

*Corrected*  
**DAY INCIDENT**

**CA-LMU-003472**

***OPERATIONAL PERIOD***

**August 3 - 4, 2014**

**0700-0700**

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME DAY</b>	<b>2. DATE 8/2/14</b>	<b>3. TIME 1900</b>
----------------------------	---------------------------------	---------------------------	-------------------------

**4. OPERATIONAL PERIOD (DATE/TIME)**  
**8/3/14 - 8/4/14 0700 – 0700**

- 5. MANAGEMENT OBJECTIVES**
- Provide for firefighter and public safety.
  - Establish and maintain positive relationships with cooperating agencies and the public.
  - Provide timely and accurate incident information.
  - Protect economic and watershed values with safe and aggressive firefighting efforts.
  - Keep costs commensurate with values at risk.
- 6. GENERAL CONTROL OBJECTIVES**
- Keep the fire:
    - North of County Road 94 and Widow Valley
    - East of Day Road
    - West of County Road 91
    - South of County Road 95

**7. WEATHER FORECAST FOR OPERATIONAL PERIOD**

Southerly flow aloft will bring moisture into the fire area leading to slightly higher afternoon humidity. Due to smoke shading, temperatures will also be a few degrees cooler. The southerly flow will also bring more instability and a few showers could approach the fire area late Sunday night.

**8. GENERAL SAFETY MESSAGE**

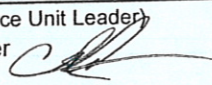

Trains are traveling through the fire area at a maximum 20 mph. Be alert and use caution when crossing tracks.

Drive safely through road construction on Highway 299 and watch out for distracted drivers.

## INCIDENT Weather Forecast

**FORECAST NO:**

**NAME OF FIRE:** 3-7 Day

**PREDICTION FOR:** DAY and NIGHT SHIFT

**UNIT:**

**SHIFT DATE:** Sunday Aug 3, 2014

**SIGNED:**

*Frederic Bunnag*

**TIME AND DATE**

**Incident Meteorologist**

**FORECAST ISSUED:** Aug 2, 2014 1900 PDT

---

**WEATHER DISCUSSION:** ...FIRE WEATHER WATCH FOR THUNDERSTORMS ON MONDAY...

Hot and dry conditions will continue today with little change in temperatures and humidity in open areas. However areas that have become smoke shaded could see temperatures down a few degrees with RH up to 5 percent higher. Moisture from the monsoon in the SW will spread into the fire area overnight with increasing clouds but also with higher nighttime humidity.

---

**WEATHER FORECAST: DAY SHIFT**

**WEATHER:** Areas of smoke..otherwise mostly sunny.

**TEMPERATURES:** 90-92 valleys and exposed area...85-89 mid slopes and ridges.

**HUMIDITY:** Falling to 30% by 1100...minimum of 17-20%

**20 FT WINDS:**

**RIDGETOP -** Northeast to East 3-5 mph until 1000...then Southwest 8-10 mph by 1400.  
Southwest to West winds 10 to 12 mph after 1600.

**SLOPE/VALLEY -** Upslope 3-5 mph until 1400, then Southwest 8-10 mph.

**HAINES INDEX:** 5 (Moderate)

**STABILITY/INVERSION:** Inversion expected to break around 1100 except in smoke-filled valley where inversion may linger until 1400.

---

**WEATHER FORECAST: NIGHT SHIFT**

**WEATHER:** Increasing clouds through the night...cloudy by morning.

**TEMPERATURES:** Overnight lows 60 to 65.

**HUMIDITY:** Rising to 30% by 2100...maximum of 65%.

**20 FT WINDS:**

**RIDGETOP -** Southwest to West 10 to 12 mph until 2000...then

**SLOPE/VALLEY -** Southwest 8-10 mph until 2100...then becoming downslope 2-4 mph.

**HAINES INDEX:** 4 (Light to Moderate)

**STABILITY/INVERSION:** Very weak or no inversion.

---

**OUTLOOK FOR MONDAY AND TUESDAY:** Monsoonal moisture will bring showers and thunderstorms to the fire area from early Monday and continue into Tuesday. Highs 75 to 85. Min RH 30-35%. 20-ft wind West 10-15 mph.

