Fire Behavior Message

Given current near to critical fuels conditions in the area of the fire and predicted weather for the operational period, any spot outside the line has the potential to exhibit the same extreme fire behavior encountered during initial attack. This includes rapid rate of spread and active spotting, especially when slope and wind are in alignment.

CAAEU 018237 Sand Incident Safety Message

FIRE BEHAVIOR

Monitor current weather conditions and forecasts.
Maintain adequate escape routes & safety zones.
LCES, 10 Standard Orders, 18 Situations
Observe Spot Weather Forecasts

HYDRATION

Drinking water before, during and after shifts.
Avoid lots of caffeinated beverages & energy drinks.
Be alert for signs of heat stress in yourself & others.
Check urine output against scale.
Monitor you core temperature and pulse rate.
Drink 8 oz. of water every 15 minutes.
Insure crews are hydrated and given rest breaks.

AIRCRAFT OPERATIONS

Keep personnel out of drop zones.
Use air-to-ground freq. to communicate with aircraft.
Use clear/concise statements when directing aircraft.
Use clock directions from pilot's perspective.

STRUCTURE PROTECTION

Utilize Structure Assessment Checklist (IRPG).
Follow structure Protection Guidelines (IRPG).
Defensible space for fire conditions.
Watch out for hazardous substances.

FIRING OPERATIONS

Conduct thorough briefing for all personnel
Qualified personnel for all assignments.
Utilize Risk Mgmt. Process before implementing.
Required PPE to be worn by all personnel involved.
Establish LCES prior to burning operations.
Communicate plan to Ops, Divs, & adjacent divisions.

COMMUNICATIONS

Know the communications plan.
Limit use of cell phones/cameras on the fire line.
Confirm changes to comm. plan with all personnel.
Brief your crews on all components of the IAP.

WEATHER

RH less than 15%.
Trees crowning inside the fireline.
Watch smoldering fires during wind events
Base all action on current and expected fire behavior.

CAL FIRE WUI Guidelines

STRUCTURE DEFENSE TACTICAL ACTIONS

CHECK AND GO

"Check and Go" is a rapid evaluation to check for occupants requiring removal or rescue.
Structure Triage Category – Threatened Non-Defensible

PREP AND GO

"Prep and Go" implies that some preparation of the structure may be safely completed prior to resources leaving the area. Structure Triage Category – Threatened Non-Defensible

PREP AND DEFEND

"Prep and Defend" is a tactic used when a Safety Zone and TRA are present and adequate time exists to safely prepare a structure for defense prior to the arrival of the fire front.
Structure Triage Category – Threatened Defensible

FIRE FRONT FOLLOWING

"Fire Front Following" is a follow up tactic employed when Check and Go, Prep and Go, or Bump and Run tactics are initially used. A tactic used to come in behind the fire front.

BUMP AND RUN

"Bump and Run" is a tactic where resources typically move ahead of the fire front in the spotting zone to extinguish spot fires and hot spots, and to defend as many structures as possible.

ANCHOR AND HOLD

"Anchor and Hold" is a tactic utilizing control lines and large water streams from fixed water supplies in an attempt to stop fire spread. The goal is to extinguish structure fires, protect exposures, and reduce ember production.

TACTICAL PATROL

"Tactical Patrol" is a tactic where the key element is mobility and continuous monitoring of an assigned area.

LEVELS OF ENGAGEMENT

PACE

Implement PACE. prior to engaging in any structure protection action.

P - Primary Plan [Offense]

Is focused on fire fighter safety and mission objectives

A - Alternate Plan [Offense]

A fall back plan that closely supports the Primary Plan

C - Contingency Plan [Defense]

Focused on the firefighter's safety, move to a safety zone or temporary refuge area

E - Emergency Plan [Defense]

Firefighter survival, deployment zones, fire shelters

ALWAYS HAVE A DEPLOYMENT SITE IDENTIFIED!

DRAW-D

D - Defend – Holding actions, protecting priority areas, protect the structures, hold and improve the line

R - Reinforce – Bring more resources to bear, add resources necessary to *advance* or *defend*

A - Advance – Anchor and Flank, Direct or Indirect Attack, Active burnout operations

W - Withdraw – Cease current activities until conditions modify, Abandon an established position or constructed line in response to an increase in fire intensity, Not a stigma, but a decision to move away from a threat

D - Delay – Wait until the situation has modified sufficiently to allow a different level of engagement, Waiting for conditions to meet pre-identified triggers necessary to *advance* or *defend*, not a lack of effort, but a conscious decision to maximize long term effectiveness
