INCIDENT ACTION PLAN THOMPSON INCIDENT

CA-BTU-012090

OPERATIONAL PERIOD

7/4/2024 0700

to

7/5/2024 0700

INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	Date From:	7/4/2024	Date To:	7/5/2024
Thompson		Time From:	0700	Time To:	0700
3. Objective(s):					
Management Objectives					
- Provide for emergency personnel and public sa	fety at all times.				
- Protect property, improvements, and infrastructor	ure.				
- Ensure costs are aligned with mission priorities.					
- Ensure coordinated, timely and accurate release	e of public information.				
- Foster and maintain relationships with all coope	rators and stakeholders.				
- Protect economic, natural, cultural and heritage	resources.				
Control Objectives					
- Keep the fire North of Hwy 162					
- Keep the fire South of Red Tape Rd					
- Keep the fire East of Table Mountain and Haul F	Rd ၞ				
- Keep the fire West of Hwy 162 and Loafer Creek	k Rd				
Company Situation of Assessment				· · · · · · · · · · · · · · · · · · ·	-#50
General Situational Awareness:					
Steep and rugged terrain, critically dry and rece	ptive fuel beds, active area	for fire history.

Spot Forecast for THOMPSON INC...CAL FIRE National Weather Service Sacramento CA 248 PM PDT Wed Jul 3 2024

Forecast is based on forecast start time of 0700 PDT on July 04. If conditions become unrepresentative...contact the National Weather Service.

...EXCESSIVE HEAT WARNING IN EFFECT UNTIL 11 PM PDT TUESDAY....

.DISCUSSION...

Very hot and dry conditions, with very little overnight relief from the heat expected through the weekend. Winds are expected to weaken tonight, before transitioning to a diurnal and terrain driven flow pattern. Daytime humidities will be in the single digits to low teens through the weekend, with poor overnight recovery. Maximum RHs in the mid 20s to mid 30s. Overnight low temperatures in the mid 70s to low 80s. Warmer overnight lows (low 80s) and max RHs in the mid 20s present above 1200 ft AGL.

.INDEPENDENCE DAY...

Sky/weather......Sunny. Areas of smoke.

Max temperature....104-108.

Min humidity......9-14 percent.

Wind (20 ft)......

Slope/valley.....Southwest winds 5 to 10 mph, with afternoon gusts up to 15 mph.

Ridgetop......South 5 to 10 mph, with afternoon gusts up to 15 mph.

Mixing height.....Around 500 ft AGL in the morning, increasing to 5700 ft AGL.

Transport winds....South around 5 mph.

.THURSDAY NIGHT...

Sky/weather......Clear. Areas of smoke through the night.
Min temperature....76-80.
Max humidity......31-35 percent.
Wind (20 ft)......
Slope/valley.....South winds up to 5 mph shifting to the east 4 to 6 mph overnight.
Ridgetop.....East around 8 mph.
Transport winds....East around 8 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1

FIRE NAME: THOMPSON
CABTU-012090

DATE ISSUED: 7/3/2024

UNIT: BUTTE

TYPE OF FIRE: WILDLAND FIRE
OPERATIONAL PERIOD:7/4-7/5/2024 0700-0700

TIME ISSUED: 2000Hrs
SIGNED: Stephen Volmer
Typed/printed: S. Volmer

INPUTS

WEATHER SUMMARY: **Excessive Heat Warning through 23:00 Tuesday 7/9/24**

Sky/ Weather....Very hot and dry conditions will continue across the region through the weekend. Highest temperatures will come Friday and Saturday with expected high temperature of 118. Single digit daytime relative humidity will be followed by minimal overnight humidity recovery. Wind speeds will slow and become more southerly but remain extremely dry.

DAY Max Temp...108° Min Humidity...9%

Wind (20ft) Southwest 5-10 mph, with gusts to 15 mph RIDGETOP: South 5-10 mph with gusts to 15 mph

NIGHT Min Temp...76° Max Humidity...35%

Wind (20ft) South 5 mph shifting to East 6 mph after midnight

RIDGETOP: East 8 mph

Review the weather forecast for more details

OUTPUTS

GENERAL:

Light flashy fuels are completely cured. The Energy Release Component is currently at the 97th percentile and will continue to climb through historic levels this week. Fuel moisture levels in the brush are averaging 85%. Fires in the area will exhibit critical rates of spread when in alignment with any wind and topography. Large stands of fire weakened Gray Pines and Oaks are found throughout the fire and will continue to retain heat under the current weather conditions. Fire weakened trees will be able to produce ember cast as well as release hot rolling material down the steep slopes.

