Fire Weather Forecast

WEDNESDAY AUG 21, 2024

FORECAST NO: 8

SHIFT DATE: Wednesday/Aug 21, 2024

FORECAST ISSUED: 2230, Aug 20, 2024

NAME OF FIRE: Boise

UNIT: SRF

Incident Meteorologist: *Mike Kistner*

DISCUSSION: One more dry day before cooler temperatures and moisture moves into the region on Thursday. Today will become mostly sunny this afternoon after the inversion lifts between 1300 and 1400. General wind direction will be out of the SW today, with gusts to 15 mph on exposed ridges and aligned areas after the inversion breaks. For tonight, clouds will increase as low pressure drops south towards the northern California Coast. Areas of light rain and drizzle is expected by sunrise Thursday morning.

WEDNESDAY:

- **WEATHER:** Areas of smoke early in the morning lifting around 1300 to 1400 then sunny.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 1-3 mph through 1100 then upslope 2-6 mph. Unsheltered areas and wind-aligned drainages: Southwest 3-5 mph through 1300 then increasing to 8 mph with gusts 10 - 15 mph.
- **MAX TEMPERATURES:** 74 - 79 lower slopes and drainages, 66 - 71 mid-slope and above.
- **MIN RH:** 30 - 35% exposed areas, 40 - 45% under the canopy
- **INVERSION:** Moderate strength setting up at midslope. Mixing out around 1300 - 1400.

WEDNESDAY NIGHT:

- **WEATHER:** Increasing clouds with areas of light rain, drizzle and fog by sunrise.
- **WIND (20 FT):** Becoming downslope/down valley 3-6 mph after 2000.
- **MIN TEMPERATURES:** 49 - 54
- **MAX RH:** Near 75% mid slope and above, 90 - 100% below 2,000 feet
- **INVERSION:** Weak inversion due to moisture pushing in

THURSDAY:

- **WEATHER:** Areas of light rain and drizzle through early afternoon with mountains obscured, then partly sunny.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 1-3 mph through 1400 then upslope 2-5 mph. Unsheltered areas and wind-aligned drainages: Westerly 3-5 mph through 1400 then increasing to 6 mph with gusts 9 - 12 mph.
- **MAX TEMPERATURES:** 65-70 lower slopes and drainages, 58-63 mid-slope and above.
- **MIN RH:** 55-60%
- **INVERSION:** Weak due to light rain and drizzle

Extended outlook: Friday through Sunday: An anomalously cold weather system will be moving over the region on Friday. A wetting rain is expected (80%) and with freezing levels dropping below 6K feet, some light snow accumulations will be possible on the higher peaks. High temperatures on Friday have a chance to set a record for coldest high temperature recorded in the month of August. Overnight lows will dip into the low 40s. Drier weather returns on Saturday with temperatures climbing back into the 60s, but still below normal. High pressure builds over the region on Sunday and temperatures will finally climb back to near normal values.

Aviation can expect IFR ceilings with obscured mountain tops on Friday.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR FORECAST

FORECAST NUMBER 9	TYPE OF FIRE: WILDFIRE
FIRE NAME: Boise Complex	FOR OPERATIONAL PERIOD: 8/21/24 (24 hour shift)
DATE ISSUED: 8/21/24 Wednesday	TIME ISSUED: 1900 8/20
UNIT: SRF	SIGNED /s/ R.Henault

INPUTS

WEATHER SUMMARY

High temps mid 70's
 Min RH 32%
 Daytime: SW 9 mph Gusts to 15 in the afternoon. Generally terrain driven winds.
 Nighttime: Light winds down slope down valley after 2000.

