# INCIDENT Weather Forecast

**FORECAST NO:**3

**NAME OF FIRE:**Applegate

**PREDICTION FOR:**24-hrOperational Period

**UNIT:**Nevada-Yuba=Placer

**SHIFT DATE:**Sunday October 12<sup>th</sup> 2014

**SIGNED:**Basil Newmerzhycky

**TIME AND DATE**

**Incident Meteorologist – Basil Newmerzhycky**

**FORECAST ISSUED:**1700 Saturday Oct 11th

**WEATHER DISCUSSION:**

**\*\*\* Very Warm & Dry with North Winds Today \*\*\***

Nrn CA remains under a strong Pacific High Pressure Ridge again today. Prevailing winds will be NW to NE and these down-sloping winds...although not strong...typically bring warmer/drier weather along with poor overnight humidity recoveries. Today's temperatures should be 8-10 deg above normal, with afternoon temperatures approaching 90 deg. Sharp weather change early next week to cooler, more moist conditions with strengthening SW winds ahead of a slowly approaching Pacific Storm system.However, by Monday afternoon, as SW winds first begin to strengthen, there will still be some fairly warm and dry air left over across the area.Cooler and more humid Tuesday-Wednesday with showers developing late Tuesday night.

**WEATHER FORECAST:**

**WEATHER:**Sunny, Warmer & Drier.

**TEMPERATURES:**Highs 87-92 deg...falling to 61-66 deg Sunday night.

**HUMIDITY:**12-17% by afternoon...at night poor RH recoveries of 30-40%.

**20 FT WINDS:**

**RIDGETOP** –Light drainage becoming NW 4-8 mph...At night NE winds 7-12 mph gusts 17 mph.

**SLOPE/VALLEY** -Light drainage becoming NNW 6-11 mph gust 17 mph. At night NE 5-10 mph gusts 15 mph towards morning.

**HAINES INDEX:**N/A

**STABILITY/INVERSION:**Minimal to No Inversion. Afternoon Mixing Heights rising to near 1300 ft AGL.

**OUTLOOK FOR MONDAY:**

Sunny. Max temp 82-87 deg, Min RH 18-23%. Wind SW increasing to 7-12 mph gusts 17 mph.

**OUTLOOK FOR TUESDAY:**

Early Sun...Increasing Afternoon Clouds. Cooler. Max temp 73-78 deg, Min RH 28-33%. Wind SW 10-15 mph gusts 20 mph.

**EXTENDED FORECAST:**

Cloudy Wednesday with a chance of showers.Breezy and much cooler. WSW winds 10-15 mph gusts 22 mph. Max temps only 65-70 deg.Min RH above 40%.

# FIRE BEHAVIOR FORECAST

<b>FORECAST NUMBER:</b> 03	<b>TYPE OF FIRE:</b> Wildfire
<b>FIRE NAME:</b> Applegate	<b>OPERATIONAL PERIOD:</b> 10/12/2014;0700-0700
<b>DATE ISSUED:</b> 10/11/14	<b>TIME ISSUED:</b> 1700
<b>UNIT:</b> NEU	<b>SIGNED:</b> Don Boursier, FBAN/LTAN

## INPUTS

### WEATHER SUMMARY:

**Friday: High Temps:** Sunny/Clear; Max. Temp. 87-92 degrees; **Min RH:** 12-17%;

**Winds:** Light early becoming NNW 6-11 mph with gusts to 17 mph.

**Friday night:** Clear; Min. Temps: 61-66 degrees; Max RH: 30-40%; Winds NE 7-12 mph with gusts to 17 mph.

## OUTPUTS

### FIRE BEHAVIOR

**GENERAL:** \*\*\*Increased winds creates high potential for new starts outside the line\*\*\*

Fire is fuels and topography driven burning in older growth Timber Litter/Understory and Chaparral.

FDFM predicted 3% for 1 hr and 4% for 10 hr fuels. Live Fuel Moisture is roughly 71%.

Aligned head Fire ROS up to 55 chains/hr and flanking 1-2 chains/hr.

