INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: SITES and POINT	2. Operational Period:	Date From: 6/22/2024 Time From: 0700	Date To: 6/23/2024 Time To: 0700
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Management Objectives

- Provide for emergency personnel and public safety at all times.
- Protect property, improvements, and infrastructure.
- Ensure coordinated, timely and accurate release of public information.
- Foster and maintain relationships with all cooperators and stakeholders.
- Protect economic, natural, cultural and heritage resources.
- Ensure costs are aligned with mission priorities.

Point Fire Branch I / III Control Objectives

- Keep the fire within the current perimeter

Sites Fire Branches V and VII Control Objectives

- Keep the fire North of Old Wilbur Road
- Keep the fire South of the Glenn/Colusa County line
- Keep the fire East of the Men(CDCR)no National Forest boundary line
- Keep the fire West of the Tehama-Glenn Canal

General Situational Awareness:

Steep and rugged terrain, critically dry and receptive fuel beds, active area for fire history and drought stressed trees.

5. Site Safety Plan Required? Yes No

Approved Site Safety Plan(s) Located at:

Point Fire Weather FORECAST

IMET contact - (816) 589-0168

FORECAST NO: 3
PREDICTION FOR: SATURDAY and SUNDAY
FORECAST ISSUED: 06/21/2024 at 1900

NAME OF FIRE: Point
SHIFT DATE: June 22, 2024
SIGNED: *[Signature]*
Incident Meteorologist (Mike Seaman)

WEATHER DISCUSSION: A marine layer will bring excellent RH recovery this morning, along with patchy low clouds. Once this marine layer burns off by mid-morning, a very warm airmass in place across the region boost temperatures into the low 90s this afternoon, while RH trends slightly lower. Winds will continue to be driven by slope flows across the area today through the weekend. The marine layer is expected to return tonight resulting in another night of excellent RH recovery.

FORECAST for TODAY:

WEATHER: Partly cloudy (30-40% shading) through 0900, then becoming sunny (0-5% shading).

MAX TEMP: 91-95° F **Trend:** Up 2-4 ° F

MIN RH: 26-30% **Trend:** Down 1-3%

20 FT WINDS:

Slope/valley....Downslope/down-drainage 3 to 6 mph becoming upslope-up-drainage after 0900.
Ridgetop.....Northwest 4 to 7 mph in morning, shifting to the southeast in the afternoon.

INVERSION: Lifting to 2000 ft by 0900, then rising to near 4000 ft after 1300.

AFTERNOON MIXING HEIGHT: 4,000 ft AGL

TRANSPORT WINDS: Southwest 6 mph.

CHANCE OF PRECIP: 0%

CWR: 0%

LAL: 1

TONIGHT:

WEATHER: Clear, then becoming mostly cloudy overnight.

MIN TEMP: 54-58° F **MAX RH:** 70-80%

20 FT WINDS: Downslope/down-drainage 3-7 mph. Ridgeline winds northwest 3-7 mph after 2200.

CHANCE OF PRECIP: 0%

CWR: 0%

LAL: 1

SUNDAY:

WEATHER: Partly cloudy (30-40% shading) through 0900, then becoming sunny (0-5% shading).

MAX TEMP: 86-90° F **Trend:** Down 4-6° F

MIN RH: 34-38% **Trend:** Up 6-9%

20 FT WINDS:

Slope/valley....Downslope/down-drainage 3 to 6 mph becoming upslope-up-drainage after 0900.
Ridgetop.....Northwest 4 to 7 mph in morning, shifting to the southeast in the afternoon.

INVERSION: Lifting to 1500 ft by 0900, then rising to near 3000 ft after 1300.

AFTERNOON MIXING HEIGHT: 3,000 ft AGL

TRANSPORT WINDS: Southwest 7 mph.

CHANCE OF PRECIP: 0%

CWR: 0%

LAL: 1

Sites Fire Weather FORECAST

IMET contact - (816) 589-0168

FORECAST NO: 4
PREDICTION FOR: SATURDAY and SUNDAY
FORECAST ISSUED: 06/21/2024 at 1900

NAME OF FIRE: Sites
SHIFT DATE: June 22, 2024
SIGNED: *[Signature]*

Incident Meteorologist (Mike Seaman)

WEATHER DISCUSSION: A hot and relatively dry airmass will remain across the fire area today, boosting afternoon temperatures to near 100 degrees for the second straight day. This heating will lift the inversion layer above 8000 feet by early afternoon, allowing humidity to fall near or just below 20%. Southerly winds aloft will strengthen through the day, and as the inversion lifts these winds will mix to the surface by mid-afternoon, and persist through sunset, gradually shifting to southwesterly with time. Hot conditions will continue Sunday, along with gusty afternoon winds.

