# INCIDENT Weather Forecast

FORECAST NO: 5

NAME OF FIRE: Bully Fire

PREDICTION FOR: Thursday Day/Night SHIFT

UNIT: SHU

SHIFT DATE: July 17/18 2014

SIGNED: *Mike Smith*  
Incident Meteorologist: Mike Smith

TIME AND DATE  
FORECAST ISSUED: 2100 July 16

**WEATHER DISCUSSION:** Monsoon moisture will continue to be pulled northward over the area today around a high pressure system over the western U.S. RH values, both overnight recovery and daytime minimums, will increase slightly again today. The monsoon moisture combined with slightly unstable conditions will bring a threat of thunderstorms to the fire area. If a thunderstorm forms over or near the fire a brief period of strong and erratic winds will be possible. Thunderstorm development is most likely however, west of the fire area over the higher elevations. The general wind pattern above the fire is light so surface winds will be terrain generated in the absence of thunderstorm downdrafts. Little change in the weather pattern is expected on Friday although the overall airmass does start to dry slightly. A more southwest flow aloft over the coming weekend will bring some more drying and an end to the thunderstorm threat with temperatures remaining moderate for this time year.

**WEATHER:** Partly cloudy. A slight chance of a shower or thunderstorm or a thunderstorm outflow passage during the afternoon and evening hours.

**TEMPERATURES:** High temperatures 89 to 95

**HUMIDITY:** 25% lower south slopes and ridgetops to 32% north slopes and shaded areas.

**20 FT WINDS:**

**RIDGETOP** - Light and variable to 5 mph in the early morning hours becoming light southeast to southwest to 5 mph after about 1100.

**SLOPE/VALLEY** - Downslope/downcanyon 2 to 5 mph occasional gusts to 8 mph through about 0900. Becoming upslope to upcanyon 3 to 8 mph with gusts to 12 mph. Some gusts to 16 mph up southeast facing canyon. Gusty winds possible from nearby thunderstorms.

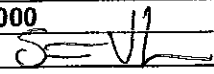

**STABILITY/INVERSION:** Slightly unstable conditions through the day. Only weak morning inversions.

**OUTLOOK FOR Thursday night:** Partly cloudy. A slight chance of an evening shower or thunderstorm in the area. Minimum overnight temperatures 65 ridgetops to around 70 in thermal belts along the slopes. Maximum humidity recovery 50 to 60%. Winds on the ridges light south to 5 mph becoming light and variable after about 2000. Slope winds decreasing after sunset and becoming mainly downslope to downcanyon after about 2200 3 to 7 mph. Occasional gusts to 14 mph down east facing canyons in the evening hours. Gusty winds possible in vicinity of thunderstorms.

**OUTLOOK FOR Friday:** Partly cloudy. A slight chance of showers or thunderstorms or thunderstorm outflow winds in the fire area in the afternoon and evening. High temperatures 89-95. Minimum humidity values 22 to 28%. Ridgetop winds light and variable morning hours becoming light southeast to southwest to 5 mph after about 0900. Occasional gust to 10 mph in the afternoon. Slope winds downslope to downcanyon in the morning hours 3 to 7 mph with gusts to 12 mph down east facing canyons becoming upslope to upcanyon 3 to 8 mph after about 0900. Some gusts 12 to 16 mph up east facing canyons after about noon. Gusty and erratic winds near thunderstorms.

**EXTRA INFORMATION:** July 17 Sunrise 5:55 Sunset 8:39

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: FULL SUPPRESSION
FIRE NAME: BULLY	OPERATIONAL PERIOD: 7/17/14 24-HOUR
DATE ISSUED: 7/16/14	TIME ISSUED: 2000
UNIT: CAL-FIRE SHASTA TRINITY UNIT SHU	SIGNED: 
	Typed/printed: Stephen Volmer FBAN (T)

### INPUTS

WEATHER SUMMARY: Thunder cells in the area will produce erratic winds in the fire area should they surface. RH minimums between 25 and 30%. Cloud cover will contribute to the decrease in the temps and increase in the RH. Unstable air mass will continue to influence the area. See IMET forecast for more detail.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** ROS in the brush fields and logged areas with regrowth will be up to 30 ch/hr with flame lengths of 13 foot. Probability of Ignition in all areas will be 80% after 1400. Spotting distance up to 1/3 mile. Interior islands still have potential of burning out.