Aligned head fire flame lengths >15' and flanking/backing <4'

Spotting from torching trees 1/4 to 1/2 mile.

Probability of Ignition: 90% in unshaded fuels

Energy Release Component (ERC): 75

Burning Index (BI): 134

### SPECIFIC:

Divisions A/G: Northwest winds will flank containment lines. Afternoon/evening Northeast winds will then push any potential fire back upon itself. Anticipate smoldering with possibility of interior torching activity contributing to spots across the line.

Divisions F: Smoldering activity will continue in interior areas. With increase in winds above 5 mph surface fire can transition to group torching with flame lengths >30'. This will contribute to spot fire opportunities towards Jefferson Canyon during the morning hours. Afternoon winds will increase spot fire opportunities towards Codfish Creek.

Division Y: Smoldering activity in interior areas. Afternoon/evening Northeast winds may increase interior activity and provide opportunities to push embers/rollout over containment lines.

### AIR OPERATIONS:

Minimal to no inversion.

Mixing height 1300'agl.; transport winds WNW 6 mph

Sunrise: 0712 hrs Sunset: 1833hrs

## SAFETY

**Increase in winds will provide a greater opportunity for fire weakened trees/snags to fall.  
Keep alert to this weather change!!**

# **SAFETY MESSAGE**

INCIDENT NAME  
**APPLEGATE**

Date  
Prepared:  
10/11/14

Time  
Prepared:  
1800

OPERATIONAL PERIOD:  
10/12-10/13/2014 0700-0700

- **Prevent dehydration by drinking water frequently through each working hour. Plan ahead, don't allow water to run out. Take water with you!**
- **Repopulation – Increased civilian presence in the fire area.**
- **Mineshafts are in the area and can be hidden by vegetation.**
- **Watch for Trains, increased speeds, look before crossing!**
- **Maintain attentiveness; don't be deceived by the fire's passive appearance. Rollout and torching are still possible on the fire. Review 10's, 18's, and the Downhill checklist with your crews.**
- **Personnel working in and around damaged structures wear appropriate PPE & respiratory protection. e.g. N95 mask.**
- **Drive with your headlights on at all times, follow all speed limits and traffic laws.**
- **Be cautious of fire weakened or partially burnt hazard trees, falling trees have been reported. Identify and Isolate.**
- **Remember when following LCES, post enough lookouts to have a good vantage of the entire hazard area.**
- **Watch your footing on the fire line, maintain adequate crew spacing. There's very steep terrain on portions of the fire.**
- **Brief your crews on all the components of the IAP.**

**Ensure firefighters have good anchor points, escape routes, and safety zones.  
Remember LCES.**

**Lookout(s), Communication(s), Escape routes and Safety zone(s)**

Prepared By (Communications Unit) Tom Webb COML						Incident Location: Applegate County Placer State CA Latitude 39 00 14N Longitude 120 59 36 W					

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

# **FINANCE MESSAGE**

**DATE: 10/12/2014**

## **TIME UNIT**

- **ePAY Cafe has been set-up in the north end of the main building.**
- Please come by the Time Unit and start your FC-33
- Vendor drop off your agreements to the Time Unit
- Shift Tickets need to be completed by line supervisor and turned in at the end of each shift.

## **COMP / CLAIMS**

- Report all injuries
- Property Damage must be reported to and documented to the Comp / Claims Unit
- Please report any Vehicle Damage

## **PROCUREMENT UNIT**

- Offsite feeding must have prior approval of the Finance and Logistic Section Chiefs
- Water usage report

## **INCIDENT BILLING INFORMATION**

NEU – Nevada/Yuba/Placer Unit  
13760 Lincoln Way.  
Auburn, Ca. 95603-3236

Index Code: 2300  
Billing Code: 013859

**Fire Suppression Repair Plan**  
By: Steven Garcia, Suppression Repair  
Created on October 11, 2014

**Outline**

- I. Objectives
- II. General Repair Guidelines
  - A. Helispots/Drop Points/Staging Areas/Safety Zones
  - B. Roads
  - C. Firelines; Hand and Dozer
  - D. Concentrations of Slash
  - E. Watercourses
  - F. Archaeological or Historic Sites (if discovered)
  - G. Site Specific Issues

**I. Objectives**

The objective of this suppression repair plan is to mitigate possible adverse effects to resources resulting from fire suppression activities on the Applegate Incident, in a manner which does not compromise firefighter safety. Surface water/erosion control, protection of cultural resources, stabilization of facilities such as roads, fence repair and the maintenance of site productivity for all lands involved in the incident are the focus of this work. Initial field review and observations began on October 10, 2014. All fire suppression repair information observed by incident personnel shall be forwarded to the Suppression Repair Unit Leader.

