INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: BUTTE INCIDENT CA-AEU-024918	2. Operational Period: Date From: 09/17/2015 Date To: 09/18/2015 Time From: 0700 hours Time To: 0700 hours		
3. Objective(s): <u>Management Objectives</u> <ul style="list-style-type: none"> Provide for public and emergency personnel safety at all times Provide for timely and accurate release of incident information to the public, media, first responders and cooperators Protect and defend structures and improvements in the fire area Protect natural and cultural resources in the fire area Provide a process to manage emergency resources efficiently Ensure costs are minimized appropriately for values at risk Ensure coordination and communication with stakeholders and cooperating agencies <u>Control Objectives</u> <ul style="list-style-type: none"> Keep the fire: <ol style="list-style-type: none"> 1. North of the Stanislaus River 2. South of Ridge, Sutter Creek Volcano, Pioneer Creek and Mill Creek Roads and the North Fork of the Mokelumne River 3. East of Highway 49 4. West of the Stanislaus National Forest DPA boundry 			
4. General Weather Conditions: SEE ATTACHED			
General Situational Awareness and Safety: <ul style="list-style-type: none"> MAINTAIN L.C.E.S. AT ALL TIMES. Safety zones and escape routes are mandatory Ensure all personnel maintain situational awareness Rolling material and steep terrain. Remember to maintain good footing Keep your hydration up by drinking water and electrolyte beverages. Avoid energy drinks Maintain good communications with your supervisors, adjacent forces and crew members Guard against complacency. 			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plan(s) Located at:			
6. Incident Action Plan (the items checked below are included in this Incident Action Plan):

Butte Fire Weather Forecast

FORECAST NO: 6
PREDICTION FOR: DAY SHIFT – NIGHT SHIFT
SHIFT DATE: Thursday, September 17, 2015
FORECAST ISSUED: September 16, 2015

NAME OF INCIDENT: Butte Fire
UNIT: Cal Fire Amador/El Dorado Unit
SIGNED: Terry Lebo
Terry Lebo, Incident Meteorologist

WEATHER DISCUSSION:

High pressure off the west coast will expand east today, beginning a gradual warming and drying trend. Warming and drying will continue into the weekend with temperatures in some areas running 10 to 15 degrees above normal.

FORECAST FOR THURSDAY:

Max Temperature: Valley Bottom 75-80 Ridgetop 72-77
Minimum Humidity: Valley Bottom 24-29% Ridgetop 20-25%
20 ft Winds:
Slopes/Valleys: Northwest 4 to 9 mph.
Ridges: North to northwest 7 to 14 mph.
Transport Winds: North 10 mph.
LAL 1
Chance of Rain 0%
Chance of Wetting Rain 0%

FORECAST FOR TONIGHT:

Max Temperature: Valley Bottom 52-57 Ridgetop 55-60
Minimum Humidity: Valley Bottom 32-37% Ridgetop 30-35%
20 ft Winds:
Slopes/Valleys: Northwest 4 to 7 mph becoming east 2 to 4 mph overnight.
Ridges: Northwest 5 to 9 mph becoming north 4 to 7 mph overnight.
Transport Winds: Northwest 15 mph.
LAL 1
Chance of Rain 0%
Chance of Wetting Rain 0%

FORECAST FOR FRIDAY:

Max Temperature: Valley Bottom 81-86 Ridgetop 77-82
Minimum Humidity: Valley Bottom 18-23% Ridgetop 15-20%
20 ft Winds:
Slopes/Valleys: Northwest 3 to 6 mph.
Ridges: North to northwest 5 to 8 mph.
Transport Winds: North 10 mph.
LAL 1
Chance of Rain 0%
Chance of Wetting Rain 0%

Planning Forecast Matrix

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 7	TYPE OF FIRE: Wildfire
FIRE NAME: Butte	OPERATIONAL PERIOD: 9/17-18/15 0700-0700
DATE ISSUED: 9/16/15	TIME ISSUED: 1900
UNIT: AEU – Amador El Dorado Unit	SIGNED: 
	Typed/printed: Don Watt FBAN

