

Lodge Complex

CA-MEU-007202

OPERATIONAL PERIOD

Tuesday August 19th 0700 to
Friday August 22th 0700

INCIDENT OBJECTIVES	1. INCIDENT NAME Lodge Complex	2. DATE 8/18/14	3. TIME 1000
----------------------------	--	---------------------------	------------------------

4. OPERATIONAL PERIOD (DATE/TIME)
8/19/14 – 8/22/14 0700-0700

- 5. MANAGEMENT OBJECTIVES**
- Provide for and maintain public and firefighter safety by utilizing the incident safety analysis process.
 - Protect the natural and cultural resources values at risk.
 - Be financially responsible for all management and fire suppression tactics.
 - Foster and enhance community, political, and economic relationships.
- 6. GENERAL CONTROL OBJECTIVES**
- Keep the fire within the current control lines.

7. WEATHER FORECAST FOR OPERATIONAL PERIOD
Low pressure will slowly move south down the coast on Tuesday, however enough moisture and instability will remain over the region for a continued threat of isolated thunderstorms. Winds aloft will remain weak with terrain and slope winds dominating. Little day to day change in temperature and relative humidity is expected with moderate overnight recoveries. A dry weather pattern will setup for Wednesday and Thursday.

8. GENERAL SAFETY MESSAGE
Driving is one of the most hazardous things we do. To be a safe driver you have to want to be one. School is back in session. Be alert for pedestrians. Hunters will be in the area. Mop-Up. Several minor injuries and near-miss incident have occurred during mop-up.

INCIDENT Weather Forecast

FORECAST NO: 18

NAME OF FIRE: Lodge Complex

PREDICTION FOR: 3 Day Outlook

UNIT: CAL FIRE MEU

SHIFT DATE: 8/19/14 – 8/21/14 (0700-0700)

SIGNED: Jim Dudley (T) Christian Cassell
Incident Meteorologist

TIME AND DATE

FORECAST ISSUED: 8/17/14 @ 1800

WEATHER DISCUSSION: Low pressure will slowly move south down the coast on Tuesday however enough moisture and instability will remain over the region for a continued threat of isolated thunderstorms. Winds aloft will remain weak with terrain and slope winds dominating. Little day to day change in temperature and relative humidity is expected with moderate overnight recoveries. A dry weather pattern will set up for Wednesday and Thursday.

OUTLOOK FOR TUESDAY: Partly Cloudy with a 15 percent chance of thunderstorms. Highs: 85-94...except 80-86 ridgetops. Lows: 56-65...except 63-69 ridgetops. Min RH: 18 to 26%. Max RH: 55-75%. Ridgetop winds: West to Northwest 5-9 MPH Gusts 13 MPH. Slope/Valley winds: typical diurnal winds. Winds strong and erratic in direction LAL: 2. CWR: 10%

EXTENDED FORECAST: WEDNESDAY AND THURSDAY

Wednesday: Mostly Clear. Highs: 87-94...except 81-87 ridgetops. Lows: 55-65...except 62-67 ridgetops. Min RH: 19-25%. Max RH: 52-75%. Ridgetop winds: South to Southwest 4 to 7 MPH Gusts 11 MPH. Slope/Valley winds: typical diurnal winds.

Thursday: Mostly clear. Highs: 85-93...except 80-86 ridgetops. Lows: 55-65...except 62-67 ridgetops. Min RH: 18-26%. Max RH: 51-75%. Ridgetop winds: Southwest to West 4 to 9 MPH Gust 13 MPH. Slope/Valley winds: typical diurnal winds.

FIRE BEHAVIOR OUTLOOK

FIRE NAME: LODGE	OUTLOOK PERIOD (valid time period): 8/19-8/21/2014
DATE ISSUED: August 18, 2014	TIME ISSUED: 1200
UNIT: MEU	SIGNED:
Typed/printed : R. Henault, FBAN(T)	

WEATHER/CLIMATOLOGY DISCUSSION: Sunny, warm and dry. An upper level trough passed over the west coast yesterday with periodic changes in stability. No significant wind events are forecasted following the frontal passage. Predominantly light southwesterly ridge top winds. Terrain driven winds will be the rule.