IZEVO I IVANIM	r i	DISTANCE	IGNITION
337	17	.6 mi	95
82	9		95
33	13		95
	82	337 17 82 9	337 17 .6 mi 82 9 .4 mi

SPECIFIC: The probability of a new ignition is extremely high due to the dense amount of cured fine flashy fuels. The abundant fine fuels underneath the trees will have the ability to contribute to single and group tree torching events. Deep seated heat will be found in all areas of the fire and standing timber requiring large amounts of mop up.

Review the included Fuels and Fire Behavior Advisory for additional information about the above average dense cured grass crop and continuous fuel loaded found throughout the state this year.

AIR OPERATIONS:

Sunset: 20:36

Sunrise: 05:45

South transport winds 5 mph will cause smoke to linger in the area. Drainage bottoms could have morning inversion layers which will break before 10:00. Mixing height 5,700' AGL by 12:00.

SAFETY

The cured grasses are a VERY receptive fuel bed, only requiring a minimal heat source to ignite. Wind goes where water flows. Be alert to turbulent winds while working in the deep drainages. Fire weakened timber will release and be able to produce heat sources that can threaten your control lines.

Fuels and Fire Behavior Advisory

California Grass and Herbaceous-Dominated Ecosystems

June 24, 2024

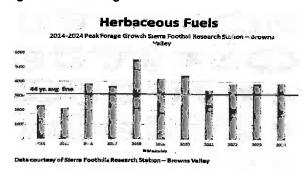

Subject: Herbaceous fuel loadings are above to well above average across most of California's grass-dominated systems, including typically arid deserts and valleys that often do not support fire growth.

Discussion: Precipitation and temperature alignments throughout the winter and spring of 2024 have resulted in an above average load of herbaceous fuels across many grass-dominated systems throughout California. The above normal grass and herbaceous load creates a continuous fuel bed, allowing for rapid spread of fires when these fuels are cured. The continuous nature of the herbaceous fuel bed is enhanced by remnant thatch resulting from herbaceous growth during the abnormally wet late summer and fall of 2023 and multiple consecutive years of above average herbaceous growth.

Difference from normal conditions:

Herbaceous fuel loading in the Sacramento Valley and foothills is near 120% of normal, with reports of loading exceeding normal by a higher level across South Ops and the NE portion of the state. Below 3,000ft these fuels are nearly to fully cured. Curing and drying is increasing at upper elevations as the state enters a period of rapid heating with widespread single digit RH in the areas of concern.

Concerns to Firefighters and the Public:

- Continuous fuel loading lowers the wind threshold need to initiate rapid spread of fires during initial attack. Under what are typically low to moderate wind speeds, rates of spread and flame lengths are likely to exceed direct attack capabilities without significant support from aircraft.
- Areas that typically resist fire spread, such as grazed areas, may not slow fire growth or reduce fire behavior as expected.
- Continuous fuels in arid and semi-arid ecosystem in deserts and high valleys are likely to support continuous fire spread in areas typically considered non-burnable.
- Heavy and continuous cured herbaceous fuels may serve as a catalyst for fire spread into brush fuel types, even at fuel moisture levels that would otherwise make them resistant to rapid fire spread.

Mitigation Measures:

- Brief all incoming resources about these conditions, especially out-of-area resources unfamiliar with local conditions.
- Consider augmentation of aircraft response for initial attack is in areas of heavy herbaceous fuels.
- Fire behavior prediction simulations using fuel models GR1 and GR2 are likely to underpredict spread;
 modification to GR4 or GR7 may be needed to accurately model fire spread in herbaceous fuels.
- Modify tactics to account for increased fire line intensity and spotting.

Area of Concern:

Across Central and Southern California, areas of concern focus on foothills, grasslands and deserts at or below 3,000 ft. in elevation. This includes portions of the following predictive services areas: NC02, NC03A, NC03B, NC04, NC05, NC07, and all South Ops PSA's.

Across the northeast portion of the state this includes hills, valleys, and deserts near and below 5,500 ft in elevation in parts of predictive services areas NC06 and NC08.

Issued By: Predictive Services Units from Northern California and Southern California, in coordination with Cal Fire and Cal OES Fire and Rescue Division.

SAFETY MESSAGE THOMPSON INCIDENT

1.	Incident Name: THOMPSON INCIDENT	2. Operational Period:	Date From:7/4/24	Date To: 7/5/24
			Time From:0700	Time To: 0700

HIGH TEMPERATURES FORECASTED: Fatigue, Heat & Dehydration

MONITOR yourself and your personnel for FATIGUE and DEHYDRATION.

