OPERATIONAL PERIOD

8/22/2024 0700

to

8/23/2024 0700

IAP, Maps,
Weather, etc.

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Boise Fire</p>	2. Operational Period:	Date From: 8/22/2024 Time From: 0700	Date To: 8/23/2024 Time To: 0700
--	-------------------------------	---	-------------------------------------

3. Objective(s):

Strategic Direction:

- The Boise fire is managed with a full suppression strategy. Firefighting resources will follow risk-based decision making and implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and restoring suppression related damages while protecting local values. Values at risk include the safety of the public and firefighters; the communities and outlying areas near Orleans and Forks of Salmon; water, transportation, natural and cultural resources.

Control Objectives:

- Keep fire south of 10N13/25 Rd (Orleans Lookout Road / Antenna Ridge) continuing to Orleans Mountain Ridge to Nordhiemer.
- Keep fire west of the Salmon River
- Keep fire north of the North Folk Red Cap Creek in the Trinity Alps Wilderness
- Keep fire east of the current perimeter

Management Objectives

- Prior to engagement, ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression activities in consultation with Incident Resource Advisors.
- Minimize impacts to communities, cultural resources, natural resources including old growth forest, critical power, communication and other infrastructure, private property inholdings, Tribal Lands, threatened, endangered species and watersheds.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Fire Weather Forecast

WEDNESDAY AUG 21, 2024

FORECAST NO: 9

SHIFT DATE: Thursday/Aug 22, 2024

FORECAST ISSUED: 2230, Aug 21, 2024

NAME OF FIRE: Boise

UNIT: SRF

Incident Meteorologist: *Mike Kistner*

DISCUSSION: An unseasonably cold and wet air mass will impact the region for the remainder of the week. This system will bring light rain showers and areas of drizzle today with mostly cloudy skies. On Friday, this system will move overhead, with moderate rainfall and a low chance for isolated thunderstorms Friday afternoon and evening. However, the main story with this system will be the temperatures. Freezing levels will drop below 6,000 feet and some light snow accumulations will be possible Friday evening and Friday night on the Orleans Lookout. The unseasonably cold and damp conditions will persist into Saturday morning.

THURSDAY:

- **WEATHER:** Increasing clouds with light rain and areas drizzle by early afternoon.
- **WIND (20 FT):** Sheltered areas: Downslope/down valley 1-3 mph through 1300 then upslope 2-6 mph. Unsheltered areas and wind-aligned drainages: Southwest 3-5 mph through 1300 then increasing to 8 mph with gusts 10 - 13 mph.
- **MAX TEMPERATURES:** 68 - 73 lower slopes and drainages, 60 - 65 mid-slope and above.
- **MIN RH:** 55 - 60%
- **INVERSION:** Weak inversion due to moisture pushing in

THURSDAY NIGHT:

- **WEATHER:** Areas of light rain, drizzle and fog.
- **WIND (20 FT):** Ridges west at 10 mph. Downslope/down valley 2-4 mph.
- **MIN TEMPERATURES:** 45 - 50
- **MAX RH:** Near 100%
- **INVERSION:** Weak inversion due to light rain and drizzle

FRIDAY:

- **WEATHER:** Areas of light rain and drizzle in the morning. Moderate to heavy rain showers this afternoon and evening with an isolated thunderstorm. Mountains obscured and chance for light snow above 6,000 feet.
- **WIND (20 FT):** Sheltered areas: Variable 4-8 mph. Unsheltered wind-aligned drainages and ridges: South-westerly 8-10 mph with gusts to 15 mph through 1400 then increasing to 10-15 mph with gusts 20 - 25 mph.
- **MAX TEMPERATURES:** 54-60 lower slopes and drainages, 47-53 mid-slope and above.
- **MIN RH:** 75%
- **INVERSION:** Weak due clouds and rain.

Extended outlook: Saturday through Monday: A transition day on Saturday as warmer and drier weather returns with temperatures climbing back into the mid 60s, but still below normal. High pressure builds over the region on Sunday and temperatures will finally climb back to near normal values and even warmer next week.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR OUTLOOK

FIRE NAME: BOISE	OUTLOOK PERIOD (valid time period): 8/22-8/24
DATE ISSUED: 8/22/24	TIME ISSUED: 1900 8/21/24
UNIT: SRF	SIGNED:  R.Henault, FBAN

WEATHER/CLIMATOLOGY DISCUSSION : For the next three days, cooler than average temperatures and wetting rain will produce minimal fire spread and moderate fire behavior. Then we will see Sunny, warm and dry conditions return as high pressure will be moving in over the area, returning to normal temps/RH values

FUELS: After a week of moderated weather conditions, fuels will be returning/remaining in critical values. 1000 hr fuels are well below average at 11% Live fuels have cured and will carry fire/contribute to the fire load.