Overnight lows around 49-54
 Max RH around 85%

OUTPUTS

FIRE BEHAVIOR

GENERAL

DFM 6-9% PIG 30-60%
 8/15 Live Fuel Moistures: Manzanita 97% Tan Oak 100% 1000hr 11%
 Forecast SC: 34 Forecast Burning Index: 21 Forecast ERC: <80thth percentile
 (Slate Creek RAWS)
 Spotting distance: up to ½ mile

*
****POTENTIAL FOR NEW IGNITIONS IN THE LOCAL AREA****

- Expect moderate to dangerous rates of spread with *alignment of slope and wind*. Group torching and spotting can contribute to significant fire growth.
- Fire has been burning actively at night above the inversion layer.
- Group torching and short crown runs have been observed, with spotting distance greater than ½ mile observed.
- Very heavy fuel loading in an area with no recorded fire history. 1000-hour fuels are consuming and contributing to fire load. Expect high energy release and extended residence/burn out times.
- Rollout is a major factor that can contribute to spots and slop-overs on extremely steep slopes.
- Fire is moving east into an 11-year-old burn scar with much lighter fuel loading, less sheltering and more reactivity to wind gusts.

Fuel Type	Flame Length	Crown Fire Flame Length	Max Rate of spread	Spotting Distance	Probability of Ignition
10 Timber Litter and Understory	<8	97	21 ch/hr	.5 mi	60%
High load timber-shrub TU5	<11	100	21 ch/hr	.5 mi	60%
Moderate Load Blowdown SB2	<9	96	37 ch/hr	.5 mi	60%
Low load dry climate shrub SH1	<2	93	2 ch/hr	.5 mi	60%

Behave Calculations use 100% slope, max wind and min RH values.

SPECIFIC

Expect low to moderate intensity in the afternoon; activity will increase after inversion lifts. Watch green islands with fire at the base of the slope/in alignment.
 Rollout potential in areas with mid-slope control lines and steep slopes.

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> • Narrow, steep, unforgiving native surfaced roads within the fire area. • Drive defensively! Expect the unexpected around every curve. • Use warning lights when working on roads or traveling in smoke. • Observe posted speed limits. Always use headlights. • Follow travel plans, roads may become impassible after rain.
All	FIRE BEHAVIOR	<ul style="list-style-type: none"> • Anticipate active fire behavior and rapid rates of spread. • Establish and maintain LCES. • Expect increased spot fires and spotting distance. • Allow for adequate time to escape routes and safety zones. • Dry Fuels and Large dead and down component. • Heavy fuel loading with no fire history. • Thunderstorms possible watch for outflow winds
ALL	HAZARD TREES	<ul style="list-style-type: none"> • Be especially alert around snags during wind events or changing wind direction. Establish trigger points. Green trees can fall without warning. • Follow Hazard Tree Safety Guidelines (IRPG p. 22). • Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> • Always be thinking "How are you going to move this patient to care". • Incorporate transportation times into your "tactical operational plan". • Don't rely on aircraft.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> • Keep alert for wildlife, rattlesnakes, bees, and plants. • Watch footing and hand placement around rocks. • Personal hygiene is #1 when it comes to Poison Oak Prevention
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> • Evaluate necessity to send personnel in areas with limited access. • Concentrate on your footing placement; take your time. • Evaluate the necessity to send personnel in areas with limited access, post lookouts to warn of rolling debris. SHOUT out to warn others
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • Follow the incidents communication plan. • Answer questions when asked by others. Ask for intel when you don't know the plan. • Ensure all personnel are familiar with the incident communications plan.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> • Establish and maintain LCES. • Locate line in favorable location, lighter fuels and gentler topography when possible. • Utilize natural or existing barriers.
ALL	MOP UP	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Use all required PPE, including eye protection. • Maintain proper spacing and overhead clearance. • Be alert for stump holes and root cavities. Watch for ash pits.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> • Utilize appropriate PPE and other equipment safety mechanisms. • Maintain safe working distances. Utilize observer or spotters. • Ensure the use of effective communication (radio, hand signals).
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> • Have a purpose for where you drive, what you do, don't rush into assignments • Use caution where you park/stage especially in steep timbered areas. • Increase SA by trying to see the work areas during daylight hours
ALL	UTV USE	<ul style="list-style-type: none"> • Ensure equipment is inspected and safe to use. • Ensure operator is trained and certified to operate. • Ensure operator has proper PPE according to the Redbook/RMA.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Repeated assignments in the same area can lead to complacency. • A feeling of being satisfied with your safety may be a sign of complacency.
INCIDENT NAME: BOISE ICS 215a	DATE PREPARED: 8/20/2024 TIME PREPARED: 1800	OPERATIONAL PERIOD 08/21/2024 0700 to 08/22/2024 0700 Prepared by: Danen

