FWSSTO

Spot Forecast for PARK Incident...CAL FIRE

National Weather Service Sacramento CA

317 PM PDT Thu Aug 29 2024

Forecast is based on forecast start time of 0700 PDT on August 30.  
If conditions become unrepresentative...contact the National Weather Service.

.DISCUSSION...

Hot and dry conditions expected over the burn area this week with above-normal temperatures. Cooler temperatures later this weekend and into Monday. Low daytime relative humidity with poor overnight recoveries continue through Saturday, with slight improvement on Sunday and Monday. Generally lighter, terrain driven winds are forecast each day, occasionally breezy in the afternoons. Increased southwest flow expected Sunday as a trough approaches NorCal. Thunderstorm threat has decreased with chances generally below 5% probability this weekend and into early next week, although some cumulus clouds are possible.

.FRIDAY...

Sky/weather.....Sunny.

Max temperature.....83-95.

Min humidity.....18-22 percent.

Wind (20 ft).....

Slope/valley.....Northeast/down-drainage winds 3 to 6 mph

shifting to the southwest/upslope after 1000  
around 5 to 10 mph, with gusts to 15 mph in the  
afternoon.

Ridgetop.....Northeast winds 4 to 9 mph shifting

to the southwest after 1000 around 6 to  
11 mph, with gusts 15 to 20 mph in the

afternoon.

Mixing height.....Increasing to 3000 ft AGL.

Transport winds.....Southwest around 10 mph.

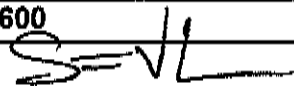

.SATURDAY...

Sky/weather.....Sunny.

Max temperature.....82-94.

Min humidity.....16-22 percent.

## FIRE BEHAVIOR OUTLOOK

<b>FIRE NAME:</b> PARK	<b>OUTLOOK PERIOD (valid time period):</b> 8/30-9/2/24 0700-0700
<b>DATE ISSUED:</b> August 29, 2024	<b>TIME ISSUED:</b> 1600
<b>UNIT:</b> Cal Fire Tehama Glenn	<b>SIGNED:</b>  <b>Typed/printed:</b> STEPHEN VOLMER FBAN

**WEATHER/CLIMATOLOGY DISCUSSION:** Weather pattern will remain quiet and stable through the period with continued clear skies. The Diurnal wind patterns will continue across the area, with enhanced effects in and across the drainages.

FRIDAY: Daytime high 95, RH 18-22%, Morning NE winds shifting to SW 5-10mph with gust to 15mph  
 SATURDAY: Daytime high 94, RH 16-22%, Morning NE winds shifting to SW 8-11mph with gust to 15mph  
 SUNDAY: Daytime high 92, RH 18-23%, Afternoon W winds shifting to SW gusting 15-20mph.

**FIRE BEHAVIOR DISCUSSION:** Expect fires to be terrain and fuels dominated. Direct air tactics will produce good holding results in the light fuels and across ridge tops. The Energy Release Component (ERC) is well below seasonal averages and projected to climb to average levels over the coming week. The abundant fine flashy fuels will easily sustain ignition and allow for dangerous fire spread rates when in alignment with wind and topography. There is currently a statewide **Fuels and Fire Behavior Advisory** issued by both GACCs for the abundant grass crops this season.

\*\*\* All fuels will continue to dry out. ERC, BI, and all fuels will climb to near seasonal averages \*\*\*

**Short Range (Today, Tomorrow) and Medium Range (3 Days):**

	FLAME LENGTH ft	RATE OF SPREAD ft/min	SPOTTING DISTANCE mi	PROBABILITY OF IGNITION
GRASS	6	38	.2	68%
BRUSH	9	50	.2	68%
TIMBER	9	14	.3	68%

\*\*\*Above values are valid within 10 miles of the incident\*\*\*

**Smoke Concerns:** Minimal smoke production will come from the incident. Smoke from new incidents will travel towards the northeast.

**Air Resources:** Clear skies with minimal afternoon clouds. Mixing heights increase through the forecast period from 3,500' to 5,500' with SW winds 5-10 mph. Plan ahead as resources could be delayed due to new incidents.

