# Boles Incident

CA-SKU-007064

OPERATIONAL PERIOD

Wednesday September 17<sup>th</sup> 0700 to  
Thursday September 18<sup>th</sup> 0700

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> Boles	<b>2. DATE</b> 9/16/14	<b>3. TIME</b> 2000
----------------------------	----------------------------------	---------------------------	------------------------

**4. OPERATIONAL PERIOD (DATE/TIME)**  
9/17/14 – 9/18/14      0700-0700

**5. MANAGEMENT OBJECTIVES**

- Provide for and maintain public and firefighter safety by utilizing the incident safety analysis process.
- Encourage and conduct unified damage inspection with all affected agencies
- Be financially responsible for all management and fire suppression tactics
- Foster and enhance community and political relationships
- Evaluate economic impacts to the community

**6. GENERAL CONTROL OBJECTIVES**

- Keep the fire north of Hidden Meadows
- Keep the fire south of Carrick Creek
- Keep the fire east of Interstate 5
- Keep the fire west of Shasta National Forest Boundary
- Provide resources for Initial Attack Incidents

**7. WEATHER FORECAST FOR OPERATIONAL PERIOD**  
RED FLAG WARNING TODAY FOR STRONG SOUTH WINDS, LOW RELETIVE HUMIDITY AND DRY FUELS  
A low pressure area is slowly moving into the area which is causing a south flow aloft. This flow along with the topography will cause strong winds over the fire area today. Expect increasing clouds throughout the day and night.

**8. GENERAL SAFETY MESSAGE**  
Watch out for electrical hazards.  
Watch out for traffic hazards.  
Watch out for hazardous materials and IDLH conditions.

## BOLES INCIDENT WEATHER FORECAST

---

Incident: **Boles Fire**

Operational Period **Wed Sep 17<sup>th</sup> 0700-0700**

Issued 1700 PDT Tuesday Sep 16<sup>th</sup>, 2014

---

### ***RED FLAG WARNING TODAY FOR STRONG SOUTH WINDS/LOW RH/RECORD DRY FUELS***

#### **DISCUSSION:**

The fire area around Weed is located in a narrow topographical zone that is strongly affected by down-sloping winds off the north aspects of Mt Shasta. These down-sloping winds are magnified when the large scale winds are from the south, and that's exactly what happened the 1<sup>st</sup> day of the fire and those large scale south winds will continue to accelerate downslope off Mt Shasta into Thursday. Strongest winds will be today (Wednesday), possibly even stronger than Monday's winds when the fire first developed. However, these large scale south winds are due to a slowly approaching low pressure system which moves onshore by late Thursday. Humidity will slowly rise today, but fuels remain critically dry so the strong winds are a big concern, and a *Red Flag Warning* is in effect thru 9pm Wednesday. Afterwards more moist air from the approaching storm will thicken cloud-cover Wednesday night-Thursday, with a few sprinkles or a light shower possible (but not a wetting rain). By Friday the low moves east of the area, and Pacific High Pressure builds in with warming/drying once again, but winds should be lighter.

---

#### **FORECAST:**

**Today (Wednesday):** *Red Flag Warning*. Partly sunny early, then increasing clouds this afternoon. Max temp 80-85 deg. Min RH 15-20%. Winds, SSE 15-25 mph gusts 35 mph. Gusts of 45 mph on nearby upper slopes.

**Tonight:** Partly to Mostly Cloudy. Min temp 50-55 deg. Max RH 45-55%. Winds SSE 8-13 mph gusts 20 mph.

**Thursday:** Mostly Cloudy & cooler. Brief shower possible. Max temp 73-78 deg. Min RH 30-35%. Winds, becoming SSE 10-15 mph gusts 20 mph by afternoon. Gusts 25 mph on nearby upper slopes.

**Outlook for Friday:** Sunny and seasonably warm. Max temp 84-89 deg, Min RH 15-20%. Winds becoming SE 7-12 mph gusts 17 mph.

## FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 1	TYPE OF FIRE: SURFACE
FIRE NAME: BOLES	OPERATIONAL PERIOD:
DATE ISSUED: 9/16/2014	TIME ISSUED: 1800
UNIT: CAL FIRE SISKIYOU UNIT	SIGNED: 
Typed/printed: TIM CHAVEZ, TEAM 4 FBAN	

### INPUTS

**WEATHER SUMMARY:** DRY AIR AND STRONG WINDS ASSOCIATED WITH AN APPROACHING COLD FRONT WILL BE THE MOST SIGNIFICANT FEATURE FOR WEDNESDAY. SEE IMET FORECAST.