**\*\*\*Fire activity will greatly increase with the alignment of slope and wind in ALL areas\*\*\***

#### SPECIFIC:

**DIV A/C/W/Y:** No movement or fire activity anticipated.

**DIV F:** Brush islands still have a high potential of re-burning. Expect to find smoldering material inside of the fields.

**DIV K:** Low intensity fire will continue to consume surface fuels as the fire backs into the drainage at .5 ch/hr with 2 foot flame lengths. Fire activity will decrease dramatically when the RH climbs above 35%. Steep slopes will contribute to rolling material and spot fires in the drainage bottoms.

**DIV Q:** Fire will back into the Duncan and Baker Creeks under the canopy. Spots established in the drainage bottoms will have potential for slope reversal towards the E2 and E3 road systems. ROS will be 25 ch/hr with 10 foot flame lengths should this occur.

**DIV R:** Expect increased fire intensity in the brush fields and logging areas. ROS in these areas will be up to 30 ch/hr. Expect backing fires to creep into the drainage bottom. Steep slopes will result in an increased amount of roll out into the East Fork of Duncan Creek. Spotting potential up to 1/4 mile. Spot fires will become easily established in all areas to the East of Billy Choop Rd.

**DIV S:** Watch for spot fires towards the East to become established. Smoldering material will continue to pose a threat.

#### AIR OPERATIONS:

Smoke conditions will continue to hamper operations in Branch II and III. Expect erratic winds over the fire if thunder cells become established in the area.

#### SAFETY:

Fire weakened timber and heart holes remain in all divisions. Watch for rolling material along the mid-slope roads. Continued possibility of thunder cells developing in the area, expect erratic winds should they develop. Call in weather observations to the Comm Unit when radio traffic allows.

# INCIDENT MANAGEMENT TEAM 6

<b>SAFETY MESSAGE</b>	1. INCIDENT NAME: Bully Incident	2. DATE PREPARED: July 16th, 2014	3. TIME PREPARED: 19:00
	4. PREPARED BY: Gabriel Santos SOF1	5. LEADER NAME: Gabriel Santos SOF1	6. OPERATIONAL PERIOD: 07-17-14 0700 TO 07-18-14 0700

# SAFETY MESSAGE

***"If it is predictable" "It is preventable"!***

- Monitor the current and expected weather conditions and obtain forecasts.
- Maintain your situational awareness and establish LCES!
- Maintain hydrated with a balanced nutritional meal intake.
- \* Use 3 to 1 Water vs. Gatorade intake ratio
- Watch your footing! This fire is burning in steep and rocky terrain.
- Exercise caution while driving on the incident this includes vehicles, dozers, transports, engines and crew buses.
- Monitor personnel for signs of fatigue and take breaks as needed.
- Exercise caution while driving to and from the incident base. Abide by the speed limit and drive defensively with your headlights on and always wear your seatbelts!
- Be aware of possible mine shafts and marijuana plantations in the fire area. Identify the hazard areas with the three stripes life hazard flagging and report the hazard (s).
- \* Be aware of poison oak.

16. GETTING FREQUENT SPOT FIRES ACROSS LINE

# Incident Management Team 6

## **SAFETY ALERT**

From IMT 6 SOF1 Gabriel Santos

### **HEAT RELATED ILLNESS**

**"If it is Predictable it is Preventable"**

Due to record-breaking high temperatures and drought conditions expected throughout California all incident personnel shall review and implement the following Heat Related Illness Prevention guidelines and document the training on you unit log (ICS 214 form).

Heat-induced illness is a result of the body's inability to cope with heat. This can be a minor symptom or a serious life-threatening injury. While recognition and treatment are important, prevention is the key. **HEAT RELATED ILLNESS IS PREVENTABLE.**

Becoming acclimated to working in a hot environment takes time.

- It normally takes 4-8 days to acclimate
- Fatigue and alcohol consumption delays this process
- Persons not acclimated are at increased risk and can suffer heat-related illness at lower levels of heat and work activity

Personnel need to pre-hydrate before work and continuously hydrate during work.

