Fire Information

OPERATIONAL PERIOD

8/24/2024 0700

to

8/24/2024 1900

IAP, Maps,
Weather, etc.

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: Boise Fire	2. Operational Period:	Date From: 8/24/2024	Date To: 8/24/2024	
		Time From: 0700	Time To: 1900	

3. Objective(s):

Strategic Direction:

- The Boise fire is managed with a full suppression strategy. Firefighting resources will follow risk-based decision making and implement tactics that offer the highest probability of success to achieve the strategy of suppressing the fire and restoring suppression related damages while protecting local values. Values at risk include the safety of the public and firefighters; the communities and outlying areas near Orleans and Forks of Salmon; water, transportation, natural and cultural resources.

Control Objectives:

- Keep fire south of 10N13/25 Rd (Orleans Lookout Road / Antenna Ridge) continuing to Orleans Mountain Ridge to Nordhiemer.
- Keep fire west of the Salmon River
- Keep fire north of the North Folk Red Cap Creek in the Trinity Alps Wilderness
- Keep fire east of the current perimeter

Management Objectives

- Prior to engagement, ensure sound risk management principles are in place to provide for firefighter and public safety.
- Implement fire suppression activities in consultation with Incident Resource Advisors.
- Minimize impacts to communities, cultural resources, natural resources including old growth forest, critical power, communication and other infrastructure, private property inholdings, Tribal Lands, threatened, endangered species and watersheds.

5. Site Safety Plan Required? Yes No

Fire Weather Forecast

SATURDAY AUG 24, 2024

FORECAST NO: 11
SHIFT DATE: Saturday/Aug 24, 2024
FORECAST ISSUED: 2230, Aug 23, 2024

NAME OF FIRE: Boise
UNIT: SRF
Incident Meteorologist: *Mike Kistner*

DISCUSSION: Heavy rain fell overnight, expect swift running water and bank-full creeks and streams today. Also, it is possible that the heavy rain may have produced debris flows in some areas. High pressure will start building into the region today with a drying and warming trend through the end of the weekend and into next week. Due to all the rain that fell, moist soils will keep min RH values high today, especially under the forest canopy.

SATURDAY:

- **WEATHER:** Cloudy and foggy in the morning, becoming sunny in the afternoon.
- **WIND (20 FT):** Light and variable in sheltered locations with terrain driven winds. Exposed areas and ridges: West 5-8 mph
- **MAX TEMPERATURES:** 67-72 lower slopes and drainages, 62-67 mid-slope.
- **MIN RH:** 50-55% in exposed area and 60-65% under the forest canopy.
- **MAX RH:** 90%
- **INVERSION:** Weak due to cloud cover in the morning.

SUNDAY:

- **WEATHER:** Mostly Sunny
- **WIND (20 FT):** Ridges and exposed drainages: west-southwest at 8-10 mph after 1300. Otherwise, terrain driven downslope / downvalley in the morning and upslope / up-valley during the afternoon.
- **MAX TEMPERATURES:** 74-79 lower slopes and drainages, 68-73 mid-slope.
- **MIN RH:** 35% in exposed areas and 45-50% under the canopy.
- **MAX RH:** 70%
- **INVERSION:** Moderate mid-slope...mixing out 1300 - 1400 hrs.

Extended outlook: Monday through Wednesday: High pressure will be over the region through this week with temperatures climbing back to near normal for this time of year. Highs will be in the 80s to low 90s and minimum RH will also dip back down to 25-30% in exposed areas and 40-45% under the forest canopy. Winds will be mostly orographic with downslope/downvalley at night and in the morning, becoming upslope/upvalley late morning through the afternoon. Ridges and exposed west to east aligned drainages will have west-northwest winds at 8 - 12 mph. The high pressure overhead will also bring cool and clear nights with stronger inversions setting up. Inversion will likely not mix out until 1400 or later.

If you have observations, please email to michael.kistner@noaa.gov or text to (240) 205-4030

FIRE BEHAVIOR OUTLOOK

FIRE NAME: BOISE	OUTLOOK PERIOD (valid time period): 8/22-8/24
DATE ISSUED: 8/22/24	TIME ISSUED: 1900 8/21/24
UNIT: SRF	SIGNED:  R. Henault, FBAN

WEATHER/CLIMATOLOGY DISCUSSION : For the next three days, cooler than average temperatures and wetting rain will produce minimal fire spread and moderate fire behavior. Then we will see Sunny, warm and dry conditions return as high pressure will be moving in over the area, returning to normal temps/RH values
FUELS: After a week of moderated weather conditions, fuels will be returning/remaining in critical values. 1000 hr fuels are well below average at 11% Live fuels have cured and will carry fire/contribute to the fire load.

