INCIDENT Weather Forecast

FORECAST NO: 4

NAME OF FIRE: Bully Fire

PREDICTION FOR: Wednesday Day/Night SHIFT UNIT: SHU

SHIFT DATE: July 16/17 2014

SIGNED: *Mike Smith*
Incident Meteorologist: Mike Smith

TIME AND DATE
FORECAST ISSUED: 2100 July 15

WEATHER DISCUSSION: High pressure over the western U.S will continue to pull monsoon moisture over the region today. The fire area should see high to middle cloud cover most of the day with humidity values responding with about a 10 percent jump over Tuesday. Morning humidity recoveries will be improved as well. Cooler temperatures are also expected. Light general winds will keep surface winds local terrain generated. There is a slight chance of thunderstorms in the area this afternoon and evening. If a thunderstorm forms over or near the fire area...a brief period of strong and erratic winds will be possible. Humidity will continue to creep upwards on Thursday as varying amounts of cloudiness move across the area. Winds will remain light but the increased moisture and instability will continue the thunderstorm threat in the afternoon and evening hours so thunderstorm downdrafts will remain a possibility. Moist unstable air will remain over the area Friday for one last day of afternoon thunderstorm threat. Drier air moves in for the weekend as the upper ridge is displaced eastward.

WEATHER: Partly to mostly cloudy. A slight chance of thunderstorms or a thunderstorm outflow passage during the afternoon.

TEMPERATURES: High temperatures 92 to 98

HUMIDITY: 22% to 28%.

20 FT WINDS:

RIDGETOP - Variable mainly southeast to 5 mph in the morning becoming southwest in the afternoon. Some gusts to 10 mph late in the afternoon.

SLOPE/VALLEY - Downslope/downcanyon mainly northwest 4 to 10 mph in the morning with occasional gusts to 15 mph down east facing canyons. Winds decreasing after sunrise becoming upslope/upcanyon to 3 to 8 mph after about 0900. Some gusts to 12-16 up east facing canyons. Strong and gusty winds possible in vicinity of thunderstorms.

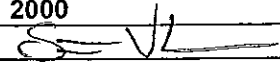

STABILITY/INVERSION: Slightly unstable conditions through the day. Only weak AM inversions.

OUTLOOK FOR Wednesday night: Partly to mostly cloudy. A slight chance of evening thunderstorms. Minimum overnight temperatures 62 ridgetops to 68 in thermal belts along the slopes. Maximum humidity recovery 45 to 50% on the slopes to around 55% on the ridgetops. Winds on the ridges becoming light and variable mainly southerly to 5 mph after about sunset. Slope winds decreasing after sunset and becoming mainly downslope to downcanyon after about 2100 3 to 7 mph with occasional gusts to 12 mph down east facing canyons. Gusty winds in vicinity of thunderstorms.

OUTLOOK FOR Thursday: Partly to Mostly cloudy. A chance of thunderstorms or thunderstorm outflow winds in the fire area in the afternoon and evening. High temperatures 91-96. Minimum humidity values 25 to 30%. Ridgetop winds light and variable morning hours becoming light southeast to 5 mph after about 0900 then southwest to west 5 to 10 mph after about 1200. Slope winds downslope to downcanyon in the morning hours 3 to 7 mph with gusts to 12 mph down east facing canyons becoming upslope to upcanyon 3 to 8 mph after about 0900. Some gusts 12 to 16 mph up east facing canyons after about noon. Gusty and erratic winds near thunderstorms.

EXTRA INFORMATION: July 15 Sunrise 5:54 Sunset 8:40

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 4	TYPE OF FIRE: FULL SUPPRESSION
FIRE NAME: BULLY	OPERATIONAL PERIOD: 7/16/14 24-HOUR
DATE ISSUED: 7/15/14	TIME ISSUED: 2000
UNIT: CAL-FIRE SHASTA TRINITY UNIT (SHU)	SIGNED: 
	Typed/printed: STEPHEN VOLMER FBAN (T)

INPUTS

WEATHER SUMMARY:

A significant increase in the cloud cover will contribute to the decrease in the temps and increase in the RH. Thunder cells in the area will produce erratic winds in the fire area should they surface. See IMET forecast for more detail.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fire will continue to actively burn throughout the operational period. Expect more active fire to occur in the brush and logging areas that are in alignment with winds and slope. ROS in the brush fields will be up to 30ch an hour, with flame lengths of 13 foot. Probability of Ignition 75% in all areas after 1400. Interior islands still have potential of burning out.

SPECIFIC:

DIV A/C/W/Y: No movement or fire activity anticipated.

DIV F/K: Low intensity fire will consume surface fuels. Expect very little transition through the ladder fuels into the crowns. Fire will back into the drainage at .5 ch hr with 2 foot flame lengths. Fire activity will decrease dramatically when the RH climbs above 35%. Steep slopes will contribute to rolling material and spot fires in the drainage bottoms.

DIV Q: Heavy overgrowth will contribute to slow rates of spread. Rolling material will cause spot fires to become established in Duncan and Baker Creeks. ROS of 5 ch hr will be seen where slopes and drainages are in alignment with the winds should rollout become established in the. Spotting will be limited to ¼ mi. Post lookouts that can clearly see into these drainages.

DIV R/S: Expect fire intensity in the brush fields and logging areas to produce the majority of fire activity. ROS in these areas will be up to 30 ch hr. Steep slopes will result in an increased amount of roll out into the East Fork of Duncan Creek. Post lookouts in areas that can see into this drainage.

AIR OPERATIONS:

Smoke will be present in the drainages, clearing mid-morning. Increase unstable air from thunder cells will produce erratic winds throughout the fire.

