

LODGE COMPLEX

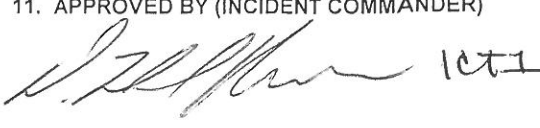

CORRECTED

CA-MEU-007202

OPERATIONAL PERIOD

AUGUST 4TH 0700 TO
AUGUST 5TH 0700

INCIDENT OBJECTIVES	1. INCIDENT NAME Lodge Complex	2. DATE 8/3/14	3. TIME 2000																				
4. OPERATIONAL PERIOD (DATE/TIME) 8/4/13 – 8/5/14 0700-0700																							
5. MANAGEMENT OBJECTIVES <ul style="list-style-type: none"> • Provide for and maintain public and firefighter safety by utilizing the incident safety analysis process. • Protect the natural and cultural resources values at risk. • Be financially responsible for all management and fire suppression tactics. • Foster and enhance community, political, and economic relationships. 6. GENERAL CONTROL OBJECTIVES <ul style="list-style-type: none"> • Keep fire South of the Big Bend of the Eel River. • Keep fire North of Lincoln Ridge. • Keep fire West of Elk Creek. • Keep fire East of Hollow Tree Creek. • Branch III – hold fire within current control lines. 																							
7. WEATHER FORECAST FOR OPERATIONAL PERIOD A weak, upper level disturbance will move east of the area through the operational period. This system will bring an increase in mid-level moisture that will result in partly cloudy skies. Temperatures will be cooler and relative humidity will be higher.																							
8. GENERAL SAFETY MESSAGE Poor visibility, narrow roadways and steep terrain all align for dangerous driving conditions. Lookout for topography driven fire conditions, loose rocks and boulders. Watch for snags.																							
9. FIRE BEHAVIOR FORECAST

FORECAST NUMBER 3	TYPE OF FIRE Surface/Individual and Group Torching
FIRE NAME Lodge Complex	OPERATIONAL PERIOD 8-4-14 24 HOUR SHIFT
DATE ISSUED 8-3-2014	TIME ISSUED 1900 HOURS
UNIT CALFIRE Mendocino Unit	SIGNED Jon Heggie FBAN (T) 

INPUTS

WEATHER SUMMARY

A slight cooling trend will bring a slight change in conditions to the incident. We will see a weak disturbance move in from the south bringing some moisture and instability to the area. This will result in less of an inversion helping with visibility but will also bring winds that have not yet been experienced on the incident. *SEE INCIDENT*

METEOROLOGIST FORECAST

OUTPUTS

FIRE BEHAVIOR

GENERAL

Probability of Ignition = 60%. (Lowers to 20% after sunset)

Spotting Distance= 1/3 mile

Fine Dead Fuel Moisture = 6-7% Energy Release Component in Timber Fuels are at 97th percentile levels or above.

Live Fuel Moisture= CHAMISE (50-60%) MANZANITA (75-80%)

The fire area has no fire history in the last 50 years and no known thinning or fuel modification. The fire is mostly a terrain driven fire with consumption of the timber understory with single tree or small group torching.

SPECIFIC

Branch I

Fuels remain at critical levels and rollout in steep terrain will continue to test personnel. Slope reversal runs will have the potential to push toward proposed containment lines. Look for increased winds from the south that may take advantage of slope/wind alignment. Watch for established fire west of DP1 to impact crews working on any indirect line to the north. Spotting from torching trees may carry embers across drainages and put unburned fuel between crews and safety zones. Expect rates of spread up hill to exceed **20 ch/h** and have up to **10ft** flame lengths. The fire has not yet been affected by any substantial wind until today's operation so maintain situational awareness with a changing fire environment.

Branch II

Low Gap Creek is in alignment with the predicted wind and will provide a path for the fire to make moderate runs to the north. Crews working on indirect line need keep a lookout toward the main fire to ensure they have enough reaction time to travel to safety zone. Look for an increase in activity after 1600 when solar radiation penetrates canopy heating up ground fuels. Look for the rates of spread up to **20 ch/h** and flame lengths up to **10 ft**. Slope reversal and rollout will continue to be present and aid in strong uphill runs with torching and possible spots up to 1/3 of a mile.