FIRE BEHAVIOR DISCUSSION (Peak Burn Period Extremes for 8/22-25):

Fuel model	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Timber Litter and Understory 10	< 7'	Up to 21 ch/hr	n/a	20%
High load timber-shrub TU5	<10'	Up to 21 ch/hr	n/a	20%
Moderate load blowdown SB2	<8'	Up to 33 ch/hr	n/a	20%
Low load dry climate shrub SH1	< 1'	Up to 1 ch/hr	n/a	20%

20'wind of 15 mph, 100% slope, max temp/min RH values used for calculation.

Short Range (Today, Tomorrow) and Medium Range (3-7 Days):

Moderate probability for large fire development in the days after the wet system. Increasing ERCs (toward 75th%) Fires are predominately fuels and topography dominated. Fire size may exceed initial attack capabilities in the first operational period; especially with wind and slope alignment. Tactical priorities should focus on direct attack at the heel and working the flanks. Holding the fire to the ridgelines may be challenging without sufficient air support. Spotting will be prevalent and may be up to 1/2 mile. Fuels are cured and will support larger fire growth and containment challenges.

BI is trending up to the 75th percentile. Mid-Flame wind speed greater than 6 mph will transition surface fire into the canopy under the hot/dry/windy conditions.

Smoke Concerns: Smoke concerns will be focused east and immediately north of the fire where air quality has returned to unhealthy levels for locations like Somes Bar, Forks of Salmon, and Cecilville. Mostly moderate impacts along the west side of the fire where most population centers in the area. After (8/21), good air quality is anticipated for a vast majority of the area through at least 8/24. Any impactful smoke from interior creeping/smoldering should remain close to the source once drier/hotter weather returns 8/25-8/27.

Reassessment Criteria: Changing weather and conditions past the August 24 expiration date of this forecast.

SAFETY

Expect fire activity with high resistance to control- fuels will ignite easier, spread faster and have increased spread rates. You may need to adjust normal strategies and tactics!!

ASSIGNMENT LIST (ICS 204 WF)

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS / WARNINGS / REMEDIES
ALL	DRIVING HAZARDS	<ul style="list-style-type: none"> Narrow, steep, unforgiving native surfaced roads within the fire area. Drive defensively! Expect the unexpected around every curve. Use warning lights when working on roads or traveling in smoke. Observe posted speed limits. Always use headlights. Follow travel plans, roads may become impassible after rain.
All	FIRE BEHAVIOR	<ul style="list-style-type: none"> Anticipate active fire behavior and rapid rates of spread. Establish and maintain LCES. Expect increased spot fires and spotting distance. Allow for adequate time to escape routes and safety zones. Dry Fuels and Large dead and down component. Heavy fuel loading with no fire history. Heavy rain can be expected, watch for fallout from rocks.
ALL	HAZARD TREES	<ul style="list-style-type: none"> Be especially alert around snags during wind events or changing wind direction. Establish trigger points. Green trees can fall without warning. Follow Hazard Tree Safety Guidelines (IRPG p. 22). Limit number of personnel around snags and their exposure time; fallers must be qualified for trees being fallen.
ALL	LONG MEDICAL TRANSPORT TIMES	<ul style="list-style-type: none"> Always be thinking "How are you going to move this patient to care". Incorporate transportation times into your "tactical operational plan". Don't rely on aircraft.
ALL	ENVIRONMENTAL HAZARDS	<ul style="list-style-type: none"> Keep alert for wildlife, rattlesnakes, bees, and plants. Watch footing and hand placement around rocks. Personal hygiene is #1 when it comes to Poison Oak Prevention
ALL	EXTREMELY STEEP TERRAIN AND ROLLING MATERIAL	<ul style="list-style-type: none"> Evaluate necessity to send personnel in areas with limited access. Concentrate on your footing placement; take your time. Evaluate the necessity to send personnel in areas with limited access, post lookouts to warn of rolling debris. SHOUT out to warn others
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> Follow the incidents communication plan. Answer questions when asked by others. Ask for intel when you don't know the plan. Ensure all personnel are familiar with the incident communications plan.
ALL	INDIRECT LINE CONSTRUCTION	<ul style="list-style-type: none"> Establish and maintain LCES. Locate line in favorable location, lighter fuels and gentler topography when possible. Utilize natural or existing barriers.
ALL	MOP UP	<ul style="list-style-type: none"> Conduct thorough briefing for all personnel (inside rear cover IRPG). Use all required PPE, including eye protection. Maintain proper spacing and overhead clearance. Be alert for stump holes and root cavities. Watch for ash pits.
ALL	HEAVY EQUIPMENT/DOZERS	<ul style="list-style-type: none"> Utilize appropriate PPE and other equipment safety mechanisms. Maintain safe working distances. Utilize observer or spotters. Ensure the use of effective communication (radio, hand signals).
ALL	NIGHT OPERATIONS	<ul style="list-style-type: none"> Have a purpose for where you drive, what you do, don't rush into assignments Use caution where you park/stage especially in steep timbered areas. Increase SA by trying to see the work areas during daylight hours
ALL	UTV USE	<ul style="list-style-type: none"> Ensure equipment is inspected and safe to use. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to the Redbook/RMA.
ALL	FATIGUE/COMPLACENCY	<ul style="list-style-type: none"> Be alert for signs of fatigue and take breaks as necessary. Maintain 2:1 work/rest ratio. Repeated assignments in the same area can lead to complacency. A feeling of being satisfied with your safety may be a sign of complacency.
INCIDENT NAME: BOISE		DATE PREPARED: 8/23/2024
ICS 215a		TIME PREPARED: 1800
		OPERATIONAL PERIOD 08/24/2024 0700 to 1900
		Prepared by: Danen

