DAY INCIDENT

CA-LMU-003472

OPERATIONAL PERIOD

August 8 - 11, 2014

0700-0700

INCIDENT OBJECTIVES	1. INCIDENT NAME DAY	2. DATE 8/7/14	3. TIME 1900																								
4. OPERATIONAL PERIOD (DATE/TIME) 8/8/14 - 8/11/14 0700 – 0700																											
5. MANAGEMENT OBJECTIVES <ul style="list-style-type: none"> • Provide for firefighter and public safety. • Establish and maintain positive relationships with cooperating agencies and the public. • Provide timely and accurate incident information. • Keep costs commensurate with values at risk. • Provide for a safe and effective demobilization process. 6. GENERAL CONTROL OBJECTIVE <ul style="list-style-type: none"> • Keep the fire within established control lines. 																											
7. WEATHER FORECAST FOR OPERATIONAL PERIOD The air mass will trend warmer and drier today with cumulus development in the afternoon. A few showers and thunderstorms are possible again, mainly east and south of the fire. Winds could become an issue on Saturday as a cold front moves across NE California. A much deeper low pressure will move into northern California and is expected to bring more thunderstorms to northern California on Sunday.																											
8. GENERAL SAFETY MESSAGE Ensure all personnel are briefed on the plan for the day. If thunderstorms are present, anticipate outflow winds and plan accordingly.

3-Day Weather Forecast for the Day Fire

Frederic Bunnag
Incident Meteorologist

...FIRE WEATHER WATCH FOR THUNDERSTORMS SUNDAY THROUGH MONDAY...

Synopsis: Less cloud cover on Friday will lead to more surface heating with the atmosphere becoming more unstable. As a result, expect more cumulus development with a chance of late afternoon and evening thundershowers, most of which will be in the eastern half of Modoc County. Winds could become an issue on Saturday as a cold front moves across NE California. A much deeper low pressure will move into northern California and is expected to bring more thunderstorms to northern California on Sunday.

Friday:

Sky/Weather: Partly Cloudy by early afternoon. Chance of showers and thunderstorms between 1600 and 2000.

Temperatures: Highs 83-86 valleys and 80-83 upper slopes and ridges.

Humidity: Minimum around 25 percent. Recovery at night to 45 percent.

20 foot winds: Northwest 5-10 mph...turning Southwest in the afternoon.

Light Northeast at night.

Haines Index: 5. **Lightning Activity Level across NE California:** 2 after 1500.

Saturday:

Sky/Weather: Partly cloudy. Windy in the afternoon.

Temperatures: Highs 85-89 valleys and 82-85 upper slopes and ridges.

Humidity: Minimum around 20 percent. Recovery at night to 45 percent.

20 foot winds: Southwest 12-15 mph...turning to Northwest 15-20 mph in the evening.

Haines Index: 5.

Sunday: FIRE WEATHER WATCH FOR THUNDERSTORMS SUNDAY THROUGH MONDAY

Sky/Weather: Thunderstorms likely after 1300.

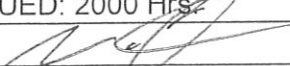

Temperatures: Highs 80-83 valleys and 76-80 upper slopes and ridges.

Humidity: Minimum 17 to 20 percent. Recovery at night to 60 percent.

20 foot winds: Southeast 8-10 mph...turning to Northwest 10-12 mph in the evening.

Haines Index: 5. **Lightning Activity Level across NE California:** 3 after 1300.

FIRE BEHAVIOR FORECAST
Day Fire

FORECAST NUMBER: 7	TYPE OF FIRE: Wildland Fire
FIRE NAME: Day Fire	OPERATIONAL PERIOD: 8/8/2014 – 8/10/14
DATE ISSUED: 8/7/2014	TIME ISSUED: 2000 Hrs
UNIT: LMU – CAL FIRE Lassen-Modoc-Plumas	SIGNED: 

INPUTS

WEATHER SUMMARY:

Expect the weather to become progressively warmer and drier over the next two days. Nighttime relative humidity recovery to drop as well. Pattern expected to return to thunderstorm development by Sunday and extend into Monday.

See Attached Incident Weather Forecast

OUTPUTS

FIRE BEHAVIOR:

No appreciable fire behavior expected today. Stump holes and heavy fuels will continue to burn over the next day or two as temperatures increase and relative humidity decreases. Expect to see isolated new smokes over the next couple days. Sunday will bring a significant change to the weather pattern as thunderstorms develop over the area.

Fuels: The Day Fire is burning primarily in commercial mixed conifer timber stands actively managed for timber production. Light to moderate slash accumulations as well as piles can be found throughout the fire area. All live fuels are under drought stress with live fuel moisture values at levels well below normal.

Topography: Topography ranges from moderately steep to flat with most of the fire area generally dominated by mild slopes.

SPECIFIC:

Mop up operations are in full force across the fire. Active fire has ceased however the current warming trend could bring parts of the fire back to life.

All Divisions: No active fire expected today, however anticipate the weather change and its effect on fire behavior. Expect to see new and previously undetected hot spots as the weather warms up.