FORECAST for TODAY: *** HEAT ADVISORY TODAY; SOUTH WINDS INCREASE THIS AFTERNOON ***

WEATHER: Sunny (0-5% shading) and hot.

MAX TEMP: 98-102° F **Trend:** Up 1-3° F
MIN RH: 17-21% **Trend:** Little Change

20 FT WINDS:

Slope/valley... Downslope/down-drainage 2 to 6 mph early, becoming southeast 6 to 10 mph with gusts 12-16 mph after 0900, then becoming south-southwest 10-14 mph with gusts 21-25 mph after 1400.
Ridgetop..... North 3-6 mph early, becoming southeast 6 to 9 mph with gusts 12-15 mph after 0900 increasing to south-southwest 12-16 mph with gusts around 25 mph after 1400.

INVERSION: Lifting to 3000 ft by 0900, then rising above 8000 ft after 1400.

MAX AFTERNOON MIXING HEIGHT: 9,500 ft AGL **TRANSPORT WINDS:** South 12 mph.

CHANCE OF PRECIP: 0% **CWR:** 0% **LAL:** 1

TONIGHT: *** GUSTY SOUTHWEST WINDS THIS EVENING ***

WEATHER: Clear.
MIN TEMP: 65-69° F **MAX RH:** 37-42%

20 FT WINDS:

Slope/valley: Southwest 10-14 mph with gusts 21-25 mph, becoming down-drainage 3-7 mph after 2200.
Ridgetop: Southwest 12-15 mph with gusts 22-28 mph, becoming north 3-6 mph after 2100.

INVERSION: Developing after 2000. **CHANCE OF PRECIP:** 0% **CWR:** 0% **LAL:** 1

SUNDAY: *** REMAINING HOT WITH GUSTY AFTERNOON SOUTH WINDS ***

WEATHER: Sunny (0-5% shading)
MAX TEMP: 96-99° F **Trend:** Down 1-3° F
MIN RH: 19-23% **Trend:** Up 1-2%

20 FT WINDS:

Slope/valley... Downslope/down-drainage 2 to 6 mph early, becoming southeast 5 to 8 mph with gusts 10-14 mph after 0900, then becoming south-southwest 10-14 mph with gusts 21-25 mph after 1400.
Ridgetop..... North 3-6 mph early, becoming southeast 6 to 9 mph with gusts 12-15 mph after 0900 increasing to south-southwest 12-16 mph with gusts around 25 mph after 1400.

INVERSION: Lifting to 3000 ft by 0900, then rising above 7000 ft after 1400.

MAX AFTERNOON MIXING HEIGHT: 8,500 ft AGL **TRANSPORT WINDS:** South 12 mph.

CHANCE OF PRECIP: 0% **CWR:** 0% **LAL:** 1

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4	TYPE OF FIRE: Wildland
FIRE NAME: Sites	OPERATIONAL PERIOD: 6/22-6/23, 0700-0700
DATE ISSUED: 6/21/2024	TIME ISSUED: 1700
UNIT: CA-LNU-011083	SIGNED: 
Typed/printed: Ross Dollarhide, FBAN(T)	

INPUTS

WEATHER SUMMARY: *HEAT ADVISORY IN EFFECT; GUSTY SOUTHWEST WIND*

Elevated temps with increasing SW winds through Sunday.

Temp: 98-102 max; 65-69 min

RH: 17-21% min; 49-54% max

Wind: SW 12-16, gust 21-25 day; SW 12-15, gust 22-28 night

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fire has reached the control lines and is becoming fuel-limited, with active mop-up operations underway. Increased temperatures and gusty winds create the potential for spot fires with fine fuels remaining highly receptive, exhibiting a 100% probability of ignition. While early season conditions make brush fuels resistant to fire, they can still support fire spread when wind and topography align.

In the absence of weather conditions outside the forecast or extreme fire behavior conditions expect:

	Max. Flame Length	Max. Rate of Spread	Spotting	Probability of Ignition
Grass	8-12' (2.4-3.7 m)	120-240 ft/min (2.2-4.4 km/hr)	< 0.5 mile (0.8 km)	100%
Grass-Shrub	8-11' (2.4-3.3 m)	50-105 ft/min (0.9-1.9 km/hr)	< 0.5 mile (0.8 km)	100%
Shrub	20-25' (6-7.6 m)	115-200 ft/min (2.1-3.7 km/hr)	< 1.0 mile (1.6 km)	100%
Timber Understory	11-15' (3.3-4.5 m)	80-115 ft/min (1.1-2.1 km/hr)	< 0.7 mile (1.1 km)	100%

****minimum safety zone size is 1.1 acre (0.4 Ha) for a Strike Team of Engines in Brush.**

****minimum safety zone size is 0.5 acres (0.2 Ha) for a Strike Team of Engines in Timber Understory.**

SPECIFIC:

Branch I / III: No fire behavior anticipated.

