SAFETY MESSAGE

EVENT: SAND Fire

DATE: July 29, 2014

Major Hazards and Risks:

Steep Rocky Terrain: -Watch your footing. Heavy fuels that are dead or dying.
-Heads-up for rolling material. Watch for snags.
-Review downhill/indirect line construction guidelines.

Heat Disorders: - Drink plenty of fluids. Stay away from caffeine. **Hydrate** early and often.
-Recognize signs and symptoms of heat disorder. (dizziness, cold and clammy skin ,etc.)

Driving: -Drive Defensively! Base speed limit is **15 mph**.
-**Mandatory: Seat belts and headlights on.**
-Watch your speed. Be aware of local traffic and adhere to posted speed limits.
Community is re-populating area. Be aware and Slow DOWN !

Mine Shafts: -Be aware of the mine shafts in the area. Flag them if you find them.

Hazard Trees: Identify them, Flag the area, GPS them, and notify Div/Sups. (Refer to IRPG p 22)

Communications: -**Review Communications Plan before engaging.** Remain in communications with your supervisor at all times. Stay on your Tac's.

Situational Awareness: -Slow down and think! If you're not thinking safety in every action, then you're just not thinking!
Check the Weather Reports for the day and night OPS.
Expect extreme fire behavior and react accordingly!

General Safety

- **Team leaders** – Recognize your safe employees that follow proper safety procedures.
- All Supervisors give 2 good, detailed safety briefings on LCES, 10 & 18, Comm. Plan, weather, per shift and log on your 214's.
- Wear appropriate PPE for the assigned task including eye protection.
- Use sunscreen.
- Watch for fatigue, take regular breaks, pace yourself and your crews.
- Make sure that Safety is notified of all injuries and accidents related to the incident.
- **Keep your head in the game. Stay alert. Complacency is your enemy!**
- **Situational Awareness at all times. Know what the fire is doing!**

Safety Officer

Jack Wise (t)

INCIDENT RISK ANALYSIS (ICS 215a)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES				
ALL	DRIVING HAZARDS REPOPULATION	<ul style="list-style-type: none"> • Drive defensively! Expect the unexpected around every curve. • Drive with headlights on. • Slow Down! Narrow dirt roads with limited passing room • Increase following distances. Maintain Situational Awareness. • Review Roadside Response Safety (IRPG p 26). 				
ALL	FATIGUE	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue. 				
ALL	HYDRATION/ NUTRITION	<ul style="list-style-type: none"> • Drinking water before, during and after shifts, up to 1.5 gal. per shift. • Be alert for signs of heat stress in yourself and others. • Maintain proper nutrition throughout the shift. 				
ALL	HEAT RELATED ILLNESS	<ul style="list-style-type: none"> • Review “Specific Treatments” section of the IRPG (pg 38) for heat illnesses signs and treatment. Watch coworkers for signs and symptoms. • Take frequent breaks as needed and operationally feasible • Report any and all injuries to your Supervisor. Follow Medical Emergency Procedures as outlined on the ICS-206 				
ALL	MOPUP	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Ensure LCES in place prior to engagement (IRPG p. 6). • Establish adequate safety zones (IRPG p.7). • Follow “Look Up, Look Down, Look Around” procedures (IRPG p. 2-3). • Utilize Risk Management Process (IRPG p.1). 				
ALL	MINE SHAFTS	<ul style="list-style-type: none"> • Be alert for mine shafts, etc. in fire area. They may not be I.D’ed on maps. • If found, flag area, notify all line personnel, DIVS, OPSC, & SOFR, keep personnel out of area. 				
ALL	POISONOUS INSECTS, SNAKES	<ul style="list-style-type: none"> • Identify, avoid, and get treatment for any bites or stings. • Use caution (for bees) when drinking from opened cans. 				
ALL	POISON OAK	<ul style="list-style-type: none"> • Review identification of poison oak. • Avoid poison oak, wash as frequently as possible. Use Technu if available. • Change clothing as possible. 				
ALL	POWER LINES	<ul style="list-style-type: none"> • Follow Hazard Tree safety guidelines (IRPG pg.22) • Communicate power line hazards to all resources • Flag area around down power lines and deny access • PG&E is working to restore power, consider all power lines “HOT”. 				
A/C/ M Q W/X	HAZARD TREES	<ul style="list-style-type: none"> • Follow Hazard Tree safety guidelines (IRPG pg.22) • Identify and report location to Falling Modules. • Avoid hazard by identifying “No Work Zones”.

