

# Lodge Complex

CA-MEU-007202

OPERATIONAL PERIOD

Wednesday August 13<sup>th</sup> 0700 to  
Thursday August 14<sup>th</sup> 0700

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> Lodge Complex	<b>2. DATE</b> 8/12/14	<b>3. TIME</b> 2000																				
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> 8/13/13 – 8/14/14                      0700-0700																							
<b>5. MANAGEMENT OBJECTIVES</b> <ul style="list-style-type: none"> <li>• Provide for and maintain public and firefighter safety by utilizing the incident safety analysis process.</li> <li>• Protect the natural and cultural resources values at risk.</li> <li>• Be financially responsible for all management and fire suppression tactics.</li> <li>• Foster and enhance community, political, and economic relationships.</li> </ul> <b>6. GENERAL CONTROL OBJECTIVES</b> <ul style="list-style-type: none"> <li>• Keep fire South of the Big Bend of the Eel River.</li> <li>• Keep fire North of Lincoln Ridge.</li> <li>• Keep fire West of Elk Creek.</li> <li>• Keep fire East of Hollow Tree Creek.</li> <li>• Branch III – hold fire within current control lines.</li> </ul>																							
<b>7. WEATHER FORECAST FOR OPERATIONAL PERIOD</b> A low pressure area will sweep east along the Oregon border. The associated frontal boundary will bring an increase in winds aloft with continued cool temperatures and a more moist airmass.																							
<b>8. GENERAL SAFETY MESSAGE</b> General Health. Fatigue may compromise safety. Be on the lookout for signs of exhaustion. Demob. Accidents can happen during Demob. Maintain situational awareness. Hunters. Deer season is open in the general fire area. Hunters may be in the area.

<b>10. PREPARED BY (PLANNING SECTION CHIEF)</b> Chris Burch (T) 		<b>11. APPROVED BY (INCIDENT COMMANDER)</b> 																					

<b>ORGANIZATION ASSIGNMENT LIST</b>	
1. Incident Name <b>Lodge Complex</b>	
2. Date <b>8/12/14</b>	3. Time <b>2100</b>
4. Operational Period <b>8/13/14- 8/14/14 0700-0700</b>	
<b>Position</b>	<b>Name</b>
5. Incident Commander and Staff	
Incident Commander	T. Derum / J. Veik (T) / D. Russell (T)
Deputy	Phil Matteson
Safety Officer	B. Stangeland / J. Piccini (T)
Information Officer	Steve Kaufmann
Liaison Officer	T. Roberts / J. Rothlein (T) / T. Howard (T) / K. Knopf (T)
6. Agency Representative	
Cahto Tribal Chair	Richard Smith
Mendocino Sheriff	Thomas Allman
Mendocino Unit	Norm Brown
CAL OES	John Salvate
LAC	Steve Olson
DFW	Steve White
CDCR	Roy Ulatan
BLM	Tim Jones
USFS	David Austin
7. Planning Section	
Chief	C. Burch (T) / T. Person (T)
Resources Unit	J. Martin / J. Serna / D. Arbgast (T) / P. Pumarejo (T) / J. Pangburn (T)
Situation Unit	E. Scovel / D. Fowler (T)
Documentation Unit	A. Mendoza/ R. Horvat (T)
Demobilization Unit	TJ McGovern / C. Durrance (T) / A. Klem (T)
Technical Specialists	
Crew Tech	J. Gutierrez / U. Moua / J. Johnson
Fire Suppression Repair	Tim Henry
Training	R. Karlen / C. Barden (T)
GIS	D. Dresselhaus / F. Postler / S. Osenton (T)
FBAN	D. Boursier / R. Henault (T)
Archaeologist	Chuck Whatford
8. Logistics Section	
Chief	B. Wood / R. Reynolds (T)
Deputy	Jim Crawford
Hired Equipment	L. Nielson / N. Daniel (T)
Supply Unit	Matt Brandt
Facilities Unit	B. Ellis / G. Randar (T)
Ground Support Unit	Doug Freeman
Communications Unit	Austin Browne
Motel Coordinator	C. Miller / T. Brady
Medical Unit	D. Nelson / A. Mendoza (T)
Food Unit	Richard Rivers