Branch V: Spotting potential elevated with windy conditions. Potential for re-burn in drainages and interior pockets where brush did not fully consume.

Branch VII: Winds aligned with the East Park escarpment will create an enhanced risk for re-burn in poorly consumed brush pockets increasing spotting potential out to 1 mile.

AIR OPERATIONS:

Anticipate hazy conditions and reduced visibility early, with the inversion lifting by 1400. Mixing height: 9,500 ft. AGL, Transport winds: S 12 mph, Sunrise 0543, Sunset 2038.

SAFETY

Tragedies have occurred during mop up, especially in light flashy fuels under windy conditions—maintain your situational awareness.

ASSIGNMENT LIST (ICS 204 WF)

INCIDENT SAFETY MESSAGE (ICS 208)

1. Incident Name: SITES and POINT	2. Operational Period: Date From: 6/22/24 Time From: 0700	Date To: 6/23/24 Time To: 0700
---	---	-----------------------------------

Operational Tempo: the speed and intensity of our actions relative to the speed and intensity of unfolding events in the operational environment. We are most vulnerable to accidents and errors when the operational tempo is changing, especially when it changes quickly.

HEAT ILLNESS MITIGATION MEASURES

- Acclimatization
- Hydration
- Work/Rest Cycles
- Personal Protective Equipment (PPE)
- Access to Shade

These actions should be taken when safe, feasible and without compromising emergency operations.

STANDARD FIREFIGHTING ORDERS

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.
4. Identify escape routes and safety zones, and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and be sure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

WATCH OUT SITUATIONS

1. Fire not scouted and sized up.
2. In country not seen in daylight.
3. Safety zones and escape routes not identified.
4. Unfamiliar with weather and local factors influencing fire behavior.
5. Uninformed on strategy, tactics, and hazards.
6. Instructions and assignments not clear.
7. No communication link with crewmembers or supervisor.
8. Constructing line without safe anchor point.
9. Building fireline downhill with fire below.
10. Attempting frontal assault on fire.
11. Unburned fuel between you and fire.
12. Cannot see main fire; not in contact with someone who can.
13. On a hillside where rolling material can ignite fuel below.
14. Weather becoming hotter and drier.
15. Wind increases and/or changes direction.
16. Getting frequent spot fires across line.
17. Terrain and fuels make escape to safety zones difficult.
18. Taking a nap near fireline.

STANDARD FIREFIGHTING ORDERS

1. Keep informed on fire weather conditions and forecasts.

CAL FIRE INCIDENT MANAGEMENT TEAM #4

Dustin Martin, Incident Commander

FINANCE MESSAGE

- SITES Incident Finance is set up at the Colusa County Fairgrounds in the Festival Hall - **CALNU011083**
- POINT Incident Finance is set up at the Cloverdale Citrus Fairgrounds in the Tea Room - **CALNU010992**
- Shift Tickets need to be completed by Division Group Supervisor and turned in daily.
 - Refer to shift ticket example in IAP.
- Report all damages and injuries to Finance.
- CAL FIRE employees and Hired Equipment Suppliers need to check in with Finance.
- Local Government personnel need to check in with CAL OES.
- Off-site feeding is not approved.
- All resources will be required to complete waterlog in IAP to document water usage. They will need to be turned into Finance daily.

Cause:	Total Personnel:

MEDIA – The California State Penal Code Section 409.5(d) allows the news media to enter scenes of disaster, riot or civil disturbance. Properly identified members of the news media should not be restricted from entering locations specified within the code. However, this does not include crime scenes, private property and does not imply that the news media may interfere with incident operations while they are in the areas of concern. More information can be found [here](#).

SOCIAL MEDIA POLICY – When assigned to a CAL FIRE incident, you will adhere to the CAL FIRE Social Media Policy, Section 0691. You can find further information about the CAL FIRE Social Media Policy [here](#).

PHOTOGRAPHS AND VIDEOS OF INCIDENT – We are in a new era of media. Media no longer means news/broadcast industry, but now refers to anyone that has the capability to shoot video, photographs and post them onto social media sites in a matter of minutes. Unfortunately, we have seen some instances of photographs or videos that have depicted unsafe, unprofessional or embarrassing circumstances which are a serious breach of ethics. When this happens, it reflects poorly on all that are attached to this incident. Posting an inappropriate video, photo or blog comment could expose oneself to unwanted ramifications. It may be unsafe to shoot photos or video and a firefighter who is concentrating on a camera loses their situational awareness.

The Public Information Office would like copies of the video and pictures that you safely took while not in an emergency situation, fire suppression activity or in an overhead assignment. Bring your video and pictures to the Public Information trailer; they will be reviewed and possibly uploaded to our many CAL FIRE social media sites. Remember, we don't want photographs or videos that depict unsafe, unprofessional or embarrassing circumstances, which are a serious breach of ethics.