Lookouts
Communications
Escape Routes
Safety Zones

Boise Fire

Operation Period: 08/21/2024 0700 to 08/22/2024 0700

Emphasis on Attention to Detail

The Small Things Make a Difference

- **Stay focused on the small things that can compromise your safety**
- **Small issues may seem inconsequential when viewed alone**
- **Sometimes multiple small issues can develop into a major problem**
- **Mitigate small issues so they do not snowball into a major issue**
- **Communicate minor problems so everyone is aware**

MAJOR HAZARDS AND RISKS

STEEP TERRAIN CHIPPING OPS FATIGUE	ROLLING MATERIAL DRIVING ASH PITS	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
---	--	---

Be sure all elements of your safety plan are in place prior to engagement

Mop Up Hazards

Wear proper PPE including eye protection.

Watch for stump holes and spray nozzle ash.

Don't forget to look up while work around trees.

Stay focused on the environment, do not be complacent.

Watch for Rolling Material

Post lookout(s) to warn of rolling material and ignitions below the line.

Consider locating line in a defensible position.

Do you have two escape routes if rolling material ignites fuel below you.

Can you adequately trench the line based on steepness of slope and soil conditions.

California Team 10 Safety Officer Jason Danen

FINANCE MESSAGE

Finance Email: 2024.boise.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

All Local Government employees MUST have a MARS account to complete and submit their F-42's for reimbursement.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

THANKS FOR KEEPING UP ON YOUR TIMES!!!

TRAINING SPECIALIST MESSAGE

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible. Register your assignment with the TNSP to take advantage of the available services.

An Incident Training Program Home Page is available for *both* trainees and trainers. Please visit and bookmark the page to register and manage your training assignment throughout the incident.

Access the Incident Training Page by scanning the QR Code on the IAP Cover Page and select the "Incident Training Program" link.

Please take advantage of the Incident Training Home Page as connectivity opportunity allows.

Trainees and Trainers: Please take a moment to check the Message Board on the Incident Trainee Website, daily, for any important information and updates regarding training assignments on this incident.

Avoid creating a delay when it's time for you to Demob. Register with the Training Specialist as early as possible during the course of your assignment.

Brad Smith, TNSP 209.770.4809 bradley_smith@firenet.gov

DOCUMENTATION MESSAGE

Please don't forget to submit final incident records to the DOCL!

For those with access to Firenet's incident directory in Microsoft Teams, submit your documents in the O_To Be Filed in eDOC Box folder found in the Files Tab of the General Channel.

If you have a lot of files, please make a folder in the O_To Be Filed in eDOC Box folder with your unit or name.

If you've got capacity, please try to use the NWCG electronic file naming convention
File Naming Convention Format
Standard for all Section/Unit Files
{DocType}_{DocVersion}_{Date}_{Incident Number}
Example: 214_BearSmokey_20210727_000123

For those without access to eDOC Box, you can get records to the DOCL in another method you prefer such as via jump drive or email (sendi_kalcic@firenet.gov). Any paper copies can be brought to DOCL desk, co-located in the LOFR trailer. If you need to scan files, a scanner is available at the DOCL desk.

Not sure which documents are Permanent Records?
Reference the Wildland Fire Incident Records-Retention Guidance.

File Naming Components

DocType is the title of the document or the ICS Form Number
Examples: PublicMeetingEvents, 296, etc

DocVersion identifies the individual files with the same doc type and date or a file name that necessitates a name ID

Not all electronic files will need a DocVersion

Examples: Resource Name, Aircraft Tail Number, Resource Order Number, Time

Date is entered YYYYMMDD - Y=year, M=month, D=day
Example: 20240820 represents the date August 20, 2024

IncidentNumber is the six-digit incident number -000NNN - N=numeral
Example: 000729 represents the incident number CA-SRF-000729

If you have questions about what to file or are having trouble with naming, uploading or anything else related to documentation, please reach out!