Avoid complacency; maintain appropriate Work Rest Cycles,

Seek shade when possible.

Stay Hydrated!

DEFENSIVE DRIVING REQUIREMENTS: Be the Professional.

Safe Speeds are a must! Caution with smoke or blind corners; watch for civilian traffic.

EVALUATE your driving routes, monitor speed, gear selection, & brakes.

TURN ON headlights; prepare for the unexpected.

UTILIZE chocks, backers and spotters; when in doubt scout it out!

FIRE BEHAVIOR: Maintain Situational Awareness & Predict.

ALWAYS wear proper PPE for the **potential of the operation**, not just the work at hand. Drought & Fire Weakened trees all have accident potential, especially with wind. Fuels: RECEPTIVE - Rates of Spread: Spotting - Watch for alignment!

Primary, Alternate, Contingency, Emergency Planning.

Calculate Risk and Take Appropriate Actions based on predicted extreme fire behavior and available resources; have them in-place prior to executing any plan.

DON'T let URGENCY drive the task.

Allow priorities to drive safe practices in your work zone.

- 4. Site Safety Plan	Required? Yes No X

TRAINING SPECIALIST MESSAGE

THOMPSON INCIDENT

CAL FIRE IMT 6 JULY 4, 2024

TRAINERS

Please complete the following documents for your Trainees:

- > Task book (initial & date the tasks completed)
- > Evaluations
- > ICS 225 Please strive to give your Trainee an honest and in-depth performance rating.

TRAINEES

Prior to demobing, please bring the following to Training:

> Task Book

If you have your documents,

> Evaluations

it is not necessary to bring

➢ ICS 225

- your trainer with you to
- Training.

Don't train until you get it right, train until you can't get it wrong!

Any questions please contact the Training Specialists:

Shane Galvez, TNSP

FINANCE MESSAGE

TIME Process

Shift Tickets: Line supervisors complete for Hired Equipment and submit hard copy to TIME, OR complete an eShift Ticket at: https://shifttickets.fire.ca.gov

Local Government: Check-in with OES; Complete the OES MARS reimbursement process

Federal resources: please provide a copy of your Crew Time Report (CTR) to TIME

CAL FIRE resources: Complete eFC-33 input sheet and provide activity updates to TIME

COMP/CLAIMS

Vehicle/Equipment Damage: Report details to Comp/Claims and have Ground Support evaluate (State vehicles will need Std. 270/274 forms)

Injuries: Submit documentation to Comp/Claims; CAL FIRE supervisors complete electronic IAPS

Property Damage: Please report details (including address, Lat/Long location) to Comp/Claims

AO-341 Hotel Rosters

Please sign the roster for every night

NO Off-Site Feeding

All feeding is provided by the Food Unit at the Incident Base

24 HOUR RESOURCE

12 HOUR RESOURCE

Public Information

Incident Information Line: 1 (866) 916-3566

CURRENT INCIDENT STATUS								
Incident Start Date: 07/02/2024	Incident Start Time: 10:51 AM							
Cause: Under Investigation	Acres:							
Containment:	Total Personnel:							

MEDIA

California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot, or civil disturbance. Correctly identified news media members should not be restricted from entering locations specified within the code. However, this does not include crime scenes or private property and does not imply that the news media may interfere with incident operations while in the areas of concern. More information can be found by following the QR code.

CAL FIRE SOCIAL MEDIA POLICY

When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE social media policy, Section 0691. Following the QR code, you can find further information about the CAL FIRE social media policy.

PHOTOGRAPHS AND VIDEOS OF THE INCIDENT

The Public Information Office would like copies of the video and pictures you safely took while not in an emergency, fire suppression activity, or overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional, or embarrassing circumstances, which are a severe breach of ethics.

LOST AND FOUND

The Information Section will manage lost and found items for the incident at the PIO Trailer.

Incident Base Camp Mailing Address

c/o Public Information Office/Trailer ATTN: Recipient Name and O-number Silver Dollar Fairgrounds 2357 Fair Street, Chico, CA 95928

###

THOMPSON INCIDENT PEER SUPPORT:

The Thompson Peer Support Team is available on the incident for any peer support needs.

Examples of peer support needs are, but not limited to, understanding stress reactions, dealing with traumatic experiences, professional or personal crisis, other behavioral health impacts and/or obtain vetted resiliency resources.

The best way to get a hold of a Peer Team member is to connect with a peer at the Peer Support trailer, located at the ICP.

In addition, there is an onsite clinician available to meet on an individual and/or group basis.

Peer Support Handouts

Stay Healthy, Stay Alert and Stay Strong!
