**WEATHER DISCUSSION:** \* Valleys = 2500 ft (Mosquito Creek), Ridgetop = 5500 ft (Grouse Mountain) \*  
 Warming and drying will peak today with highs at low elevations above 90 and minimum RH just above 20 percent. A strengthening nighttime inversion will allow for poor RH recoveries and an extended burn period. Elevated mixing heights today combined with strong southeast winds aloft will create a complex wind environment. Southeast winds will start early in the morning, battling with the northwest sea breeze in the afternoon. Wind direction will be inconsistent with some enhanced gusts up to 20 mph. Conditions will slightly ease Friday as moisture moves in aloft and high pressure weakens.

## **THURSDAY:**

**WEATHER:** Mostly clear. Battling winds from southeast to northwest.  
**MAX TEMP:** Valleys: 90-94°F (2-4°F ↑)      **3PM RH:** Valleys: 22-28% (4-8% ↓)  
 Ridgetops: 83-87°F (1-3°F ↑)      **Ridgetops:** 26-32% (3-6% ↓)  
**CHC WTG RAIN:** 0%      **CHC THUNDER:** 0%      **INSTABILITY:** Medium

**WINDS:** Valleys: Upslope 2-4, afternoon South 3-6 mph.  
**(20 feet)** Ridgetops: Southeast 4-8, afternoon inconsistent South to West 10-14 mph.

**MIXING HEIGHT:** Rising to 2,600 ft by 1400.      **TRANSPORT WIND:** Northwest 10-15 mph.

## **THURSDAY NIGHT:**

**WEATHER:** Clear.  
**MIN TEMP:** Valleys: 58-62° (2-4°F ↓)      **3AM RH:** Valleys: 45-55% (2-4% ↓)  
 Ridgetops: 62-68° (2-4°F ↓)      **Ridgetops:** 32-42% (2-4% ↓)  
**CHC WTG RAIN:** 0%      **CHC THUNDER:** 0%      **INSTABILITY:** Low

**WINDS:** Valleys: Downslope 2-4 mph, strongest just after sunset.  
**(20 FEET)** Ridgetops: Downslope 2-4 mph.

**MIXING HEIGHT:** Dropping to 200 ft by 2200.      **TRANSPORT WIND:** Southeast 2-4 mph.

## **FRIDAY:**

**WEATHER:** Few high clouds. Very slight chance of thunderstorms in the late afternoon.  
**MAX TEMP:** Valleys: 86-90°F (3-6°F ↓)      **3PM RH:** Valleys: 26-32% (2-4% ↑)  
 Ridgetops: 83-87°F (1-3°F ↓)      **Ridgetops:** 28-34% (1-3% ↑)  
**CHC WTG RAIN:** 0%      **CHC THUNDER:** 5%      **INSTABILITY:** Low

**WINDS:** Valleys: Upslope 2-4, afternoon north 3-6 mph.  
**(20 feet)** Ridgetops: Upslope 3-6, afternoon north 8-12 mph.

**MIXING HEIGHT:** Rising to 1,600 ft by 1400.      **TRANSPORT WIND:** North 6-10 mph.

**EXTENDED OUTLOOK:** Models are consistent in a strong plume of midlevel moisture moving northward late Friday. Essentially all models show moisture jetting up the Sacramento Valley with about 70% also showing moisture curving alongshore and then pushing inland to effect NW California. Moisture will bring a risk is mostly dry thunderstorms, but models have yet to show a consistent forcing mechanism. Lightning conditions are on a knives edge with a slight forecast change likely to greatly change the forecast. At the moment, there is a 20% chance of dry lightning on Saturday.

## FIRE BEHAVIOR OUTPUTS

### GENERAL

Fire is at control features around the entire perimeter and burn down and mop-up have mitigated much of the heat near control lines. The result of these conditions is very low potential for any notable fire behavior and an expectation that fire will remain within containment lines. The main threat for any spread outside of containment lines is spotting from interior torching, though this potential has diminished and will continue to decrease. Re-burn potential exists in areas where the ground fuels have been consumed and the canopy has been cured, this threat is decreasing daily as heat diminishes.

The continued warming and drying trends increase fire behavior potential outside of the current fire perimeter. In the event of fire resources responding to an initial attack, expect more notable fire behavior than they have encountered on the Hill Fire in recent days. Fire out of wind or slope alignment will exhibit backing and flanking fire with flame lengths near to slightly above 4 ft. If aligned with wind or slope, expect flame lengths 8-10ft. Maximum spotting distance near 1/2 of a mile and POI near 90%.

**Consider reviewing a pocket card for local knowledge on fire environment triggers and thresholds:**

### SPECIFIC

**Div A (South), Div C (West) and D (North):** Expect isolated smoke production from snags and stump holes interior. No movement beyond control features anticipated.

**Div L (East) and Div Z (Southeast):** Fire is at control lines across both divisions and crews are working on mop-up and securing the lines. Heavy dead and down fuels will retain heat and continue to smolder. No movement beyond control features anticipated.