INCIDENT WEATHER FORECAST

Incident: **Sand Fire**

Operational Period: **Tuesday July 29th 0700-0700**

Issued: 1700 PDT Monday July 28, 2014

DISCUSSION:

Strong 4-Corners high pressure builds towards CA. This high will produce SE flow aloft and swing a surge of monsoonal moisture northward along the Sierra today. Isolated thunderstorms are expected 20-40 miles east of the fire early Tuesday. However, drier air will push in behind this moisture late in the day Tuesday with clearing from south to north. Partly cloudy skies expected through early afternoon, followed by afternoon clearing and warmer/drier conditions. Hotter & drier conditions Wed-Thu with afternoon temperatures near or over 100 deg and Min RH near 10% each day. Winds will be mainly E/downslope overnight through mid-morning before switching over to a typical WSW/up-canyon wind by afternoon.

FORECAST:

Today (Tuesday): Partly cloudy through noon, then mostly sunny by afternoon. Distant thunderstorms to the north & east. Max temps 95-100 deg, Min RH 12-17%. Winds downslope/ E 3-6 mph with localized gusts near 15 mph thru late morning, otherwise becoming SW to Up-drainage 4-8 mph gusts 13 mph by afternoon.

Tonight: Clear. Min temps 65-70 deg. Max RH 45-50%. Winds light ENE//drainage 3-6 mph.

Wednesday: Mostly sunny & hot. Max temps 98-103 deg. Min RH 8-13%. Winds, becoming WSW 5-10 mph gusts 15 mph by afternoon. Gusts near 20 mph on upper slopes.

Outlook for Thursday: Sunny and hot. Max temp 98-103 deg, Min RH 8-13%. Winds becoming WSW 7-12 mph gusts 17 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 002	TYPE OF FIRE: Wildfire
FIRE NAME: Sand Fire	OPERATIONAL PERIOD: 07/29/14 0700-0700
DATE ISSUED: July 28, 2014	TIME ISSUED: 19:00
UNIT: CA-AEU-018237	SIGNED: <i>Jeff Shelton</i> Typed/printed: Jeff Shelton (FBTS)

INPUTS

WEATHER SUMMARY:

*** Continued Hot and Dry ***

*** Isolated T-storms Late Tonight East of Fire ***

Persistent high pressure will continue to bring hot/dry conditions with only moderate humidity recoveries overnight (45-50%). Isolated thunderstorms are expected 20-40 miles east of the fire early in the shift, followed by drier air late in the day Tuesday. Expect clearing from south to north with warmer/drier conditions through the afternoon. Winds start light easterly, switching over to a WSW/up-canyon wind by afternoon.

Max. Temperatures- 95 to 100 deg. **Min. Humidity-** 12 to 17% **Winds-** SW 4 to 8 mph/Gusts to 13 mph

OUTPUTS

FIRE BEHAVIOR

GENERAL:

- Fuels are very receptive. Your activities may be an ignition source.
- Areas where slope, fuel, and wind align must be identified for safe engagement.
- Spotting potential is high. New starts will develop rapidly!
- Favorable conditions for reburn still exist; Torching may promote short crown runs.
- Anticipate rollout as heavy fuels are continually weakened by deep seated fire.

SPECIFIC:

All Divisions: Spot fires outside established containment lines or new starts...

Flame Lengths- 3 to 6 ft. in Grass, Up to 17 ft. in Brush

Rate of Spread- 60 chains/hour in Grass, Up to 110 chains/hour in Brush

Spotting Distances- Up to .25 miles in Grass/Brush, Up to .4 miles in Timber (Torching)

Probability of Ignition- Over 90% at the peak of the burn period

AIR OPERATIONS:

Expect increasing visibility as the inversion breaks by mid-morning (09:00). Mixing heights will rise to 5,500 AGL during peak daytime heating. Anticipate terrain induced turbulence in areas with complex topography; especially near developing thunderstorms.