Tue: Max. Temps. 82-95 degrees, Min. RH 18-26%, Winds W to NW 5-9 mph gusts to 13 mph.
 Weds: Max. Temps. 87-94 degrees, Min. RH 19-25%, Winds S to SW 4-7 mph gusts to 11 mph
 Thur: Max. Temps. 85-93 degrees, Min. RH 18-26%, Winds SW to W 4-9 mph gusts to 13 mph

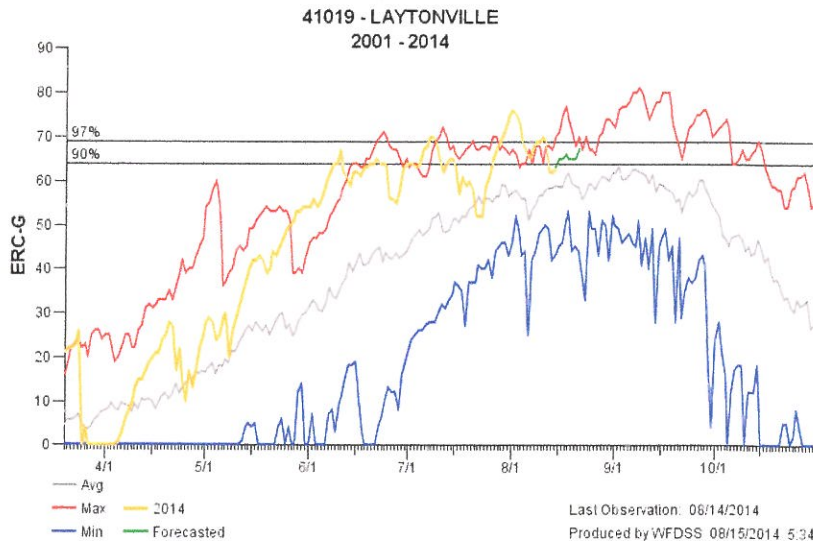

FIRE BEHAVIOR DISCUSSION (Peak Burn Period Extremes):

Location / Fuel Type	Max Flame Length	Max Rate of spread	Spotting	Probability of Ignition
All Divisions Timber-Shrub	< 10'	<13 ch/hr	¼ - ½ mile	60-90%
Divisions K,L,M,N Moderate Load Timber Litter	< 6'	<11 ch/hr	¼ - ½ mile	60-90%
Mid-slopes Broadleaf Litter	< 2'	<2 ch/hr	¼ - ½ mile	60-90%
Upper slopes/Isolated patches- Brush	<20	<75 ch/hr	¼ - ½ mile	60-90%

Short Range (Today, Tomorrow) and Medium Range (3-7 Days):

**** Assumes 60% slope to reflect canyon potential ****

Significant probability for large fire development. Associated with warm and dry weather, increasing ERCs (>90th %) with light to moderate winds and excessively dry fuels for this time of season. Fires are predominately fuels and topography dominated. Fire size may exceed initial attack capabilities in the first operational period; especially with wind and slope alignment. Tactical priorities should focus on direct attack at the heel and working the flanks. Holding the fire to the ridgelines may be challenging without sufficient air support. Spotting will be prevalent and may be up to ½ mile. Vegetation that has an age class of 15 years or greater should be identified to support larger fire growth and containment challenges.

Smoke Concerns: Morning inversions will trap smoke within deep drainages. Marine layers can enhance this effect.
Reassessment Criteria: Changing weather and conditions past the August 21 expiration date of this forecast.

SAFETY

Expect fire activity with high resistance to control- fuels will ignite easier, and have increased spread rates.
 You may need to adjust normal strategies and tactics!!

SAFETY MESSAGE

“LODGE COMPLEX”

CA-MEU-007202 August 19-21, 2014 0700-0700

DRIVING

Awareness – Driving is one of the most hazardous things we do.

Practice situational awareness; be aware of what is happening in front, behind, and on both sides of your vehicle.