Branch IV

If spot fires become established on the east side of the Ell River they may push toward crews working on indirect line on Division P,W and Y. Rates of spread can be up to **20ch/h** and have **10ft** flame lengths. The predicted wind may align with the south fork of the Ell River and create erratic fire behavior in the bends and eddies of the drainage. No crown fire is predicted single/small group tree torching may occur. Slope reversal and rollout will aid perimeter growth and may generate moderate up hill runs.

AIR OPERATIONS:

Less of an inversion should help with visibility on the incident. Watch out for water drops on trees that may create snags and widow maker around ground crews.

SAFETY

- Trees that have been in the burn area may come down with no notice be aware of your surroundings
- Indirect line construction crews may not be able to see the main fire so post lookouts as needed
- Rollout and slope reversal have challenged suppression efforts each operational period, identify the potential for changing fire spread

Lodge Complex Safety Communication

FIRELINE & GENERAL FIELD SAFETY – CULTIVATION THREAT

SIGNS YOU ARE IN OR NEAR A MARIJUANA GROW SITE

- **Presence of Marijuana Plants** (or a distinctive skunk-like, pungent odor)
- **Irrigation Pipe/Dripline/Timers**
- **Potting Soil Bags/Grow Bags**
- **Isolated Water Tanks**
- **Garbage** (usually discarded grow materials, toilet paper, and food containers)
- **Rustic Camps/Trailers**
- **Dammed Creeks** (sometimes filled with fertilizers or other contaminants)
- **Fertilizers/Chemicals/Animal Poisons & Traps**
- **Chemical fencing is one tactic to keep animals and people away. Any signs of chemicals spread on the ground over an area should be avoided. The chemical may be pink in color and used as a powder or gel/slurry consistency.**

MAINTAIN AWARENESS IN REMOTE AREAS:

- **Always stay alert – Situational Awareness is key**
- **When possible work in pairs**
- **Apply the LCES principle**
- **Position your vehicle so you can leave quickly**
- **Exercise caution when you encounter well worn narrow trails with trimmed brush**
- **Growers may be camouflaged and difficult to see**
- **Ensure you maintain accountability within your work space**
- **Report any suspicious activities in your work location**
- **Always carry a portable radio/cell phone with fresh batteries/full charge and recognize communication holes**

IF YOU ENCOUNTER A GROW SITE:

- **Watch for people, weapons, and vicious dogs**
- **Watch for booby traps**
- **Do not explore the area**
- **Immediately retreat (if on foot, best to retrace your path back)**
- **Note landmarks and take a GPS waypoint only if it can be safely done**
- **Do not engage growers**
- **Report your find to your supervisor and law enforcement**
- **Notify the Safety Officer of any findings**

Incident Location

County

Mendocino

Latitude, Longitude

Deviation is assumed to be narrow band unless otherwise noted in the remarks. Mode refers to either "A" (analog), "D" (digital) or "M" (mixed mode).

TRAINING SPECIALIST MESSAGE

A Training Specialist is now on the incident.

All assigned trainees
working on position task books will need to
register with the Incident Training Specialist in
order to receive proper credit for your
assignment.

**The Training Specialist is available immediately
following the morning Operations Briefing to
20:00**

CAL FIRE

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/owner.

Fireline personnel- (During mop up operations)

- Use Pencil Hose and Garden Nozzles with Shut-Offs.
- Use Back pumps.
- Use Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely.
- Locate/Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline.

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind etc.).
- Consider use of tertiary or treated water.

Aviation Operations-

- Consider use of Gels, Foams and Retardants. Set up portable plants.
- Consider using Blivits and Pencil Hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops.

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, ICS-214 Water Usage Reports) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Note locations on incident map.
- Use alternative or reclaimed water sources when available. Note locations on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as a Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance.
- Review this check list and brief daily.