## FIRE BEHAVIOR FORECAST Day Fire

FORECAST NUMBER: 2	TYPE OF FIRE: Wildland Fire
FIRE NAME: Day Fire	OPERATIONAL PERIOD: 8/3/2014 0700-0700
DATE ISSUED: 8/2/2014	TIME ISSUED: 2000 Hrs.
UNIT: LMU – CAL FIRE Lassen-Modoc	SIGNED: typed/printed: Chris Waters FBAN

### INPUTS

#### WEATHER SUMMARY:

Weather will continue to be hot and dry with temperatures in the mid 90's and RH in the 17-20 percent. Expect increasing instability with a Haines Index of 5. Smoke from other fires in the area may block the sun in the afternoon causing temperatures to slightly decrease and block the sun from the fire area. Expect afternoon southwest winds from 10 to 20 mph after 1200 hrs.

### OUTPUTS

#### FIRE BEHAVIOR:

Fire continues to display extreme fire behavior in the afternoon. Instability in conjunction with poor fuels conditions is causing tremendous fire runs and large column development. Early afternoon winds which typically surface around 1400 hrs. are contributing to long range spotting in excess of ¼ to ½ mile. The active fire front is now moving into favorable terrain, however the persistent afternoon winds will continue to contribute to long range spotting. Be prepared for extreme fire behavior all afternoon.

**Fuels:** The Day Fire is burning primarily in commercial mixed conifer timber stands actively managed for timber production. Light to moderate slash accumulations as well as piles can be found throughout the fire area. All live fuels are under drought stress with live fuel moisture values at levels well below normal.

**Topography:** Topography ranges from moderately steep to flat with most of the fire area generally dominated by mild slopes.

**Weather:** Afternoon southwest winds are the most significant weather element for the Day Fire.

#### SPECIFIC:

Divisions C, H, S, & V: This is will be the most active part of the fire. Expect long range spotting from ¼ to ½ mile as afternoon winds surface. These divisions will continue to challenge suppression operations and will likely continue to move to the northwest across the flats. Fire behavior will increase after 1400 hrs. and is expected to move the fire further to the northwest. Intense fire behavior will continue into the evening and nighttime as heavy dead fuels continue to burn down.

Divisions A, X, & W: These divisions continue to hold, with fire activity expected to diminish throughout the day. Keep in mind that mop up operations have been limited due to resource availability. Some hot spots and low intensity fire remains.

#### AIR OPERATIONS:

Smoky conditions will hamper Air operations all morning and will not completely clear out until the afternoon winds settle in. Additionally, smoke from other fires in the area will contribute to afternoon limited visibility.

#### SAFETY:

**Extreme Fire Behavior will continue to be a significant hazard. Monitor weather and fuels conditions, communicate, and identify your Safety Zones. Fire damaged trees and hot stump holes are everywhere. Monitor roadways and control lines for hazards.**

# CAL FIRE INCIDENT MANAGEMENT TEAM 3

<b>SAFETY MESSAGE</b>	1. INCIDENT NAME: DAY	2. DATE PREPARED: August 2, 2014	3. TIME PREPARED: 1400
	4. PREPARED BY: Curtis Brown	5. LEADER NAME: Curtis Brown SOF1	6. OPERATIONAL PERIOD: 8-3-2014 0700 TO 8-4-2014 0700

# SAFETY MESSAGE

## *Fatigue (n)*

*1.inability to respond to situation: the temporary inability of somebody to respond to a situation as a result of overexposure or excessive activity*

