**Incident Forecast for the Sand Fire**  
1530 PDT Sunday, July 27, 2014

**\*\*\* Hot and Very Dry Again Today \*\*\***  
**\*\*\* Isolated Nocturnal T-storms Late Tonight East of Fire \*\*\***

**Discussion:** Strengthening high pressure over the 4-Corners builds towards CA. This high will continue to bring hot/dry conditions to the area. Poor humidity recoveries from the overnight hours will result in morning humidity levels already at low levels of 30-40%...drying to near 10% by late afternoon. Winds will start off light easterly less than 6 mph but should diminish then switch over to a more typical WSW/up-drainage wind this afternoon. Some cumulus buildups to the east this afternoon, but a bigger concern will be the possibility of nocturnal thunderstorms developing late tonight across the Yosemite region and tracking northward just east of the fire area by daybreak Tuesday morning. If these storms do occur, their downdrafts could become channeled by the Cosumnes drainage into brief 25 mph gusts. Any lightning should remain east of the fire area.

**Today (Monday):** Partly sunny & hot. Max temps 99-104 deg. Low morning RH of 35-40% drying to Min RH 8-13%. Winds drainage to E 3-6 mph thru late morning, becoming WSW 5-10 mph gusts 15 mph by afternoon. Gusts near 20 mph on upper slopes.

**Tonight:** Partly cloudy. Isolated lightning to the distant S & E of the fire east of the fire towards dawn. Min temps 65-70 deg. Max RH 45-50%. Winds light ENE//drainage 1-4 mph...but variable wind gusts over 15 mph possible towards dawn.

**Tuesday:** Mixed sun and clouds. Cumulus buildups to the north & east Max temps 97-102 deg, Min RH 10-15%. Winds variable early from the E with localized gusts near 15 mph, otherwise becoming W to Up-drainage 4-8 mph gusts 13 mph by afternoon.

**Outlook for Wednesday:** Sunny and hot. Max temp 98-103 deg, Min RH 8-13%. Winds becoming WSW 7-12 mph gusts 17 mph.

## INPUTS

### WEATHER SUMMARY:

\*\*\* Hot and Very Dry \*\*\*

\*\*\* Isolated T-storms Late Tonight East of Fire \*\*\*

Strengthening high pressure will continue to bring hot/dry conditions with poor humidity recoveries overnight. Winds start off light easterly but diminish, then switch over to typical WSW/up-drainage by afternoon. Cumulus buildups to the east will bring the possibility of nocturnal thunderstorms; tracking northward just east of the fire area by daybreak Tuesday morning. Downdrafts could become channeled by the Cosumnes drainage into brief 25 mph gusts. Any lightning should remain east of the fire area.

**Max. Temperatures-** 99-104 degrees **Min. Humidity-** 8 to 13% **Winds-** WSW 5 to 10 mph/Gusts to 15 mph

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL:

- Fuels within the ENTIRE burn area are drought stressed.
- The fire is predominantly fuels driven, but amplified by steep topography.
- Persistently low relative humidity will support spotting. New starts will expand quickly!
- Understory burning has increased reburn potential, Torching may promote short crown runs.
- Steep terrain will foster rollout as heavy fuels are weakened by deep seated fire.

#### SPECIFIC:

**All Divisions: Spot fires outside established containment lines or new starts...**

**Flame Lengths-** 3 to 6 ft. in Grass, Up to 17 ft. in Brush

**Rate of Spread-** 60 chains/hour in Grass, Up to 110 chains/hour in Brush

**Spotting Distances-** Up to .25 miles in Grass/Brush, Up to .4 miles in Timber (Torching)

**Probability of Ignition-** Over 90% at the peak of the burn period

#### AIR OPERATIONS:

Expect poor to fair smoke dispersion during the morning hours with the inversion breaking by 11:00. Mixing heights will rise to 5,000 AGL during peak daytime heating. Anticipate terrain induced turbulence in areas with complex terrain; especially during times of afternoon cumulus development.