### OUTPUTS

#### FIRE BEHAVIOR

**GENERAL:** CONTINUED EXTREMELY DRY FUELS IN ALL LIVE AND DEAD CLASSES. 100-HOUR DEAD FUELS ARE 6%, 1000-HOUR FUELS ARE AT 7% (3<sup>RD</sup> PERCENTILE-HISTORIC LOW FOR THIS DATE). LIVE FUEL MOISTURE IN MANZANITA AT MT. SHASTA ARE 80% (CRITICAL LEVEL).

#### SPECIFIC:

##### BRANCH I

THE ASPECT IS MOSTLY SOUTH ALONG THE BEAUGHTON CREEK IN THIS BRANCH AND THIS WILL FAVOR FUELS THAT ARE RECEPTIVE TO SPOTTING AND GIVEN THE STRONG WINDS, IF A SPOTFIRE BECOMES ESTABLISHED EXPECT FIRE BEHAVIOR SIMILAR TO MONDAY, WITH FLAME LENGTH 20+ FT. AND TORCHING AND CROWNING LIKELY.

##### BRANCH II

THE FORWARD PART OF THIS BRANCH HAS MOSTLY BURNED INTO IRRIGATED AGRICULTURAL AREAS IN THE CARRICK CREEK AREA. ALTHOUGH SPOTTING INTO DRY LIGHT FUELS IS POSSIBLE THE FIRE BEHAVIOR WILL ALLOW DIRECT ATTACK WITH CREWS OR ENGINES.

#### AIR OPERATIONS:

NO INVERSION LIKELY, ALTHOUGH STRONG WINDS WILL CAUSE SIGNIFICANT TURBULENCE AND DOWNDRAFTING IN THE AREA AROUND MT. SHASTA.

### SAFETY

- STRONG WINDS WILL LIKELY CAUSE FIRE WEAKENED TIMBER TO FALL ON RIDGETOPS AND WIND ORIENTED SLOPES. USE EXTREME CAUTION WHEN WORKING IN THESE AREAS.
- SPOT FIRES MAY IGNITE EASILY AND SPREAD RAPIDLY UPON ESTABLISHMENT. IF YOU ARE IN THE GREEN AREA ESPECIALLY IN BRANCH I HAVE AN ESCAPE PLAN AND DO NOT COMMIT TO ONE WAY OR DIFFICULT ROADS.

# SAFETY MESSAGE

## BOLES

CA-SKU 7064 SEPTEMBER 17, 2014 0700-0700

### ELECTRICAL HAZARDS UTILITY COMPANY IS "RE-ENERGIZING"

**Watch out for electrical hazards in burned out dwellings and down power lines**

- Power lines may be hidden.
- Utility workers may miss underground service that may be damaged.
- Electrical arc can travel long distances.

**Mitigation** – Look up to live- Look up, Look Down, Look all around.

- Visually check power poles to identify service lines leading to underground service
- Treat all electrical panels and power lines as if they are charged
- Make contact and communicate with utility workers working in your area.

### TRAFFIC

#### CIVILIAN POPULATION IN THE FIRE AREA

**Maintain a high level of situational awareness in all driving situations and while working near roadways**

- Watch for high speed vehicles and people becoming stressed.
- Watch for distracted civilians driving through the area.

**Mitigation** – Drive with a high level of Situational Awareness

- Practice defensive driving techniques.
- Wear DOT Highway vests when working in, around and near traffic.
- Use warning lights as appropriate when on roadways.

### HAZARDOUS MATERIAL AND IDLH

#### HAZARDOUS MATERIALS AND IDLH CONDITIONS MY BE PRESENT IN AREA

**Maintain high levels of situational awareness**

- Burned structures with household and industrial waste may be present.
- High levels of carbon monoxide, toxic gases and particulates will be present during structure overhaul.
- PPE can become contaminated during structural overhaul.