9. Operations		
Chief	M. Brown / (Day Ops) / B. Weiser (Night Ops)	
Deputy	Scott Lindgren / G. Gonzalez (T)	
A. Branch I- Division/Groups		
Branch Director		
Deputy		
Division/Group	A / D / G

# FIRE BEHAVIOR FORECAST

FORECAST NUMBER 12	TYPE OF FIRE: Wildfire
FIRE NAME Lodge Complex	OPERATIONAL PERIOD 8-13-14 (24 HR SHIFT)
DATE ISSUED 8-12-2014	TIME ISSUED 1900 HOURS
UNIT CALFIRE Mendocino Unit	SIGNED Renee Henault FBAN (T)

## INPUTS

**WEATHER SUMMARY \*\*\* Continued cool, expect general winds to shift from SW to NW as front passes\*\*\***

**Wednesday:** High temps 73-81 degrees; **Min RH:** 25-30%

**Winds:** Ridge top: SW 3-6 Gusts to 14 until noon, then W/NW 4-8 Gusts to 14 until sundown.

Slope/valley: Up slope terrain driven until 1100, then up valley 3-6 Gusts to 10

**Wednesday Night:** Low temps: 53-65 **Max RH:** 70-85% valleys, 50-65% ridges upper slopes

**Winds:** Ridge top: E/SE 2-4 Gusts to 8 until 0700.

Slope/valley: Down slope/down valley 2-4 1900-0700

**LAL: 1**

## OUTPUTS

### FIRE BEHAVIOR

#### GENERAL

**\*\*Occasional short runs possible in green islands\*\***

**Fine Dead Fuel Moisture Predicted:** 5% Unshaded, 8% Shaded

**Live Fuel Moisture=** CHAMISE (50-60%) MANZANITA (75-80%) \*both critical\*

**Probability of Ignition =** 40% Shaded fuels, 70% Unshaded.

**Spotting Distance=** 1/4 mile

**Forecast ERC:** 61 ~90<sup>th</sup> percentile

**Forecast Burning Index:** 64

- Expect backing surface fire in timber understory.
- Surface fire in the brush with transition to canopy possible when winds align with slope. *Group torching and short runs possible with torching Max flame lengths up to 75' and 120 ch/hr.*
- **Surface fire transition to crown possible when *sustained* eye level winds within the fuel sheltering are greater than 6mph.**

#### SPECIFIC

##### Branch II

Favorable NW winds contribute to slow, backing fire behavior toward the north into Little Low Gap Creek and the Eel River.

##### Branch IV **\*\*Anticipate increased fire behavior as burnout operations merge with main fire\*\***

Re-burn potential exists in areas where fire intensity was not adequate to consume the over story. Winds may align with drainages and ignite these areas. Spotting and rollout will continue to challenge crews sending embers up to **¼ a mile**.

Terrain dominates the diurnal wind flow within the Eel River Drainage, NW flow aloft may combine and enhance canyon flow towards Horseshoe bend.

Location / Fuel Type	Max Flame Length	Max Rate of spread	Spotting	Probability of Ignition
All Divisions: Timber-Shrub	< 10'	<13 ch/hr	¼ mi	50-70%
Divisions K,L,M,N Moderate Load Timber Litter	< 6'	<11 ch/hr	¼ mi	50-70%
Mid-slopes Broadleaf Litter	< 2'	<2 ch/hr	¼ mi	50-70%
Upper slopes/Isolated patches- Brush	<20	<75 ch/hr	¼ mi	50-70%

#### AIR OPERATIONS:

Inversion over the fire area until 1200 below 1000' AGL. Afternoon NW winds may impact visibility at the helibase.

Mixing height 7000' AGL

### SAFETY

**Be alert for re-burn potential in areas where canopy has been scorched/pre-heated.**

## COMPLACENCY

**CAUSES OF COMPLACENCY CAN COME FROM DIFFERENT DIRECTIONS  
DON'T GET COMPLACENT!**

**Now is when some personnel may begin to forget the basics**

- Cooler temperatures and the lack of active fire may cause complacency.
- Patrol and mop-up can seem 'routine' causing you to let your guard down.
- Many accidents occur during the wind down of an incident – this is not the time to get hurt.