- Water is the primary form of fluid replacement
- Before work, it is recommended to drink 20 ounces of sports drink
- During work drink 8 ounces of water every 15 minutes (1 Quart/hour)
- Cool / cold water is preferred
- Consider a carbohydrate / electrolyte sports drink as a portion (25%-50%) of the fluid intake

#### Avoid Hyponatremia

- Hyponatremia develops when the concentration of sodium is diluted in the bloodstream
- Exercise-induced hyponatremia occurs when this phenomenon is caused by excess water intake during exercise or work
- Proper nutrition and consumption of carbohydrate/electrolyte sports drinks as part of hydration will assist in avoiding hyponatremia
- Symptoms can include disorientation, headache, muscle cramps and nausea

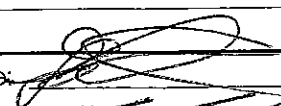

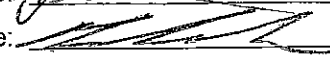

#### Avoid Certain Drinks

- To help prevent dehydration, **avoid** carbonated beverages and performance beverages such as Red Bull, Rock Star, Monster Drinks, etc.
- Caffeine hastens fluid loss in the urine.

# CAL FIRE INCIDENT MANAGEMENT TEAM

# 6

## Thunderstorm Safety

Approaching thunderstorms may be noted by a sudden reverse in wind direction, a noticeable rise in wind speed, and a sharp drop in temperature. Rain, hail, and lightning occur only in the mature stage of a thunderstorm.

## Situational Awareness

Observe the 30/30 rule: If you see lightning and hear the thunderclaps follow in less than 30 seconds, take the storm precautions identified below. Do not resume work in exposed areas until 30 minutes after storm activity has passed.

## Hazard Control

- Take shelter in a vehicle or building if possible.
- If outdoors, find a low spot away from tall trees, wire fences, utility lines and other elevated conductive objects. Make sure the place you pick is not subject to flooding.
- If in the woods, move to an area with shorter trees.
- If only isolated trees are nearby, keep your distance twice the tree height.
- If in open country, crouch low, with feet together, minimizing contact with the ground. You can use a pack to sit on, but never lay on the ground.
- If you feel your skin tingle or your hair stand on end, immediately crouch low to the ground. Make yourself the smallest possible target and minimize your contact with the ground.
- Don't group together.
- Don't stay on ridge tops, wide open areas, or near ledges or rock outcroppings.
- Don't operate landline telephones, machinery, or electric motors.
- Don't handle flammable materials in open containers or metal hand tools.

# Fire Suppression Repair

It is time to begin planning for the fire suppression repair efforts. A fire suppression repair plan will be developed for the SHU Bully Incident. To accomplish our goals we need to identify problem areas, prescribe the needed work, and ensure that the work is completed.

In an effort to identify problem areas we have created the attached form for use by the Branches and Divisions. As noted on the form, items to consider include: fences and gates damaged during the incident; road and watercourse crossings repairs; culverts and watercourses needing cleanout; fire breaks in need of waterbarring; trash and equipment pickup.

Use the attached form(s) to document locations where repair work may be necessary. Use maps to show locations. Return forms to the Suppression Repair Unit at the end of your shift.

## Fire Suppression Repair Checklist CA-SHU-006248

Fire Name BULLY Form Preparer \_\_\_\_\_

Division \_\_\_\_\_ Date Prepared \_\_\_\_\_

<u>Work Needed</u>	<u>Location</u> <u>(T./R./S.)</u>
--------------------	--------------------------------------

Fence/Gate Repair \_\_\_\_\_

Waterbars \_\_\_\_\_

Road Repair \_\_\_\_\_

Watercourse Cleanout \_\_\_\_\_

Culvert Cleanout and Repair \_\_\_\_\_

Seeding/Mulching Watercourse Crossing \_\_\_\_\_

Trash Pickup \_\_\_\_\_

Other \_\_\_\_\_

NOTE: List type of material/equipment/personnel needed (e.g., fencing materials, tools, dozer, backhoe, stakeside, handcrew, etc.)

# CAL FIRE

## INCIDENT MANAGEMENT TEAM

### WATER USAGE PLAN

#### *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

#### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

#### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

#### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

#### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.

#### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.

#### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.