SAFETY

Monitor the Weather. Don't be Caught off Guard by Lowering Humidity and Increasing Wind!

Assume Dust Devils Will Carry Materials Across Containment Lines! Stay Alert!

DIVISION ASSIGNMENT LIST	1. Branch I	2. Division/Group Division A/C/M
---------------------------------	-----------------------	--

3. Incident Name Sand	4. Operational Period Date: 7/29/2014 to 7/30/2014 Time: 0700-0700

Incident Location
 AMADOR AND EL DORADO COUNTIES
 State CA Latitude Longitude

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

FINANCE MESSAGE
July 29th 2014

FC-33's

PLEASE REMEMBER TO CHECK IN WITH THE PERSONNEL TIME RECORDERS AND KEEP YOUR TIME UPDATED.

SHIFT TICKETS

SHIFT TICKETS MUST BE TURNED IN AT THE END OF EACH SHIFT BY AN AGENCY REPRESENTATIVE

OFFSITE FEEDING AND LODGING

ALL OFF-SITE FEEDING AND PURCHASES MUST BE APPROVED BY THE FINANCE SECTION CHIEF, LOGISTICS SECTION CHIEF OR I C. THERE MAY BE CASES WHERE WILL HAVE TO FEED OFF SITE IN THE OUT LYING DIVISIONS, BUT SUBJECT TO THE SAME APPROVAL PROCESS OUTLINED ABOVE.

PROPERTY DAMAGE & INJURIES

PLEASE REPORT ANY INJURIES AND ACCIDENTS TO THE FINANCE SECTION. IF YOU FIND DAMAGE CAUSED BY SUPPRESSION ACTIVITIES PLEASE DOCUMENT ITS LOCATION, PHOTOGRAPH, IF POSSIBLE, AND REPORT TO COMP /CLAIMS.

BE SURE TO LOCK YOUR VEHICLES

Pete Bymers / Rich Browne
Finance Section Chiefs

TRAINING SPECIALIST MESSAGE

Trainer / Mentors:

If in the event:

You are leaving the incident before your assigned trainee

Or

Your trainee is reassigned

You must complete a performance evaluation for the period the trainee was assigned to you

TRAINEES:

Beat the Rush!!

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you Demob!! If you're ready – DO IT NOW!

Bring the following to the "exit interview"

- **A completed and signed ICS 225 or 226 Performance Evaluation**
- **A completed Exit Interview Form**
- **Trainee Evaluation Record**

Forms are available at the Training Office

Claudia Soiza

949 632-7813

Training Specialist

LOCAL GOVERNMENT OVERHEAD

IF YOU ARE ON THE INCIDENT AFTER 7/29 FOLLOW THESE INSTRUCTIONS FOR REIMBURSEMENT.

COMPLETE YOUR F-42 or F-78.

FOLLOW INSTRUCTIONS ON BACK OF FRONT PAGE.

TAKE TO CALFIRE TIME UNIT LEADER FOR INCIDENT SIGNATURE IN BLOCK #14.

ONCE SIGNED, KEEP THE WHITE AND GOLDENROD COPIES.

GIVE PINK COPY TO THE CALFIRE TIME UNIT LEADER.

MAIL THE WHITE COPY TO :

Cal OES Fire and Rescue Division

Fire Suppression Repair Plan

Sand Incident

Outline

- I. Objectives
- II. General Repair Guidelines
 - A. Firelines; Hand and Dozer
 - B. Watercourses
 - C. Concentrations of Slash
 - D. Archaeological or Historic Sites (if discovered)
 - E. Site Specific Issues

I. Objectives

The objective of this suppression repair plan is to mitigate possible adverse effects to resources resulting from fire suppression activities in a manner which does not compromise firefighter safety. Surface water/erosion control, protection of cultural resources, stabilization of facilities such as culverts, watercourse crossings, fence repair and the maintenance of site productivity for all lands involved in the incident are the focus of this work.

II. General Repair Guidelines

A. Repair Objectives – to reduce soil erosion and visual impacts.

- Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment.