- Exercise caution while driving on the incident, Highway 299, and in the surrounding communities. Drive slow, drive safe, and watch out for the wildlife... SLOW DOWN.
- Stay hydrated!!! Time to think = time to drink. Document 2:1 rest and hydration on 214'S.
- Stay at least 100 feet away from the train tracks. Trains ARE traveling through the fire area at 20mph.
- Be aware of what is happening around you (SA) and adapt your exit strategy accordingly. ESTABLISH SAFETY ZONES AND KNOW YOUR ESCAPE ROUTE!
- Trees are weakened due to fire activity. Look Up, Down, and Around for tree hazards.
- Remain mindful of changing weather conditions; don't be caught off guard. Wind may increase and change direction.
- Establish COMMUNICATIONS report any coverage issues to your line supervisor.
- Watch for signs of fatigue in yourself and each other - Take breaks early and often !!!

# DANGER

# LOOK OUT FOR TRAIN

# Incident Management Team 3

## SAFETY

### HEAT Information

"If it is Predictable it is Preventable"

Heat-induced illness is a result of the body's inability to cope with heat. This can be a minor symptom or a serious life-threatening injury. While recognition and treatment are important, prevention is the key. **HEAT ILLNESS IS PREVENTABLE.**

Becoming acclimated to working in a hot environment takes time.

- It normally takes 4-8 days to acclimate
- Fatigue and alcohol consumption delays this process
- Persons not acclimated are at increased risk and can suffer heat-related illness at lower levels of heat and work activity

Personnel need to pre-hydrate before work and continuously hydrate during work.

- Water is the primary form of fluid replacement
- Before work, it is recommended to drink 20 ounces of sports drink
- During work drink 8 ounces of water every 15 minutes (1 Quart/hour)
- Cool / cold water is preferred
- Consider a carbohydrate / electrolyte sports drink as a portion (25%-50%) of the fluid intake

#### Avoid Hyponatremia

- Hyponatremia develops when the concentration of sodium is diluted in the bloodstream
- Exercise-induced hyponatremia occurs when this phenomenon is caused by excess water intake during exercise or work
- Proper nutrition and consumption of carbohydrate/electrolyte sports drinks as part of hydration will assist in avoiding hyponatremia
- Symptoms can include disorientation, headache, muscle cramps and nausea

#### Avoid Certain Drinks

- To help prevent dehydration, **avoid** carbonated beverages and performance beverages such as Red Bull, Rock Star, Monster Drinks, etc.
- Caffeine hastens fluid loss in the urine.