Anticipate and prepare for thunderstorms prior to their arrival on Sunday. Thunderstorm safety should be reviewed in preparation for the coming event.

AIR OPERATIONS:

No air operations are planned for the Day Fire.

SAFETY:

Stump holes and fire damaged trees continue to be a significant hazard. Active fire behavior is not expected however continue to monitor the fire area for isolated flare ups. Warmer and drier conditions will potentially allow new hot spots to flare up.

Major change in weather on Sunday with a return to thunderstorm development over the area. Review thunderstorm and lightning safety prior to their arrival.

CAL FIRE INCIDENT MANAGEMENT TEAM 3

SAFETY MESSAGE	1. INCIDENT NAME: DAY	2. DATE PREPARED: August 7, 2014	3. TIME PREPARED: 1400
	4. PREPARED BY: Curtis Brown	5. LEADER NAME: Curtis Brown SOF1	6. OPERATIONAL PERIOD: 8-8-2014 0700 TO 8-11-2014 0700

SAFETY MESSAGE

Situational Awareness

1. the ability to identify, process, and comprehend the critical elements of information about what is happening to the team with regards to the mission. More simply, it's knowing what is going on around you.

- Exercise caution while driving on the incident, Highway 299, and in the surrounding communities. Drive slow, be respectful and watch out for the wildlife.
- Stay hydrated. Time to think = time to drink. Document rest and hydration on an ICS 214 (Unit Log).
- Stay at least 100 feet away from the train tracks. Trains ARE traveling through the fire area.
- Be aware of what is happening around you. Timber company employees are within the fire area.
- Trees are weakened due to fire activity. Watch for hazard trees and request "C" fallers.
- Remain mindful of changing weather conditions.
- Ensure that all PPE is worn while engaged in mop-up operations. Pace yourself through the shift.
- Watch for signs of fatigue in yourself and each other - Take breaks early and often.
- Ensure all personnel are briefed on the plan for the day.

SNAG (Hazard Tree) SAFETY:

Size up snag hazards in work area.

Never become complacent.

Always look up.

Get weather reports.

14. WEATHER IS GETTING HOTTER AND DRIER

[Handwritten signatures]

CAL FIRE Incident Management Team 3

Robert Michael – Incident Commander

Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Situational Awareness

Observe the 30/30 rule: If you see lightning and hear the thunderclaps following in less than 30 seconds take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open county, crouch low with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, wide open areas, or near ledges or rock outcroppings.
- Don't operate landlines telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

Curtis Brown IMT-3 SOF1

David Sargenti IMT 3 SOF (t)

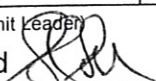

In Readiness Is All

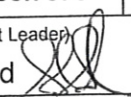

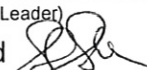

INCIDENT RISK ANALYSIS (ICS 215A)

DIV	HAZARDOUS ACTIONS / CONDITIONS	MITIGATIONS/WARNINGS/REMEDIES	
ALL	FIRE WEATHER WATCH/ THUNDERSTORM	<ul style="list-style-type: none"> • Follow the Thunderstorm Safety Precautions in the IAP. • Anticipate outflow winds and plan accordingly. 	
ALL	BRIEFING	<ul style="list-style-type: none"> • Ensure all personnel are briefed on the plan for the day. • Retain IAP for additional operational periods. • Request additional IAP if needed. 	
ALL	DRIVING HAZARDS/ ROADS	<ul style="list-style-type: none"> • Drive defensively. SLOW DOWN. • Increase following distances on dusty roads. • Slow down when you meet opposing traffic. • Be alert for construction work on Highway 299. • Drive with headlights on. • Be alert for wildlife, heavy trucks, and timber personnel vehicles on the roadways. • Check traffic approaching behind you when making left turns. 	
ALL	FATIGUE	<ul style="list-style-type: none"> • Be alert for signs of fatigue and take breaks as necessary. • Maintain 2:1 work/rest ratio. • Monitor incoming resources for level of fatigue. 	
ALL	HYDRATION	<ul style="list-style-type: none"> • Drinking water before, during and after shifts, up to 1.5 gal. per shift • Be alert for signs of heat stress in yourself and others 	
ALL	SNAGS/ FIRE-WEAKENED TREE HAZARDS	<ul style="list-style-type: none"> • Follow Hazard Tree Safety Guidelines (IRPG p. 20 (RED)). • Many of the trees within the fire area are weakened due to fire activity. • Order Class C fallers order via Division Supervisor. 	
ALL	COMMUNICATIONS	<ul style="list-style-type: none"> • LMU local tone 5 or tone 6 can be utilized to communicate with SIFC if unable to get out on the assigned command frequency. 	
ALL	TRAINS	<ul style="list-style-type: none"> • Stay 100' away from tracks at all times. • Use caution when crossing tracks. LOOK both ways. 	
ALL	MEDICAL TRANSPORT	<ul style="list-style-type: none"> • Assign personnel with Advanced Life Support capability on the line. • Cache emergency equipment (backboards etc.) in various locations on line. • ALS ambulance may be order from SIFC. 	
ALL	MOP UP	<ul style="list-style-type: none"> • Conduct thorough briefing for all personnel (inside rear cover IRPG). • Use all required PPE, including eye protection. • Maintain proper spacing and overhead clearance. • Be alert for stump holes and root cavities. • Minimize exposure to smoke, and rotate personnel into clean air as practical.

