak and brief high pressure will be over the area today and Tuesday with drier conditions. RH values will dip back down to near 25-30% in exposed lower slopes and drainage areas today and again on Tuesday, but expect RH to be 10-15% higher under the canopy. General wind direction will be out of the WSW today, however, winds will be light and variable in sheltered drainages. The drier air will stay in place tonight and RH recovery will be more modest with the lowest values around midslope.

MONDAY:

- **WEATHER:** Areas of smoke early in the morning lifting between 1000 - 1200 then sunny.
- **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1000 - 1100 then upslope 2-6 mph. Unsheltered areas and wind-aligned drainages: West-southwest 3-5 mph through 1100 then increasing to 8 mph with gusts 10 - 13 mph.
- **MAX TEMPERATURES:** 71-76 lower slopes and drainages, 64-69 mid-slope and above.
- **MIN RH:** 30% exposed areas, 40 - 45% under the canopy
- **INVERSION:** Mixing out between 1100 - 1200.

MONDAY NIGHT:

- **WEATHER:** Mostly clear with areas of smoke
- **WIND (20 FT):** Becoming downslope/down valley 3-7 mph after 2000.
- **MIN TEMPERATURES:** 48-53
- **MAX RH:** Near 60 - 65% mid slope... higher RH lower slopes (below 1500 ft) and also higher slopes above 3500 ft
- **INVERSION:** Weak and shallow, extending only to about 1500.

TUESDAY:

- **WEATHER:** Areas of smoke until 1100 then mostly sunny
- **WIND (EYE LEVEL):** Sheltered areas: Downslope/down valley 1-3 mph through 1000 - 1100 then upslope 2-6 mph. Unsheltered areas and wind-aligned drainages: Westerly 3-5 mph through 1100 then increasing to 8 mph with gusts 10 - 13 mph.
- **MAX TEMPERATURES:** 71-77 lower slopes and drainages, 63-68 mid-slope and above.
- **MIN RH:** 33% in exposed areas and near 45% under the canopy
- **INVERSION:** ...mixing out around noon.

Extended outlook: Wednesday through Friday: A weak system will push into the area Tuesday night into Wednesday morning, but will likely only bring an increase in moisture with some clouds and higher RH values. Areas of smoke will likely remain an issue through the morning hours with the inversion holding on until the afternoon. Winds will mostly be weak and westerly. A larger low pressure system moves into the region toward the end of the week and into the weekend, possibly bringing more showers and thunderstorms. There are no critical fire weather concerns through the period.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 8	TYPE OF FIRE: WILDFIRE
FIRE NAME: Boise Complex	FOR OPERATIONAL PERIOD: 8/19/24 (24 hour shift)
DATE ISSUED: 8/19/24 Monday	TIME ISSUED: 1900 8/18
UNIT: SRF	SIGNED /s/ R.Henault

INPUTS

WEATHER SUMMARY

High temps 64-69
 Min RH 30%
 Daytime: WSW 8 G10-13G mph in the afternoon.
 Nighttime: Light winds down slope down valley after 2000.

Overnight lows around 48-53
 Max RH around 60-65%

OUTPUTS

FIRE BEHAVIOR

GENERAL

FDPM 6-9% PIG 30-50%
 8/15 Live Fuel Moistures: Manzanita 97% Tan Oak 100% 1000hr 11%
 Forecast SC: 15 Forecast Burning Index: 10 Forecast ERC: <80thth percentile
 (Slate Creek RAWS)
 Spotting distance: up to ½ mile

*
****POTENTIAL FOR NEW IGNITIONS IN THE LOCAL AREA****

- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Fire has been burning actively at night above the inversion layer.
- Group torching and short crown runs have been observed, with spotting distance greater than ½ mile observed.
- Very heavy fuel loading in an area with no recorded fire history. 1000-hour fuels are consuming and contributing to fire load. Expect high energy release and extended residence/burn out times.
- Rollout is a major factor that can contribute to spots and slop-overs on extremely steep slopes.
- Fire is moving east into an 11-year-old burn scar with much lighter fuel loading, less sheltering and more reactivity to wind gusts.

Fuel Type	Flame Length	Crown Fire Flame Length	Max Rate of spread	Spotting Distance	Probability of Ignition
10 Timber Litter and Understory	<8	97	21 ch/hr	.5 mi	50%
High load timber-shrub TU5	<11	100	21 ch/hr	.5 mi	50%
Moderate Load Blowdown SB2	<9	96	37 ch/hr	.5 mi	50%
Low load dry climate shrub SH1	<2	93	2 ch/hr	.5 mi	50%

Behave Calculations use 100% slope, max wind and min RH values.

SPECIFIC

Expect low to moderate intensity fire with slow rates of spread. Fuels will be recovering from the recent moisture this afternoon; activity could be increased in areas that had no rainfall or are high exposure to drying -- unsheltered/wind/aspect/solar radiation.