## INCIDENT RISK ANALYSIS (ICS 215A)

HAZARDOUS ACTIONS / CONDITIONS		MITIGATIONS/WARNINGS/REMEDIES	
	<b>FIRE BEHAVIOR</b>	<ul style="list-style-type: none"> <li>Review "Severe Fire Behavior Potential" (IRPG p.78 (RED)).</li> <li>Monitor current weather conditions and forecasts. Make sure all personnel receive thorough briefings every shift.</li> <li>Be observant for formation and passage of thunder cells through or close to fire area and alert all personnel.</li> <li>Maintain adequate escape routes and safety zones. Advise all personnel if these are compromised or changed. Set trigger points when appropriate.</li> <li>Adhere to 10 Std Orders, mitigate 18 situations.</li> </ul>	
<b>ALL</b>	<b>DRIVING HAZARDS/ ROADS</b>	<ul style="list-style-type: none"> <li>Drive defensively! Expect the CITIZENS around every curve.</li> <li>Increase following distances on dusty roads. Slow down when you meet opposing traffic. Be alert for construction work on Highway 299.</li> <li>Drive with headlights on.</li> <li>Be alert for wildlife, heavy trucks, &amp; high speed opposing traffic crossing into your lane.</li> <li>Check traffic approaching behind you when making left turns.</li> <li>Maintain Situational Awareness.</li> </ul>	
<b>ALL</b>	<b>FATIGUE</b>	<ul style="list-style-type: none"> <li>Be alert for signs of fatigue and take breaks as necessary.</li> <li>Maintain 2:1 work/rest ratio.</li> <li>Monitor incoming resources for level of fatigue.</li> </ul>	
<b>C,H,S</b>	<b>SAFETY ZONES</b>	<ul style="list-style-type: none"> <li>ESTABLISH Safety Zones in each Division</li> <li>Follow Safety zone guidelines (IRPG p. 7 (RED))</li> <li>Carefully evaluate burned areas before designation as safety zones due to spotty burning in numerous areas.</li> <li>When safety zones are distant from work site, set trigger points to allow personnel to reach them in a timely manner.</li> </ul>	
<b>H,S</b>	<b>TRAINS</b>	<ul style="list-style-type: none"> <li>Stay 100' away from track at all times.</li> <li>Use caution when crossing track. LOOK both ways.</li> </ul>	
<b>ALL</b>	<b>MEDIVAC</b>	<ul style="list-style-type: none"> <li>Assign personnel with Advanced Life Support capability on the line.</li> <li>Cache emergency equipment (backboards etc.) in various locations on line.</li> <li>Maintain ALS ambulance at FALL RIVER AIRPORT.</li> <li>Keep line personnel informed of this issue. Safety briefings to stress that extra care should be taken with high-risk tasks (i.e. tree falling, chainsaw use, etc.).</li> <li>Supervisors insure that personnel with severe reaction to bee sting, etc. have "epi-kits" or consider leaving such individuals in camp.</li> </ul>	
<b>ALL</b>	<b>HYDRATION/HEAT MESSAGE</b>	<ul style="list-style-type: none"> <li>Drinking water before, during and after shifts, up to 1.5 gal. per shift.</li> <li>Be alert for signs of heat stress in yourself and others.</li> <li>Follow Heat Precautions in IAP</li> </ul>	
<b>ALL</b>	<b>SMOKE</b>	<ul style="list-style-type: none"> <li>Monitor crew's health. Get medical care for early signs of respiratory illness.</li> <li>Provide rest breaks; have crews get as much sleep as possible; hydrate!</li> </ul>	
<b>ALL</b>	<b>AIRCRAFT OPERATIONS</b>	<ul style="list-style-type: none"> <li>Keep personnel out of drop zones.</li> <li>Use air-to-ground freq. to communicate with aircraft.</li> <li>Use clear, concise statements when directing aircraft. Use clock directions from pilot's perspective.</li> <li>Avoid "heli-mopping". Eliminate unnecessary pilot exposure.</li> </ul>	
<b>ALL</b>	<b>SNAGS/ FIRE-WEAKENED TREE HAZARDS</b>	<ul style="list-style-type: none"> <li>Follow Hazard Tree Safety Guidelines (IRPG p. 20 (RED)).</li> <li>Many of the trees within the fire area are weakened due to fire activity.</li> <li>Be especially alert around snags during wind events.</li> </ul>	
<b>A,C,H, S</b>	<b>SPOTTING</b>	<ul style="list-style-type: none"> <li>Post LOOKOUTS</li> <li>Ensure adequate ESCAPE ROUTES and SAFETY ZONES</li> </ul>

# AIR OPERATIONS SUMMARY 220

PREPARED BY: John C. Richardson

DATE: 8/2/2014

**1. INCIDENT NAME:** Day  
**2. OPERATIONAL DATE:** 08/03/2014  
**SUNRISE:** 0700  
**SUNSET:** 1952

**3. REMARKS (Safety Notes, Flight-Hazards, Other Hazards, Air Operations, and Special Equipment, etc.):** Smokey Conditions \*Numerous fires in the area \*Joint helibase at Fall River Airport 1 frequency \*All helos lat/long and report dip sites and gals. \*Use travel routes established for each fire. \* MET Towers (see 2<sup>nd</sup> page). Fall River Unicom 122.8

Helibase(s)  
 Name: Fall River  
 Lat./Long: 41 02.5 121 26.05

**4. AIR RESCUE AIRCRAFT:** H-202 Day time  
*Activation Instructions:* CANG H-826 Available 24/7 @ Redding Airport. Order rescue helicopter through communications. They will relay to Susanville ECC.

