

Incident Status Summary (ICS-209)

Incident: **LODGE COMPLEX**

1. Incident Name: LODGE COMPLEX		2. Incident Number: CA-MEU-007202	
3. Report Version: Initial <input checked="" type="checkbox"/> Update Final	4. Incident Commander(s) & Agency or Organization: TODD DERUM	5. Incident Management Organization: Type 1 Team	6. Incident Start Date/Time: Date: 07/30/2014 Time: 0630
7. Current Incident Size or Area Involved: 4600 Acres	8. Percent (%) Contained or Completed: 25 % Percent (%) of Perimeter to be Contained: 100 %	9. Incident Type: Wildfire B. Incident Description: C. Cause: Lightning/Natural	10. Incident Complexity Level: Single <input checked="" type="checkbox"/> Complex Single Command
12. Prepared By: Print Name: Eric Scovel SITL Date/Time Prepared: 08/07/2014 0800		13. Approved By: Print Name: Todd Derum IC Signature: _____	
14. Date/Time Submitted: 08/07/2014 0809		15. Primary Location, Organization, or Agency Sent To: NOPS	
16. State: CA	17. County / Parish / Borough: Mendocino	18. City: Laytonville	
19. Unit or Other:	20. Incident Jurisdiction:	21. Incident Location Ownership: CA-MEU	
22. Latitude/Longitude: Latitude: 39° 46' 6" Longitude: 123° 38' 59"	23. US National Grid Reference: Grid Zone: x-Coordinate: y-Coordinate:	24. Legal Description: Principal Meridian: Mount Diablo Township: 22N Range: 16W Section: 21 1/4 Sec: of 1/4 Sec:	
25. Short Location or Area Description (list all affected areas or a reference point): West of Laytonville			26. UTM Coordinates: Zone: Easting: Northing:
27. Note any electronic geospatial data included or attached (indicate data format, content, and collection time information and labels): IAP and map products are located on the NIFC FTP website			
28. Significant Events for the Time Period Reported (summarize significant progress made, evacuations, incident growth, etc.): Branch IV continued to improve, and plumb lines. Mop up of control lines in Branches I & II. Fire activity last night was subdued and is expected to pick up again, later today.			
29. Primary Fuel Model, or Materials, or Hazards Involved (hazardous chemicals, fuel types, infectious agents, radiation, etc.):			

Incident Status Summary (ICS-209)

Incident: **LODGE COMPLEX**

Fuel Model: Timber (Litter and Understory)				
30. Damage Assessment Information (summarize damage and/or restriction of use or availability to residential or commercial property, natural resources, critical infrastructure and key resources, etc.):	Structural Summary	# Threatened (up to 72 hrs)	# Damaged	# Destroyed
	Single Residences	35	0	0
	Multiple Residences	0	0	0
	Mixed Commercial / Residential	0	0	0
	Nonresidential Commercial Property	0	0	0
	Other Minor Structures	0	0	0

	Potential Future Threat	X
	Mass Notifications in Progress	
	Mass Notifications Completed	
	No Evacuation(s) Imminent	
	Planning for Evacuation	X
	Planning for Shelter-in-Place	X
	Evacuation(s) in Progress	
	Shelter-in-Place in Progress	

Incident Status Summary (ICS-209)

Incident: **LODGE COMPLEX**

		Active?
	Repopulation in Progress	
	Mass Immunization in Progress	
	Mass Immunization Complete	
	Quarantine in Progress	
	Area Restriction in Effect	

36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes:

12 hours: The fire continues to move in a northely direction and spreading out eastward. As Alpha strike teams arrive they will be utilized to assess and prep houses in the area and construct lines. Porta tanks are being set up and hoselays are being plumbed into the divisions. Evacuation warnings may be in effect sometime today to the areas of Dann Valley, Little Dan Creek, Cedar Flat, Cummings/Little Red Mountain, Tan Oak Park, Hermitage, Big Bend and Grizzly Creek. Lines continue to be scouted and assesed in the northern area of the fire to button up line construction.

24 hours: Tentative plans in Branch II include completing the firing operations. This will bring fire from DP 10 to the Low Gap area. As crews arrive they will be given work assignments based on the priorities set by operations.

48 hours: Crews will continue to prep lines and plumb with hoselays and porta tanks. Firing operations will continue to secure areas of the fire perimeter.

72 hours: The fire has potential to be pushed eastward along a south facing slope if all the weather conditions are in alignment. This would allow the fire to have a long, strong run toward the dozerline. The fuels along this ridge are brushy and create spotting conditions . This run could continue to Hwy 101. Repeaters, located atop of Cahto Mountain, consists of Verizon, CHP, AT&T, Cal Fire and multiple others could be threatened by the fire.

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):
100% CONTAINMENT

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

12 hours: Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

24 hours: Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

48 hours: Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor.