SITES FIRE
SUPPRESSION REPAIR PLAN 6/20/2024
Sonoma Lake Napa Unit
Incident # CA-LNU-011083

GENERAL SUPPRESSION REPAIR POLICY

Suppression damage is defined as adverse impacts to resources caused by our firefighting efforts. The authority to complete suppression repair work lies with the Public Resources Code (PRC), including PRC 4170 and 4170.5, PRC 4675, and PRC 4676(a, b). Policy derived from the statutes is provided in the CAL FIRE Handbook. This policy and authority provide for repairs necessary to prevent further resource damage.

Mitigations described within this plan have been developed to apply to constructed fire lines, watercourse crossings, access roads, drop points, Heli-spots and any other locations disturbed by fire suppression activities. These mitigations are intended to be used to reduce the overall effects that may occur downslope. Of particular concern are potential water quality impacts, damage to private roads, and cultural resources. The intent is to utilize resources presently assigned to the incident for repair with operators that have knowledge of activities that occurred during control operations. A Suppression Repair Group Supervisor will be assigned to ensure that work is done as required and according to the Fire Suppression Repair plan. Additional specialists may be used if the need arises. These general standards will be applied except where site-specific needs are identified, and alternative repair actions are developed and agreed upon.

OBJECTIVES:

- Minimize surface and gully erosion.
- Minimize sediment delivery to stream channels.
- Restore conditions to pre-fire drainage patterns.
- Limit off road vehicle access on hand and dozer lines where possible with dirt berm or existing obstructions.

GENERAL GUIDELINES

Dozer lines

- Pull back berms, brush and rocks spreading over the width to the break.
- Install and construct water bars on lines steeper than 10%, as per the following, or as directed by the Suppression Repair team:

WATER BAR OR CROSS DRAIN SPACING				
Fireline or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	150'	100'	75'

*All waterbars should be installed diagonally with a minimum cut of 6" into existing grade, and minimum height of 12" from the bottom of the trench to backfill top. Waterbars shall be installed at all approaches to watercourse crossings. Waterbars shall be constructed to allow for drainage at the discharge end into non-erodible material and into the green where feasible. All waterbars to be constructed at 30 degrees, angled downhill.

Roads

- Clean culverts plugged with soil and debris resulting from fire control activities.
- Breach/remove berms to facilitate drainage.
- Water roads as directed by Suppression Repair Specialist.

Infrastructure

- Repair gates and fences damaged by fire control activities. Repairs will be conducted in consultation with landowners.
- Other infrastructure, such as water pipes, will be evaluated and repaired as agreed upon and in consultation with the landowner.

Camps, Staging, Helispots/Helibases and Drop Points

- Restore sites to pre-fire conditions to the best extent possible.
- Remove all flagging, garbage, litter, and unneeded equipment.
- Comply with all conditions of any Land Use Agreement.

Watercourses

- All watercourse issues shall be reported to the Suppression Repair Group Supervisor immediately, before any work may begin.
- All slash, soil, and debris deposited into watercourses resulting from fire suppression activities shall be removed and stabilized.
- All loose soil must be pulled away from the watercourse and stabilized.

Concentrations of Slash

- On areas that cannot be adequately waterbarred, or as an option to waterbarring, slash may be spread to cover the soil to minimize erosion.
- Branches and logs should be placed at contour and spread out as much as possible.
- Piles created by suppression operations within 150 feet of permanent structures, public roads or private roads will be lopped and scattered within 18 inches of the soil surface.

Archaeological or Historic Sites (if discovered)

- All potential sites shall be avoided.
- Impacted sites will be reported to the Fire Suppression Repair Group Supervisor or Suppression Repair Coordinator.
- If sites are encroached upon, work will stop immediately; **if there is no threat of fire spread**, and the Fire Suppression Repair Group Supervisor shall be notified.

Comp Claims Issues:

- Damaged resources that are too large or complex for the Fireline Suppression Group to handle shall be turned over to Comp Claims for processing. Examples of such issues include damage to pavement, bridges, pipelines, etc.

Additional Specific Concerns

- Continue evaluation of additional fire suppression repair needs
- Specifications above may change if deemed necessary by Fire Suppression Repair Specialists to ensure resource management goals are met.

Approved by:

Andy Turner, Deputy Incident Commander

Dawn Pedersen, RPF 2754, Fire Suppression Repair Supervisor

TRAINING SPECIALIST MESSAGE

**A Training Specialist is available for trainees on
the incident.**

**All State, Federal and local government agency
Trainees working on Position Task Books will
need to register with the Incident Training
Specialist in order to receive proper credit for
your assignment.**