**Lookouts
Communications

Safety Zones**

Boise Fire

Operation Period: 08/24/2024 0700 to 1900

SAFETY MESSAGE

Shadow Day- Preparing For Change

- **New leadership coming in.**
- **Expect new resources/ overhead on the fire. Pass on Situational Awareness gained from previous operational periods.**
- **Ask for clarification if something does not make sense or if there are questions. You are probably not the only person with that concern or question.**
- **What information would you want to have on your first day of the fire? Ensure you pass those items to the incoming resources/ overhead.**
- **If you see something, say something!**

MAJOR HAZARDS

FATIGUE CHIPPING OPS HEAVY RAIN	ROLLING MATERIAL STEEP TERRAIN SPIKE CAMPS	HEAVY EQUIPMENT HAZARD TREES COMPLACENCY
--	---	---

Be sure all elements of your safety plan are in place prior to engagement

Mop Up Hazards

Wear proper PPE including eye protection.

Watch for stump holes and spray nozzle ash.

Don't forget to look up while work around trees.

Stay focused, do not be complacent.

Stay Hydrated

Drink fluids before, during, and after the shifts.

For every 2 bottles of water, drink 1 bottle of Gatorade.

At 2% dehydration, performance will fall off by 10-20% and is the #1 trigger of fatigue.

California Team 10 Safety Officer Jason Danen

FINANCE MESSAGE

Finance Email: 2024.boise.finance@firenet.gov

CTR's, Shift Tickets and supporting documents may be mailed to the email address above. If you are unable to send documents electronically you can drop off paper copies to Finance. Please submit documents either electronic **OR** hard copy. Do not submit duplicates. **Approving Officials** for CTRs & Shift Tickets please write legibly and print your name under your signature.

Contract equipment please note your resource order number on the top right of the shift ticket and note any down time in the remarks block. Make sure to record mileage for transports.

All Local Government employees MUST have a MARS account to complete and submit their F-42's for reimbursement.

Water Logs need to be filled out when pulling water from the water sources.

Fire Replacement - For replacement of non-cache items the requesting resource will take a completed OF-213 and OF-289 to the Comp/Claims Unit Leader for review. Requests for replacement of government-issued non-standard items brought from the home unit must be accompanied by a copy of a signed JHA or RA (IIBMH Chapter 30 Page 30-5). Based on the documentation provided a determination for replacement will be made by the Finance Section Chief, IC, or INBA. Damaged items will be surrendered to the Supply Unit. Replacement for normal wear and tear is through home unit project funds. Please do not wait until demob to begin this process.

THANKS FOR KEEPING UP ON YOUR TIMES!!!

TRAINING SPECIALIST MESSAGE

The Incidnet Training Program will be in transition as ICP is moved to Etna and Forks Base and Aikens Camp are improved and developed.

Training Specialist services, at ICP in Orleans, will become unavailable after Friday 8-23 at 2000 Hrs.,.

Training Specialist services, at ICP in Etna, will become available Sunday 8-25 at 0700 Hrs.

Training assignment registration will remain open and available, at Forks Base Camp. See the TNSP assigned to Base Camp for assistance.

MEDICAL PLAN (ICS 206 WF) CIIMT 10

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

- 1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)
Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."
- 2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.
Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or Illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + "Medical" <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