Waterbar Guidelines:

- **SPACING:** These spacing distances should be used as a *guide*. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install waterbars at the following recommended **minimum** intervals:

Fireline Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- **LOCATION:** Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- **DEPTH AND WIDTH:** Waterbars need to be cut into the ground surface, do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.
- **ANGLE:** Determine the average gradient in percent slope of the fireline being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.

B. Watercourses

Remove all deposited soil from watercourses, swales or draws back to original level. Place waterbars on both sides of a watercourse where possible. Restore channel banks at fire line crossings to the bank shape see above and below the crossing. Pull perched soil from drainage edges and feather it out onto fire trail

- Remove fire suppression created debris from stream channels. Do not remove large woody debris (LWD) which was in channels prior to the fire.
- Major watercourse damage, if present, shall be reported to the SHU RM.
- Where fire lines are constructed within 100' of running watercourses, straw or wood chip mulching will be placed to prevent sediment from entering the watercourse. All loose soil must be pulled away from the watercourse and stabilized.
- Block access to stream channels where not previously accessible from roads and trails (utilize slash and or rock).

C. Concentrations of Slash

On areas that can not be adequately waterbarred or as an option to waterbarring, slash may be spread to cover the soil to minimize erosion. Branches and logs should be placed at contour and as thick as possible. Leave some amount of bare soil along the burned edge of the fire to prevent fire from carrying across the line. This work should be completed only after the fire is out and with the permission of Branch, Operations, or the IC.

- Piles created by suppression operations within 150' of permanent structures, public roads or private roads will be lopped and scattered within 18" of the soil surface.
- Scatter large concentrations of slash or debris (concentrations larger than 5ft x 5ft x 5ft).