If you're not sure, file it. Records could/should include unit logs (214s), general messages (213s), meeting minute notes, photos, etc. in addition to the permanent record files.

*Remember: for 213's use Sender's Unit Name and Sender's Last Name if known. *

Do not file general messages you send to other units

Please do not wait until the last minute to submit documents.
Thank you for keeping up on your incident records – they help tell the story of the incident!

Email orders to: CIIMT10Ordering@gmail.com

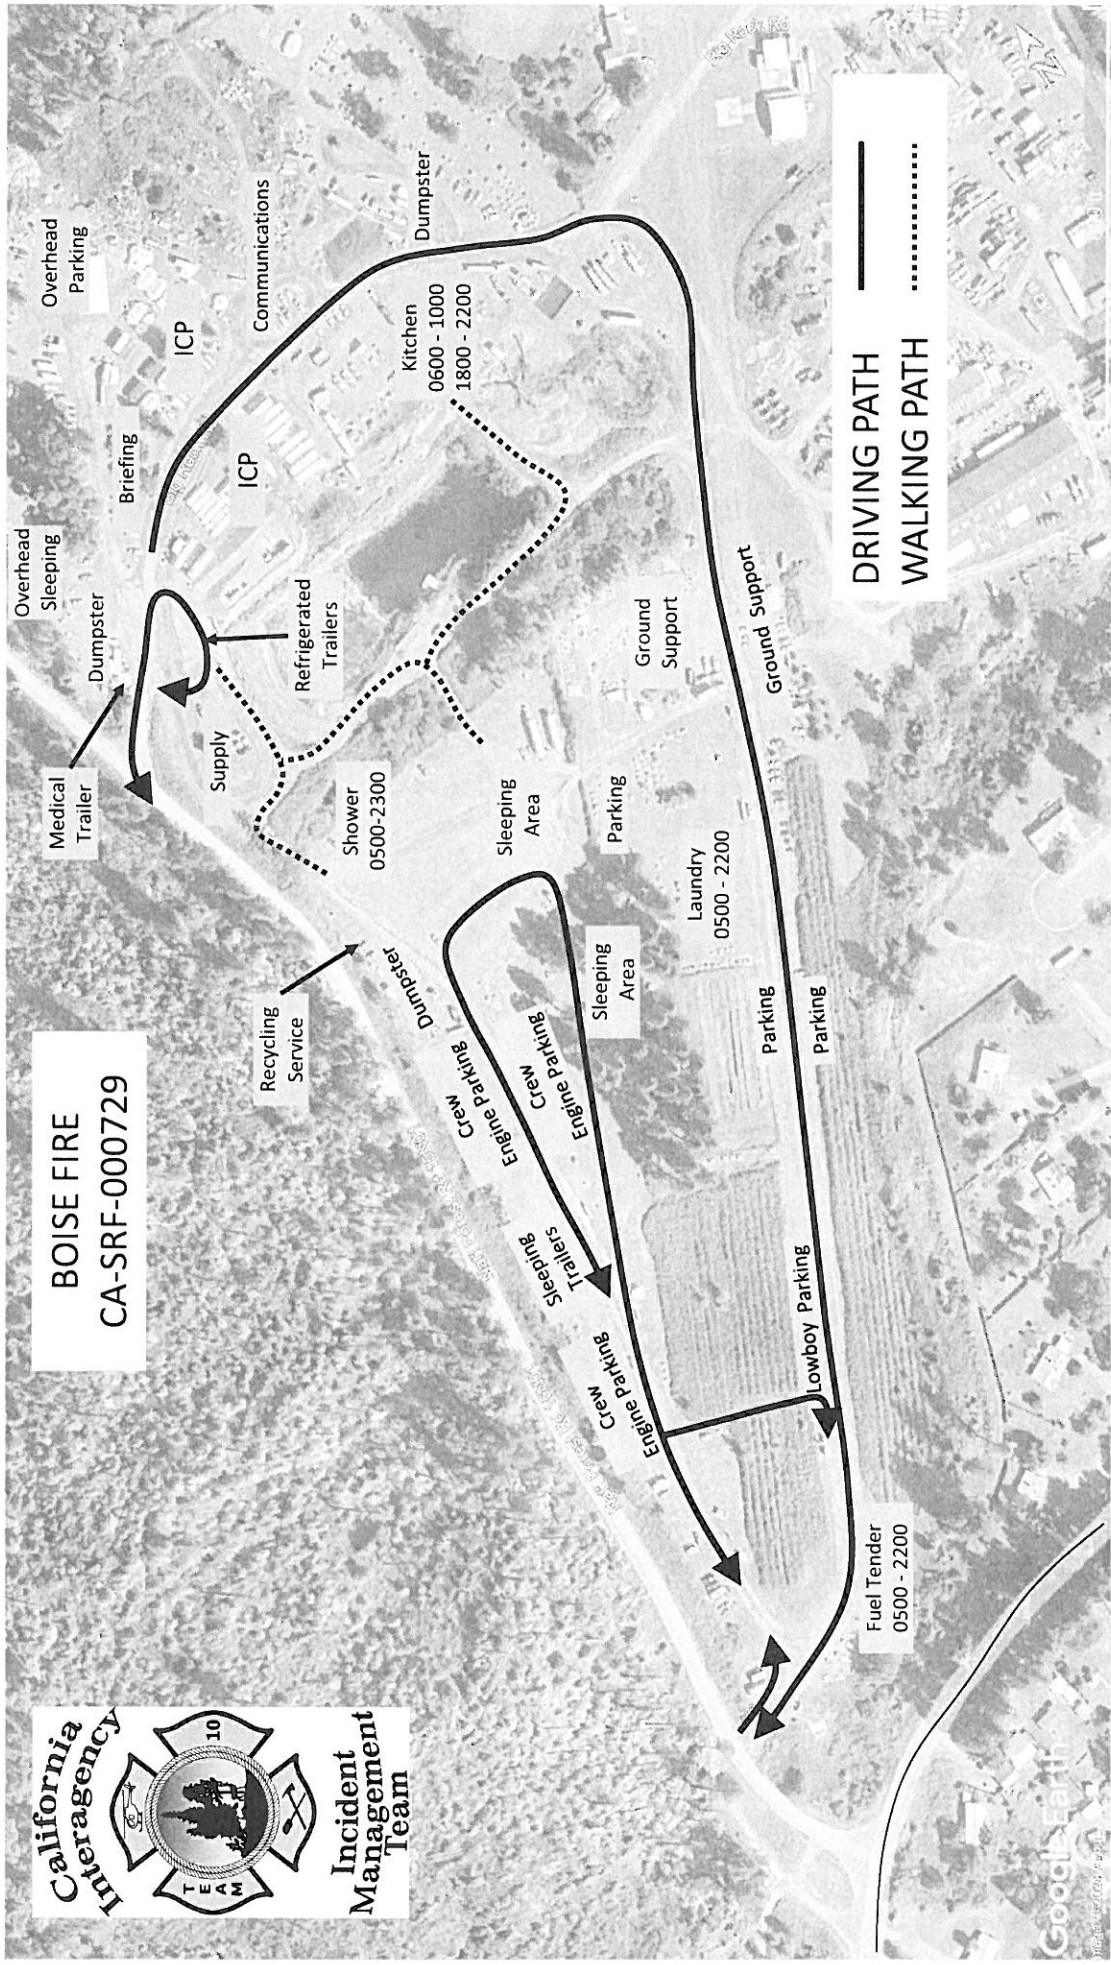

CIIMT 10 FIRELINE ORDER FORM

Date & Time order was placed:		Order # (DIVS + #)	Location & Time for delivery (DIV, LZ, DP, Lat Long)		Mode of Delivery

MEDICAL PLAN (ICS 206 WF) CIIMT 10

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE Ex: Unconscious, difficulty breathing, bleeding severely, 2 ^o - 3 ^o burns more than 4 palm sizes, heat stroke, disoriented. <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. Ex: Significant trauma, unable to walk, 2 ^o - 3 ^o burns not more than 1-3 palm sizes. <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport Ex: Sprains, strains, minor heat-related illness.	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)
Patient Care		Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