INPUTS

WEATHER SUMMARY:

The weather will start to increase in temperature and dropping in humidity levels. The temperatures will be 72-80 degrees in the daytime and 52-60 degrees overnight. The minimum humidity will be 20-29% during the day and 30-37% overnight. **Winds will change from the past several days and will be from north to northwest.** The slopes and valleys will be 4-9 mph and the ridges will be 7-14 mph during the day. Overnight the slope and valley winds will be northwest 4-7 mph becoming east 2-4 mph and ridge winds will be northwest 5-9 mph becoming north 4-7 mph.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

The fuels have almost completely returned to the conditions they were before the cool moist weather we had the past several days. This will increase the fire activity especially in the islands of the fire. The smoldering fuels will actively burn as the afternoon temperatures increase and humidity drops. The lack of cloud cover will also increase the curing of the fuels. The wind will influence opposite slopes as it changes directions, having an influence on areas which have been sheltered the past several days. The areas of brush which had the understory burned may have torching as the smoldering material becomes more active. There is a Fuels and Fire Behavior Advisory out for this area and areas to the south about the critical fuel conditions.

Fuels Advisory

CSR 7 Day Outlook

CNR 7 Day Outlook

SPECIFIC:

The wind will now influence different portions of the slope on the northeast portion of the fire, mainly on the ridges. There are several pockets of unburned fuels throughout the fire and they have the potential to become active. The east and south portions of the fire have unburned brush directly on the line, if this becomes active the spotting potential is high. The leaves of the brush carry well in the wind. If the fire develops a column it will increase the spotting distance from fire brands. The southeast portion of the fire will have the wind in alignment with several slopes, with established fire the fire spread will be rapid with medium to long distance spotting.

AIR OPERATIONS

There may be a weak inversion in the morning clearing early, having limited to no effect on air operations.

SAFETY

The fuel moisture recovery in the light fuels has already diminished, increasing the probability of ignition. Continue to monitor the changes in weather and take the time to calculate the probability of ignition for your area.

Fuels and Fire Behavior Advisory

Sierra Nevada Mountains and Foothills

September 9, 2015

Subject: Four years of drought has significantly increased the number of dead and dying conifers and oaks across portions of the Sierra Nevada and surrounding foothills. This has resulted in explosive fire behavior conditions and wildfire's resistance to control. Fire fighter safety is a major concern, as well as continued risk to the public in the affected forested areas.

Discussion: It is estimated that well over 5 million trees have died across the Sierra and Sequoia National Forests as well as in the nearby foothills. This is due to a combination of a multi-year drought and significant bark beetle infestation. This number is up from last year when approximately 300,000 trees had died. The deceased trees have immediately increased the amount of standing dead fuel load, which will contribute to extreme fire behavior in the affected areas. **Fire Managers/Firefighters should plan accordingly and be vigilant for flash fires through dead crowns.** Risk to ground suppression personnel and equipment from a greater likelihood of falling and/or weakened trees is also a major concern.

Departure from normal conditions: Normally, conifer forests across the southern and central Sierra experience something less than five percent mortality. In the last six months a substantial number of conifer stands have displayed a ten-fold increase in the number of dead and dying trees. It has been suggested that the current situation mimics the early stages of what occurred in the Southern California national forests between 2001 and 2005. The latest Energy Release Component (ERC) values are all near the 90th percentile for this time of year and are expected to increase further through the second week of September. **Recent fire behavior on the Rough Incident underscores the seriousness of the current situation.** Flash fires, long range spotting, and extreme rates of spread will continue to be common characteristics on new and existing incidents in the coming weeks.