KYLE JOHNSON - COML TEAM 3
 Incident Location Lassen Modoc Unit
 Latitude N 41° 13.619 Longitude W -121° 21.740

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

Fire Information Lines

For information on the Day Fire contact:

(530) 638-3614

For all other fires contact the following:

Bald Fire: (530) 336-6553

Eiler Fire: (530) 225-2510

General information on surrounding fires:

(530) 252-6450

FINANCE SECTION

MESSAGE

The Finance Section will be moving !!!

The Time unit will be at Base Camp until approximately 1800 hours on 8/8/14. All hired equipment, please make every attempt to come into the Time Unit as early as possible to assist on getting your docs prepared for your departure.

If for any reason you miss us, we will be relocating on Saturday morning to the Red Lion Hotel in Redding.
1830 Hilltop Drive - (530) 221-8700 / (530) 224-6671-fax

All hired equipment shift tickets are completed and dropped off in the Time Unit by agency personnel / line supervisors only.

Please report all injuries and suppression damage to the Comp / Claims Unit, no matter how minor. For fire suppression damage, please include photos (if possible), a location and a brief description.

Any off site feeding charged to the incident must be pre-approved by the Logistics Section and/or Finance Section Chief. The Motel Tech Spec will have information on this.

ROGER RAINES, FSC1
TERRY EASTWOOD, DEP. FSC1

Training Specialist Message

All Day Incident Trainees and Trainers:
Unless you are otherwise notified, all open training assignments on the Day Incident must be “closed out” with the TNSP by 0900 hours today, Friday, August 8th.

In order to receive documented credit for your training assignment – you must close out with the Training Specialist before you complete the demobilization process.

If as much work as possible has been completed in the position task book, Trainees may close their assignment with the TNSP prior to the demobilization process.

Please bring the following to the “exit interview”

- Your Position Task Book
- A completed and signed ICS 225 or 226 Performance Evaluation*
- A completed Trainee Exit Interview Form*

If you are unable to complete your close-out with the Training Specialist our contact information is below. Please let us know how we can help you even after the incident.

Mike Wink
(707) 889-4225

Rob Scott-Trainee
(949)292-3207
Rob.Scott@lacity.org

TNSP is located in the back of room 16. Please feel free to contact us if you cannot come by in person.

Archaeological and Historic Properties Fireline Guidance for the Day Fire Modoc County, CA

Do not compromise safety for the protection and preservation of archaeological and historic properties. When possible and prudent:

1. Be on the lookout for prehistoric archaeological sites. These sites may include seasonal camps marked by the presence of obsidian and/or basalt flakes and village sites that also include dark midden soils and perhaps circular housepit depressions. The Native American group living in the area at time of historic contact was the Achomawi.
2. Be on the lookout for historic archaeological sites. These sites may include old homesteads now marked by the presence of foundations, wells, and can dumps, early sawmill sites, abandoned ditches, and stacked rock foundation remains.
3. Look for these prehistoric and historic sites in flat areas, especially adjacent to streams and springs.
4. If you observe artifacts, features, or sites attempt to avoid if possible. If you can't avoid, minimize ground disturbance as much as possible, only clearing the surface to as minimal a depth as necessary. Try to go around sites with dozers rather than through them. Flag new sites if possible.
5. If you find artifacts leave them in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
6. Note locations of discovered artifacts, features, and/or sites on a map. Better yet take a GPS reading if possible. Leave information for the archaeologist with the Plans Unit so that the sites can be relocated and protected during Fire Suppression Repair.
7. If you encounter a burial or other human remains, cease work in the area and contact Division immediately.

Fire Suppression Repair

Roads:

- Install waterbars where waterbars previously existed.
- Install new waterbars where needed.
- Install or maintain rolling dips where a rolling dip previously existed.
- Re-establish existing berms where applicable.
- Clean culverts plugged with soil and rock resulting from fire road use.
- Dip out stream crossings and stabilize if filled with dirt.
- Remove all slash and debris from culvert inlets/outlets.
- Water roads for dust abatement.

Hand Lines and Dozer Lines

Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread precipitation run-off to reduce sediment transport and soil erosion. The intent is to move water off the fireline before it can build up enough energy to erode and transport sediment.

Waterbar Guidelines:

These spacing distances should be used as a **guide**. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install waterbars at the following recommended minimum intervals:

<u>% Slope</u>	<u>0-25</u>	<u>26-50</u>	<u>>50</u>
Hand Line	100'	75'	50'
Road /Dozer	150'	75'	50'

INCIDENT MANAGEMENT TEAM 3

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214, IMT3 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Division.
- Review this check list and brief daily.