FIRE BEHAVIOR DISCUSSION (Peak Burn Period Extremes for 8/22-25):

Fuel model	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Timber Litter and Understory 10	< 7'	Up to 21 ch/hr	n/a	20%
High load timber-shrub TU5	<10'	Up to 21 ch/hr	n/a	20%
Moderate load blowdown SB2	<8'	Up to 33 ch/hr	n/a	20%
Low load dry climate shrub SH1	< 1'	Up to 1 ch/hr	n/a	20%

20'wind of 15 mph, 100% slope, max temp/min RH values used for calculation.

Short Range (Today, Tomorrow) and Medium Range (3-7 Days):

Moderate probability for large fire development in the days after the wet system. Increasing ERCs (toward 75th%) Fires are predominately fuels and topography dominated. Fire size may exceed initial attack capabilities in the first operational period; especially with wind and slope alignment. Tactical priorities should focus on direct attack at the heel and working the flanks. Holding the fire to the ridgelines may be challenging without sufficient air support. Spotting will be prevalent and may be up to 1/2 mile. Fuels are cured and will support larger fire growth and containment challenges.

BI Is trending up to the 75th percentile. Mid-Flame wind speed greater than 6 mph will transition surface fire into the canopy under the hot/dry/windy conditions.

Smoke Concerns: Smoke concerns will be focused east and immediately north of the fire where air quality has returned to unhealthy levels for locations like Somes Bar, Forks of Salmon, and Cecilville. Mostly moderate impacts along the west side of the fire where most population centers in the area. After (8/21), good air quality is anticipated for a vast majority of the area through at least 8/24. Any impactful smoke from interior creeping/smoldering should remain close to the source once drier/hotter weather returns 8/25-8/27.

Reassessment Criteria: Changing weather and conditions past the August 24 expiration date of this forecast.

SAFETY

Expect fire activity with high resistance to control- fuels will ignite easier, spread faster and have increased spread rates. You may need to adjust normal strategies and tactics!!

AIR OPERATIONS SUMMARY ICS-220

Incident Name / Number: Boise Fire / CA-SF-000129
 Sunrise: 6:29 Startup: 800 Cutoff: 2000 Sunset: 20:03

General Remarks: Safety Notes, Hazards, Air Operations Special Equipment, etc.
 TRACK ALL DIPSITE LOCATIONS / NUMBER OF DIPS / GALLONS TAKEN.
 Assess mission complexity and the benefit/risk of the mission.
 All GPS DATA TO BE COLLECTED IN DEGREES, MINUTES, DECIMAL MINUTES, FORMAT.
 Report all unknown UAS/UFO sightings to Air Ops/Air Attack
Continue feedback to improve safety and situational awareness

DO NOT be pressured into accepting a mission that you know, or feel, is unsafe.
***AVOID No Fly Zones in respect for cultural ceremonies**

Send all aviation costs to 2024.BOISE.FINANCE@FIRENET.GOV by end of shift

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES	
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Narrow, steep, unforgiving native surfaced roads within the fire area. Drive defensively! Expect the unexpected around every curve. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Always use headlights. Follow travel plans, roads may become impassible after rain. 	
All	FIRE BEHAVIOR	<ul style="list-style-type: none"> Anticipate active fire behavior and rapid rates of spread. Establish and maintain LCES. Expect increased spot fires and spotting distance. Allow for adequate time to escape routes and safety zones. Dry Fuels and Large dead and down component. Heavy fuel loading with no fire history. Thunderstorms possible watch for outflow winds 	
ALL	HAZARD TREES	<ul style="list-style-type: none"> Be especially alert around snags during wind events or changing wind direction. Establish trigger points. Green trees can fall without warning. Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen. 	
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> Always be thinking "How are you going to move this patient to care". Incorporate transportation times into your "tactical operational plan". Don't rely on aircraft. 	
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention 	
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Evaluate necessity to send personnel in areas with limited access. Concentrate on your footing placement; take your time. Evaluate the necessity to send personnel in areas with limited access, post lookouts to warn of rolling debris. SHOUT out to warn others 	
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Follow the incidents communication plan. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident communications plan. 	
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers. 	
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Watch for ash pits. 	
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotters. Ensure the use of effective communication (radio, hand signals). 	
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours 	
ALL	UTV USE	<ul style="list-style-type: none"> Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/RMA. 	
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Repeated assignments in the same area can lead to complacency. A feeling of being satisfied with your safety may be a sign of complacency. 	
INCIDENT NAME: BOISE		DATE PREPARED: 8/21/2024	OPERATIONAL PERIOD 08/22/2024 0700 to 0700

	SAFETY MESSAGE

Crew Safety Is Dependent Upon Competent And Confident Leadership

Every Incident Supervisor Has The Responsibility To Confirm That Safe Practices Are Known And Observed