Suppression Repair personnel will develop more site-specific repair recommendations, where needed. Specific information about roads, constructed firelines, helispots, safety zones and other suppression facilities will be provided by the Suppression Repair Unit Leader. The Suppression Repair Unit Leader will maintain a complete record (maps or GIS files) of suppression facilities and suppression repair treatments. Submittal of additional site specific information will be ongoing.

**II. General Repair Guidelines**

**A. Helispots/Drop Points/Staging Areas/Safety Zones**

- Avoid leaving heavy accumulations of slash and/or debris, scatter so it appears natural.
- Pull any berms back onto the site. Install cross drainage.
- Spread slash or brush over the area, if available.
- Large exposed areas of soil may be ripped as an alternative to waterbarring.

**B. Roads**

Each road should be evaluated to determine how it should be drained. Some sections only require the outside berm to be broken while others may need waterbars. If rolling dips existed prior to the incident, they shall be restored as appropriate.

- Install waterbreaks where a waterbreak previously existed.
- Install new waterbreaks where needed
- Install or maintain a rolling dips where a rolling dip previously existed.
- Some cooperators roads reopened during the incident now require closing or blocking access. These will be site specific issues to be addressed as needed.
- Re-establish existing berms where applicable.
- Breach berms to facilitate drainage, where applicable.
- Clean culverts plugged with soil and rock resulting from fire road use.
- Remove all slash and debris from culvert inlets/outlets.

- Clean and grade ditch lines and lead off ditches.
- Blading or grading of roads to restore/maintain stable road surfaces may be necessary. Grading shall be done after containment and control objectives have been met once suppression repair activities have commenced, or as deemed necessary by operations, branches or divisions.
- Vegetation displaced and deposited adjacent to roads shall be pulled and scattered to cover bare soil, or lopped in-place, or rearranged to reduce hazards as practical.

**C. Firelines; Hand and Dozer**

Repair Objectives – to reduce soil erosion and visual impacts.

- Install waterbars as described in the guidelines below. Waterbars are designed to intercept, slow and spread the precipitation run-off in order to reduce sediment transport and soil erosion. The idea is to move water off the fireline before it can build up enough energy to erode and transport sediment.
- Dozer lines where significant numbers of trees greater than 6" diameter have been pushed over, special measures will be taken to reduce the associated significant fuel loading. Treatment will include whole tree chipping which consists of removal of trees from dozer piles, cutting of stumps, skidding and chipping on site. Material that cannot feasibly be chipped in this manner will be masticated, lopped and scattered, or scattered and tracked with equipment, and will be determined by the suppression repair group supervisor.

**Waterbar Guidelines:**

- SPACING: These spacing distances should be used as a *guide*. Judgment should be used in locating waterbars to minimize erosion potential. It may not be possible or necessary to place waterbars in steep or rocky areas. Install waterbars at the following recommended **minimum** intervals:

Fireline Gradient (% slope)	Minimum Distance Between Water-Bars (feet)
0 to 10	200
11 to 25	100
25+	50