SAFETY

Keep in mind which tactic you are engaged in. Is it an opportunity tactic or a fire behavior tactic? Tactics should be tied to conditions.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Narrow, steep, unforgiving native surfaced roads within the fire area. Drive defensively! Expect the unexpected around every curve. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Always use headlights. Follow travel plans, roads may become impassible after rain.
All	FIRE BEHAVIOR	<ul style="list-style-type: none"> Anticipate active fire behavior and rapid rates of spread. Establish and maintain LCES. Expect increased spot fires and spotting distance. Allow for adequate time to escape routes and safety zones. Dry Fuels and Large dead and down component. Heavy fuel loading with no fire history. Thunderstorms possible watch for outflow winds
ALL	HAZARD TREES	<ul style="list-style-type: none"> Be especially alert around snags during wind events or changing wind direction. Establish trigger points. Green trees can fall without warning. Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> Always be thinking "How are you going to move this patient to care". Incorporate transportation times into your "tactical operational plan". Don't rely on aircraft.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Evaluate necessity to send personnel in areas with limited access. Concentrate on your footing placement; take your time. Evaluate the necessity to send personnel in areas with limited access, post lookouts to warn of rolling debris. SHOUT out to warn others
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Follow the incidents communication plan. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident communications plan.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Watch for ash pits.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotters. Ensure the use of effective communication (radio, hand signals).
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours
ALL	UTV USE	<ul style="list-style-type: none"> Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/RMA.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Repeated assignments in the same area can lead to complacency. A feeling of being satisfied with your safety may be a sign of complacency.

Boise Fire
Operation Period: 08/19/24 0700 to 08/20/24 0700

SAFETY MESSAGE

Common Denominators of Fire Behavior on Tragedy Fires

1. On relatively small fires or deceptively quiet areas of large fires.
2. In relatively light fuels, such as grass, herbaceous fuels, and light brush.
3. When there is an unexpected shift in wind direction or in wind speed.
4. When fire responds to topographic conditions and runs uphill.
5. During critical burn period between 1400 and 1700. (IRPG Pg 3)

Are you in any of these situations now, or expected today? What have you done to mitigate the hazards?

MAJOR HAZARDS AND RISKS

<u>STEEP TERRAIN</u> <u>FATIGUE</u> <u>SPOT FIRES</u>	<u>ROLLING MATERIAL</u> <u>DEHYDRATION</u> <u>ALLERGIC REACTION</u>	<u>OHV USE</u> <u>HAZARD TREES</u> <u>COMPLACENCY</u>
---	---	---

Be sure all elements of your safety plan are in place prior to engagement

Poison Oak – Urushiol Oil

- The oil contaminates your skin, gear and clothing. Traces can cause a severe reaction.
- Reaction time is 6 or 8 hrs. to 3 days before the rash occurs.
- That amount of time is your window of opportunity to get the oil off of your skin and clothes allowing a person to completely avoid a rash or dramatically cut down on the severity.
- Wash exposed area with Tecnu original as soon as possible. Rub it fairly aggressively and wipe or scrape it off. Follow up with Tecnu extreme scrub as soon as possible.
- Get it off your clothes by using the camp laundry every day.

Roadside Response Safety

- Conduct all operations as far from traffic lanes as possible.
- When not involved in firefighting, high visibility vests must be worn.
- Park on one side of the roadway.
- Exit vehicle away from the traffic lane when possible.
- Post lookouts to watch for and control traffic in both directions.
- Use cones or other warning signs.
- Operate pumps from the non-traffic side.
- Keep all hose, tools and equipment out of the traffic lane. (IRPG Pg 24)

FINANCE MESSAGE

Finance Email: 2024.boise.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

All Local Government employees MUST have a MARS account to complete and submit their F-42's for reimbursement.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

THANKS FOR KEEPING UP ON YOUR TIMES!!!

TRAINING SPECIALIST MESSAGE

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible.

Training Specialists are available at ICP and Nordheimer Camp. Register your assignment with the TNSP, at either location, to take advantage of available TNSP services.

A Training Home Page is available for *both* trainees and trainers for this incident. *As connectivity allows*, visit and bookmark the page to manage your training assignment throughout the incident. *Trainees and Trainers: Please take a moment to check the Message Board on the Training Home Page, daily, for any important information and updates regarding training assignments on this incident.*

Access the Training Home Page by scanning the QR Code on the IAP Cover and select the “Training Specialist” link.

Avoid creating a delay when it’s time for you to Demob. Register with the Training Specialist as early as possible during the course of your assignment.

Ryan Wakefield

Cal OES Asst. Chief
Region II - North

OES Resource Check In QR Code

DEMOB

If you have questions about the Demob process, please call Boise Fire Demob at 916-440-3661. If no answer, please leave a message clearly stating who you are, why you are calling and a number so that we may return your call.

****If you are flying home, please call Demob 72 hours in advance!****

Documentation (DOCL)

Incident records please remember to provide final incident records on a consistent basis to the DOCL. Records may be uploaded to the 'To Be Filed' folder in eDOC Box or dropped off to the DOCL located in the Status Check-in trailer. Please do not wait until the last minute before leaving the incident.

Thank you for keeping up on your incident records – they help tell the story of the incident!

MEDICAL PLAN (ICS 206 WF) CIIMT 10

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2nd - 3rd burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2nd - 3rd burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