### SAFETY

- Review the **Fuels and Fire Behavior Advisory** included for information regarding the abundant fine flashy fuel crop that has occurred statewide this year.
- Utilize "one foot in the burn" tactics when engaging slop-overs, spot fires, or any new incidents.
- Fire damaged trees and branches in the fire area will continue to release. Be alert when working near any tree.

**Reassessment Criteria:** Changing weather and conditions past the September 2nd expiration date of this forecast, or any locations other than the area listed. Contact the local NWS office to request Spot Weather Forecasts for any new incident.

# Fuels and Fire Behavior Advisory

## California Wide

August 20, 2024 – September 2, 2024

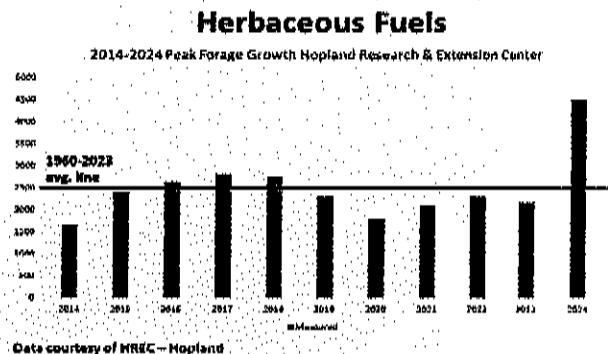

**Subject:** Herbaceous fuel loads are above to well above average across most of California's grass-dominated systems, including typically arid deserts and valleys that often do not support fire growth.

**Discussion:** Precipitation and temperature alignments throughout the winter and spring of 2024 have resulted in an above average load of herbaceous fuels across many grass-dominated systems throughout California. The above normal grass and herbaceous load creates a continuous fuel bed, allowing for rapid spread of fires when these fuels are cured. The continuous nature of the herbaceous fuel bed is enhanced by remnant thatch resulting from herbaceous growth during the abnormally wet late summer and fall of 2023 and multiple consecutive years of above average herbaceous growth.

The combination of heavy herbaceous fuels with seasonably available dead woody and live fuels results in a highly flammable fire environment where rapid fire growth has been observed and is expected to continue for initial attack fires.

### Difference from normal conditions:

Herbaceous fuel loadings in the California Coast Ranges, Sierra Foothills, and areas east of the Sierra Crest range from 120% to as much as 198% of normal. These fuels are fully cured at all elevations and across all PSAs in California where herbaceous fuels dominate the fire environment.

### Concerns to Firefighters and the Public:

- Continuous and above normal fuel loading lowers the wind speed threshold needed to initiate rapid spread of fires during initial attack. Under what are typically low to moderate wind speeds, rates of spread and flame lengths are likely to exceed direct attack capabilities.
- Areas that typically resist fire spread, such as grazed areas and arid / semi-arid high valleys and deserts, may not slow fire growth or reduce fire behavior as expected.
- Heavy and continuous cured herbaceous fuels are highly available and may serve as catalysts for rapid fire spread in brush and timber fuel types.

### Mitigation Measures:

- Modify tactics to account for expected rapid rates of spread and long-range spotting potential.
- Brief all resources on these conditions, especially out-of-area resources unfamiliar with local conditions.
- Consider augmentation of initial attack resources.
- Fire behavior prediction simulations using fuel models GR1 and GR2 are likely to underpredict spread; modification to GR4 or GR7 may be needed to accurately model fire spread in herbaceous fuels.

**Area of Concern:** Areas where herbaceous fuels dominate the fire environment across all PSAs and at all elevations in California.

**Issued By:** Predictive Services Units of Northern California and Southern California, in coordination with Cal Fire and Cal OES Fire and Rescue Division.

# **SAFETY MESSAGE PARK INCIDENT**

1. Incident Name: PARK

## **FATIGUE, HEAT & DEHYDRATION**

**MONITOR** yourself and your personnel for **FATIGUE** and **DEHYDRATION**.

Avoid complacency; maintain appropriate **Work Rest Cycles**,

Seek shade when possible.