Concerns to Firefighters and the Public:

- Fire Managers/Firefighters need to plan for and anticipate the potential for explosive fire behavior conditions in the affected areas **even during non-critical weather events.**
- Fire personnel and the public should be aware of the increased fall hazard and should seek to mitigate appropriately.

Mitigation Measures: At the onset of a wildfire event, history shows a quick and effective initial suppression response is the first best tool in suppressing unwanted wildfire.

- Fire Managers/ Firefighters should consider suppression options and safe access prior to an event.
- Agency Administrators need to ensure the concerns brought forward in this advisory are included in all suppression and or prescribed fire operations.
- Review the most current [Southern California 7-day Significant Fire Potential](#) along with the [Monthly and Seasonal Outlooks](#).

Area of Concern: Predictive Service Areas **SC02, SC03, and SC04** (Southern Sierra, Central Sierra, and the Sierra Foothills).

Issued: September 9, 2015 (Note this advisory will be in effect for 14 days and will be reviewed/updated at that time.)

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name: BUTTE INCIDENT CA-AEU-024918	2. Operational Period: Date From: 09/17/2015 Time From: 0700	Date To: 09/18/2015 Time To: 0700
3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan: <u>MAJOR HAZARDS/RISKS</u> <i>REPOPULATION:</i> Coordinate with utility personnel. Engage citizens regarding safety. Be aware of repopulation status in your area. <i>TRAFFIC and DRIVING HAZARDS:</i> SLOW DOWN in the field and in base camp. Increase your following distance. Watch for civilian and utility vehicles. <i>HAZARD TREES/SNAGS:</i> Beware of fire and drought stressed trees. Identify and flag hazards then share the information. Look up, look down, look all around. <i>LIFE HAZARDS:</i> Lookout for power lines, stump holes, mining hazards, steep terrain and other hazards. Identify and communicate hazards. <i>HYGIENE and CAMP ILLNESS :</i> Wash your hands frequently and always before eating. Cover your cough. Do not wear your field PPE (nomex) in the base camp kitchen or dining areas. <i>HYDRATION/NUTRITION/FATIGUE:</i> Keep hydrated and monitor your personnel. Use proper work/rest cycles. Recognize illness and take action early. Know the ICS 206 and how to use it. <i>COMMUNICATIONS:</i> Review your communications plan (ICS 205). Reduce radio traffic, use phones when appropriate. Use human repeaters as needed. <i>PPE:</i> Wear all PPE for current and expected conditions at all times. <i>DEMOBILIZATION:</i> Travel safely to your home base or next assignment. Get proper rest before driving. Plan your travel and communications.

FIRING OPERATION CHECKLIST

Location: _____

Date: _____ Time: _____

Firing Supervisor _____

1. Personnel Briefing

- Objectives
- Conditions (fire environment)
- Resource assignments identified
 - Firing personnel
 - Holding forces
 - Lookouts
- Ignition plan/sequence
- Communication Plan
- Contingency Plan
- Safety issues

2. Go / No-Go

- All personnel briefed
- Weather forecast reviewed
- Resources in place
- Lookouts posted as needed
- Anchor and termination firing points identified
- Communications systems in place
- Fire behavior forecast reviewed
- Escape routes and safety zones established and made known
- Adjoining forces/Air Attack notified

3. Approval Prior To Firing

- Division Supervisor
- Branch Director
- Operations

4. Other Notifications

- Other: _____
- Other: _____

Attach Firing Operations Checklist to ICS-214

A		
Type 1 Engine Access?		
Address or Location		
W Water Source? define below	100 Feet Defensible Space?	 Civilians Present ?
Special Notes or Hazards:		
Date	Resource ID	
Time		

**The final decision to defend a structure is always
up to the assigned resource**

Based on your experience, complete the Placard by answering the following questions:

Access: Does it appear to have access/egress and turnarounds for Type I fire engines?

Yes = Circle

No = Circle with diagonal slash

Address or Location:

Complete for address, or location being assessed

Water Source: Does the structure appear to have a water source for use by fire engines?