D. Archaeological or Historic Sites (if discovered)

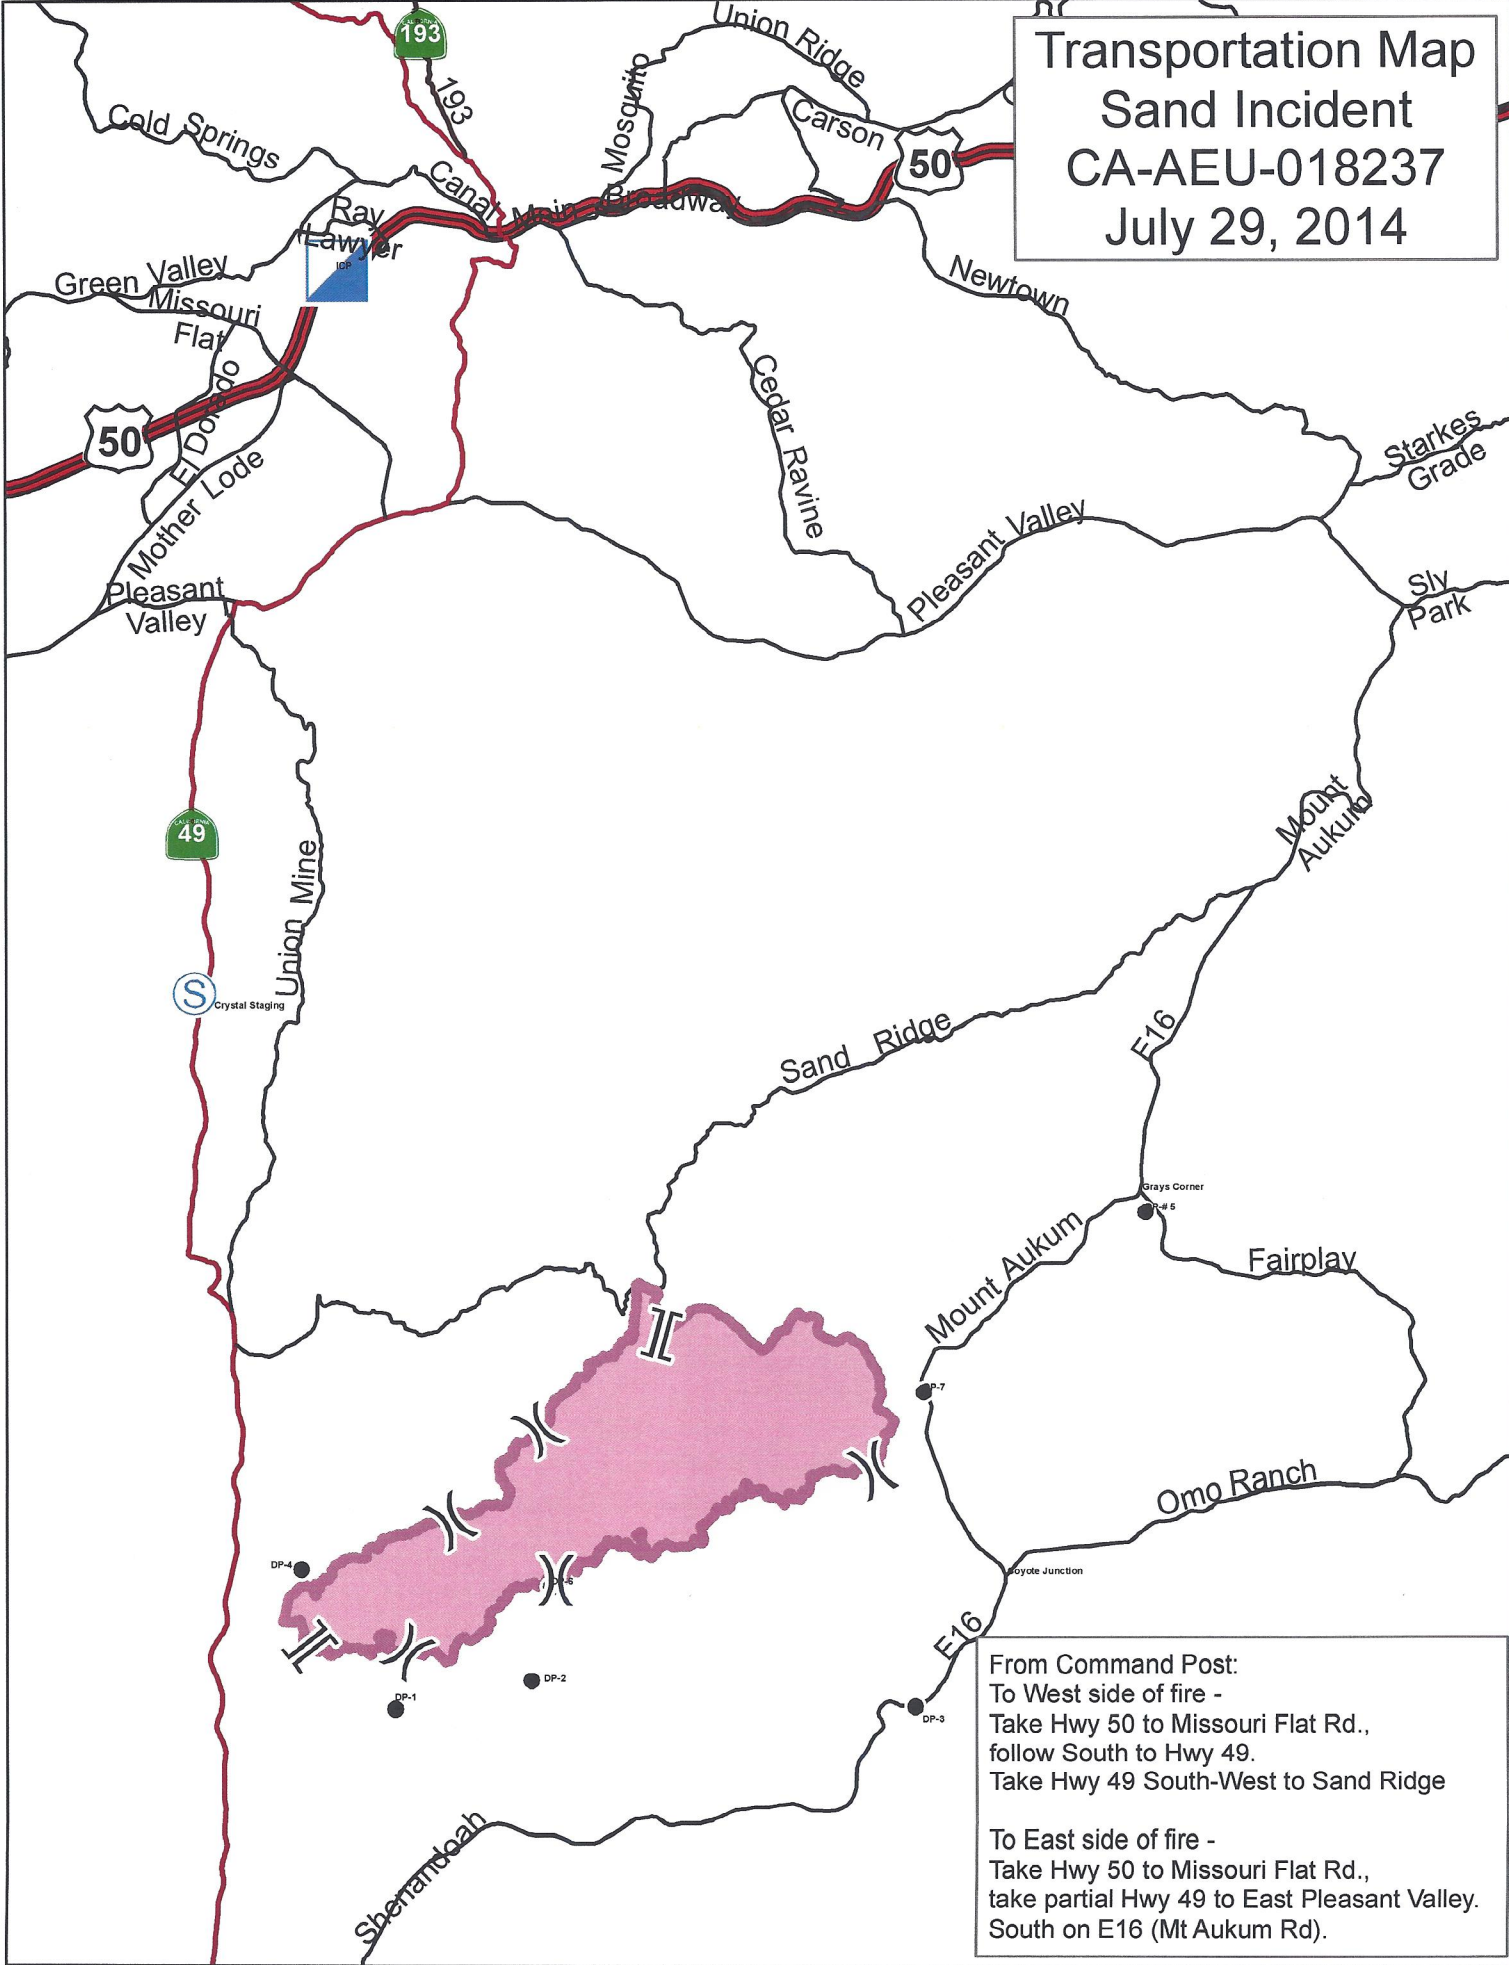

- All potential sites shall be flagged and avoided.
- Impacted sites will be reported to the Suppression Repair Unit Leader as soon as possible.
- If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Leader will be notified.

G. Site Specific Issues

These guidelines are in addition to specific guidelines which pertain to specific project sites. Due to the ongoing nature of the incident submittal of specific guidelines is incomplete. Additions will be submitted as on-the-ground reviews are completed.

Resource Advisors from Cooperating agencies are submitting their issues to the Suppression Repair Group. The Suppression Repair Group will keep the IC advised of site specific issues or repair requests that are not consistent with this plan prior to initiating any of those repair activities.

Transportation Map
 Sand Incident
 CA-AEU-018237
 July 29, 2014

From Command Post:
 To West side of fire -
 Take Hwy 50 to Missouri Flat Rd.,
 follow South to Hwy 49.
 Take Hwy 49 South-West to Sand Ridge

To East side of fire -
 Take Hwy 50 to Missouri Flat Rd.,
 take partial Hwy 49 to East Pleasant Valley.
 South on E16 (Mt Aukum Rd).

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