**Stay Hydrated!**

## **PERSONAL PROTECTIVE EQUIPMENT**

Ensure approved and issued PPE is being worn by all personnel engaged in mop-up. Supervisors set the tone and **LEAD BY EXAMPLE**. Burn injuries while mopping up in many circumstances is preventable. Know and understand the limitations of your PPE.

## **EMOTIONAL FATIGUE**

Ensure you use **EAP/ESS** as needed. Clinicians and Peer support are in basecamp.

Proper nutrition, rest and hydration reduces fatigue and exhaustion emergencies.

Know your physical limits and be honest and quick to report limitations or not feeling well.

## **DEFENSIVE DRIVING REQUIREMENTS: Be the Professional**

**MAINTAIN SAFE SPEEDS!** Caution with blind corners; watch for civilian traffic.  
**EVALUATE** your driving routes, morning school traffic and community interaction.

**TURN ON** headlights; prepare for the unexpected.

**UTILIZE** chocks, backers and spotters; when in doubt scout it out!

**Stay hydrated, get rest, and travel safely.**

4. Site Safety Plan Required? Yes  No

# MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2<sup>o</sup> - 3<sup>o</sup> burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2<sup>o</sup> - 3<sup>o</sup> burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor injury or illness. Non-emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + Medical <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of incident within an incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

**4. EVACUATION PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication*

**6. COMMUNICATIONS:** Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.

## FINANCE MESSAGE PARK INCIDENT CA-BTU-013761

- **PARK INCIDENT FINANCE (TIME & HIRED EQUIPMENT) WILL BE LOCATED AT THE TEHAMA FAIRGROUNDS UNTIL SEPTEMBER 3<sup>rd</sup>.**
- **STARTING SEPTEMBER 4<sup>th</sup> FINANCE WILL BE LOCATED AT THE RED LION HOTEL IN REDDING CA.**
- **CAL FIRE TIME UNIT (Personnel & Hired Equipment):**
  - CAL FIRE PERSONNEL – Make sure you have started your eFC-33 and update after each shift. Please make sure ePay schedules are up to date.
  - HIRED EQUIPMENT SUPPLIERS – Check in with the Time Unit and drop off your agreements.
- **LINE SUPERVISORS**
  - Turn in hired equipment shift tickets at the end of each shift.
- **SHIFT TICKET DROP-OFF LOCATIONS**
  - **UNTIL September 3<sup>rd</sup>**
    - TIME Unit In Finance Building at Tehama Fairgrounds.
  - **AFTER September 3<sup>rd</sup>**
    - Logistics trailer in the front of the Tehama Fairgrounds  
650 Antelope Blvd, Red Bluff, CA 96080.
- **COMP / CLAIMS**
  - Josh.Chastain@fire.ca.gov / Contact Number: (530) 922-0131
- **DAMAGE CLAIMS** (suppression, property, vehicle etc.)
  - Report on an ICS-213 including location, description of damages, and your contact information.
- **PROCUREMENT**
  - Please send Team Agreement FC-33 to the Procurement Unit Leader Ray Leanos at [Raymond.Leanos@fire.ca.gov](mailto:Raymond.Leanos@fire.ca.gov)
  - For any Procurement questions reach out to Ray Leanos at (909) 489-6430
- **INJURIES**
  - Please report all injuries and suppression damage to Comp / Claims no matter how minor.
- **Finance Section Chiefs**
  - Joe Tapia, FSC1
  - Michael Lamonica, Deputy FSC1

# CHECK-IN & DMOB MESSAGE PARK INCIDENT CA-BTU-013761

## CHECK-IN

- ALL resources must check in at the Tehama Base or use the Remote Check-In QR Code below.

## DEMOBILIZATION (DMOB)

- To begin the DMOB process, supervisors must submit an ICS-213 to the Resources Unit.
- Resources must report to DMOB at the time identified on the Tentative DMOB List. Do not arrive prior to your scheduled time.
- Prior to reporting to DMOB, please return all supplies and equipment.
- Resources are required to get signatures from the following sections:
  - Motels
  - Supply
  - Ground Support
  - Training (for any Trainees)
  - Communications
  - Time
  - DMOB

## **GROUND SUPPORT MESSAGE PARK INCIDENT CA-BTU-013761**