**Mitigation** – Maintain situational awareness for the unexpected.

- Wear N95 masks and SCBA as necessary.
- Isolate and deny entry for all hazardous material and IDLH situations.
- Identify, flag, and/or mark Hazards.

# AIR OPERATIONS SUMMARY

(Expanded Form for Large Operations)

OPERATIONAL PERIOD DATE: DAY SHIFT DATE: 9/17/14 START: 0800 END: 1900

<b>1. INCIDENT NAME:</b> Boles	<b>2. PREPARED BY:</b> Mark Gradek	<b>3. PREPARED DATE/TIME:</b> 9/16/14
<b>4. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.):</b>		
-All GPS data to be collected in ( Degrees, minutes, and decimal minutes)		
-Avoid aerial application of retardant or foam within 300' of waterways, bodies of water. If retardant is dropped within these areas, notify the helibase with Lat/Long, estimate of gallons, and a map.		
-All requests for recons to go through Air Ops or Air Support.		
-Track drop locations for cost apportionment.		
-Track dipsite locations.

**8. MEDICAL EMERGENCY PROCEDURES**

**EMERGENCY FREQUENCY: CALCORD**

**LINE EMERGENCY:**  
Crew Supervisor will contact Division Supervisor with patient complaint/condition and location.

- Division/Group Supervisor contacts:
  - Closest EMS resource
  - Communications Unit
- Communications Unit contacts:
  - Ground or Air ambulance as requested
  - Operations
  - Safety
  - Medical Unit (916) 622-3371
- Division Supervisor or designee will serve as point of contact and run medical emergency on assigned channel.
  - A pre-assigned tactical frequency (i.e. CALCORD) should be used for IWI and only for duration of need.
- Communications Unit will clear command channel for emergency traffic as needed and only for duration of need.

**CAMP EMERGENCY:**  
Contact Boles Communications on CALCORD with patient complaint/symptoms and location. Boles Communications will respond appropriate medical response.

- Boles Communication contacts:
  - Medical Unit
  - Safety
  - Logistics
  - Operations
  - Crew Supervisor
  - Comps/Claims

## **Archaeological and Historical Sites Fireline Guidance for the Boles Incident**

**Do not compromise safety for the protection and preservation of archaeological and historical sites. When feasible and prudent:**

1. Be on the lookout for prehistoric and historic sites. Prehistoric archaeological sites include temporary camps containing scatters of obsidian and/or chert flakes that often look like broken glass. More permanent village sites containing circular depressions (house pits), artifact scatters, and dark brown-black soils (midden). These typically occur on flats near sources of water, along ridgetops and saddles, and other such places suitable for camping. Historic sites include old wooden buildings, structures and corrals, rock foundations, wells, and debris scatters. These kinds of resources can be found in the same kinds of environmental settings as prehistoric camp sites.
2. No archaeological or historical sites have yet been flagged. If you observe artifacts, features, or sites, attempt to avoid dozing or driving through and/or parking on these sites, if feasible, especially with heavy equipment.
3. If you can't avoid sites, minimize disturbance as much as feasible, only clearing the surface to as minimal a depth and width as necessary.
4. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons.
5. When a site is discovered, flag it for visibility and report its location to the Division Supervisor. If feasible, note locations of discovered resources on a map. Better yet, take a GPS reading. Leave information with the Plans Section so that the sites can be relocated and protected during both the suppression and fire suppression repair phases of the Incident.
6. If you encounter a burial or other human remains, cease work in that area immediately and contact the CAL FIRE Archaeologist. State law requires that CAL FIRE then contact the County Coroner, who will then determine if the remains are part of a crime scene. If the Coroner determines that the remains are Native American, State law requires the Coroner to contact the Native American Heritage Commission in Sacramento.

# ***TRAINING SPECIALIST MESSAGE***

**A Training Specialist is now on the incident.**

***All assigned trainees***

**working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.**

**The Training Specialist is available immediately following the morning Operations Briefing till  
19:00**

# CAL FIRE INCIDENT MANAGEMENT TEAM WATER USAGE PLAN

## *California Drought Emergency*

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

### **Fireline personnel-** (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

### **Road Maintenance and Repair-**

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

### **Aviation Operations-**

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

### **Private Water Supplies-**

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

### **Public/ Municipal Water Supplies-**

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

### **Management and Supervision-**

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

**This page intentionally left blank.**