- LOCATION: Locate waterbars at natural slope breaks or to take advantage of natural features when possible. Direct water to unburned areas, and/or resistant surfaces with high vegetation cover when possible. Waterbars should extend beyond the width of the trail and discharge into undisturbed areas, rocky ground, or filter areas well protected with slash and vegetative cover.
- DEPTH AND WIDTH: Waterbars need to be cut into the ground surface, do not simply push up soil. On dozer constructed line waterbar depths should be at least 6 inches; total height from bottom of ditch to top of waterbar should average at least 12 inches and not exceed 24 inches. On hand constructed line waterbar depths should be at least 4 inches; total height from bottom of ditch to top of water-bar should average at least 8 inches and not exceed 18 inches. The width of the waterbar channel should be enough to handle expected water flows and to avoid plugging when a normal amount of sloughing occurs.
- ANGLE: Determine the average gradient in percent slope of the fireline being waterbarred. Add 5 to the average gradient. This approximates the angle in degrees for the water bar. Do not install water bars at an angle steeper than 45 degrees as this will increase water velocity rather than slow it down.
- Scatter large concentrations of slash or debris (concentrations larger than 5ft x 5ft x 5ft).

## Waterbar Guidelines

### D. Concentrations of Slash

On areas that can not be adequately waterbarred or as an option to waterbarring, slash may be spread to cover the soil to minimize erosion. Branches and logs should be placed at contour and as thick as possible. Leave some amount of bare soil along the burned edge of the fire to prevent fire from carrying across the line. This work should be completed only after the fire is out and with the permission of Branch, Operations, or the IC.

- Piles created by suppression operations within 150' of permanent structures, public roads or private roads will be lopped and scattered within 18" of the soil surface.

### E. Watercourses

Remove all deposited soil from watercourses, swales or draws back to original level. Place waterbars on both sides of a watercourse where possible. Restore channel banks at fire line crossings to the bank shape see above and below the crossing. Pull perched soil from drainage edges and feather it out onto fire trail

- Remove fire suppression created debris from stream channels. Do not remove large woody debris (LWD) which was in channels prior to the fire.
- Major watercourse damage, if present, shall be reported to the Suppression Repair Unit prior to the end of the shift.
- Where fire lines are constructed within 100' of running watercourses, straw or wood chip mulching will be placed to prevent sediment from entering the watercourse. All loose soil must be pulled away from the watercourse and stabilized.
- Block access to stream channels where not previously accessible from roads and trails (utilize slash and or rock).

#### **F. Archaeological or Historic Sites (if discovered)**

- All potential sites shall be flagged and avoided.
- Impacted sites will be reported to the Suppression Repair Unit Leader as soon as possible.
- If sites are encroached upon, work will stop immediately and the Division/Group Supervisor or Suppression Repair Leader will be notified.

#### **G. Site Specific Issues**

These guidelines are in addition to specific guidelines which pertain to specific project sites. Due to the ongoing nature of the incident submittal of specific guidelines is incomplete. Additions will be submitted as on-the-ground reviews are completed and future dozer lines, safety zones, are constructed.

The Suppression Repair Group will keep the IC advised of site specific issues or repair requests that are not consistent with this plan prior to initiating any of those repair activities.

# SUPPRESSION REPAIR

It is time to begin planning for the fire suppression repair efforts. A fire suppression repair plan will be developed for each of the fires within the NEU Applegate Incident. To accomplish our goals we need to identify problem areas, prescribe the needed work, and ensure that the work is completed.

In an effort to identify problem areas we have created the attached form for use by Divisions. As noted on the form, items to consider include: fences and gates damaged during the incident; road and watercourse crossings repairs; culverts and watercourses needing cleanout; fire breaks in need of waterbarring; trash and equipment pickup.

Use the attached form(s) to document locations where repair work may be necessary. Use maps to show locations. Return forms to the Suppression Repair Unit at the end of your shift.

## Fire Suppression Repair Checklist

**Fire Name** \_\_\_\_\_ **Form Preparer** \_\_\_\_\_

**Division** \_\_\_\_\_ **Date Prepared** \_\_\_\_\_

### Work Needed

### Location (Lat/Long)

**Fence/Gate Repair** \_\_\_\_\_

**Waterbars** \_\_\_\_\_

**Road Repair** \_\_\_\_\_

**Watercourse Cleanout** \_\_\_\_\_

**Culvert Cleanout and Repair** \_\_\_\_\_

**Seeding/Mulching Watercourse Crossing** \_\_\_\_\_

**Trash Pickup** \_\_\_\_\_

**Other** \_\_\_\_\_

NOTE: List type of material/equipment/personnel needed (e.g., fencing materials, tools, dozer, backhoe, stakeside, handcrew, etc.)