SAFETY:

Watch for fire weakened timber, and "heat holes" in all divisions. Expect erratic winds with the passage of any thunder cell systems. Post a fire weather watch and note any build-ups and wind changes. Continue to take and submit your weather obs to TIM.CHAVEZ@FIRE.CA.GOV or text to 951-536-4822.

INCIDENT MANAGEMENT TEAM 6

**SAFETY MESSAGE**

1. INCIDENT NAME:

Bully Incident

2. DATE PREPARED:

July 15th, 2014

3. TIME PREPARED:

19:00

4. PREPARED BY:

Gabriel Santos SOF1

5. LEADER NAME:

Gabriel Santos SOF1

6. OPERATIONAL PERIOD:

07-16-14 0700 TO 07-17-14 0700

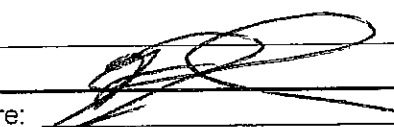

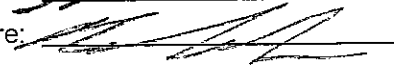

SAFETY MESSAGE

"If it is predictable" "It is preventable"!

- Monitor the current and expected weather conditions and obtain forecasts.
- Maintain your situational awareness and establish LCES!
- Maintain hydrated with a balanced nutritional meal intake.
 - * Use 3 to 1 Water vs. Gatorade intake ratio
- Watch your footing! This fire is burning in steep and rocky terrain.
- Exercise caution while driving on the incident this includes vehicles, dozers, transports, engines and crew buses.
- Monitor personnel for signs of fatigue and take breaks as needed.
- Exercise caution while driving to and from the incident base. Abide by the speed limit and drive defensively with your headlights on and always wear your seatbelts!
- Be aware of possible mine shafts and marijuana plantations in the fire area. Identify the hazard areas with the three stripes life hazard flagging and report the hazard (s).
- * Be aware of poison oak.

Incident Management Team 6

SAFETY ALERT

From IMT 6 SOF1 Gabriel Santos

HEAT RELATED ILLNESS

"If it is Predictable it is Preventable"

Due to record-breaking high temperatures and drought conditions expected throughout California all incident personnel shall review and implement the following Heat Related Illness Prevention guidelines and document the training on you unit log (ICS 214 form).

Heat-induced illness is a result of the body's inability to cope with heat. This can be a minor symptom or a serious life-threatening injury. While recognition and treatment are important, prevention is the key. **HEAT RELATED ILLNESS IS PREVENTABLE.**

Becoming acclimated to working in a hot environment takes time.

- It normally takes 4-8 days to acclimate
- Fatigue and alcohol consumption delays this process
- Persons not acclimated are at increased risk and can suffer heat-related illness at lower levels of heat and work activity

Personnel need to pre-hydrate before work and continuously hydrate during work.

- Water is the primary form of fluid replacement
- Before work, it is recommended to drink 20 ounces of sports drink
- During work drink 8 ounces of water every 15 minutes (1 Quart/hour)
- Cool / cold water is preferred
- Consider a carbohydrate / electrolyte sports drink as a portion (25%-50%) of the fluid intake

Avoid Hyponatremia

- Hyponatremia develops when the concentration of sodium is diluted in the bloodstream
- Exercise-induced hyponatremia occurs when this phenomenon is caused by excess water intake during exercise or work
- Proper nutrition and consumption of carbohydrate/electrolyte sports drinks as part of hydration will assist in avoiding hyponatremia
- Symptoms can include disorientation, headache, muscle cramps and nausea

Avoid Certain Drinks

- To help prevent dehydration, **avoid** carbonated beverages and performance beverages such as Red Bull, Rock Star, Monster Drinks, etc.
- Caffeine hastens fluid loss in the urine.

CAL FIRE INCIDENT MANAGEMENT TEAM

6

Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

Situational Awareness

Observe the 30/30 rule: If you see lightning and hear the thunderclaps follow in less than 30 seconds, take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

Hazard Control

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

Gabriel Santos IMT 6 SOF1

Joe Buchmeier IMT 6 SOF (T)

CAL FIRE INCIDENT MANAGEMENT TEAM 6

FIRING OPERATION CHECKLIST

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications in place

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

Fire Suppression Repair

It is time to begin planning for the fire suppression repair efforts. A fire suppression repair plan will be developed for the SHU Bully Incident. To accomplish our goals we need to identify problem areas, prescribe the needed work, and ensure that the work is completed.

In an effort to identify problem areas we have created the attached form for use by the Branches and Divisions. As noted on the form, items to consider include: fences and gates damaged during the incident; road and watercourse crossings repairs; culverts and watercourses needing cleanout; fire breaks in need of waterbarring; trash and equipment pickup.

Use the attached form(s) to document locations where repair work may be necessary. Use maps to show locations. Return forms to the Suppression Repair Unit at the end of your shift.

Fire Suppression Repair Checklist CA-SHU-006248

Fire Name BULLY Form Preparer _____

Division _____ Date Prepared _____

<u>Work Needed</u>	<u>Location</u> <u>(T./R./S.)</u>
--------------------	--------------------------------------

Fence/Gate Repair _____

Waterbars _____

Road Repair _____

Watercourse Cleanout _____

Culvert Cleanout and Repair _____

Seeding/Mulching Watercourse Crossing _____

Trash Pickup _____

Other _____

NOTE: List type of material/equipment/personnel needed (e.g., fencing materials, tools, dozer, backhoe, stakeside, handcrew, etc.)