**Initial Attack:** As with any emerging fire, take a moment to assess the fuels, weather, terrain, and slope position. Expected fire behavior ranges from that which is conducive to direct action to flame lengths that would pose significant challenges to ground resources based on the specific combination(s) of these factors.

### AIR OPERATIONS

Limited smoke production will provide clear skies for any required air operations.

### SAFETY

The fire retains initial attack responsibility with the TFR and is also likely to support any initial attack fires in the general vicinity in support of the local unit. Keep in mind that fire behavior on an initial attack is likely to be elevated compared to what you are experiencing during mop-up, patrol and back haul.

# Hill Incident – Safety Message

INCIDENT #CA-SRF-000586

DATE: 08/1/2024

TIME: 0700-1900 Hrs.

## Lead with Respect

Fireline leaders respect their co-workers and subordinates. This attitude creates an atmosphere of professionalism and effectiveness in line resources. As an additional benefit, safety is enhanced. Employ your people in accordance with their qualifications and capabilities.

- Know your people and look out for their well-being.
- Keep your people informed.
- Build the team.

## PREPARING FOR A MEDICAL EMERGENCY

Practice reporting the 8-Line Medical Protocol with all crew members. An emergency shouldn't be the first time that the process is reviewed. Know where the closest medical staff is located. Pre plan travel routes and utilize drop points as rendezvous locations if needed. Have a plan in case aircraft are unavailable. Know who else is medically trained within assigned resources.

## Driving Safety with Civilian Traffic

- Maintain a safe following distance and allow space for cars to pass.
- Be diligent in using your mirrors as cars may be passing you.
- Use turnouts when available to let cars pass.
- Stay calm; we are not part of their race.
- Maintain a heightened level of awareness of blind corners.
- Watch out for visitors who may stop to take photos and block the roadway.
- SLOW DOWN!

## Extraction Plan

- Before you engage in any action, consider your location and egress options and how you would safely extract an injured person, given the resources that are available, site and environmental conditions.
- Re-evaluate as your location or conditions change.
- Don't wait for an injury to occur before developing a plan!

**6. Work Assignments:**  
 Keep the fire within its current footprint. Patrol and mop-up to a distance where safe to do so.  
 Identify and mitigate hazard trees.  
 Back haul excess supplies and equipment.  
 Chip available materials on roads and control lines or as directed.

**7. Special Instructions:**  
 Access DP60/70 via 6N06 road off of Friday Ridge to avoid congestion with fire resources, utilize traffic plan.  
 Back haul trash daily to avoid wildlife interaction.  
 Coordinate with READ prior to heavy equipment operations.  
 Only use metered fire hydrant on HWY 96 and staging for water filling.

# Demobilization Message – September 1<sup>st</sup>, 2024

## WILLOW CREEK BASE CAMP

If you require **AIR TRAVEL** back to your home unit, please stop by the DMOB office located at WILLOW CREEK Base Camp **Seventy-Two (72)** Hours prior to your DMOB DATE.

This will ensure the Travel Agent has plenty of time to secure you a flight.

If you are listed on the DMOB LIST stop by the DMOB to begin the process at your assigned date and time.

Ensure to turn in your CRT's or Shift Tickets to the Finance Section Daily!

Contractors & Vipers only need to take their yellow inspection form with Hours & Miles to ground support, you do not need to take the equipment.

## Hill Fire: Resource Advisor Message

### **Fish Screens: Coho Salmon Critical Habitat**

The Trinity River and tributaries are considered critical habitat for Threatened Coho salmon, an anadromous fish (fish born in freshwater who spend most of their lives in saltwater and return to freshwater to spawn). Please ensure that any Mark 3 and Engine/Tender suction hoses have a fish screen attached when drafting. Fish screens are designed to minimize stress, injury or even death during the drawing and application process. Talk to a READ if you need a screen.

### **Port Orford Cedar Root Disease**

Some local drainages are infected with POC Root disease, which is a root rotting disease that spreads via water and mud. Infested waters near the fire perimeter include: the main stem of Willow Creek and small creeks to the north up to Hoopa, south side of Willow Creek (includes area in **Boise Creek Campground**) in East Fork of Willow Creek (includes area in **East Fork Campground**) and in most of the tributaries. **DO NOT DRAFT from East Fork Campground OR Boise Creek Campground.**

**IMPORTANT: Yellow/White Candy-Striped flagging** is being used for cultural/natural resource protection. Flagging indicates equipment exclusion areas.

- **Invasive Plant Species**

The area in and around the Hill Fire is home to many sensitive species. Infestations of highly invasive plant species, like yellow star thistle, are one of the largest threats to sensitive species populations here. Spread via vehicles and foot traffic as well as re-activation via fire is of high concern. To help protect these sensitive places, do not park in and try to avoid areas flagged areas.

- **Cultural Resources:**

There is a potential that undocumented cultural resources will be encountered while fighting fire. It is important when a potential cultural resource is encountered it is not disturbed in any manner. Work with your division to notify a resource advisor for recommendations on how to proceed.

# FIRE INFORMATION

**Medical Incident Report**

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)**

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.**

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor injury or illness. <b>Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>