**Mitigation- Situational Awareness, Situational Awareness, Situational Awareness!**

- Keep your head in the game!
- Identify those things that may be causing you to become complacent.
- Coach members of your team and take care of one another.

## FATIGUE

**FATIGUE MAY COMPROMISE SAFETY!**

**Be on the lookout for signs of fatigue – look out for one another - Look For:**

- Chronic feelings of exhaustion, feeling "spacey."
- Impaired decision-making and judgment • Low motivation • Moodiness.
- An inability to pay attention and short-term memory problems, confusion.
- Slowed reflexes and responses.

**Mitigation – Proper nutrition reduces fatigue**

- Eat foods, which provide steady energy • limit sugary, fatty, fried foods.
- Hydrate - proper hydration prevents fatigue.
- Manage work rest ratio while performing work.
- Take full advantage of time off line to rest.

## DEMOB

**ACCIDENTS CAN HAPPEN DURING DEMOB**

**Be on the lookout for vehicle and pedestrian congestion**

- Vehicles will be moving in tight areas around Ground Support and parking areas.
- Increased backing and maneuvering of vehicles in tight spots.
- Crews may be in a hurry to leave the incident due to reassignment.

**Mitigation- Maintain high levels of situational awareness through the demob process.**

- Provide back-up and spotter personnel - more than one may be required
- Drive safely and be on the lookout for ICP pedestrian traffic
- Drive safely and monitor fatigue when traveling to home unit or new incident.

**Jack Piccinini**

  
**SAFETY OFFICER**

**8. MEDICAL EMERGENCY PROCEDURES**

**EMERGENCY FREQUENCY: CALCORD**

**LINE EMERGENCY:**

Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  1. Closest EMS resource
  2. Communications Unit
- Communications Unit contacts:
  1. Ground or Air ambulance as requested
  2. Operations
  3. Safety
  4. Medical Unit (707) 984-6925
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  1. A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

**CAMP EMERGENCY:**

Contact Medical Unit on CALCORD with patient complaint/condition and location. Medical Staff will respond to stabilize incident:

- Medical Unit contacts:
  1. Communications
  2. Safety
  3. Logistics
  4. Operations
  5. Crew Supervisor
  6. Comps/Claims

**Immediate Need Firing Operation Checklist**

**GO / NO GO CHECKLIST**

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified
  
- APPROVAL / NOTIFICATION(S) PRIOR TO FIRING

0044.4.1 V2

**Personnel Briefing**

- Objectives
- Conditions
  - Weather
  - Fuel
  - Burn window
- Resource assignments
  - Firing personnel
  - Holding forces
  - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues
  - Escape routes and safety zones

**\* ALL FIRING OPERATIONS WILL UTILIZE THIS CHECKLIST AND OBTAIN PRIOR APPROVAL FROM OPERATIONS THROUGH THE APPROPRIATE BRANCH DIRECTOR AND DIVISION SUPERVISOR.**

**Location:** \_\_\_\_\_

**Date:** \_\_\_\_\_ **Time:** \_\_\_\_\_

**Firing Supervisor:** \_\_\_\_\_

# FIRE SUPPRESSION REPAIR PLAN

## LODGE COMPLEX: CA-MEU-007202 8/13/2014

Fire Suppression Repair is the repair of damage caused directly from fire suppression activities. It is not the repair of areas damaged by the fire activity itself such as burned material and secondary damage such as falling trees or erosion from hydrophobic soils. We are responsible for repairing only the damage caused by *fighting* the fire. We are also not responsible for upgrading facilities beyond their pre-fire condition.

### Instructions for suppression repair during mop-up

Dozer operators will install waterbreaks (waterbars) on all dozer lines as well as secondary access roads while performing mop-up operations. *Dozer lines amongst the structures* shall have the berms pulled and waterbreaks installed where necessary with hand crews to minimize the impacts on residents. Hand crews will install waterbreaks on all handlines.

Scattered trash shall be collected and deposited in trash piles. Trash piles will be removed and placed at drop points either before or while hose lays are collected. Police your areas and clean them up as events wind down.

### Inventory and Mapping

Suppression overhead and other personnel will document rehabilitation needs and their location. This information will be given to the Fire Suppression Repair Group. **GREEN** flagging will be used to designate areas in need of repair. The type of repair/instructions will be written directly on the green flagging for ease of use.