Mitigation –

- Take a good hard look at your driving habits. Are you training yourself to do the right things the right way, like fastening your seat belt, checking your mirrors, and maintaining safe following distances?
- Inattentiveness is a major contributing factor in motor vehicle accidents within the Wildland firefighting community. Since the average adult attention span is 15-20 minutes we must develop techniques that allow us to refocus our attention on our driving.
- Many things can lure our attention away from our driving such as: fatigue, eating and drinking, reading directions and maps, writing, cell phone and radio use, conversation within the vehicle and music.

SCHOOL IS IN SESSION

Be alert for pedestrians!

Mitigation – Keep speeds slow enough that you can come to a complete stop

- We are guests in this community - look out for others.
- Expect the unexpected in kids actions.
- Keep speeds appropriate for the roadways.

HUNTERS

DEER SEASON IS OPEN IN THE GENERAL FIRE AREA – HUNTERS MAY BE IN THE AREA

- Watch out for hunters hiking or traversing the area
- Alert supervisors of hunters in the area
- Make notifications for appropriate Law Enforcement response if needed

MOP-UP AWARENESS

Awareness – Several minor injuries and near-miss incidents have occurred to firefighting personnel performing mop-up operations on this incident.

Mitigation – Maintain your Situational Awareness while on your assignment and ensure you are wearing your full PPE

- Stump holes can be very deep and hold heat for an extended period of time.
- Keep reassessing the trees in the area you are working for potential fall hazards and utilize fallers as needed.
- Ensure your crews are wearing full PPE.

CAL FIRE Safety Communication 2014-03

Monitoring Fatigue

CAL FIRE's Safety Program recognizes our personnel have experienced a high level of physical and mental fatigue during this wildland fire season. The arduous work often involves long and irregular work shifts, lack of sleep and/or quality sleep, improper nutrition and unpredictable and stressful events. Fatigue and stress can decrease situational awareness which in turn increases the risk of injury, and accidents.

- Allow enough time to sleep after work shifts and on days off.
- Avoid strenuous activities on your rest days and allow your body to recover for the next shift.
- Avoid heavy meals late at night, especially before going to sleep.
- Reduce the intake of sugar, caffeine and other stimulants (Energy Drinks etc.) particularly the hours before sleeping.
- Ensure fluid and nutritional needs are met, and work/rest cycles are implemented to prevent unnecessary fatigue among both firefighters, fire managers, contractors and non-uniformed personnel.

Injuries:

CAL FIRE personnel are exposed to a variety of hazards placing them at risk of injuries while on duty, or on Rest and Rehab. Through CAL FIRE's network of Safety Officers, we have identified a few trends listed below.

- Slips, Trips and Falls (Causing Sprains and Strains; CAL FIRE's # 1 injury)
- Burns from radiant heat and thermal heat contact (Stump Holes, Fireline Operations)
- Lacerations from tools and equipment (Chain Saws, Axes, Pulaski's)
- Falling objects (Fire Weakened Trees, Unstable Structure Components)
- Reactions from plants and insects (Poison Oak, Sumac, Ticks, Yellow Jackets)
- Vehicle accident injuries

Reducing Injuries:

- Communicate potential hazards to personnel along with, mitigation, avoidance, and reporting unsafe conditions (Safety Briefings, Tailgate Safety Sessions)
- Ensure firefighters receive training on safe response to and from emergencies and to always be aware of the potential to be caught in a hazardous condition
- Review and enforce standard operating procedures for operating motor vehicles and wearing seat belts (Restraints, Defensive Driving)
- Inspect and train on the proper use and limitations of personal protective equipment
- Report all injuries and illnesses to appropriate supervisors for proper reporting

Below is a link to "Six Minutes for Safety." Please use these documents for the purposes of discussion, Tailgate Safety Sessions, and provide appropriate documentation using a IIPP-6 at an incident or at the local level.

REMINDER

**Due to Water
rationing,**

**No water can be
taken from the City
of Willits!**

**This includes
hydrant usage.**

Thank You, Lodge IC

CAL FIRE

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