Yes = Circle (describe in the "Special Notes or Hazards" area)

No = Circle with diagonal slash

Defensible Space: Does it appear that a minimum of 100' of combustible vegetation has been cleared away from the structure?

Yes = Circle

No = Circle with diagonal slash

Civilians Present: Do civilians appear to be present at the site?

Yes = Circle (describe in the "Special Notes or Hazards" area)

No = Circle with diagonal slash

Special Notes or Hazards: Note the presence of hazards or useful pieces of information.

Date and Time: Complete

Resource ID: Complete using agency identifier and unit ID.

If conditions change, and as time and resources permit, you may complete a new placard and place it over the top of the previous placard.

Placard should be printed on yellow card stock preferably 60 lb. minimum.

Instructions for use

			
Type I Engine Access?			
3246 OAK St. Address or Location			
			
Special Notes or Hazards: <i>Wood pile under deck on west side</i> <i>Pool in back no vehicle access</i>			
Date	7/10/09	Resource ID	SAC-E17
Time	1645		

The final decision to defend a structure is always up to the assigned resource

Incident Location

County Amador State-CA Latitude Longitude N Longitude W

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

FINANCE MESSAGE

DATE: 9-17-15

Finance Section is located at both Incident Bases.

OUT OF STATE RESOURCES

- Please turn in a copy of your agreement

LOCAL GOVERNMENT

- Please contact OES prior to your 7 day rotation

TIME UNIT

- All Hired Equipment must demob out of the Calaveras Incident Base
- Federal Time Keeper is available.
- Please come by the Time Unit and start your FC-33
- Vendor drop off your agreements to the Time Unit
- Shift Tickets need to be completed by line supervisor and turned in at the end of each shift.

COMP / CLAIMS

- Report all injuries
- Property Damage must be reported to and documented
- Please report any Vehicle Damage

PROCUREMENT UNIT

- No offsite feeding is approved
- Water usage report needs to be turned in Dailey

CAL FIRE

INCIDENT MANAGEMENT TEAM

WATER USAGE PLAN

California Drought Emergency

The following shall be considered and implemented by all fire resources as a means to provide maximum efficiencies when utilizing water resources, while minimizing the impacts to private and public water supplies. Accountability shall be maintained for all water supplies that are utilized and care should be applied to ensure proper replacement and/or reimbursement to the supplier/ owner.

Fireline personnel- (During mop up operations)

- Use of Pencil Hose and Garden Nozzles with Shut-Offs.
- Use of Back pumps.
- Dry Mop-up and consolidation of heavy fuels to areas where they can burn out safely
- Locate/ Relocate Firelines to lighter fuels or natural barriers when safe.
- Set up and use portable tanks in anticipation of longer transport times for Water Tenders.
- Use of foams, gels and other water enhancers.
- Evaluate need to mop up in excess of 200 feet from fireline

Road Maintenance and Repair-

- Monitor and water roads only when and where needed.
- Water when most effective (evening and nights).
- Use chemical treatments when available (Magchloride, Omni bind ect).
- Consider use of tertiary or treated water (sp)

Aviation Operations-

- Use of Gels, Foams and Retardants. Set up portable plants.
- Consider Blivits and Pencil hose for interior mop up operations as opposed to numerous bucket drops.
- Establish and use pre-use agreements for existing and known water sources.
- Use large watershed dip sites when able. Minimize use of small, static ponds and lakes.
- Maintain accountability of water used and locations of dip sites.
- Evaluate need for interior bucket drops

Private Water Supplies-

- Notify property owner as early as possible.
- Minimize usage and develop alternative water supplies when and where appropriate.
- Track usage (meter, 214 form) and develop a plan to replace water.
- Make arrangements for reimbursement and damage claims if needed.

Public/ Municipal Water Supplies-

- Notify Agency as soon as possible and request a representative to the incident.
- Identify fill areas and request metering devices. Place on incident map.
- Use alternative or reclaimed water sources when available. Place on incident map.
- Make arrangements for reimbursement and damage claims if needed.