- **TAKE CHARGE** of assigned resources
 - **MOTIVATE** crew members with a “can do” safety attitude
- **DEMONSTRATE INITIATE** by taking appropriate action in the absence of orders
 - **COMMUNICATE** by giving specific instructions and asking for feedback
 - **SUPERVISE** at the scene of the action

MAJOR HAZARDS AND RISKS

STEEP TERRAIN FATIGUE SPOT FIRES	ROLLING MATERIAL DEHYDRATION EVAC TIMES	MOUNTAIN DRIVING HAZARD TREES COMPLACENCY
--	---	---

Be sure all elements of your safety plan are in place prior to engagement

Dirty Nomex? Don't think cool-think contaminated.

For more information scan the URL code to the right for the full article and other useful links related to cancer awareness

Firefighting has been linked to an increased risk of certain types of cancer. Wildland firefighters are exposed to carcinogens through their skin. Skin becomes 400% more absorptive for every 5 degrees increase in core body temperature. Washing or swapping dirty PPE may reduce carcinogen exposure. Showers or wet wipes to the affected areas are your best prevention

FINANCE MESSAGE

Finance Email: 2024.boise.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

All Local Government employees MUST have a MARS account to complete and submit their F-42's for reimbursement.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

THANKS FOR KEEPING UP ON YOUR TIMES!!!

TRAINING SPECIALIST MESSAGE

Trainees: There is much the (On Site) Incident Training Specialist can do to help make your assignment as productive as possible.

Training Specialists are available at ICP and Nordheimer Camp. Register your assignment with the TNSP, at either location, to take advantage of available TNSP services.

A Training Home Page is available for *both* trainees and trainers for this incident. *As connectivity allows*, visit and bookmark the page to manage your training assignment throughout the incident. *Trainees and Trainers: Please take a moment to check the Message Board on the Training Home Page, daily, for any important information and updates regarding training assignments on this incident.*

Access the Training Home Page by scanning the QR Code on the IAP Cover and select the “Training Specialist” link.

Avoid creating a delay when it's time for you to Demob. Register with the Training Specialist as early as possible during the course of your assignment.

Ryan Wakefield

Cal OES Asst. Chief
Region II - North

OES Resource Check In QR Code

Please don't forget to submit final incident records to the DOCL!

For those with access to Firenet's incident directory in Microsoft Teams, submit your documents in the 0_To Be Filed in eDOC Box folder found in the Files Tab of the General Channel.

If you have a lot of files, please make a folder in the 0_To Be Filed in eDOC Box folder with your unit name.

If you've got capacity, please try to use the NWCG electronic file naming convention

File Naming Convention Format

Standard for all Section/Unit Files

{DocType}_{DocVersion}_{Date}_{Incident Number}

Example: 214_BearSmokey_20210727_000123

For those without access to eDOC Box, you can get records to the DOCL in another method you prefer such as via jump drive or email (sendi_kalcic@firenet.gov). Any paper copies can be brought to DOCL desk, co-located in the LOFR trailer. If you need to scan files, a scanner is available at the DOCL desk.

Not sure which documents are Permanent Records?

Reference the Wildland Fire Incident Records-Retention Guidance.

These are the permanent file folders. If you have something on this list, it is particularly important to turn in/post. All other documentation is encouraged as well, the below list is critical. Thanks

- Delegation of Authority - Return of DOA
- Field Weather Observations (not RAWs)
- Final FBAN LTAN IMET Report
- Final Fire Narrative - Executive Summary
- Final Fire Perimeter Map
- Final Fire Progression Map
- Final Jurisdiction - Ownership Map
- Final Statement of Costs
- IAPs (Original _ Corrected)
- ICS-201 Incident Briefing
- ICS-209 FINAL Incident Status Summary_
- ICS-215 Planning Worksheet
- ICS-215A LCES Safety Analysis
- Individual Fire Report (FS 5100-29-DI-1202)
- Infrared Imagery w- Interpretation
- Mechanical Use in Wilderness Request
- Newspaper Clippings
- Photos, Essential annotated
- Significant Events Narrative
- Special Interest - Political Inquiries
- Web Pages Videos Photos
- Wildland Fire Decision Support System (WFDSS) - WFSa

If you have questions about what to file or are having trouble with naming, uploading or anything else related to documentation, please reach out!

Please do not wait until the last minute to submit documents.

Thank you for keeping up on your incident records – they help tell the story of the incident!

MEDICAL PLAN (ICS 206 WF) CIIMT 10

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY. FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o – 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o – 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location			Descriptive Location & Lat. / Long. (WGS84)		
Incident Name			Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>		
On-Scene Incident Commander			Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>		
Patient Care			Name of Care Provider <i>(Ex: EMT Smith)</i>		
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