**5. TFR/91.137:**  
 Radius: 10 NM  
 Altitude: 10,000 MSL  
**Center Point:**  
 Latitude: 41 15.3  
 Longitude: 121 17.3

**3a. Water Points:** See Page 2

Prepared By (Communications Unit) *Kyle Johnson* Incident Location County Lassen & Modoc State CA Latitude N Longitude W

**KYLE JOHNSON - COM1 TEAM 3**

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

**8. MEDICAL EMERGENCY PROCEDURES**

**LINE EMERGENCY:**  
 Crew Supervisor will contact **Division Supervisor** with patient complaint/condition and location.

- **Division/Group Supervisor contacts:**
  1. Closest EMS resource
  2. Communications Unit
- **Communications Unit contacts:**
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
- **Division Supervisor or designee** will serve as point of contact and run medical emergency on assigned channel.
  1. **CALCORD** shall be used as the tactical frequency for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

## **TRAINEES**

To document your progress on this assignment as a Trainee, please make sure you check in with me. I am here to help you with your questions and documentation as it relates to USFS PMS 310-1, California CICCIS, and CAL FIRE HB4039.

**Mike Wink**  
**(707) 889-4225**  
**mike.wink@fire.ca.gov**

I am located in the back of room 16. Please feel free to contact me if you cannot come by in person.