### Objectives

- Install waterbreaks while crews and dozers are actively onsite on roads, trails, and handlines damaged by fire suppression. Waterbreaks shall have proper angle and open outlets to insure effective drainage.
- Repair damaged fences (remember, those portions damaged by suppression efforts, not by the fire itself).
- Restore barriers on roads that were previously abandoned but opened for suppression activities.
- Insure that drainage is provided at crossings, ditch drains, remove deposited material, and stabilize approaches.
- Report any damages or damages mitigated to the Fire Suppression Repair Unit leader.
- Complete all repair work prior to final demobilization.

### Firelines/Existing Fuelbreaks/Staging Areas/Safety Zones/Heliports/Drop Points

- Remove debris deposited during suppression activities, including flagging and signs.
- Install waterbreaks.
- Pull berms back onto disturbed areas, except in areas identified as needing a berm to serve as a barrier for roads/trails.
- On Federal land, spread brush across the disturbed areas to provide ground cover and a seed source.
- On Federal land, masticators/excavators/dozers with brush rakes will be utilized on existing fuelbreaks utilized during suppression efforts to reduce any excessive fuel loading within a WUI Threat or Defense Zone.

### Roads

- Clean culverts and drainage facilities plugged with soil and debris deposited during suppression activities.
- Re-establish cross drains and drainage if removed or made inoperable by suppression activities. Use cut brush – if available and nearby – to block off potential OHV access. On Federal land, break up piles and scatter brush over the fireline.
- Remove outboard berms created during suppression activities and incorporate into road surface.

### Watercourses

- All slash, soil and debris deposited into watercourses during suppression activities shall be removed.
- All loose soil must be pulled away from the watercourse and stabilized (graded smooth, and slash packed for cover).
- If excavated, the stream channel will be wider than the natural channel and set to natural grade. The approaches to the crossing will be sloped back to prevent future stream bank failure.

**Archaeological or Historic Sites** – Notify incident Archaeologist and Fire Suppression Repair Group.

### Waterbreak/Waterbar/Cross Drain spacing

Line or Road Gradient (%)	0-10%	11-25%	26-50%	>50%
Spacing	200'	100'	75'	50' (25' on Federal land)

Waterbreaks shall be cut diagonally with a minimum depth of 6" into existing grade with a 12" berm for a minimum height of 18". Waterbreaks will be installed at a 30-45 degree angle. Outlets shall be open and directed into non-erodible material.

### Conflicts with Suppression Activities

Postpone repair activities that hamper access or other suppression actions. The location of needed repair actions shall be noted and relayed to the Fire Suppression Repair Group. **DO NOT** compromise fire lines by spreading flammable material across them.

# DEMOB

LODGE COMPLEX  
CA – MEU – 007202

- Resources report to Demob trailer at the times posted on the tentative demob list which is posted around the Incident Base.
- Resources will get signatures from the following units prior to departing incident base:
  - Motels
  - Supply
  - Training (If they have a trainee)
  - Communications
  - Saw Shop
  - Documentation
  - Time
- Resources will then report to Howard Forest Training Center for ground support inspection.
- Once completed with ground support and the ICS #221 has been given to the demob representative at Howard Forest, resources then are approved to continue to reassignment or released back to home unit.

## **TRAINING SPECIALIST MESSAGE**

**Wednesday August 13, at 1200 is the deadline for opening an active training assignment with the Training Specialist on this incident.**

**Trainees who have not previously checked in with the TNSP should do so immediately.**

### ***Beat the Rush!!***

**Trainer / Evaluators/Trainees:, you are strongly encouraged to take advantage of your time in camp and conduct the training close-out with the TNSP. It is not necessary to wait until demob!**

**Chris Barden 951-818-8578  
Training Specialist**

# Attention

# Crews !!

All Cal Fire Crews have been scheduled for an R & R day over the next 7-10 day period. Please follow the schedule to ensure that all crews are afforded a rest period per Chief Pimlott's directive . Any questions please come see the Crew Tech in the Resource trailer or Contact at.

# CAL FIRE

## WATER USAGE PLAN

### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

#### **Fireline personnel-** (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

#### **Aviation Operations-**

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