Management and Supervision-

- Use leaders intent and establish Water Conservation as an Management Objective.
- Consider complexity of water use on incidents. Establish a Water Supply Group Supervisor to coordinate additional resources to support the incident needs.
- Complete the Water Usage Report daily and turn in to Finance
- Review this check list and brief daily.

Information: _____

The intent of this document is intended to track, record and validated the amount of water used on a incident. It's not intended to review the performance of equipment using the water on an incident.

TURN INTO FINANCE DAILY

TRAINING SPECIALIST MESSAGE

A Training Specialist is available for trainees on the incident. We are now located in a trailer across from check in.

All federal, state and local government agency trainees working on position task books will need to register with the Incident Training Specialist in order to receive proper credit for your assignment.

We are now experiencing an increase in DEMOB'S with the incident. Please come by early to close out your training package and check out with us PRIOR to starting the DEMOB process.

To check out: bring your evaluation record, performance evaluation, qualification card and position task book.

Training Specialist

Steve Hurdle

CAL FIRE INCIDENT MANAGEMENT TEAM 1

PHILL VENERIS – INCIDENT COMMANDER

DEMOBILIZATION PLAN - SUMMARY

Butte Incident
CA-AEU-024918

GENERAL INFORMATION

The Demobilization Plan is developed to facilitate the orderly removal and checkout of resources on the incident. By definition, surplus personnel are available for release if they have rested for a minimum of **8 hours**.

GENERAL GUIDELINES

- o **NO RESOURCES WILL LEAVE THE INCIDENT UNTIL AUTHORIZED TO DO SO BY THE DEMOB UNIT.**
- o DEMOB list will be posted around camp and also will be added to the CAL FIRE IMT 1 online folder. (Scan QR code to read DEMOB list or <http://calfire.box.com/calfireimt1>)
- o Efforts will be made to ensure that all released personnel arrive at their destination prior to 2200 hours.
- o All government and hired vehicles leaving the incident will have a safety inspection. If a vehicle is within 1,000 miles of a "B" service, it is the responsibility of the resource to contact Ground Support and have an oil change prior to their scheduled DEMOB time.
- o All trainees are to keep their time up to date and report to the Training Specialist with their task books and evaluations prior to completion of the demobilization process.
- o All strike team leaders are responsible to call North Ops at 1-800-237-3703 immediately upon being released from the incident.

RESPONSIBILITIES

Unit Leaders will declare resources excess to their **Section Chief**. **Section Chiefs** will declare excess resources to the Planning Section Chief through the **Resource Unit Leader**. This should be done 36 hours in advance of anticipated release. Use the **Declaration of Excess Resources sheet** or **General Message Form (ICS-213)** to list all excess resources. Include the resource name, request number, name of person, date and time of declared excess, and time in which the resource will be eligible to leave. Send to the **RESOURCE UNIT** where the resource will be determined to be surplus to the incident. Surplus resources will then be able to report to the **DEMOB UNIT**, receive a Demobilization Checkout Form (ICS 221), get the appropriate ICS 221 signatures, and then return the completed ICS 221 to the DEMOB UNIT prior to final release or reassignment.

RELEASE PRIORITIES

1. Organized fire departments
2. OES engines
3. Hired personnel and equipment
4. Other agencies (USFS, BLM, etc.)
5. Out of region Cal Fire forces
6. Within Region Cal Fire Forces
7. Unit CAL FIRE Forces

TRAVEL INFORMATION

All resources will meet agency specific requirements on hours of travel per day. For CAL FIRE hand crews, a full 24 hour reset period shall be adhered to before departing from the incident. After a crew's last operational period they shall begin the demobilization release procedure during their 24 hour off shift. In addition, they must use the following complete 24 hour period as reset time before they depart from the incident.

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.

Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to you local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.