## **Archaeological and Historic Properties Fireline Guidance for the Day Fire Modoc County, CA**

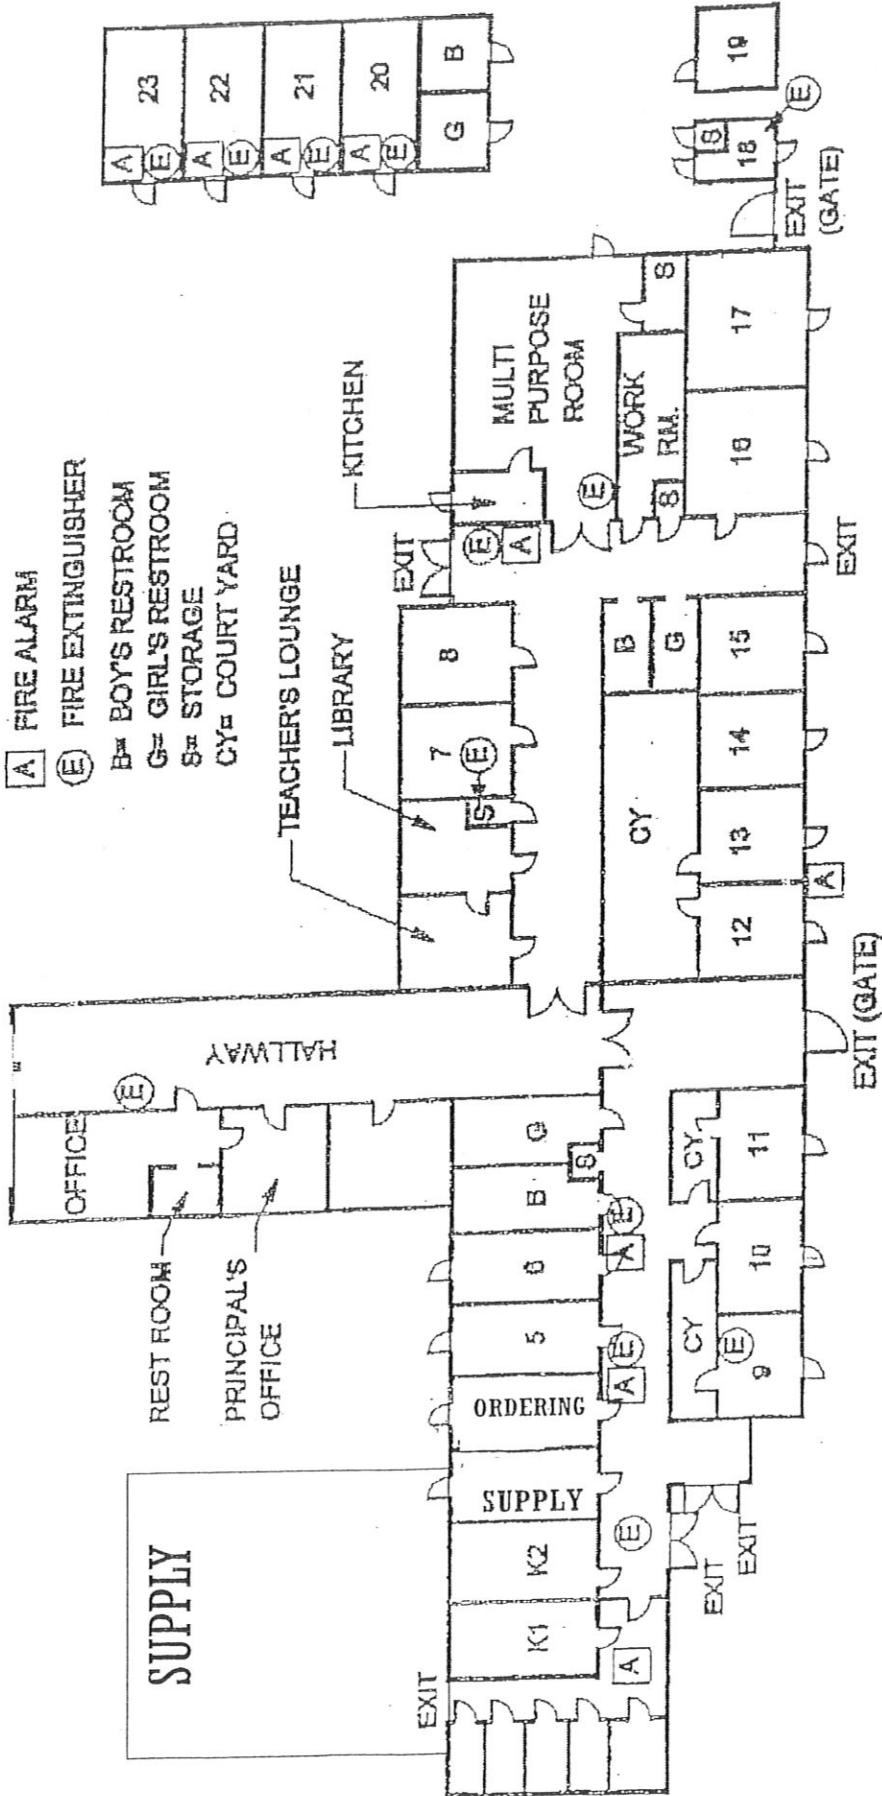

*Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:*

1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes and village sites that also include dark midden soils and perhaps circular housepit depressions. The Native American group living in the area at time of historic contact was the Achomawi.
2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, and stacked rock foundation remains.
3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
4. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
5. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair.
7. If you encounter a burial or other human remains, cease work in the area and contact Division immediately.

# FINANCE SECTION

## MESSAGE

**8/3/14**

**Please make sure hired equipment shift tickets are completed and dropped off in the Time Unit by agency personnel / line supervisors only.**

**Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor. For fire suppression damage, please include photos (if possible), a location address and / or Lat / Long and a brief description.**

**Please be aware of the water use forms included in the IAP.**

**Any off site feeding charged to the incident must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.**

**ROGER RAINES, FSC1**

**TERRY EASTWOOD, DEP. FSC1**

# CAL FIRE INCIDENT MANAGEMENT TEAM 3 WATER USAGE PLAN

## *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

### **Fireline personnel-** (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

### **Aviation Operations-**

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, IMT3 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

### **Public/Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Situation Unit.
- Review this check list and brief daily.