## SAFETY

# SAND FIRE SAFETY MESSAGE

We are ALL accountable for SAFE behaviors

SAND FIRE Day/Night

Monday -Tuesday

07/28-29/2014

## MAJOR HAZARDS:

- INCIDENT DRIVING
- EXTREMELY LOW HUMIDITY
- HEAT STRESS AND HYDRATION
- LONG TERM SEASONAL FATIGUE

Fire Order of the Day –Maintain prompt communications with your forces,  
Your supervisor, and adjoining forces.

- ❖ **Fire Behavior** – Extremely dry fuel conditions, live fuel moisture is less than 50%. Steep Topography and Canyon Systems, monitor fire weather and indicators of extreme fire behavior. Anticipate changes in weather condition.
- ❖ **Health and Sanitation** - Secure rolling stock in vehicles, no trash on floor of apparatus. Keep work areas, and staging areas as clean as possible to reduce encounters with unwanted critters & camp crud.
- ❖ **Hydration/Nutrition** is becoming critical with higher temps and lowering relative humidity. Be alert to heat stress in yourself and others. Drink fluids coupled with proper nutrition to maintain peak performance.

## Watch Out Situation of the Day

4. UNFAMILIAR WITH WEATHER AND LOCAL FACTORS INFLUENCING FIRE BEHAVIOR

### Symptoms & Signs of Heat Illness

**Heat Exhaustion:** Victim will have cool, clammy skin; pale coloring; feel weak, dizzy and/or nauseous.

**Treatment :** Have individual sit in shade or cool area; administer fluids; loosen clothing and assure rest.

**Heat Stroke: *This is a medical emergency!!***  
Victim will hot, dry, red skin and possible convulsions. These symptoms can progress to unconsciousness and death!

**Treatment –** Immediately cool individual's body by pouring water over them, especially the head and upper body. Contact the medical unit. Monitor the victim and provide whatever medical support necessary. Placing ice around the neck, groin and armpits can help speed the cool down.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

## Instructions for Use of CDF 101 Property Certification of Location or Damage

**Document Number:** for use as a local number system or when attached to a FC-40 document.

**Location / Incident Name:** Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

**Incident Number:** Enter the appropriate incident number

**Unit:** Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

**Region:** Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

**Date:** Enter the date the P.L. or D. was completed.

**The following items were:** Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

**Reminder,** this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

**Date of Occurrence:** Enter the date the property was broken, left on line or damaged.

**Quantity:** Enter the quantity for the line item.

**Unit of Measure:** Enter the unit of measure for the line item (example ea = each).

**CDF Stock Number:** Enter the PIN or stock number.

**Description:** Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

**Property Number:** Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

**Location of Items:** Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

**Remarks:** Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

### Signature of Person Certifying Occurrence as Described:

**Signature:** The CDF Employee certifying the occurrence must sign.

**Printed Name:** Enter the printed name of the signature.

**Title:** Enter the title of the signature.

**Date:** Enter the date of the signature.

### Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

**Comments:** Supervisors may enter comments of approval or disapproval.

**Signature of Unit Administrator:** Signature of Unit Supervisor reviewing the certification described.

**Title:** Title of the signature.

**Date:** Date of the signature.

**Notes:**

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to your local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.

## *Who needs to turn in what?*

Unit Logs (ICS-214s) are required by Strike Team Leaders and above. However, Crews, Engines and possibly other contractors working on the line or in camp, may be asked to fill them out, especially if there has been a significant event that may need to be documented, or if requested by your Supervisor.

Copies of the Crew Evaluations (ICS-224s) and Personnel Evaluations (ICS-225s) are sent to your home unit or business office. Therefore, it is imperative to provide the home unit or business name and address on the evaluation form.

Thanks for your help and cooperation.

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

#### **Fireline personnel-** (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

#### **Aviation Operations-**

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