# **CAL FIRE**

## **INCIDENT MANAGEMENT TEAM**

### **WATER USAGE PLAN**

#### ***California Drought Emergency***

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

#### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

#### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

# CAL FIRE

## INCIDENT MANAGEMENT TEAM WATER USAGE LOG

DATE: \_\_\_\_\_

Division / Group: \_\_\_\_\_

AGENCY ID / VENDOR: \_\_\_\_\_

i.e.. Strike Team 1110C, Acme Water Tenders

REQUEST # \_\_\_\_\_

WATER SOURCE LOCATION	Hydrant	Open source i.e. pond	Tank	Gallons Used	Property Owner / Contact Number if known **

**\*\*Please note if you made contact with property owner and their contact. (Use reverse side if needed.)**  
**Information:** \_\_\_\_\_.

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

**TURN INTO FINANCE DAILY**

# FIRING OPERATION CHECKLIST

Location: \_\_\_\_\_

Date: \_\_\_\_\_ Time: \_\_\_\_\_

Firing Supervisor \_\_\_\_\_

## 1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
  - Firing personnel
  - Holding forces
  - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

## 2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

## 3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

## 4. Other Notifications

- Other: \_\_\_\_\_
- Other: \_\_\_\_\_

Attach Firing Operations Checklist to ICS-214

**NOTE: This form must not be used to certify lost, stolen or worn out property. A STD 152 Property Survey Report must be completed.**