72 hours: Commercial timberland, logging operations and equipment; designated wilderness area, Angelo Coast Elder Creek Reserve, threatened and endangered species including the Spotted Owl, Marbled Murrelet and various plants, designated wild & scenic Eel River Corridor, the town of Laytonville, South Leggett and Hwy 101, repeaters, located atop of Cahto Mountain, consisting of Laytonville Fire Tower, PG&E lines, Grain Tower, BLM Building, UC Weather Station, UNAVCO Seismic Station, Cal Fire Lookout, 101 Netlink Tower, Cal Fire Tower,

Incident Status Summary (ICS-209)

Incident: **LODGE COMPLEX**

Verizon Tower, AT&T Building & Antennas	
Anticipated after 72 hours:	
39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:	
12 hours:	To assist in meeting the Incident Objectives a portable retardant plant and 4 type I helicopters are required. 2 type I strike teams of engines for line construction and firing operations support; 5 type III strike teams of engines for line construction and firing operation support; 12 strike teams of handcrews any type for line construction and firing operation support; 1 dozer; 6 water tenders; 3 DIVS; 4 SOFR; 3 FEMP; 5 HEQB; 1 FALC; 1 READ.
24 hours:	To assist in meeting the Incident Objectives a portable retardant plant and 4 type I helicopters are required. 2 type I strike teams of engines for line construction and firing operations support; 5 type III strike teams of engines for line construction and firing operation support; 12 strike teams of type I crews for line construction and firing operation support; 1 type 2 crew for mop-up; 1 dozer; 6 water tenders; 3 DIVS; 4 SOFR; 3 FEMP; 5 HEQB; 1 FALC; 1 READ.
48 hours:	10 type III strike teams of engines for support of firing operations and line construction; 6 type I strike teams of engines for line construction and firing operations support; 2 type V strike teams of engines patrol and support of firing operations in areas with narrow roads; 12 strike teams of crews any type for line construction and firing operation support; 5 dozers; 5 water tenders; 1 Branch Dir; 3 DIVS; 3 SOFR; 1 FEMP; 5 HEQB; 1 C faller
72 hours:	15 type III strike teams of engines for support of firing operations and line construction; 6 type I strike teams of engines for line construction and firing operations support; 2 type V strike teams of engines patrol and support of firing operations in areas with narrow roads; 12 strike teams of crews any type for line construction and firing operation support; 5 dozers; 5 water tenders; 1 Branch Dir; 3 DIVS; 3 SOFR; 1 FEMP; 5 HEQB; 1 C faller
Anticipated after 72 hours:	
40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to: 1) critical resource needs identified above, 2) the Incident Action Plan and management objectives and targets, 3) anticipated results.	
The above resources are necessary to ensure safe operations. The remote location of this fire in the BLM Wilderness Area, is in extremely steep terrain and heavy fuels, is a contributing factor for the resource request. All containment lines must be scouted and reviewed prior to construction. Additional resources are needed to fully staff fire. Currently some divisions are unstaffed due to lack of resources. Some fireline personnel are working in multiple ICS roles. Crews will continue to construct, prep fireline and plumb with hoselays as directed. Line construction will continue in Div L and Div M to tie in to the Eel River. Crews will prep and hold line from Low Gap Creek to Little Low Gap Creek. Line construction continues from Div. N/P to the Eel River. Drive time from ICP to DP 10 is 2 hours. 2 New divisions have been added to the fire, M&Z.	
41. Planned Actions for Next Operational Period: Continue to construct direct handline when possible, indirect line as planned. Improve existing lines. Building of contingency lines continues and secondary contingency lines are being scouted and identified. Complete line construction from DP 10 to the Eel River. Construct line from the Eel River to the M/L Break. Continue to construct and prep line from Div. N/P Break to the Eel River and plumb the line with hose. Prep line from 10-Mile Creek to Horseshoe Bend and prep structures for defense in Division Y. Crews will be prepping and clearing the Towers and Repeater sites on Cahto Peak. Crews will also be prepping structures for Structure Defense from Tan Oak Park to DP-9.	
42. Projected Final Incident Size/Area: 14,000	
43. Anticipated Incident Containment or Completion Date: 08/20/2014	
44. Projected Significant Resource Demobilization Start Date: 08/15/2014	
45. Estimated Incident Costs to Date: \$7,043,531.00	

Incident Status Summary (ICS-209)

Incident: **LODGE COMPLEX**

46. Projected Final Incident Cost Estimate: **\$18,000,000.00**

47. Remarks (or continuation of any blocks above – list block number in notation):

ICP located in Laytonville. Fire spread continues to be a threat to numerous high profile areas including the conservancy owned and operated by UC Berkeley, which includes USGS Hydrologic Bench Mark Stream for stream monitoring purposes. It is also a critical zone observatory. UC Berkeley is utilizing a \$5 million grant for continued studies in this area. BLM has numerous threatened and endangered species in this area, including a designated Wilderness Area and a Wild & Scenic River Corridor.

Energy Release Components (ERC) are historic high levels. Handlines are the primary control line which is hampered by the steep terrain, potential for rolling debris to ignite fuels below working crews, and high temperatures. The average slope is 70%.

Additional resources have been arriving and has helped achieve short term goals. Drift smoke from the fire has been settling in the Ukiah Valley and could create potential health and economic impacts, including vineyards and pear orchards.

In order to meet Lodge Complex objectives, the incident is willing to trade helicopters that are capable of using a portable retardant plant.

An evacuation warning may be issued to Dann Valley, Little Dan Creek, Cedar Flat, Cummings/Little Red Mountain, Tan Oak Park, Hermitage, Big Bend, and Grizzly Creek areas.

All times represented are in Central Standard Time (CST) unless otherwise noted.

Incident Name	Suppression Strategy	Size	MMA	Cost to Date
LODGE COMPLEX	Full Suppression	4,600	25 %	\$7,043,531.00