## **Instructions for Use of CDF 101 Property Certification of Location or Damage**

**Document Number:** for use as a local number system or when attached to a FC-40 document.

**Location / Incident Name:** Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

**Incident Number:** Enter the appropriate incident number

**Unit:** Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

**Region:** Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

**Date:** Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

**Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.**

**Date of Occurrence:** Enter the date the property was broken, left on line or damaged.

**Quantity:** Enter the quantity for the line item.

**Unit of Measure:** Enter the unit of measure for the line item (example ea = each).

**CDF Stock Number:** Enter the PIN or stock number.

**Description:** Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

**Property Number:** Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

**Location of Items:** Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

**Remarks:** Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

**Signature of Person Certifying Occurrence as Described:**

**Signature:** The CDF Employee certifying the occurrence must sign.

**Printed Name:** Enter the printed name of the signature.

**Title:** Enter the title of the signature.

**Date:** Enter the date of the signature.

### **Unit Supervisors Approval:**

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

**Comments:** Supervisors may enter comments of approval or disapproval.

**Signature of Unit Administrator:** Signature of Unit Supervisor reviewing the certification described.

**Title:** Title of the signature.

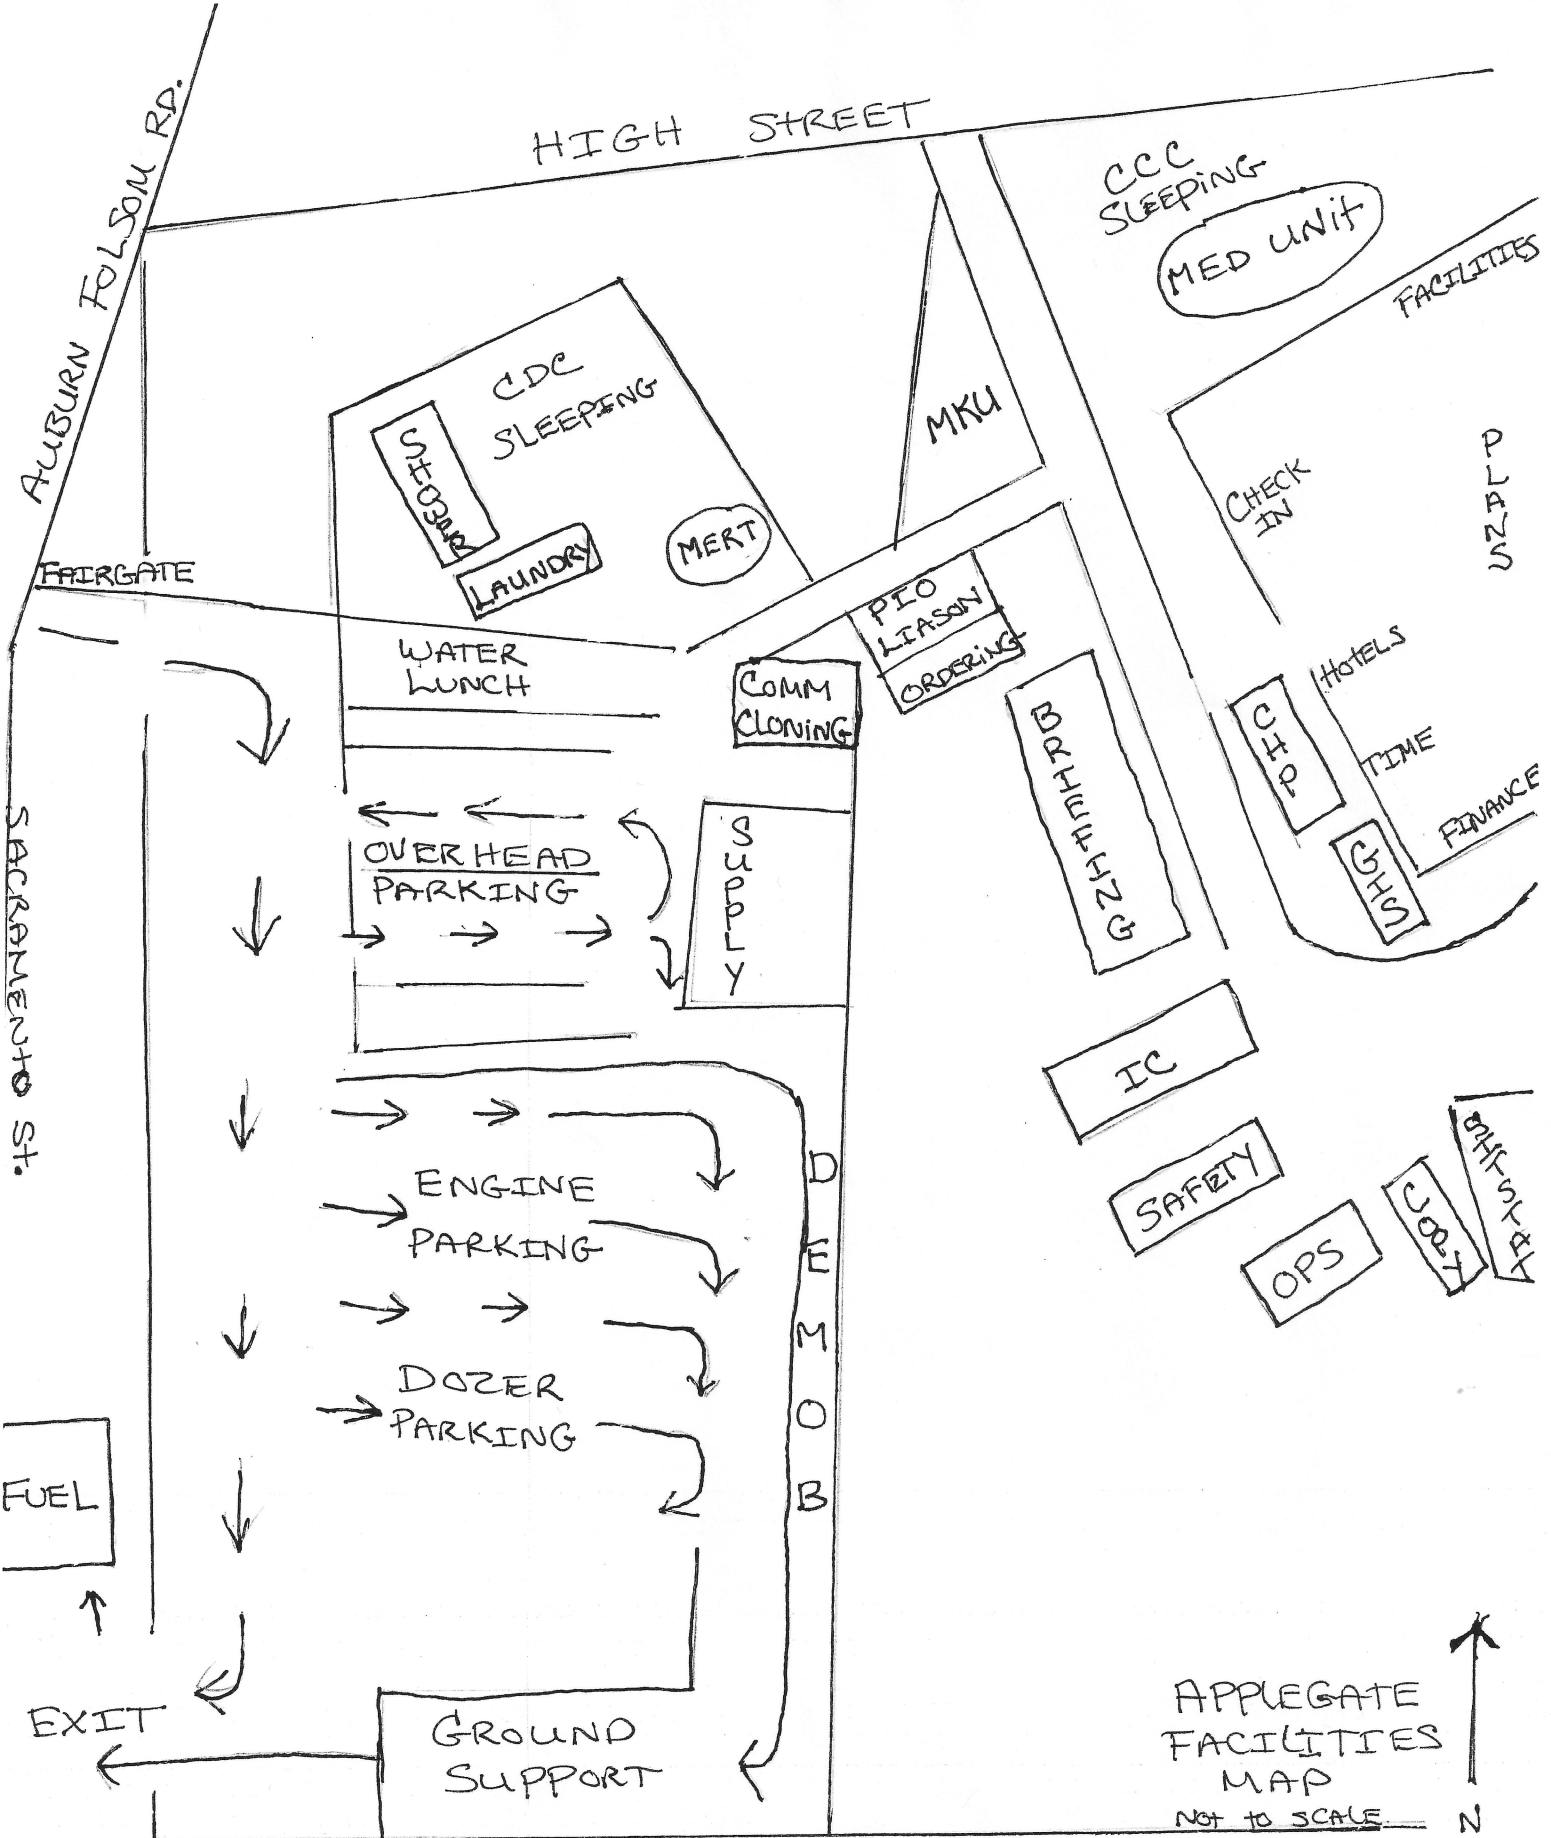

**Date:** Date of the signature.

**Notes:**

**This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.**

**This document is required as certification when submitting an MRT to your local Service Center for replacement of property.**

**An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.**
